American International Group, Inc.
Cautionary Statement Regarding Forward-Looking Information

This Financial Supplement may include, and officers and representatives of American International Group, Inc. (AIG) may from time to time make, projections, goals, assumptions and statements that may constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. These projections, goals, assumptions and statements are not historical facts but instead represent only AIG’s belief regarding future events, many of which, by their nature, are inherently uncertain and outside AIG’s control. These projections, goals, assumptions and statements include statements preceded by, followed by or including words such as “will,” “believe,” “anticipate,” “expect,” “intend,” “plan,” “focused on achieving,” “view,” “target,” “goal” or “estimate.” These projections, goals, assumptions and statements may address, among other things, AIG’s: exposures to subprime mortgages, monoline insurers, the residential and commercial real estate markets, state and municipal bond issuers, sovereign bond issuers, the energy sector and currency exchange rates; exposure to European governments and European financial institutions; strategy for risk management; sales of businesses; restructuring of business operations; generation of deployable capital; strategies to increase return on equity and earnings per common share; strategies to grow net investment income, efficiently manage capital, grow book value per share, and reduce expenses; anticipated restructuring charges and annual cost savings; anticipated business or asset divestitures or monetizations; anticipated organizational and business changes; strategies for customer retention, growth, product development, market position, financial results and reserves; and subsidiaries’ revenues and combined ratios.

It is possible that AIG’s actual results and financial condition will differ, possibly materially, from the results and financial condition indicated in these projections, goals, assumptions and statements. Factors that could cause AIG’s actual results to differ, possibly materially, from those in the specific projections, goals, assumptions and statements include:

- changes in market conditions;
- negative impacts on customers, business partners and other stakeholders;
- the occurrence of catastrophic events, both natural and man-made;
- significant legal proceedings;
- the timing and applicable requirements of any new regulatory framework to which AIG is subject as a nonbank systemically important financial institution and as a global systemically important insurer;
- concentrations in AIG’s investment portfolios;
- actions by credit rating agencies;
- judgments concerning casualty insurance underwriting and insurance liabilities;
- our ability to successfully manage run-off insurance portfolios;
- our ability to successfully reduce costs and expenses and make business and organizational changes without negatively impacting client relationships or our competitive position;
- our ability to successfully dispose of, or monetize, businesses or assets;
- judgments concerning the recognition of deferred tax assets;
- judgments concerning estimated restructuring charges and estimated cost savings; and
- such other factors discussed in Part I, Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations (MD&A) and Part II, Item 1A. Risk Factors in AIG’s Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2016, Part I, Item 2. MD&A and Part II, Item 1A. Risk Factors in AIG’s Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2016, and Part II, Item 7. MD&A and Part I, Item 1A. Risk Factors in AIG’s Annual Report on Form 10-K for the year ended December 31, 2015.

AIG is not under any obligation (and expressly disclaims any obligation) to update or alter any projections, goals, assumptions or other statements, whether written or oral, that may be made from time to time, whether as a result of new information, future events or otherwise.

American International Group, Inc. Non-GAAP Financial Measures

Throughout this Financial Supplement, we present our financial condition and results of operations in the way we believe will be most meaningful and representative of our business results. Some of the measurements we use are “non-GAAP financial measures” under Securities and Exchange Commission rules and regulations. GAAP is the acronym for “accounting principles generally accepted in the United States.” The non-GAAP financial measures we present may not be comparable to similarly-named measures reported by other companies.

Book Value Per Common Share Excluding Accumulated Other Comprehensive Income (AOCI) and Book Value Per Common Share Excluding AOCI and Deferred Tax Assets (DTA) are used to show the amount of our net worth on a per-share basis. We believe these measures are useful to investors because they eliminate items that can fluctuate significantly from period to period, including changes in fair value of our available for sale securities portfolio, foreign currency translation adjustments and U.S. tax attribute deferred tax assets. These measures also eliminate the asymmetrical impact resulting from changes in fair value of our available for sale securities portfolio wherein there is largely no offsetting impact for certain related insurance liabilities. We exclude deferred tax assets representing U.S. tax attributes related to net operating loss carryforwards and foreign tax credits as they have not yet been utilized. Amounts for interim periods are estimates based on projections of full-year attribute utilization. As net operating loss carryforwards and foreign tax credits are utilized, the portion of the DTA utilized is included in Book Value Per Common Share. Book Value Per Common Share Excluding AOCI is derived by dividing Total AIG shareholders’ equity, excluding AOCI, by Total common shares outstanding. Book Value Per Common Share Excluding AOCI and DTA is derived by dividing Total AIG shareholders’ equity, excluding AOCI and DTA, by Total common shares outstanding. The reconciliation to book value per common share, the most comparable GAAP measure, is presented on page 7 herein.

Return on Equity – After-tax Operating Income Excluding AOCI and Return on Equity – After-tax Operating Income Excluding AOCI and DTA are used to show the rate of return on shareholders’ equity. We believe these measures are useful to investors because they eliminate items that can fluctuate significantly from period to period, including changes in fair value of our available for sale securities portfolio, foreign currency translation adjustments and U.S. tax attribute deferred tax assets. These measures also eliminate the asymmetrical impact resulting from changes in fair value of our available for sale securities portfolio wherein there is largely no offsetting impact for certain related insurance liabilities. We exclude deferred tax assets representing U.S. tax attributes related to net operating loss carryforwards and foreign tax credits as they have not yet been utilized. Amounts for interim periods are estimates based on projections of full-year attribute utilization. As net operating loss carryforwards and foreign tax credits are utilized, the portion of the DTA utilized is included in Return on Equity. Return on Equity – After-tax Operating Income Excluding AOCI is derived by dividing actual or annualized after-tax operating income attributable to AIG by average AIG shareholders’ equity, excluding average AOCI. Return on Equity – After-tax Operating Income Excluding AOCI and DTA is derived by dividing actual or annualized after-tax operating income attributable to AIG by average AIG shareholders’ equity, excluding average AOCI and DTA. The reconciliation to return on equity, the most comparable GAAP measure, is presented on page 7 herein.

