American International Group, Inc.
Conference Call Presentation
Second Quarter 2016
August 3, 2016
Cautionary Statement Regarding Forward Looking Information

This document and the remarks made within this presentation may include, and officers and representatives of American International Group, Inc. (AIG) may from time to time make, projections, goals, assumptions and statements that may constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. These projections, goals, assumptions and statements are not historical facts but instead represent only AIG’s belief regarding future events, many of which, by their nature, are inherently uncertain and outside AIG’s control. These projections, goals, assumptions and statements include statements preceded by, followed by or including words such as “will,” “believe,” “anticipate,” “expect,” “intend,” “plan,” “focused on achieving,” “view,” “target,” “goal,” or “estimate.” It is possible that AIG’s actual results and financial condition will differ, possibly materially, from the results and financial condition indicated in these projections, goals, assumptions and statements. Factors that could cause AIG’s actual results to differ, possibly materially, from those in the specific projections, goals, assumptions and statements include: changes in market conditions; negative impacts on customers, business partners and other stakeholders; the occurrence of catastrophic events, both natural and man-made; significant legal proceedings; the timing and applicable requirements of any new regulatory framework to which AIG is subject as a nonbank systemically important financial institution and as a global systemically important insurer; concentrations in AIG’s investment portfolios; actions by credit rating agencies; judgments concerning casualty insurance underwriting and insurance liabilities; AIG’s ability to successfully manage run-off insurance portfolios; AIG’s ability to successfully reduce costs and expenses and make business and organizational changes without negatively impacting client relationships or AIG’s competitive position; AIG’s ability to successfully dispose of, or monetize, businesses or assets; judgments concerning the recognition of deferred tax assets; judgments concerning estimated restructuring charges and estimated cost savings; and such other factors discussed in Part I, Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations (MD&A) and Part II, Item 1A. Risk Factors in AIG’s Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2016, Part I, Item 2. MD&A and Part II, Item 1A. Risk Factors in AIG’s Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2016, and Part II, Item 7. MD&A and Part I, Item 1A. Risk Factors in AIG’s Annual Report on Form 10-K for the year ended December 31, 2015.

AIG is not under any obligation (and expressly disclaims any obligation) to update or alter any projections, goals, assumptions or other statements, whether written or oral, that may be made from time to time, whether as a result of new information, future events or otherwise. This document and the remarks made orally may also contain certain non-GAAP financial measures. The reconciliation of such measures to the most comparable GAAP measures in accordance with Regulation G is included in the Second Quarter 2016 Financial Supplement available in the Investor Information section of AIG’s corporate website, www.aig.com, as well as in the Appendix to this presentation.

Nothing in this presentation or in any oral statements made in connection with this presentation is intended to constitute, nor shall it be deemed to constitute, an offer of any securities for sale or the solicitation of an offer to purchase any securities in any jurisdiction.
## Progress On Financial Targets

<td></td>
</tr>
</tbody>
</table>

1) Includes consolidations and eliminations.
Reducing Exposure to Market Sensitive Assets

As part of our on-going de-risking and divestiture of legacy assets, AIG has reduced its overall exposure from assets that are recorded at fair value through earnings by over 40% (or $19B) since 2010.

The decline has come primarily from the wind down of the Legacy DIB/GCM portfolio as well as other non-core legacy investments (e.g. AerCap and PICC shares).

While the nature of these investments results in quarterly volatility, we expect our actions to result in a higher quality and a more sustainable source of earnings.

During the six months ended June 30, 2016 we reduced our hedge fund portfolio by $1.4 billion as a result of redemptions received during the period consistent with our planned reduction of exposure to that asset class. We remain on track to meet our targeted reductions by the end of 2017.

