
**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549**

Form 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the quarterly period ended March 31, 2011

Commission File Number 1-8787

American International Group, Inc.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

180 Maiden Lane, New York, New York
(Address of principal executive offices)

13-2592361

(I.R.S. Employer
Identification No.)

10038
(Zip Code)

Registrant's telephone number, including area code: (212) 770-7000

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer
(Do not check if a smaller
reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of April 29, 2011, there were 1,796,747,575 shares outstanding of the registrant's common stock.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

1. Basis of Presentation and Recent Events

These unaudited condensed consolidated financial statements do not include all disclosures that are normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States (GAAP) and should be read in conjunction with the audited consolidated financial statements and the related notes included in the Annual Report on Form 10-K of American International Group, Inc. (AIG) for the year ended December 31, 2010 (AIG's 2010 Annual Report on Form 10-K). The condensed consolidated financial information as of December 31, 2010 has been derived from audited consolidated financial statements not included herein.

Financial information for certain foreign subsidiaries is reported on different period end bases, in most cases one month prior to AIG. The effect on AIG's consolidated financial condition and results of operations of all material events occurring between January 1, 2011 and March 31, 2011 has been recorded in the first quarter of 2011. AIG determined the Great Tohoku Earthquake & Tsunami (the Tohoku Catastrophe) in Japan in March 2011 to be an intervening event that had a material effect on AIG's consolidated financial position and results of operations. Accordingly, AIG recorded catastrophe losses for these entities from the Tohoku Catastrophe of \$864 million in its Chartis International operations related to this event.

In the opinion of management, these consolidated financial statements contain the normal recurring adjustments necessary for a fair statement of the results presented herein. Interim period operating results may not be indicative of the operating results for a full year. AIG evaluated the need to recognize or disclose events that occurred subsequent to the balance sheet date. All material intercompany accounts and transactions have been eliminated.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires the application of accounting policies that often involve a significant degree of judgment. AIG considers that its accounting policies that are most dependent on the application of estimates and assumptions are those relating to items considered by management in the determination of:

- insurance liabilities, including general insurance unpaid claims and claims adjustment expenses and future policy benefits for life and accident and health contracts;
- recoverability of assets, including deferred policy acquisition costs (DAC) and flight equipment;
- estimated gross profits for investment-oriented products;
- impairment charges, including other-than-temporary impairments;
- liabilities for legal contingencies;
- estimates with respect to income taxes, including recoverability of deferred tax assets;
- fair value measurements of certain financial assets and liabilities, including credit default swaps (CDS) and AIG's economic interest in Maiden Lane II LLC (ML II) and equity interest in Maiden Lane III LLC (ML III) (together, the Maiden Lane Interests); and
- classification of entities as held for sale or as discontinued operations.

These accounting estimates require the use of assumptions about matters, some of which are highly uncertain at the time of estimation. To the extent actual experience differs from the assumptions used, AIG's consolidated financial condition, results of operations and cash flows could be materially affected.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

Reclassifications

Due to changes in the relative composition of AIG's remaining continuing operations as a result of the substantial completion of AIG's asset disposition plan, AIG is presenting separately the following line items on its Consolidated Statement of Income (Loss) beginning in the current quarter:

Current line item:	Previously included in line item:
Policy fees ^(a)	Premiums and other considerations
Aircraft leasing revenues and Aircraft leasing expenses, respectively	Other income and Other expenses, respectively
Interest credited to policyholder account balances ^(b)	Policyholder benefits and claims incurred
Amortization of deferred acquisition costs	Policy acquisition and other insurance expenses

(a) *Represents fees recognized from universal life and investment-type products, consisting of policy charges for the cost of insurance, policy administration charges, amortization of unearned revenue reserves and surrender charges.*

(b) *Represents interest on account-value-based policyholder deposits, consisting of amounts credited on non-equity-indexed account values, accretion to the host contract for equity indexed products, and net amortization of sales inducements.*

Prior period amounts were reclassified to conform to the current period presentation for the above line items. Additionally, certain other reclassifications have been made to prior period amounts in the Consolidated Statement of Income (Loss) and Consolidated Balance Sheet to conform to the current period presentation. See Notes 3 and 4 herein for revisions and reclassifications to prior period amounts attributable to discontinued operations.