Normalized Return on Equity, Excluding AOCI and DTA further adjusts Return on Equity – After-tax Operating Income, excluding AOCI and DTA for the effects of certain volatile or market related items. We believe this measure is useful to investors because it presents the trends in our consolidated return on equity without the impact of certain items that can experience volatility in our short-term results. Normalized Return on Equity, Excluding AOCI and DTA is derived by excluding the following tax adjusted effects from Return on Equity – After-tax Operating Income, Excluding AOCI and DTA: the difference between actual and expected (i) catastrophe losses, (ii) alternative investment returns, and (iii) Direct Investment book (DIB) and Global Capital Markets (GCM) returns; fair value changes on PICC investments; update of actuarial assumptions; net reserve discount change; Life insurance incurred but not reported (IBNR) death claim charge; and prior year loss reserve development. The reconciliation to Return on Equity – After-tax Operating Income Excluding AOCI and DTA, is presented on page 14 herein.

We use the following operating performance measures because we believe they enhance the understanding of the underlying profitability of continuing operations and trends of our business segments. We believe they also allow for more meaningful comparisons with our insurance competitors. When we use these measures, reconciliations to the most comparable GAAP measure are provided on a consolidated basis.

After-tax operating income attributable to AIG is derived by excluding the following items from net income attributable to AIG. These items generally fall into one or more of the following broad categories: legacy matters having no relevance to our current businesses or operating performance; adjustments to enhance transparency to the underlying economics of transactions; and measures that we believe to be common to the industry. For example, certain ratios and other metrics described below:

- deferred income tax valuation allowance releases and charges;
- changes in fair value of securities used to hedge guaranteed living benefits;
- changes in benefit reserves and deferred policy acquisition costs (DAC), value of business acquired (VOBA), and sales inducement assets (SIA) related to net realized capital gains and losses;
- other income and expense — net, related to Corporate and Other run-off insurance lines;
- loss on extinguishment of debt;
- net realized capital gains and losses;
- non-qualifying derivative hedging activities, excluding net realized capital gains and losses;
- income or loss from discontinued operations;
- income and loss from divested businesses, including:
 - gain on the sale of International Lease Finance Corporation (ILFC); and
 - certain post-acquisition transaction expenses incurred by AerCap Holdings N.V. (AerCap) in connection with its acquisition of ILFC and the difference between expensing AerCap’s maintenance rights assets over the remaining lease term as compared to the remaining economic life of the related aircraft and related tax effects;
- legacy tax adjustments primarily related to certain changes in uncertain tax positions and other tax adjustments;
- non-operating litigation reserves and settlements;
- reserve development related to non-operating run-off insurance business; and
- restructuring and other costs related to initiatives designed to reduce operating expenses, improve efficiency and simplify our organization.

Operating revenue excludes Net realized capital gains (losses), income from non-operating litigation settlements (included in Other income for GAAP purposes) and changes in fair value of securities used to hedge guaranteed living benefits (included in Net investment income for GAAP purposes).

American International Group, Inc.
Non-GAAP Financial Measures (continued)

General operating expenses, operating basis, is derived by making the following adjustments to general operating and other expenses: include (i) loss adjustment expenses, reported as policyholder benefits and losses incurred and (ii) certain investment and other expenses reported as net investment income, and exclude (i) advisory fee expenses, (ii) non-deferrable insurance commissions, (iii) direct marketing and acquisition expenses, net of deferrals, (iv) non-operating litigation reserves and (v) other expense related to a retroactive reinsurance agreement. We use general operating expenses, operating basis, because we believe it provides a more meaningful indication of our ordinary course of business operating costs.

We use the following operating performance measures within our Commercial Insurance and Consumer Insurance reportable segments as well as Corporate and Other.

Commercial Insurance: Property Casualty and Mortgage Guaranty; Consumer Insurance: Personal Insurance

- **Pre-tax operating income:** includes both underwriting income and loss and net investment income, but excludes net realized capital gains and losses, other income and expense — net, and non-operating litigation reserves and settlements. Underwriting income and loss is derived by reducing net premiums earned by losses and loss adjustment expenses incurred, acquisition expenses and general operating expenses.
- **Ratios:** We, along with most property and casualty insurance companies, use the loss ratio, the expense ratio and the combined ratio as measures of underwriting performance. These ratios are relative measurements that describe, for every \$100 of net premiums earned, the amount of losses and loss adjustment expenses, and the amount of other underwriting expenses that would be incurred. A combined ratio of less than 100 indicates underwriting income and a combined ratio of over 100 indicates an underwriting loss. Our ratios are calculated using the relevant information calculated under GAAP, and thus may not be comparable to similar ratios calculated for regulatory reporting purposes. The underwriting environment varies across countries and products, as does the degree of litigation activity, all of which affect such ratios. In addition, investment returns, local taxes, cost of capital, regulation, product type and competition can have an effect on pricing and consequently on profitability as reflected in underwriting income and associated ratios.
- **Accident year loss and combined ratios, as adjusted:** both the accident year loss and combined ratios, as adjusted, exclude catastrophe losses and related reinstatement premiums, prior year development, net of premium adjustments, and the impact of reserve discounting. Natural catastrophe losses are generally weather or seismic events having a net impact in excess of \$10 million each. Catastrophes also include certain man-made events, such as terrorism and civil disorders, that meet the \$10 million threshold. We believe the as adjusted ratios are meaningful measures of our underwriting results on an on-going basis as they exclude catastrophes and the impact of reserve discounting which are outside of management's control. We also exclude prior year development to provide transparency related to current accident year results.