* As of quarter-end.
Impact of Low Interest Rate Environment

<table>
<thead>
<tr>
<th>Business Impacted</th>
<th>Considerations for Inforce ALM</th>
<th>Key Actions for New Business</th>
</tr>
</thead>
<tbody>
<tr>
<td>Long-tail Casualty</td>
<td>▪ Assets generally longer than liabilities so limited impact</td>
<td>▪ Continued focus on pricing, risk selection and rate</td>
</tr>
<tr>
<td>Variable Annuities</td>
<td>▪ Interest rate risk on living benefits fully hedged</td>
<td>▪ Manageable risk due to strong pricing, product discipline and risk management</td>
</tr>
<tr>
<td>Fixed Annuities</td>
<td>▪ Disciplined ALM matching, impact is 2-4 basis points per quarter on net spreads</td>
<td>▪ Focus on maintaining VoNB margins and expense management while volumes likely decline</td>
</tr>
<tr>
<td>Life</td>
<td>▪ Potential ALM mismatch on the long-end of the curve due to limited investable assets</td>
<td>▪ Limited new origination in Whole Life and UL in current environment</td>
</tr>
<tr>
<td>Legacy Structured</td>
<td>▪ Potential ALM mismatch on the long-end of the curve due to limited investable assets</td>
<td>▪ N/A</td>
</tr>
<tr>
<td>Settlements</td>
<td>▪ Historical gains harvesting</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th></th>
<th>100 bps reduction in interest rates(^1,2)</th>
<th>Remainder of 2016</th>
<th>FY 2017</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normalized Pre-tax Operating Income</td>
<td>&lt; ($100) mm</td>
<td>($250 - $350) mm</td>
<td></td>
</tr>
<tr>
<td>Normalized ROE</td>
<td>&lt; (10) bps</td>
<td>(25 – 35) bps</td>
<td></td>
</tr>
</tbody>
</table>

1) Estimates are based on a 100 bps reduction of the 10-year U.S. Treasury yield from the January 26th plan of 2.6% to 1.6% in 2017.
2) Amounts presented do not include the potential impact from changes in actuarial assumptions (e.g., DAC unlocking) or change in Workers’ Compensation discount as they are not included in the computation of Normalized ROE.
GOE, operating basis, reductions in 1H'16 were primarily driven by staff reductions, rationalized employee benefits, and professional fee reductions.

The second half 2016 expense comparisons are expected to slow due to the second half 2015 actions taken.
# Normalized Return On Equity Expansion

Underwriting Improvement, Expense Management and Active Capital Management Drives Normalized ROE Expansion

Additional $698 million of share repurchases through August 2, 2016.

1) Includes AIG notes, bonds, loans and mortgages payable, and AIG Life Holdings, Inc. (AIGLH) notes and bonds payable, and junior subordinated debt.
2) The inclusion of RBC measures is intended solely for the information of investors and is not intended for the purpose of ranking any insurance company or for use in connection with any marketing, advertising or promotional activities. ACL is defined as Authorized Control Level and CAL is defined as Company Action Level. RBC ratio for Domestic Life Insurance Companies excludes holding company, AGC Life Insurance Company.
3) Reflects $2.9B capital contribution to Non-Life Insurance Companies on January 25, 2016 as a result of the 4Q15 reserve strengthening.
4) As of the date of this presentation, all ratings have stable outlooks, except for S&P ratings on AIG, Inc., which have a negative outlook. For Non-Life Insurance Companies FSR and Life Insurance Companies FSR, ratings only reflect those of the core insurance companies.

</tbody>
</table>

- The accident year loss ratio, as adjusted, improved by 4.2 pts YoY reflecting our strategic actions and lower severe losses.
- The underwriting loss in 2Q16 was primarily driven by higher catastrophe losses and net reserve discount.
- The decline in NPW (ex. FX) of 20% was primarily driven by:
  - Reinsurance, portfolio exits and market headwinds from lower rates ~10%
  - Risk Selection ~10%
- The GOE ratio improved YoY due to lower employee-related expenses and expense savings initiatives.
- NII declined YoY primarily due to declines in alternative investment income and lower fair value earnings on PICC holdings.

</tbody>
</table>

- Increases in premiums and deposits and in net flows were primarily due to higher sales in Fixed Annuities, Retail Mutual Funds and Group Retirement. Lower surrenders in Group Retirement also contributed to the improvement in net flows.
- Pre-tax operating income decreased primarily due to lower net investment income, partially offset by lower employee-related expenses.
- Net investment income decreased primarily due to lower income on alternative investments and lower base yields.
- Declines in advisory fee income, advisory fee expense and general operating expenses reflect the sale of AIG Advisor Group in May 2016.
- Assets under management grew 4% YoY reflecting positive net flows and an increase in unrealized gains.

