

TIP SHEET:

After a Hurricane

Hurricane season is from June 1st to November 30th. If you operate near hurricane prone areas, have a plan of what to do before, during and after a hurricane strikes. The following tips and actions may be helpful to consider after a hurricane.

Tips for business

- Secure the site and establish a command center to direct the recovery operation.
- Survey damage and notify local fire and/or police departments as soon as it is safe to do so.
- Survey for safety hazards such as downed electrical wires, leaking gas or flammable liquids, poisonous gasses, damage to foundations or underground piping, etc.
- Clean roof drains, storm drains, retention ponds, etc. and remove any debris.
- Call designated key personnel and emergency contractors to coordinate and start repairs and salvage.
- Begin salvage as soon as possible to prevent further damage.
- Report damage to insurance companies as soon as possible.

Items to consider include:

- Cover broken windows and damaged roofs. Make temporary repairs to prevent further damage.
- Cover contents of buildings with tarps to minimize rain damage when roof repairs cannot be readily accomplished.
- Separate damaged goods from undamaged goods.
- Remove standing water in buildings, yard areas, etc.
- Clean and dry equipment with most critical objects receiving priority.
- Consider dehumidification of most areas, especially moisture sensitive equipment.
- Inspect all electrical equipment including exposed insulators, bus bars, and conductors before reenergizing electrical distribution systems and equipment.

Fire protection

- Repair and return to service as soon as possible all fire protection including sprinklers, water supplies, fire pumps, special extinguishing systems, alarms and supervisory service, etc.
- Ensure that all company policy programs, such as hot work (cutting and welding) and smoking are properly supervised and enforced during salvage and repair operations. If automatic protection is impaired, arrangements for special fire watches should be made and notice provided to your insurance company and the fire department.
- Maintain a fire watch during outages to fire protection equipment and/or water supply.

AIG is the marketing name for the worldwide property-casualty, life and retirement, and general insurance operations of American International Group, Inc. For additional information, please visit our website at www.aig.com. All products and services are written or provided by subsidiaries or affiliates of American International Group, Inc. Products or services may not be available in all countries, and coverage is subject to actual policy language. Non-insurance products and services may be provided by independent third parties. Certain property-casualty coverages may be provided by a surplus lines insurer. Surplus lines insurers do not generally participate in state guaranty funds, and insureds are therefore not protected by such funds.