Commercial Insurance: Institutional Markets; Consumer Insurance: Retirement and Life

- **Pre-tax operating income** is derived by excluding the following items from pre-tax income:
 - changes in fair value of securities used to hedge guaranteed living benefits;
 - net realized capital gains and losses;
 - changes in benefit reserves and DAC, VOBA and SIA related to net realized capital gains and losses; and
 - non-operating litigation reserves and settlements.

Premiums and deposits: includes direct and assumed amounts received and earned on traditional life insurance policies, group benefit policies and life-contingent payout annuities, as well as deposits received on universal life, investment-type annuity contracts and mutual funds.

Corporate and Other — Pre-tax operating income and loss is derived by excluding the following items from pre-tax income and loss:

- loss on extinguishment of debt;
- net realized capital gains and losses;
- changes in benefit reserves and DAC, VOBA and SIA related to net realized capital gains and losses;
- income and loss from divested businesses, including Aircraft Leasing;
- net gain or loss on sale of divested businesses, including:
 - gain on the sale of ILFC; and
 - certain post-acquisition transaction expenses incurred by AerCap in connection with its acquisition of ILFC and the difference between expensing AerCap's maintenance rights assets over the remaining lease term as compared to the remaining economic life of the related aircraft and our share of AerCap's income taxes;
- non-operating litigation reserves and settlements;
- reserve development related to non-operating run-off insurance business; and
- restructuring and other costs related to initiatives designed to reduce operating expenses, improve efficiency and simplify our organization.

Results from discontinued operations are excluded from all of these measures.

Notes

Consolidated Results

- (1) Beginning in 1Q16, the presentation of income on alternative investments has been refined to include only income from hedge funds, private equity funds and affordable housing partnerships. Hedge funds for which we elected the fair value option are recorded as of the balance sheet date. Other hedge funds are generally reported on a one-month lag, while private equity funds are generally reported on a one-quarter lag. Other investment income primarily includes changes in market value of investments accounted for under the fair value option (including PICC Property & Casualty Company Limited (PICC P&C) held by Non-Life Insurance Companies), real estate income, life settlements, and income (loss) from equity method investments. Prior period disclosures have been reclassified to conform to this presentation.
- (2) For the quarters ended March 31, 2016, December 31, 2015 and September 30, 2015, because we reported a net loss and, in the quarter ended December 31, 2015, an after-tax operating loss, all common stock equivalents are anti-dilutive and are therefore excluded from the calculation of diluted shares and diluted per share amounts.
- (3) 2Q16 includes the sale of AIG Advisor Group. 2Q15 included certain post-acquisition transaction expenses incurred by AerCap in connection with its acquisition of ILFC and the difference between expensing AerCap's maintenance rights assets over the remaining lease term as compared to the remaining economic life of the related aircraft and our share of AerCap's income taxes.
- (4) Beginning in 3Q15, we launched broad initiatives designed to reduce operating expenses, improve efficiency and simplify our organization. These costs include employee severance and one-time termination benefits, modernization of our information technology platforms, and costs associated with consolidation of legal entities and exiting lower return lines of business.
- (5) Excludes a valuation allowance (release) charge of \$(350) million, \$(800) million and \$1.2 billion in 2Q16, 1Q16 and 4Q15, respectively, recorded in AOCI.
- (6) The reconciliation of After-tax operating income (loss) as reported to Normalized after-tax operating income (loss) and ROE-after-tax operating income (loss) to Normalized ROE are as follows:

<i>(in millions)</i>	Quarterly					Six Months Ended June 30,	
	2Q16	1Q16	4Q15	3Q15	2Q15	2016	2015
After-tax operating income (loss) as reported	\$ 1,113	\$ 773	\$ (1,348)	\$ 691	\$ 1,893	\$ 1,886	\$ 3,584
Adjustments to arrive at Normalized after-tax operating income (loss):							
Catastrophe losses above (below) expectations	104	15	(87)	(333)	(25)	119	(99)
(Better) worse than expected alternative returns	4	464	344	298	(116)	468	(208)
(Better) worse than expected DIB & GCM returns	(28)	257	(3)	165	(203)	229	(242)
Fair value changes on PICC investments	55	67	(12)	167	(146)	122	(181)
Update of actuarial assumptions	-	-	(7)	11	-	-	-
Net reserve discount charge (benefit)	195	(7)	56	50	(260)	188	(153)
Life Insurance - IBNR death claims	-	(16)	(13)	-	-	(16)	-
Unfavorable (favorable) prior year loss reserve development	19	(39)	2,329	124	214	(20)	237
Normalized after-tax operating income (loss)	\$ 1,462	\$ 1,514	\$ 1,259	\$ 1,173	\$ 1,357	\$ 2,976	\$ 2,938
Normalized Average AIG Shareholders' equity, excluding average AOCI and DTA	\$ 66,295	\$ 68,269	\$ 75,029	\$ 78,973	\$ 81,283	\$ 67,653	\$ 80,897
ROE - after-tax operating income (loss), excluding AOCI and DTA (page 7)	6.7%	4.5%	(7.3%)	3.5%	9.3%	5.6%	8.8%
Impact of Normalizations	2.1%	4.4%	14.0%	2.4%	(2.6%)	3.2%	(1.5%)
Normalized ROE - after-tax operating income (loss), excluding AOCI and DTA	8.8%	8.9%	6.7%	5.9%	6.7%	8.8%	7.3%

