## Cautionary Statement Regarding Projections and Other Information About Future Events

This document and the remarks made within this presentation may include, and officers and representatives of American International Group, Inc. (AIG) may from time to time make, projections, goals, assumptions and statements that may constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. These projections, goals, assumptions and statements are not historical facts but instead represent only AIG’s belief regarding future events, many of which, by their nature, are inherently uncertain and outside AIG’s control. These projections, goals, assumptions and statements include statements preceded by, followed by or including words such as “believe,” “anticipate,” “expect,” “intend,” “plan,” “view,” “target,” or “estimate”. It is possible that AIG’s actual results and financial condition will differ, possibly materially, from the results and financial condition indicated in these projections, goals, assumptions and statements. Factors that could cause AIG’s actual results to differ, possibly materially, from those in the specific projections, goals, assumptions and statements include: actions by credit rating agencies; changes in market conditions; the occurrence of catastrophic events; significant legal proceedings; the timing of, and the applicable requirements of, any new regulatory framework to which AIG becomes subject; concentrations in AIG’s investment portfolios, including its municipal bond portfolio; judgments concerning casualty insurance underwriting and reserves; judgments concerning the recognition of deferred tax assets; judgments concerning deferred policy acquisition costs recoverability; judgments concerning the recoverability of aircraft values in International Lease Finance Corporation’s (ILFC) fleet; and such other factors as are discussed throughout Part I, Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations (MD&A) and in Part II, Item 1A. Risk Factors in AIG’s Quarterly Report on Form 10-Q for the quarter ended June 30, 2012, and in Part I, Item 1A. Risk Factors and discussed throughout Part II, Item 7. MD&A of AIG’s Annual Report on Form 10-K for the year ended December 31, 2011, as amended by Amendment No. 1 and Amendment No. 2 on Form 10-K/A filed on February 27, 2012 and March 30, 2012, respectively, and discussed throughout Exhibit 99.2, MD&A of AIG’s Current Report on Form 8-K filed on May 4, 2012.

AIG is not under any obligation (and expressly disclaims any obligation) to update or alter any projections, goals, assumptions or other statements, whether written or oral, that may be made from time to time, whether as a result of new information, future events or otherwise. This document and the remarks made orally may also contain certain non-GAAP financial measures. The reconciliation of such measures to the most comparable GAAP measures in accordance with Regulation G is included in the Second Quarter 2012 Financial Supplement available in the Investor Information section of AIG’s corporate website, [www.aig.com](http://www.aig.com).

# Chartis – Financial Highlights

## Global Combined Ratios

- Decrease in accident year loss ratio excluding catastrophe losses reflects shift in mix of business to higher value lines and geographies, improved pricing and enhanced risk selection tools.
- Increase in expenses was primarily driven by higher acquisition costs due to the shift to more profitable, stable lines (approximately 1.4 points) and continued strategic investments.
- Net adverse prior year reserve development of \$117 million driven by Environmental, partially offset by favorable development on prior year CAT losses. The second quarter benefited from a \$94 million net increase in reserve discount.
- CAT losses of \$328 million globally in 2Q12.
- Operating income included net investment income of \$1.2 billion in 2Q12, up slightly from the year ago quarter.

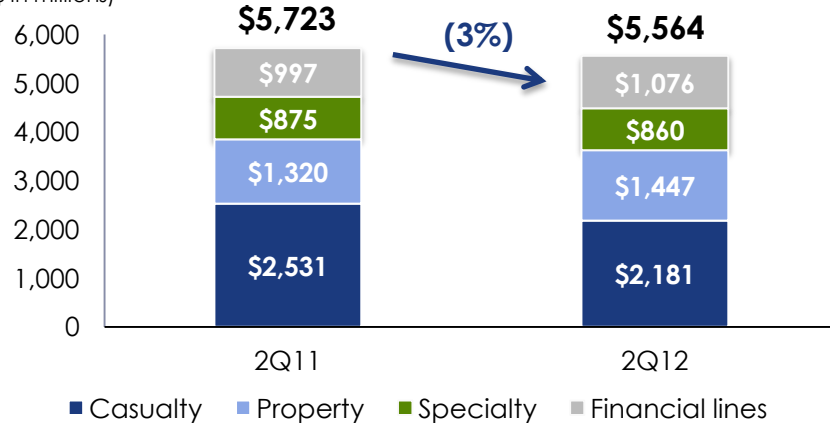

Operating income (\$ in millions)	
2Q11	2Q12
\$783	\$936

# Chartis – Net Premiums Written

Net premiums written reflect continued business mix shift and enhanced risk selection.

