countries  
through  
volunteerism.

**~18K**  
students were able to participate in  
**Junior Achievement**  
programming in

**22**  
cities around the globe where  
AIG has the largest employee  
and business footprint.

# AIG's Matching Grants Program

matches employees' donations in support of eligible nonprofit organizations that employees are passionate about.

After **David Lynders'** son was diagnosed with type-1 diabetes, he needed to carry a medical kit containing life-saving supplies everywhere he went. The kit was old fashioned and bulky. David, **AIG's Head of Financial Institutions, Financial Lines**, made it his mission to help children with type-1 diabetes feel less conspicuous when carrying their medical supplies. Donations from David and his colleagues were matched by AIG to help ensure that every youngster with type-1 diabetes, regardless of their families' means, in his medical unit had a cool new backpack to tote their medical supplies around with instead.

**David Ward, Senior Financial Advisor, AIG Retirement Services**, and his wife donated to a kidney transplant and organ donation awareness fund on behalf of their good friend, who was in need of a kidney transplant. Thanks in part to their donation and AIG's 2-to-1 match, the transplant recipient's financial goal was not only met, but surpassed, and she received a kidney last year.