Normalizing adjustments are tax affected using a 35% tax rate and computed based on average shareholders' equity, excluding AOCI and DTA, for the respective periods.

American International Group, Inc.
Notes (continued)

Consolidated Results

- (7) Operating revenue excludes Net realized capital gains (losses), income from non-operating litigation settlements (included in Other income for GAAP purposes) and changes in fair value of securities used to hedge guaranteed living benefits (included in Net investment income for GAAP purposes). The reconciliation to GAAP total revenues is as follows:

<i>(in millions)</i>	Quarterly					Six Months Ended June 30,	
	2Q16	1Q16	4Q15	3Q15	2Q15	2016	2015
Total operating revenues	\$ 13,569	\$ 12,737	\$ 14,187	\$ 13,179	\$ 15,635	\$ 26,306	\$ 30,225
Reconciling items:							
Changes in fair value of securities used to hedge guaranteed living benefits	120	133	(4)	4	(87)	253	(43)
Net realized capital gains (loss)	1,042	(1,106)	(349)	(342)	126	(64)	1,467
Income from divested businesses	-	-	-	-	(33)	-	(48)
Non-operating litigation settlements	7	34	3	-	76	41	91
Other	(14)	(19)	(6)	(19)	(18)	(33)	(18)
Total revenues	\$ 14,724	\$ 11,779	\$ 13,831	\$ 12,822	\$ 15,699	\$ 26,503	\$ 31,674

- (8) Includes general operating expenses from AIG Life Limited (formerly Ageas Protect Limited), which was acquired on December 31, 2014, and general operating expenses from Laya Healthcare, which was acquired on March 31, 2015. Also refer to Note (9).
- (9) Includes unallocated loss adjustment expenses, certain investment expenses and certain acquisition expenses (including the portion deferred for GAAP reporting). Excludes charges for non-operating litigation reserves, restructuring and other costs, and other expense related to a retroactive reinsurance agreement.
- (10) The Life Insurance Companies conduct business primarily through American General Life Insurance Company, The Variable Annuity Life Insurance Company, The United States Life Insurance Company in the City of New York, AIG Fuji Life Insurance Company Limited (Fuji Life) and AIG Life Limited.
- (11) The Non-Life Insurance Companies include property casualty and mortgage guaranty companies that conduct their business primarily through the following major operating companies: National Union Fire Insurance Company of Pittsburgh, Pa.; American Home Assurance Company; Lexington Insurance Company; Fuji Fire and Marine Insurance Company Limited; American Home Assurance Company, Ltd.; AIG Asia Pacific Insurance, Pte, Ltd.; AIG Europe Limited; and United Guaranty Residential Insurance Company. For the year ended December 31, 2015, Eaglestone Reinsurance Company (Eaglestone), a reinsurer of run-off lines of business from affiliates within Non-Life Insurance Companies, was transferred from the Non-Life Insurance Companies to Corporate and Other.
- (12) Includes AIG Parent, other assets and investments held by AIG Parent, AIG Life Holdings, Inc. (a non-operating holding company), Eaglestone, and consolidations, eliminations and other adjustments.
- (13) As of June 30, 2016, included debt of consolidated investment vehicles related to real estate investments of \$2.7 billion, affordable housing partnership investments of \$1.6 billion and other securitization vehicles of \$845 million. As of December 31, 2015, included debt of consolidated investment vehicles related to real estate investments of \$2.4 billion, affordable housing partnership investments of \$1.5 billion, and other securitization vehicles of \$1.0 billion. As of June 30, 2015, included debt of consolidated investment vehicles related to real estate investments of \$2.4 billion, affordable housing partnership investments of \$265 million and other securitization vehicles of \$1.2 billion.
- (14) The Life Insurance Companies' balance consists primarily of third-party debt related to other subsidiaries and consolidated investments in affordable housing partnerships.
- (15) Beginning in 1Q16, a \$1.8 billion deferred tax asset valuation allowance released to AOCI, which was previously reported in the Corporate & Other segment has been reclassified to Life Insurance Companies consistent with the reporting of the related gains on investments.
- (16) Borrowings are carried at fair value with fair value adjustments reported in Other income on the Consolidated Statement of Operations. Contractual interest payments amounted to \$36 million and \$78 million for the three months ended June 30, 2016 and 2015, respectively, and \$63 million and \$91 million for the six months ended June 30, 2016 and 2015, respectively.
- (17) Includes the effect of consolidating previously unconsolidated partnerships.
- (18) The junior subordinated debentures receive partial equity treatment from a major rating agency under its current policies but are recorded as long-term borrowings on the Condensed Consolidated Balance Sheets.
- (19) The tax effect on net realized capital (gains) losses includes the impact of non-US tax rates lower than 35% applied to foreign exchange (gains) losses attributable to those jurisdictions where foreign earnings are considered to be indefinitely reinvested.