## Commercial NPW

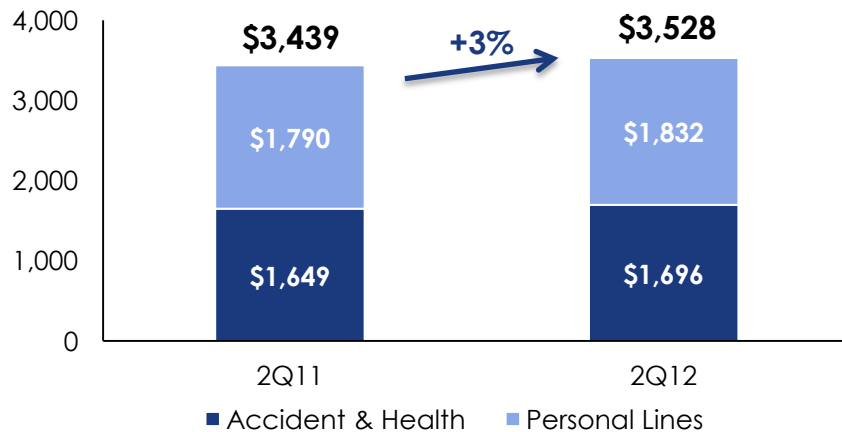

(\$ in millions)

- Global commercial rates increased 5.5% over the prior year period (8% for the U.S.) led by Property and Workers' Compensation both at 9%.
- Commercial Insurance continues to practice portfolio management, focusing resources on higher value, profitable lines of business and geographies.
- Consumer Insurance NPW was 40% of total Chartis NPW in 2012, reflecting growth across the business using multiple distribution channels.

## Consumer NPW

(\$ in millions)

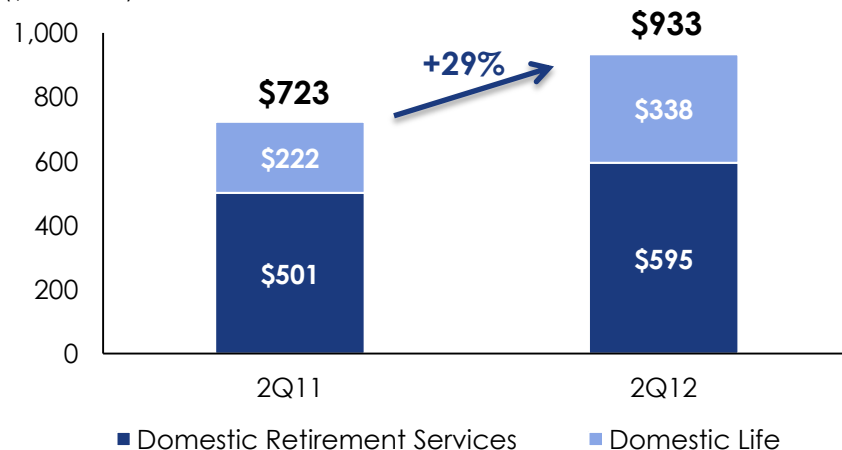

\* Chartis Other NPW of \$3 million in 2Q12 and \$5 million in 2Q11 is not presented above.

# SunAmerica – Financial Highlights

## Operating Income

(\$ in millions)

- Operating income in 2Q12 benefited from improved base net investment spreads mainly due to cash redeployment in 2011 and disciplined management of interest crediting rates.
- The year ago period included a loss from Maiden Lane II of \$176 million and an IBNR reserve of \$100 million for social security death master file claims.
- Lower income from hedge fund investments.
- Net flows positive for 6<sup>th</sup> consecutive quarter reflecting strong variable annuity and mutual fund deposits. Decreased fixed annuity deposits impacted by low interest rate environment.
- Retail life insurance sales increased in 2Q12 by 14% from 1Q12.