### Assets Under Management

**June 30, 2016 – $234.1 Billion**

- **Retail Mutual Funds**: 7%
- **Fixed Annuities**: 28%
- **Group Retirement**: 40%
- **Retirement Income Solutions**: 25%

<td>$184</td>
</tr>
</tbody>
</table>

- Life premiums and deposits increased 5% YoY, both excluding the effect of FX and on a reported basis, primarily due to growth in International Life and Health.
- Pre-tax operating income increased primarily due to more favorable mortality experience and lower domestic general operating expenses, partially offset by lower net investment income.
- Net investment income decreased primarily due to lower income on alternative investments.

#### 2Q16 New Business Sales

- **U.S.**: 42%
- **Japan**: 49%
- **U.K.**: 9%

Life insurance new product sales continue to reflect the balance and diversification of new business from a geographic and product portfolio perspective.

- New business sales in the U.S. are from term and universal life. Japan sales consist of term, health and savings products. U.K. sales are primarily term life.
- Life insurance in force increased 2% from a year ago.

^1 Other income primarily related to commission and profit sharing revenues received by Laya Healthcare from the distribution of insurance products.

### Improvement in underwriting income reflects:
- Strategic actions to reduce expenses, including refocused direct marketing activities;
- Increase in net favorable prior year loss reserve development;
- Partially offset by higher catastrophe losses and current year accident losses including a single large loss event.

- Pre-tax operating income growth reflects improved loss experience from lower new delinquencies and lower ultimate frequency as well as higher net premiums earned due to growth of insurance in force.
- Delinquency rate of 2.9% is the lowest level since 2Q 2005.
- As of June 30, 2016, Mortgage Guaranty held estimated available assets of $3.3 billion compared to minimum required assets of $2.9 billion under the Private Mortgage Insurer Eligibility Requirements.

### Primary Delinquency Trend¹,²

- Delinquencies continue to decrease as the volume of new delinquencies declines and cure rates improve.

1) Domestic First-lien only, based on the principal amount of loans insured.
2) In the second quarter of 2016, Mortgage Guaranty’s number of delinquent loans and primary delinquency ratio were revised to remove modified pool policies and reflect primary first-lien only policies. Prior periods have been revised to conform to the current period presentation.
Non-GAAP Reconciliations
Glossary of Non-GAAP Financial Measures

AIG

We use certain of our operating performance measures, as discussed beginning in the next paragraph below, to define our forward-looking financial targets; as described on page 3. Our financial targets are provided based on management’s estimates. The most directly comparable GAAP financial targets would be heavily dependent upon results that are beyond management’s controls and the outcome of these items could be significantly different than management’s estimates. Therefore, we do not provide quantitative reconciliations for these financial targets as we cannot predict with accuracy future actual events (e.g., catastrophe losses) and impacts from changes in macro economic market conditions, including the interest rate environment (e.g. estimate for DIB & GCM returns, fair value changes on PICC Investments, net reserve discount change and returns on alternative investments).

We use the following operating performance measures because we believe they enhance the understanding of the underlying profitability of continuing operations and trends of our business segments. We believe they also allow for more meaningful comparisons with our insurance competitors. When we use these measures, reconciliations to the most comparable GAAP measure are provided on a consolidated basis.

- **Operating revenue** excludes Net realized capital gains (losses), income from non-operating litigation settlements (included in Other income for GAAP purposes) and changes in fair value of securities used to hedge guaranteed living benefits (included in Net investment income for GAAP purposes).

- **Book Value Per Common Share Excluding Accumulated Other Comprehensive Income (AOCI), Book Value Per Common Share Excluding AOCI and Deferred Tax Assets (DTA) and Book Value Per Common Share Excluding AOCI and DTA and Including Dividend Growth** are used to show the amount of our net worth on a per-share basis. We believe these measures are useful to investors because they eliminate items that can fluctuate significantly from period to period, including changes in fair value of our available for sale securities portfolio, foreign currency translation adjustments and U.S. tax attribute deferred tax assets. These measures also eliminate the asymmetrical impact resulting from changes in fair value of our available for sale securities portfolio where there is largely no offsetting impact for certain related insurance liabilities. We exclude deferred tax assets representing U.S. tax attributes related to net operating loss carryforwards and foreign tax credits as they have not yet been utilized. Amounts for interim periods are estimates based on projections of full-year attribute utilization. As net operating loss carryforwards and foreign tax credits are utilized, the portion of the DTA utilized is included in Book Value Per Common Share. Book Value Per Common Share Excluding AOCI is derived by dividing Total AIG shareholders’ equity, excluding AOCI, by Total common shares outstanding. Book Value Per Common Share Excluding AOCI and DTA is derived by dividing Total AIG shareholders’ equity, excluding AOCI and DTA, by Total common shares outstanding. Book Value Per Common Share Excluding AOCI and DTA and including dividend growth is derived by dividing Total AIG shareholders’ equity, excluding AOCI and DTA, and including growth in quarterly dividends above $0.125 per share to shareholders, by Total common shares outstanding.