Commercial Insurance

Basis of Presentation

Commercial Insurance manages its business in three operating segments - Property Casualty, Mortgage Guaranty and Institutional Markets - and operates in three major geographic areas: the Americas (which includes the United States, Canada, Latin America, the Caribbean and Bermuda), Asia Pacific (which includes Japan and other Asia Pacific nations, including China, Korea, Singapore, Vietnam, Thailand, Australia and Indonesia), and EMEA (which includes the United Kingdom, Continental Europe, the Russian Federation, India, the Middle East and Africa). Commercial Insurance products for large and small businesses are primarily distributed through a network of independent retail and wholesale brokers, and through an independent agency network in the Asia Pacific and EMEA regions. Major lines of business include Casualty, Property, Specialty and Financial Lines.

Net investment income is attributed to the operating segments of Commercial Insurance and Consumer Insurance based on internal models consistent with the nature of the underlying businesses.

For Commercial Insurance - Property Casualty, we estimate investable funds based primarily on loss reserves and unearned premiums. The net investment income allocation is calculated based on these estimated investable funds consistent with the approximate duration of the liabilities and a capital allocation for each operating segment.

For Commercial Insurance - Institutional Markets, net investment income is attributed based on invested assets from segregated product line portfolios held in our Life Insurance Companies. The fundamental investment strategy for these product line portfolios is to maintain primarily a diversified, high quality portfolio of fixed maturity securities and, to the extent practicable, to approximately match established duration targets based on characteristics of the underlying liabilities. All invested assets of the Life Insurance Companies in excess of liabilities are allocated based on internal estimates of target statutory capital for each product line.

Net investment income for Commercial Insurance - Mortgage Guaranty is attributed based on legal entity invested assets.

Notes

- (1) Alternative investment income includes income on hedge funds, private equity funds and affordable housing partnerships. Hedge funds for which we elected the fair value option are recorded as of the balance sheet date. Other hedge funds are generally reported on a one-month lag, while private equity funds are generally reported on one-quarter lag.
- (2) Other investment income is comprised principally of real estate income, changes in market value of investments accounted for under the fair value option, and income (loss) from equity method investments.
- (3) Natural catastrophe losses (CATs) are generally weather or seismic events having a net impact on AIG in excess of \$10 million each. Catastrophes also include certain man-made events, such as terrorism and civil disorders that meet the \$10 million threshold.
- (4) Severe losses are defined as non-catastrophic individual first-party losses and surety losses greater than \$10 million, net of related reinsurance and salvage and subrogation.
- (5) Computed using a constant exchange rate for each period.
- (6) Base portfolio investment income includes interest, dividends and foreclosed real estate income, net of investment expenses.
- (7) Net investment income-other enhancements include call and tender income, changes in market value of investments accounted for under the fair value option, interest received on defaulted investments and other miscellaneous investment income, including income of certain partnership entities that are required to be consolidated.
- (8) Comprises the notional value of (i) new stable value wrap contracts and (ii) stable value wrap contracts novated from AIG Global Capital Markets and rewritten as group annuity contracts. Excludes the portion of stable value wraps included in Total insurance reserves.

American International Group, Inc.
Notes (continued)

Commercial Insurance

(9) Underwriting ratios are computed as follows:

- a. Loss ratio = Loss and loss adjustment expenses incurred ÷ Net premiums earned (NPE)
- b. Catastrophe losses (CATs) and reinstatement premiums = [Loss and loss adjustment expenses incurred – (CATs)] ÷ [NPE + Reinstatement premiums (RIPs) related to catastrophes] – Loss ratio
- c. Prior year development net of premium adjustments = [Loss and loss adjustment expenses incurred – Prior year loss reserve development (favorable) unfavorable (PYD), net of reinsurance] ÷ [NPE + RIPs related to prior year catastrophes + (Additional) returned premium related to prior year development] – Loss ratio
- d. Net reserve discount = -1*[Net reserve discount (benefit) charge ÷ NPE] (Note: any rounding will go into this line since Accident year loss ratio, as adjusted is calculated independently.)
- e. Accident year loss ratio, as adjusted = [Loss and loss adjustment expenses incurred – CATs – PYD – Net reserve discount (benefit) charge] ÷ [NPE + RIPs related to catastrophes + RIPs related to prior year catastrophes + (Additional) returned premium related to PYD]
- f. Acquisition ratio = Total acquisition expenses ÷ NPE
- g. General operating expense ratio = General operating expenses ÷ NPE
- h. Expense ratio = Acquisition ratio + General operating expenses ratio
- i. Combined ratio = Loss ratio + Expense ratio
- j. Accident year combined ratio = Accident year loss ratio, as adjusted + Expense ratio

(10) Premiums and deposits is a non-GAAP financial measure.

The following table presents a reconciliation of Institutional Markets premiums and deposits to GAAP premiums:

<i>(in millions)</i>	Quarterly					Six Months Ended June 30,	
	2Q16	1Q16	4Q15	3Q15	2Q15	2016	2015
Premiums and deposits	\$ 506	\$ 304	\$ 797	\$ 159	\$ 680	\$ 810	\$ 826
Deposits	(288)	(61)	(65)	(33)	(26)	(349)	(71)
Other	(3)	(8)	(6)	(11)	(11)	(11)	(16)
Premiums	\$ 215	\$ 235	\$ 726	\$ 115	\$ 643	\$ 450	\$ 739

(11) In the second quarter of 2016, Mortgage Guaranty's number of delinquent loans and primary delinquency ratio were revised to remove modified pool policies and reflect primary first-lien only policies. Prior periods have been revised to conform to the current period presentation.