## Net flows

(\$ in millions)

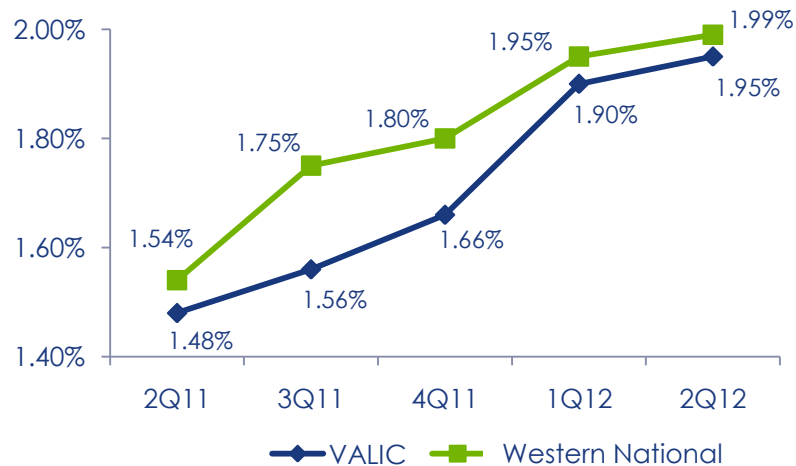

# SunAmerica – Base Yields and Net Investment Spreads

Base Yields and Net spreads increased in the second quarter.

Base Yields<sup>(1)</sup>

Base Net Investment Spreads<sup>(1)</sup>

- Base yields and base net investment spreads improved in 2Q12 mainly due to cash redeployment and disciplined new and renewal crediting rate actions.
- Sustained low interest rate environment expected to pressure base yields.
- Active management of crediting rates limits spread compression.
- At June 30, 2012, a total of 56% of account values are at contractual minimum guaranteed crediting rates vs. 38% at the end of the second quarter of 2011.

1) Excludes alternatives and other enhancements.

# SunAmerica – Proactively Addressing Sustained Low Interest Rates

## 2012 Management Actions

- Continued disciplined approach to new business pricing.
- Actively managing renewal rates.
- Re-priced life products to reflect current low rate environment.
- Re-filed certain products to continue lowering minimum rate guarantees

## Effect of Low Rates on Annual Earnings<sup>(1)</sup>

\$ in millions	2012	2013	2014	2015
Estimated impact on pre-tax operating income	\$0 – (\$10)	(\$50) – (\$60)	(\$110) – (\$125)	(\$180) – (\$200)

- Opportunistic investments in structured securities and redeployment of cash in 2011 have offset the impact of the low rate environment.
- Future reinvestment of portfolio cash flows at yields of 4% - 5%.
- No significant DAC unlocking or statutory capital impact anticipated.

1) Assumes 10-Year Treasury Rate remains at 1.40% through 2015. Assumes no accelerated realization of capital gains.

## Mortgage Guaranty – Improving Trends

- In 2Q 2012, Mortgage Guaranty generated operating income of \$43 million, driven by favorable prior year development and a decline in new delinquencies.

### Operating Income

(\$ in millions)

- Delinquency ratio declined to 10.3% in 2Q 2012, driven by letter campaign to lenders to file claims.

### Primary Delinquency (DQ) Ratio (%)

- \$8.5 billion new insurance written (NIW)<sup>(1)</sup> in 2Q 2012 with consistently high quality risks.

### NIW

<b>Total Legacy Derivatives <sup>(4)</sup></b>	<b>~\$1,800</b>	<b>\$176</b>	<b>\$157</b>	<b>91%</b>	<b>11%</b>

1) 2008 net notional amounts are approximate.

2) The Gross Vega is calculated as the sum of all the individual positions' absolute vegas as if each position is not hedged. Although AIGFP's books are almost completely hedged on a net Vega basis, the Gross Vega measure will help monitor how well the volatility risk is being eliminated. The interest rate option vega denotes the change in value due to a 0.1% increase in normal volatility. For other derivatives (i.e., Equity, Commodity and FX option), vega denotes the change in value due to a 1% increase in lognormal volatility.

3) Gross Automatic Termination Event measures the impact of a three-notch downgrade. 2008 Gross Automatic Termination Event includes \$1.3 billion attributable to GICs.

4) Excludes \$17.4 billion and \$10.2 billion of intercompany derivatives in 2012 and 2011, respectively.