- **After-tax operating income attributable to AIG** is derived by excluding the following items from net income attributable to AIG. These items generally fall into one or more of the following broad categories: legacy matters having no relevance to our current businesses or operating performance; adjustments to enhance transparency to the underlying economics of transactions; and measures that we believe to be common to the industry. For example, certain ratios and other metrics described below:
  - deferred income tax valuation allowance releases and charges;
  - changes in fair value of securities used to hedge guaranteed living benefits;
  - changes in benefit reserves and deferred policy acquisition costs (DAC), value of business acquired (VOBA), and sales inducement assets (SIA) related to net realized capital gains and losses;
  - other income and expense — net, related to Corporate and Other run-off insurance lines;
  - loss on extinguishment of debt;
  - net realized capital gains and losses;
  - non qualifying derivative hedging activities, excluding net realized capital gains and losses;
  - income or loss from discontinued operations;
  - income and loss from divested businesses, including:
    - gain on the sale of International Lease Finance Corporation (ILFC) and certain post-acquisition transaction expenses incurred by AerCap Holdings N.V. (AerCap) in connection with its acquisition of ILFC and the difference between expensing AerCap’s maintenance rights assets over the remaining lease term as compared to the remaining economic life of the related aircraft and related tax effects;
    - legacy tax adjustments primarily related to certain changes in uncertain tax positions and other tax adjustments;
    - non-operating litigation reserves and settlements;
    - reserve development related to non-operating run-off insurance business; and
    - restructuring and other costs related to initiatives designed to reduce operating expenses, improve efficiency and simplify our organization.
Glossary of Non-GAAP Financial Measures

- **Return on Equity – After-tax Operating Income Excluding AOCI and Return on Equity – After-tax Operating Income Excluding AOCI and DTA** are used to show the rate of return on shareholders’ equity. We believe these measures are useful to investors because they eliminate items that can fluctuate significantly from period to period, including changes in fair value of our available for sale securities portfolio, foreign currency translation adjustments and U.S. tax attribute deferred tax assets. These measures also eliminate the asymmetrical impact resulting from changes in fair value of our available for sale securities portfolio wherein there is largely no offsetting impact for certain related insurance liabilities. We exclude deferred tax assets representing U.S. tax attributes related to net operating loss carryforwards and foreign tax credits as they have not yet been utilized. Amounts for interim periods are estimates based on projections of full-year attribute utilization. As net operating loss carryforwards and foreign tax credits are utilized, the portion of the DTA utilized is included in Return on Equity. Return on Equity – After-tax Operating Income Excluding AOCI is derived by dividing annual actual or annualized after-tax operating income attributable to AIG by average AIG shareholders’ equity, excluding average AOCI and DTA.

- **Normalized Return on Equity, Excluding AOCI and DTA (Normalized ROE)** further adjusts Return on Equity – After-tax Operating Income, excluding AOCI and DTA for the effects of certain volatile or market related items. We believe this measure is useful to investors because it presents the trends in our consolidated return on equity without the impact of certain items that can experience volatility in our short-term results. Normalized Return on Equity, Excluding AOCI and DTA is derived by excluding the following tax adjusted effects from Return on Equity – After-tax Operating Income, Excluding AOCI and DTA:
  - the difference between actual and expected catastrophe losses;
  - the difference between actual and expected alternative investment returns;
  - the difference between actual and expected Direct Investment Book (DIB) and Global Capital Markets (GCM) returns;
  - Fair value changes on PICC investments;
  - Update of actuarial assumptions;
  - Net reserve discount change;
  - Life insurance incurred but not reported (IBNR) death claim charge; and
  - Prior year loss reserve development.