Recent Events

AIG completed the Recapitalization (described below) and has substantially completed its asset disposition plan and has executed multiple capital markets transactions.

Recapitalization

On January 14, 2011 (the Closing), AIG completed a series of integrated transactions to recapitalize AIG (the Recapitalization) with the United States Department of the Treasury (the Department of the Treasury), the Federal Reserve Bank of New York (the FRBNY) and the AIG Credit Facility Trust (the Trust), including the repayment of all amounts owed under the Credit Agreement, dated as of September 22, 2008 (as amended, the FRBNY Credit Facility). AIG recognized a loss on extinguishment of debt in the first quarter of 2011, representing primarily accelerated amortization of the prepaid commitment fee asset resulting from the termination of the FRBNY Credit Facility on January 14, 2011.

Repayment and Termination of the FRBNY Credit Facility

At the Closing, AIG repaid to the FRBNY approximately \$21 billion in cash, representing complete repayment of all amounts owed under the FRBNY Credit Facility, and the FRBNY Credit Facility was terminated. The funds for the repayment came from the net cash proceeds from AIG's sale of 67 percent of the ordinary shares of AIA Group Limited (AIA) in its initial public offering and from AIG's sale of American Life Insurance Company (ALICO). These funds were loaned to AIG, in the form of secured limited recourse debt (the SPV Intercompany Loans), from the special purpose vehicles that held the proceeds of the AIA IPO and the ALICO sale (the AIA SPV and the ALICO SPV, respectively, and collectively, the SPVs, and such loans, the SPV Intercompany Loans). The SPV Intercompany Loans are secured by pledges and any proceeds received from the sale by AIG and certain of its subsidiaries of, among other collateral, all or part of their equity interests in Nan Shan Life Insurance Company, Ltd. (Nan Shan) and International Lease Finance Corporation (ILFC and, together with Nan Shan, the Designated Entities), as well as the remaining AIA ordinary shares held by the AIA SPV. Until their

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

sale on February 1, 2011, AIG's Japan-based life insurance subsidiaries, AIG Star Life Insurance Company Ltd. (AIG Star) and AIG Edison Life Insurance Company (AIG Edison), were also Designated Entities.

Repurchase and Exchange of SPV Preferred Interests

At the Closing, AIG drew down approximately \$20.3 billion (the Series F Closing Drawdown Amount) under the Department of the Treasury's commitment (the Department of the Treasury Commitment (Series F)) pursuant to the Securities Purchase Agreement, dated as of April 17, 2009 (the Series F SPA), between AIG and the Department of the Treasury relating to AIG's Series F Fixed Rate Non-Cumulative Perpetual Preferred Stock, par value \$5.00 per share (the Series F Preferred Stock). The Series F Closing Drawdown Amount was the full amount remaining under the Department of the Treasury Commitment (Series F), less \$2 billion that AIG designated to be available after the closing for general corporate purposes under a commitment relating to AIG's Series G Cumulative Mandatory Convertible Preferred Stock, par value \$5.00 per share (the Series G Preferred Stock), described below (the Series G Drawdown Right). The right of AIG to draw on the Department of the Treasury Commitment (Series F) (other than the Series G Drawdown Right) was terminated.

AIG used the Series F Closing Drawdown Amount to repurchase all of the FRBNY's preferred interests in the SPVs (the SPV Preferred Interests). AIG transferred the SPV Preferred Interests to the Department of the Treasury as part of the consideration for the exchange of the Series F Preferred Stock described below.

The Department of the Treasury, so long as it holds SPV Preferred Interests, has the right, subject to existing contractual restrictions, to require AIG to dispose of the remaining AIA common shares held by the AIA SPV. In addition, the consent of the Department of the Treasury, so long as it holds SPV Preferred Interests, will be required for AIG to take specified significant actions with respect to the Designated Entities, including initial public offerings, sales, significant acquisitions or dispositions and incurrence of specified levels of indebtedness. If any SPV Preferred Interests are outstanding on May 1, 2013, the Department of the Treasury will have the right to compel the sale of all or a portion of one or more of the Designated Entities on terms that it will determine.

As a result of these transactions, the SPV Preferred Interests are no longer considered permanent equity on AIG's balance sheet, and are classified as Redeemable noncontrolling nonvoting, callable, junior preferred interests in partially owned consolidated subsidiaries held by the Department of the Treasury.