Account value by benefit type (a)					
Guaranteed Minimum Death Benefits (GMDB) only (b)	\$ 60,438	\$ 62,224	\$ 62,468	\$ 61,405	\$ 64,672
Guaranteed Minimum Income Benefits (GMIB) (c)	2,342	2,367	2,443	2,429	2,647
Guaranteed Minimum Withdrawal Benefits (GMWB) (d)	39,202	38,433	37,951	36,487	37,435
Liability by benefit type (a)					
Guaranteed Minimum Death Benefits (GMDB) (b)	\$ 461	\$ 462	\$ 464	\$ 471	\$ 397
Guaranteed Minimum Income Benefits (GMIB) (c)	25	26	27	27	16
Guaranteed Minimum Withdrawal Benefits (GMWB) (d)	2,710	2,097	1,234	1,398	456

- (a) Excludes assumed reinsurance business.
- (b) A guaranteed minimum death benefit is an amount paid from a variable annuity upon the death of the owner. This benefit protects beneficiaries from market volatility and may be different than the account value. Each of these benefits may be subject to a maximum amount based on age of owner or dollar amount. "Guaranteed Minimum Death Benefits only" signifies that no other guarantees are present. Contracts with a guaranteed living benefit also have a guaranteed minimum death benefit.
- (c) A guaranteed minimum income benefit establishes a minimum amount available to be annuitized regardless of actual performance in the product. The benefit is not available until a set number of years after contract issue.
- (d) A guaranteed minimum withdrawal benefit creates a guaranteed income stream which, within certain parameters, may continue for the life of the annuitant even if the entire contract value has been reduced to zero. The fair value of GMWB embedded derivatives is based on actuarial and capital market assumptions related to projected cash flows of rider fees and claims over the expected lives of the contracts. Also includes guaranteed minimum accumulation benefit (GMAB), which ensures a return of premium invested at the end of 10 years, based on premiums invested in a defined period. The liability for GMAB at June 30, 2016 was \$11 million.

Consumer Insurance

Basis of Presentation:

Consumer Insurance presents its results in the following operating segments:

Retirement: product lines include Fixed Annuities, with products including deferred fixed annuities and immediate annuities; Retirement Income Solutions, with products including variable and index annuities; Group Retirement, with products including retirement plans, annuity and investment products for employees of education, healthcare and other sponsoring companies; and Retail Mutual Funds. Periods through 2Q16 also included results for AIG Advisor Group, our network of independent broker-dealers, which was sold in May 2016.

Life: includes the following product lines: Traditional Life, Universal Life, International Life, Accident & Health (A&H), Endowments and Group Benefits of the Life Insurance Companies.

Personal Insurance: Personal Insurance - North America and Personal Insurance - International include the following product lines: Automobile, Property, Warranty Service Programs, and A&H and Group Benefits of the Non-Life Insurance Companies.

Selected operating statistics are provided for the Fixed Annuities, Retirement Income Solutions, and Group Retirement product lines in the Retirement operating segment, as well as the Personal Insurance - North America and Personal Insurance - International in the Personal Insurance operating segment. Operating statistics are not separately presented for Advisory Services and Retail Mutual Funds, which are included in the Retirement operating segment.

Consumer Insurance operations are conducted through the Life Insurance Companies as well as the Non-Life Insurance Companies.

Consumer Insurance operates in three major geographic areas: the Americas (which includes the United States, Canada, Latin America, the Caribbean and Bermuda), Asia Pacific (which includes Japan, China, Korea, Singapore, Vietnam, Thailand, Australia, Indonesia and other Asia Pacific nations), and EMEA (which includes the United Kingdom, Ireland, Continental Europe, the Russian Federation, India, the Middle East and Africa).

Consumer Insurance products are distributed primarily to individual consumers or groups of consumers through a diverse, multi-channel distribution network that includes broker-dealers, agencies and independent marketing organizations, banks, brokers, partnerships, travel agents, affiliated financial advisors, and direct-to-consumer platforms.

Net investment income is attributed to the operating segments of Commercial Insurance and Consumer Insurance based on internal models consistent with the nature of the underlying businesses.

For Consumer Insurance - Personal Insurance, we estimate investable funds based primarily on loss reserves and unearned premiums. The net investment income allocation is calculated based on these estimated investable funds consistent with the approximate duration of the liabilities and a capital allocation for each operating segment.

For Consumer Insurance - Retirement and Consumer Insurance - Life, net investment income is attributed based on invested assets from segregated product line portfolios held in our Life Insurance Companies. The fundamental investment strategy for these product line portfolios is to maintain primarily a diversified, high quality portfolio of fixed maturity securities and, to the extent practicable, to approximately match established duration targets based on characteristics of the underlying liabilities. All invested assets of the Life Insurance Companies in excess of liabilities are allocated based on internal estimates of target statutory capital for each product line.

