Power Generation Risk Consulting

Taking the lead with industry professionals like you

Power Generation Risk Consultants specializing in risks associated with power generating facilities (PowerGen) help clients and brokers secure coverage in an increasingly complex insurance market by delivering trust-worthy market reports.

It's not enough to say the team assessing your risk has industry experience. They have worked extensively as power plant managers and operators, and have been deeply involved in large installations, asset management and maintaining critical equipment. Each member of the team has a unique story and implicit knowledge that makes them one of you, asking the right questions, understanding the risks, and making the assessments that you, our brokers, and other carriers can depend on.

PowerGen Risk Consulting – a network that runs from Kansas to Queensland

Our collaborative knowledge-sharing approach across AIG’s PowerGen Risk Consulting network enables the team to keep pace with important industry changes about traditional and emerging technologies, the latest equipment manufacturer updates and best practices.

More than 15 experienced professionals dedicated to our PowerGen Risk Consulting team.

Established relationships with leading power generation equipment manufacturers technical liaisons and industry thought-leaders.

Insights into loss trends and new technologies through working groups and knowledge shared by people with up to 40 years of experience “in the industry”

Simple conversations and open dialog about the complex risks at respective power generating facilities help to provide clarity and encourage informed decision-making for our insurance partners.

Robust industry expertise across traditional and renewable energy technologies

AIG has the talent with knowledge breadth and depth to understand the PowerGen risk challenges faced by industry, with capabilities ranging from traditional risks to highly specialized offerings. Each client is paired with a PowerGen Risk Consultant based on knowledge, specific experience, technical expertise, and location. AIG PowerGen Risk Consultants use a pragmatic approach to risk mitigation recommendations, helping our clients to engage in loss control regardless of resources available.

AIG provides insights and solutions for clients across various types of energy generating installations:
Keeping Pace with the Energy Transition

We start with technical acuity and adapt evolving with the changing landscape of energy generation. But it’s not just the technology that we keep pace with. Our risk consultants keep up to date on legislative developments so that they can understand the practical world our clients are working within and see around the corners on what’s next when it comes to technology. Many of our PowerGen Risk Consultants have significant experience managing the same types of assets that our clients are managing. This helps strengthen our understanding of the challenges our clients face every day.

- We continue to evolve our Risk Consulting team.
- We help clients by sharing unique solutions, identifying pre-cursor events and best practices.
- We help clients think about risks differently by reviewing significant low-probability high-impact events seen in the industry.
- We have an open-door policy of communication and knowledge sharing with leading equipment manufacturers as they innovate their newest designs.
- We serve as underwriting advisors and collaborators with AIG’s specialized energy underwriting team.