Issuance of AIG's Series G Preferred Stock

At the Closing, AIG and the Department of the Treasury amended and restated the Series F SPA to provide for the issuance of 20,000 shares of Series G Preferred Stock by AIG to the Department of the Treasury. The Series G Preferred Stock was issued with a liquidation preference of zero, which will increase by the amount of any funds drawn down by AIG under the Series G Drawdown Right from the Closing until March 31, 2012 (or the earlier termination of the Series G Drawdown Right).

Dividends on the Series G Preferred Stock are payable on a cumulative basis at a rate per annum of 5 percent, compounded quarterly, of the aggregate liquidation preference outstanding from time to time of the Series G Preferred Stock and may be paid, at AIG's option, in cash or in increases in the liquidation preference.

The available funding under the Series G Drawdown Right that may be used for general corporate purposes will be reduced by the amount of net proceeds of future AIG equity offerings. Net proceeds from an equity offering in excess of the available funding under the Series G Drawdown Right will be required to be used to pay down any liquidation preference of the Series G Preferred Stock. The Series G Preferred Stock is redeemable at any time in cash at AIG's option, at a redemption price equal to the liquidation preference plus accrued and unpaid dividends.

If the Series G Preferred Stock has an outstanding liquidation preference on March 31, 2012, it will be converted into a number of shares of AIG common stock, par value \$2.50 per share (AIG Common Stock), equal to the amount of the liquidation preference on that date plus accrued and unpaid dividends divided by \$29.29.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

Exchange of AIG's Series C, E and F Preferred Stock for AIG Common Stock and Series G Preferred Stock

At the Closing:

- the shares of AIG's Series C Perpetual, Convertible, Participating Preferred Stock, par value \$5.00 per share (the Series C Preferred Stock), held by the Trust were exchanged for 562,868,096 shares of newly issued AIG Common Stock which were subsequently transferred by the Trust to the Department of the Treasury;
- the shares of AIG's Series E Fixed Rate Non-Cumulative Perpetual Preferred Stock, par value \$5.00 per share (the Series E Preferred Stock), held by the Department of the Treasury were exchanged for 924,546,133 newly issued shares of AIG Common Stock;
- the shares of the Series F Preferred Stock held by the Department of the Treasury were exchanged for (a) the SPV Preferred Interests, (b) 20,000 shares of the Series G Preferred Stock and (c) 167,623,733 shares of newly issued AIG Common Stock; and
- as a result of the Recapitalization and at March 31, 2011, the Department of the Treasury holds 1,655,037,962 shares of AIG Common Stock, representing ownership of approximately 92.2 percent of outstanding AIG Common Stock.

The issuance of AIG Common Stock as described above significantly affected the determination of net income attributable to common shareholders and the weighted average shares outstanding, both of which are used to compute earnings per share. See Note 12 herein for further discussion.

AIG entered into a registration rights agreement with the Department of the Treasury that granted the Department of the Treasury registration rights with respect to the shares of AIG Common Stock issued at the Closing, including:

- the right to participate in any registered offering of AIG Common Stock by AIG after the Closing;
- the right to demand no more than twice in any 12-month period that AIG effect a registered market offering of its shares after the earlier of August 15, 2011 and the date of AIG's completion of a primary equity offering;
- the right to engage in at-the-market offerings; and
- subject to certain exceptions, the right to approve the terms, conditions and pricing of any registered offering in which it participates until its ownership falls below 33 percent of AIG's voting securities.

AIG has the right to:

- raise up to \$3 billion (and up to an additional \$4 billion with the consent of the Department of the Treasury) by January 14, 2012 in a registered primary offering; and
- raise the greater of \$2 billion and the amount of the projected deficit if the AIG Board of Directors determines, after consultation with the Department of the Treasury, that due to events affecting AIG's insurance subsidiaries, AIG Parent's reasonably projected aggregate liquidity (cash, cash equivalents and commitments of credit, but not the Series G Drawdown Right) will fall below \$8 billion within 12 months of the date of such determination.