American International Group, Inc.
Notes (continued)

Consumer Insurance

Notes

- (1) Consumer pre-tax operating income and AIG consolidated pre-tax income in 4Q15 and 3Q15 included the net effect of adjustments to reflect the review and update of certain assumptions used to amortize DAC and related items for interest-sensitive products, including life and annuity spreads, mortality rates, surrender rates and variable annuity growth rates. The update of actuarial assumptions also included adjustments to reserves for universal life with secondary guarantees, group benefit claim reserves, loss recognition for certain long-term care products, and adjustments to the valuation of variable annuity GMWB features that are accounted for as embedded derivatives. Changes in the fair value of such embedded derivatives are recorded in net realized capital gains (losses) and, together with related DAC adjustments, are excluded from pre-tax operating income. In the aggregate, the net effect of adjustments to reflect the review and update of actuarial assumptions increased (decreased) pre-tax operating income as follows:

	Life		Fixed	Retirement Income		Group	Total Consumer	
	4Q15	3Q15	Annuities	4Q15	3Q15	Retirement	4Q15	3Q15
<i>(in millions)</i>

* Includes assumed premiums for certain Health products distributed by Laya Healthcare, which were assumed by a Commercial Insurance affiliate effective 1Q16.

American International Group, Inc.
Notes (continued)

Consumer Insurance

- (3) Base portfolio investment income includes interest, dividends and foreclosed real estate income, net of investment expenses.
- (4) Alternative investment income includes income on hedge funds, private equity funds and affordable housing partnerships. Hedge funds for which we elected the fair value option are recorded as of the balance sheet date. Other hedge funds are generally reported on a one-month lag, while private equity funds are generally reported on a one-quarter lag.
- (5) Net investment income - other enhancements include call and tender income, changes in market value of investments accounted for under the fair value option, interest received on defaulted investments (other than foreclosed real estate) and other miscellaneous investment income, including income of certain partnership entities that are required to be consolidated.
- (6) Net flows are provided for Fixed Annuities, Retirement Income Solutions, Retail Mutual Funds and Group Retirement. Annuity net flows represent premiums and deposits less death, surrender and other withdrawal benefits. Net flows related to mutual funds represent deposits less withdrawals. Life Insurance, Advisory Services, Group Benefits and Personal Insurance are not included in net flows. Net flows exclude activity related to closed blocks of fixed and variable annuities.
- (7) Includes return on base portfolio. Quarterly results are annualized.
- (8) Includes incremental effect on base yield of alternative investments. Quarterly results are annualized.
- (9) Includes incremental effect on base yield of other enhancements. Quarterly results are annualized.
- (10) Annuity surrender rates represent actual or annualized surrenders and withdrawals as a percentage of average account value.
- (11) Consumer Insurance uses reinsurance, product design and hedging to mitigate risks related to guaranteed benefits in individual annuity contracts. Certain GMDB benefits written before 2004 and the majority of GMIB benefits (which are not currently offered) are reinsured. Risk mitigation product design features for GMWB include rider fees indexed to an equity market volatility index, required minimum allocations to fixed accounts, and the use of volatility control funds. After reflecting product risk-mitigating features, we hedge our remaining economic exposure to market risk within GMWB and GMAB liabilities (GMAB is not currently offered) through our variable annuity hedging program, which is designed to provide additional protection against large and combined movements in interest rates, equity prices, credit spreads and market volatility under multiple scenarios. See Enterprise Risk Management – Life Insurance Companies Key Insurance Risks – Variable Annuity Risk Management and Hedging Program in our Annual Report on Form 10-K for the year ended December 31, 2015 for an additional discussion.
- (12) Life - Other income is primarily related to Laya Healthcare commission and profit sharing revenues received from insurers for distribution of their products. We acquired Laya Healthcare on March 31, 2015.
- (13) Life and A&H sales are shown on a continuous payment premium equivalent (CPPE) basis. Life insurance sales include periodic premiums from new business expected to be collected over a one-year period and 10 percent of unscheduled and single premiums from new and existing policyholders. Sales of A&H insurance represent annualized first-year premium from new policies.
- (14) Life insurance lapse rates are reported on a 90-day lag basis to include grace period processing. International lapse rates represent Fuji Life (Japan).
- (15) Natural catastrophe losses (CATs) are generally weather or seismic events having a net impact on AIG in excess of \$10 million each. Catastrophes also include certain man-made events, such as terrorism and civil disorders that meet the \$10 million threshold.
- (16) Severe losses are defined as non-catastrophic individual first party losses greater than \$10 million, net of related reinsurance and salvage and subrogation.
- (17) Computed using a constant exchange rate for each period.
- (18) Underwriting ratios are computed as follows:
 - a) Loss ratio = Losses and loss adjustment expenses incurred ÷ Net premiums earned (NPE)
 - b) CATs and reinstatement premiums = [Loss and loss adjustment expenses incurred – (CATs)] ÷ [NPE + Reinstatement premiums (RIPs) related to catastrophes] – Loss ratio
 - c) Prior year development net of premium adjustments = [Loss and loss adjustment expenses incurred – Prior year loss reserve development (favorable) unfavorable (PYD), net of reinsurance] ÷ [NPE + RIPs related to prior year catastrophes + (Additional) returned premium related to prior year development] – Loss ratio
 - d) Net reserve discount = -1*[Net reserve discount (benefit) charge ÷ NPE] (Note: any rounding will go into this line since Accident year loss ratio, as adjusted is calculated independently.)
 - e) Accident year loss ratio, as adjusted = [Loss and loss adjustment expenses incurred – CATs – PYD – Net reserve discount (benefit) charge] ÷ [NPE + RIPs related to catastrophes + RIPs related to prior year catastrophes + (Additional) returned premium related to PYD]
 - f) Acquisition ratio = Total acquisition expenses ÷ NPE
 - g) General operating expense ratio = General operating expenses ÷ NPE
 - h) Expense ratio = Acquisition ratio + General operating expenses ratio
 - i) Combined ratio = Loss ratio + Expense ratio
 - j) Accident year combined ratio = Accident year loss ratio, as adjusted + Expense ratio
- (19) The 2Q16 accident year loss ratio, as adjusted, includes a single large loss event which totaled \$33 million, of which \$16 million was related to first party losses (meeting the definition of severe losses) and \$17 million was related to third party losses, impacting the personal property business in the U.S.

