

## **Data Conversion Services**

The conversion services offered by RMIS allow our customers to convert historical loss information from self-insured or TPA systems to American International Companies<sup>®</sup> host systems. This enables viewing and analysis of complete loss history through IntelliRisk NetSource<sup>®</sup> or RMIS Reporting. Solution Development Teams work in conjunction with Business System and Programmer Analysts to ensure thorough analysis and accurate transfer of data.

RMIS Conversion Services provide the following capabilities:

- Data Conversions from active TPA systems for consolidated reporting through RMIS.
- File Transfers from retired TPA or self-insured systems to AIG Claim Services, Inc. (AIGCS) for claim handling.
- Captive Run-Off Transfers from retired TPA systems to monitor exposure and claim handling.
- Loss Portfolio Buyout Transfers from self-insured entities for claim handling and premium booking.