Until the Department of the Treasury's ownership of AIG's voting securities falls below 33 percent, the Department of the Treasury will, subject to certain exceptions, have complete control over the terms, conditions and pricing of any offering in which it participates, including any primary offering by AIG. As a result, if AIG seeks to conduct an offering of its equity securities (other than an offering described in the preceding paragraph) the Department of the Treasury may decide to participate in the offering, and to prevent AIG from selling any equity securities.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

Issuance of Warrants to Purchase AIG Common Stock

On January 19, 2011, as part of the Recapitalization, AIG issued to the holders of record of AIG Common Stock as of January 13, 2011, by means of a dividend, ten-year warrants to purchase a total of 74,997,778 shares of AIG Common Stock at an exercise price of \$45.00 per share. AIG retained 67,650 of these warrants for tax withholding purposes. Warrants were not issued to the Trust, the Department of the Treasury or the FRBNY.

Sales of Businesses

- On February 1, 2011, AIG completed the sale of AIG Star and AIG Edison to Prudential Financial, Inc., for \$4.8 billion, consisting of \$4.2 billion in cash and \$0.6 billion in the assumption of third-party debt. Of the \$4.2 billion in cash, AIG retained \$2 billion to support the capital of Chartis pursuant to an agreement with the Department of the Treasury, and caused the remaining amount to be applied to repay the Department of the Treasury's SPV Preferred Interests. AIG recognized a pre-tax gain of \$1.9 billion on the sale which is reflected in Net income from discontinued operations in the Consolidated Statement of Income.
- On January 12, 2011, AIG entered into an agreement to sell its 97.57 percent interest in Nan Shan Life Insurance Company, Ltd. (Nan Shan) for \$2.16 billion in cash.

See Note 4 to the Consolidated Financial Statements for additional information on these transactions.

Sale of MetLife Securities

On March 1, 2011, AIG entered into a Coordination Agreement among the ALICO SPV, AIG and MetLife, Inc. (MetLife) regarding a series of integrated transactions (the MetLife Disposition) whereby MetLife agreed to allow AIG to offer for sale the MetLife securities that AIG received when it sold ALICO to MetLife earlier than contemplated under the original terms of the ALICO sale (the ALICO Sale). The MetLife Disposition included (i) the sale of MetLife common stock, par value \$0.01 per share, and the sale of common equity units of MetLife pursuant to two separate underwritten public offerings and (ii) the sale by the ALICO SPV of MetLife preferred stock to MetLife.

In connection with the MetLife Disposition, on March 1, 2011, AIG and the ALICO SPV also entered into a letter agreement with the Department of the Treasury pursuant to which AIG and the ALICO SPV received the consent of the Department of the Treasury to the MetLife Disposition. AIG completed the MetLife Disposition on March 8, 2011 for a total of \$9.6 billion and used \$6.6 billion of the proceeds to repay all of the liquidation preference and accrued return of the Department of the Treasury's ALICO SPV Preferred Interests and a portion of the liquidation preference and accrued return of the Department of the Treasury's AIA SPV Preferred Interests. AIG recognized a loss of \$348 million on the disposition in the quarter ended March 31, 2011, representing the decline in securities value since December 31, 2010 due to market conditions. Of this amount, \$191 million is reflected in Net realized capital losses and \$157 million is reflected in Net investment income in the Consolidated Statement of Income (Loss). The remaining proceeds were placed in escrow to secure indemnities provided to MetLife under the original terms of the ALICO stock purchase agreement as described in Note 11 herein.

Liquidity Assessment

In assessing AIG's current financial flexibility and developing operating plans for the future, management has made significant judgments and estimates with respect to the potential financial and liquidity effects of AIG's risks and uncertainties, including but not limited to:

- the potential for declines in bond and equity markets;
- the potential effect on AIG if the capital levels of its regulated and unregulated subsidiaries prove inadequate to support current business plans;

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

- AIG's continued ability to generate cash flow from operations;
- the potential adverse effects on AIG's businesses that could result if there are further downgrades by rating agencies; and
- the potential for regulatory limitations on AIG's business in one or more countries.

AIG believes that it has sufficient liquidity to meet future liquidity requirements, including reasonably foreseeable contingencies and events.