Corporate and Other

- (1) 3Q15 included a \$175 million pre-tax pension curtailment gain related to freezing of the AIG Retirement Plan, the Non-Qualified Retirement Income Plan and the Supplemental Executive Retirement Plan.
- (2) Represents AIG's share of AerCap's pre-tax operating income through the June 2015 date of sale of a majority of our ordinary shares of AerCap, which excludes certain post-acquisition transaction expenses incurred by AerCap in connection with its acquisition of ILFC and the difference between expensing AerCap's maintenance rights asset over the remaining lease term as compared to the remaining economic life of the aircraft and our share of AerCap's income taxes.
- (3) Consists of the results of investments held by AIG Parent to support various corporate needs as well as the remaining positions of AIG Financial Products Corp. and related subsidiaries (collectively, AIGFP), life settlements, real estate, equipment leasing and lending and other secured lending investments held by AIG Parent and certain subsidiaries.
- (4) As a result of the progress of the wind down and de-risking activities of the Direct Investment Book (DIB) and the derivative portfolio of AIGFP included within Global Capital Markets (GCM), AIG has discontinued separate reporting of the DIB and GCM. Their results are reported within Income from other assets, net, beginning with the first quarter of 2015. This reporting aligns with the manner in which AIG manages its financial resources. Interest expense for 2Q16, 1Q16, 4Q15, 3Q15, and 2Q15 included \$13 million, \$13 million, \$13 million, \$13 million, and \$15 million, respectively, of interest expense previously reported in DIB results.
- (5) Property Casualty run-off insurance lines consists primarily of excess workers' compensation, asbestos and legacy environmental (1986 and prior); certain environmental liability, certain healthcare coverage, certain casualty and specialty coverages, and long-duration business in Japan. U.S. Life Insurance run-off insurance lines include American Security Life Insurance Company Limited, AIG Life Insurance Company (Switzerland) Ltd. and a reinsurance transaction of American International Reinsurance Company, Ltd. During the third and fourth quarters of 2015, certain environmental liability, healthcare, casualty and specialty coverages that are no longer offered by Commercial - Property Casualty were transferred to run-off Property Casualty insurance lines.
- (6) 4Q15 included \$311 million of net adverse prior year loss reserve development associated with certain environmental liability, healthcare, casualty and specialty coverages previously reported in Commercial - Property Casualty. 3Q15 included \$43 million of net adverse prior year loss reserve development associated with certain environmental liability, healthcare, casualty and specialty coverages previously reported in Commercial - Property Casualty, and excluded \$30 million of non-operating net adverse prior year loss reserve development.
- (7) In 1Q16, 4Q15, and 3Q15, \$1.3 billion, \$0.9 billion and \$0.3 billion, respectively, of loss reserves for certain environmental liability, casualty, healthcare, and specialty coverages, previously reported in Commercial Casualty and Specialty lines of business, were transferred to Other run-off insurance lines.

Consolidated Results

- (1) Includes the legal entities comprising the Mortgage Guaranty operating segment.
- (2) Includes consolidations, eliminations and other adjustments.
- (3) As of June 30, 2016, includes debt of consolidated investment vehicles related to real estate investments of \$2.5 billion, affordable housing partnership investments and securitizations of \$2.3 billion and other securitization vehicles and investments of \$273 million. At December 31, 2015, includes assets backed by debt of consolidated investment vehicles related to real estate investments of \$2.4 billion, affordable housing partnership investments and securitizations of \$2.2 billion, and other securitization vehicles and investments of \$359 million.
- (4) Includes the effect of consolidating previously unconsolidated partnerships.
- (5) Consists primarily of direct private equity investments.
- (6) Alternative investments include hedge funds, private equity funds and affordable housing partnerships.
- (7) Hedge funds for which we elected the fair value option are recorded as of the balance sheet date. Other hedge funds are generally reported on a one-month lag, while private equity funds are generally reported on one-quarter lag.
- (8) Changes in the value of the underlying investments in hedge funds and private equity funds that are accounted for under the equity method or fair value option are recorded in earnings. Changes in the value of the investments in similar funds included in Other are primarily recorded in accumulated other comprehensive income (AOCI).
- (9) Includes changes in the fair value of embedded derivatives and a portion of associated fees for variable annuity living benefit features (primarily GMWB) and changes in fair value of hedging instruments purchased to hedge the liabilities.
- (10) 2Q16, 1Q16, 4Q15, 3Q15, and 2Q15 included \$105 million, \$(483) million, \$136 million, \$(48) million, and \$34 million, respectively, of foreign exchange gains (losses) primarily due to a short term intercompany balance that was matched with available for sale investments in fixed maturity securities denominated in the same foreign currencies. Unrealized gains and losses on the available for sale investments were recorded in other comprehensive income resulting in an immaterial impact on our overall equity or book value per share from this arrangement.
- (11) Includes impairments on investments in life settlements.