- **General operating expenses, operating basis** is derived by making the following adjustments to general operating and other expenses: include (i) loss adjustment expenses, reported as policyholder benefits and losses incurred and (ii) certain litigation and other expenses related to the retroactive reinsurance agreement. We also derive General operating expense savings on a gross basis, which represents changes during the period in General operating expenses, operating basis, before the effect of additional investments made during the period. We use general operating expenses, operating basis, because we believe it provides a more meaningful indication of our ordinary course of business operating costs.

### Commercial Insurance: Property Casualty and Mortgage Guaranty; Consumer Insurance: Personal Insurance

- **Pre-tax operating income**: includes both underwriting income and loss and net investment income, but excludes net realized capital gains and losses, other income and expense — net, and non-operating litigation reserves and settlements. Underwriting income and loss is derived by reducing net premiums earned by losses and loss adjustment expenses incurred, acquisition expenses and general operating expenses.

- **Ratios**: We, along with most property and casualty insurance companies, use the loss ratio, the expense ratio and the combined ratio as measures of underwriting performance. These ratios are relative measurements that describe, for every $100 of net premiums earned, the amount of losses and loss adjustment expenses, and the amount of other underwriting expenses that would be incurred. A combined ratio of less than 100 indicates underwriting income and a combined ratio of over 100 indicates an underwriting loss. Our ratios are calculated using the relevant information calculated under GAAP, and thus may not be comparable to similar ratios calculated for regulatory reporting purposes. The underwriting environment varies across countries and products, as does the degree of litigation activity, all of which affect such ratios. In addition, investment returns, local taxes, cost of capital, regulation, product type and competition can have an effect on pricing and consequently on profitability as reflected in underwriting income and associated ratios.

- **Accident year loss and combined ratios, as adjusted**: both the accident year loss and combined ratios, as adjusted, exclude catastrophe losses and related reinstatement premiums, prior year development, net of premium adjustments, and the impact of reserve discounting. Natural catastrophe losses are generally weather or seismic events having a net impact in excess of $10 million each. Catastrophes also include certain man-made events, such as terrorism and civil disorders, that meet the $10 million threshold. We believe these adjusted ratios are meaningful measures of our underwriting results on an on-going basis as they exclude catastrophes and the impact of reserve discounting which are outside of management’s control. We also exclude prior year development to provide transparency related to current accident year results.

- **Accident year loss ratio, as adjusted (Adjusted for 2012-2015 Prior Year Development)** further adjusts the Accident Year Loss Ratio, as adjusted to include the impact of the prior year reserve development recorded during 2012-2015 into each respective accident year.

Note: Normalizing adjustments are tax effected using a 35% tax rate and computed based on average normalized shareholders’ equity, excluding AOCI and DTA, for the respective period. 1)Represents U.S. tax attributes related to net operating loss carryforwards and foreign tax credits.
American International Group, Inc. (AIG) is a leading global insurance organization. Founded in 1919, today we provide a wide range of property casualty insurance, life insurance, retirement products, mortgage insurance and other financial services to customers in more than 100 countries and jurisdictions. Our diverse offerings include products and services that help businesses and individuals protect their assets, manage risks and provide for retirement security. AIG common stock is listed on the New York Stock Exchange and the Tokyo Stock Exchange.

Additional information about AIG can be found at www.aig.com and www.aig.com/strategyupdate | YouTube: www.youtube.com/aig | Twitter: @AIGinsurance | LinkedIn: http://www.linkedin.com/company/aig. These references with additional information about AIG have been provided as a convenience, and the information contained on such websites is not incorporated by reference into this presentation.

AIG is the marketing name for the worldwide property-casualty, life and retirement, and general insurance operations of American International Group, Inc. For additional information, please visit our website at www.aig.com. All products and services are written or provided by subsidiaries or affiliates of American International Group, Inc. Products or services may not be available in all countries, and coverage is subject to actual policy language. Non-insurance products and services may be provided by independent third parties. Certain property-casualty coverages may be provided by a surplus lines insurer. Surplus lines insurers do not generally participate in state guaranty funds, and insureds are therefore not protected by such funds.