Supplementary Disclosure of Cash Flow Information

Three Months Ended March 31, <i>(in millions)</i>	2011	2010
Supplementary disclosure of cash flow information:		
Cash paid during the period for:		
Interest*	\$ (5,796)	\$ (1,047)
Taxes	\$ (384)	\$ (604)
Non-cash financing/investing activities:		
Interest credited to policyholder contract deposits included in financing activities	\$ 1,255	\$ 2,086
Debt assumed on consolidation of variable interest entities	\$ -	\$ 2,591
Debt assumed on acquisition	\$ -	\$ 164

* Includes payment of FRBNY credit facility accrued compounded interest of \$4.7 billion in the three months ended March 31, 2011.

2. Summary of Significant Accounting Policies**Recent Accounting Standards*****Future Application of Accounting Standards******A Creditor's Determination of Whether a Restructuring is a Troubled Debt Restructuring***

In April 2011, the Financial Accounting Standards Board (FASB) issued an accounting standard update that amends the guidance for a creditor's evaluation of whether a restructuring is a troubled debt restructuring and requires additional disclosures about a creditor's troubled debt restructuring activities. The new standard clarifies the existing guidance on the two criteria used by creditors to determine whether a modification or restructuring is a troubled debt restructuring: (i) whether the creditor has granted a concession and (ii) whether the debtor is experiencing financial difficulties. The new standard is effective for interim and annual periods beginning on July 1, 2011 with early adoption permitted. AIG is required to apply the guidance in the accounting standard retrospectively for all modifications and restructuring activities that have occurred since January 1, 2011. For receivables that are newly considered impaired under the guidance, AIG is required to measure the impairment of those receivables prospectively in the first period of adoption. In addition, AIG must begin providing the disclosures about troubled debt restructuring activities in the period of adoption. AIG is currently assessing the effect of adoption of this new standard on its consolidated financial condition, results of operations and cash flows.

Accounting for Costs Associated with Acquiring or Renewing Insurance Contracts

In October 2010, the FASB issued an accounting standard update that amends the accounting for costs incurred by insurance companies that can be capitalized in connection with acquiring or renewing insurance contracts. The new standard clarifies how to determine whether the costs incurred in connection with the acquisition of new or renewal insurance contracts qualify as deferred acquisition costs. The new standard is effective for interim and annual periods beginning on January 1, 2012 with early adoption permitted. Prospective or retrospective

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

application is also permitted. AIG elected not to early adopt the standard and has not yet determined whether it will subsequently adopt it prospectively or retrospectively. Upon adoption, retrospective application would result in a reduction to beginning retained earnings for the earliest period presented, whereas prospective application would result in higher amortization expense being recognized in current and future periods relative to the retrospective method. The accounting standard update will result in a decrease in the amount of capitalized costs in connection with the acquisition or renewal of insurance contracts as AIG will only defer costs that are incremental and directly related to the successful acquisition of new or renewal business. AIG is currently assessing the effect of adoption of this new standard on its consolidated financial condition, results of operations and cash flows.

Accounting Standards Adopted During 2011

AIG adopted the following accounting standards during the first quarter of 2011:

Consolidation of Investments in Separate Accounts

In April 2010, the FASB issued an accounting standard that clarifies that an insurance company should not combine any investments held in separate account interests with its interest in the same investment held in its general account when assessing the investment for consolidation. Separate accounts represent funds for which investment income and investment gains and losses accrue directly to the policyholders who bear the investment risk. The standard also provides guidance on how an insurer should consolidate an investment fund in situations in which the insurer concludes that consolidation of an investment is required and the insurer's interest is through its general account in addition to any separate accounts. The new standard became effective for AIG on January 1, 2011. The adoption of this new standard did not have a material effect on AIG's consolidated financial condition, results of operations or cash flows.

Fair Value Measurements and Disclosures

In January 2010, the FASB issued updated guidance that requires fair value disclosures about significant transfers between Level 1 and 2 measurement categories and separate presentation of purchases, sales, issuances, and settlements within the rollforward of Level 3 activity. Also, this updated fair value guidance clarifies the disclosure requirements about the level of disaggregation and valuation techniques and inputs. This new guidance was effective for AIG beginning on January 1, 2010, except for the disclosures about purchases, sales, issuances, and settlements within the rollforward of Level 3 activity, which were effective for AIG beginning on January 1, 2011. See Note 6 herein.

3. Segment Information

AIG reports the results of its operations through three reportable segments: Chartis, SunAmerica Financial Group (SunAmerica) and Financial Services. AIG evaluates performance based on pre-tax income (loss), excluding results from discontinued operations and net (gains) losses on sales of divested businesses, because AIG believes that this provides more meaningful information on how its operations are performing.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

The following table presents AIG's operations by reportable segment:

<i>(in millions)</i>	Reportable Segment				Total	Consolidation and Eliminations	Consolidated
	Chartis	SunAmerica	Financial Services	Other Operations			
Three Months Ended March 31, 2011

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)***4. Discontinued Operations and Held-for-Sale Classification****Discontinued Operations*****AIG Star and AIG Edison Sale***

On September 30, 2010, AIG entered into a definitive agreement with Prudential Financial, Inc. for the sale of its Japan-based insurance subsidiaries, AIG Star and AIG Edison, for total consideration of \$4.8 billion, including the assumption of certain outstanding debt totaling \$0.6 billion owed by AIG Star and AIG Edison. The transaction closed on February 1, 2011 and AIG recognized a pre-tax gain of \$1.9 billion on the sale which is reflected in Income from discontinued operations, net of income tax expense, in the Consolidated Statement of Income (Loss). AIG has no continuing significant involvement with or significant continuing cash flows from AIG Star and AIG Edison. In connection with the sale, AIG recorded a goodwill impairment charge of \$1.3 billion in 2010.

Nan Shan Sale Agreement

On January 12, 2011, AIG entered into an agreement to sell its 97.57 percent interest in Nan Shan for \$2.16 billion to a Taiwan-based consortium. While AIG believes the consortium meets certain basic criteria established by the Financial Supervisory Commission of Taiwan, the transaction is still subject to regulatory approvals and customary closing conditions. The sale of Nan Shan is expected to be consummated in 2011. AIG continues to classify Nan Shan as a discontinued operation for all periods presented since AIG will not retain any interest or continuing involvement with Nan Shan and AIG is not expected to have significant continuing cash flows from Nan Shan.

These transactions met the criteria for held for sale accounting and discontinued operations classification.

Nan Shan, AIG Star and AIG Edison previously were components of the Foreign Life Insurance & Retirement Services reportable segment. Results from discontinued operations for the three months ended March 31, 2011 and 2010 include the results of AIG Star and AIG Edison through the date of disposal, and Nan Shan. Results from discontinued operations for the three months ended March 31, 2010 also include the results of ALICO and American General Finance, Inc. (AGF), which were sold during 2010. See Note 4 to the Consolidated Financial Statements in AIG's 2010 Annual Report on Form 10-K for discussion of these sales and Note 11 herein for a discussion of guarantees and indemnifications associated with sales of businesses.

The following table summarizes income (loss) from discontinued operations:

Three Months Ended March 31, (in millions)	2011	2010
Revenues:		
Premiums	\$ 2,549	\$ 5,030
Net investment income	712	1,892
Net realized capital gains (losses)	369	(151)
Other income	5	550
Total revenues	3,635	7,321
Benefits, claims and expenses	3,094	6,633
Interest expense allocation	2	19
Income from discontinued operations	539	669
Gain (loss) on sales	1,594	(107)
Income from discontinued operations, before income tax expense	2,133	562
Income tax expense	480	219
Income from discontinued operations, net of income tax expense	\$ 1,653	\$ 343

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)***Held-for-Sale Classification**

The aggregate held-for-sale assets and liabilities are presented separately as single line items in the asset and liability sections of the Consolidated Balance Sheet at March 31, 2011 for Nan Shan and December 31, 2010 for Nan Shan, AIG Star and AIG Edison.

The following table summarizes assets and liabilities held for sale:

<i>(in millions)</i>	March 31, 2011	December 31, 2010
Assets:		
Fixed maturity securities	\$ 42,016	\$ 77,905
Deferred policy acquisition costs	3,628	7,095
Mortgage and other loans receivable, net	4,111	5,584
Equity securities	2,766	4,488
Other invested assets	2,038	4,167
Short-term investments	1,488	3,670
Separate account assets	3,934	3,745
Other assets	(1,228)	544

Other long-term debt	-	525
Other liabilities	2,540	4,428
Total liabilities held for sale	\$ 54,236	\$ 97,312

* Represents one and nine aircraft that remain to be sold under agreements for sale by ILFC as of March 31, 2011 and December 31, 2010, respectively.

5. Business Combination

On March 31, 2010, AIG, through a Chartis International subsidiary, purchased additional voting shares in Fuji Fire & Marine Insurance Company Limited (Fuji), a publicly traded Japanese insurance company with property/casualty insurance operations and a life insurance subsidiary. The acquisition of the additional voting shares for \$145 million increased Chartis International's total voting ownership interest in Fuji from 41.7 percent to 54.8 percent, which resulted in Chartis International obtaining control of Fuji. This acquisition was consistent with Chartis International's desire to increase its share in the substantial Japanese insurance market, which is undergoing significant consolidation, and to achieve cost savings from synergies.

In February 2011 Chartis announced a cash tender offer for all of the remaining common shares and stock acquisition rights of Fuji that it did not previously own. The tender offer period expired on March 24, 2011, and approximately 305 million shares were tendered at an offer price of 146 Yen per share (\$1.76 per share) for a purchase price of \$538 million. As of March 31, 2011, Chartis owned 98.4 percent of Fuji's outstanding voting shares.

The 2011 purchase was accounted for as an equity transaction because AIG previously consolidated Fuji due to its controlling interest. Accordingly, the difference between the fair value of the consideration paid of \$538 million and the carrying value of the noncontrolling interest acquired of \$509 million was recognized as a reduction of AIG's equity. Identifiable net assets remained unchanged and there was no gain or loss recorded in consolidated net income.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

6. Fair Value Measurements

Fair Value Measurements on a Recurring Basis

AIG measures the following financial instruments at fair value on a recurring basis:

- trading and available for sale securities portfolios;
- certain mortgage and other loans receivable;
- derivative assets and liabilities;
- non-traded equity investments and certain private limited partnerships and certain hedge funds included in Other invested assets;
- equity interest in AIA accounted for under the fair value option;
- certain short-term investments;
- securities purchased under agreements to resell included in Short-term investments;
- securities sold under agreements to repurchase and securities and spot commodities sold but not yet purchased included in Other liabilities;
- separate account assets;
- certain policyholder contract deposits;
- certain trust deposits and deposits due to banks and other depositors included in Other liabilities;
- certain long-term debt; and
- certain hybrid financial instruments included in Other liabilities.

The fair value of a financial instrument is the amount that would be received from the sale of an asset or paid to transfer a liability in an orderly transaction between willing, able and knowledgeable market participants at the measurement date.

The degree of judgment used in measuring the fair value of financial instruments generally correlates with the level of observable valuation inputs. AIG maximizes the use of observable inputs and minimizes the use of unobservable inputs when measuring fair value. Financial instruments with quoted prices in active markets generally have more pricing observability and less judgment is used in measuring fair value. Conversely, financial instruments for which no quoted prices are available have less observability and are measured at fair value using valuation models or other pricing techniques that require more judgment. Pricing observability is affected by a number of factors, including the type of financial instrument, whether the financial instrument is new to the market and not yet established, the characteristics specific to the transaction, liquidity and general market conditions.

Fair Value Hierarchy

Assets and liabilities recorded at fair value in the Consolidated Balance Sheet are measured and classified in a hierarchy for disclosure purposes consisting of three “levels” based on the observability of inputs available in the marketplace used to measure the fair values as discussed below:

- *Level 1:* Fair value measurements that are quoted prices (unadjusted) in active markets that AIG has the ability to access for identical assets or liabilities. Market price data generally is obtained from exchange or dealer markets. AIG does not adjust the quoted price for such instruments. Assets and liabilities measured at fair value on a recurring basis and classified as Level 1 include certain government and agency securities, actively traded listed common stocks and futures and options contracts, most separate account assets and most mutual funds.
- *Level 2:* Fair value measurements based on inputs other than quoted prices included in Level 1, that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. Assets and liabilities measured at fair value on a recurring basis and classified as Level 2 generally include certain government and agency securities, most investment-grade and high-yield corporate bonds, certain residential mortgage-backed securities (RMBS), certain commercial mortgage-backed securities (CMBS) and certain collateralized loan obligations/asset backed securities (CLO/ABS), certain listed equities, state, municipal and provincial obligations, hybrid securities, securities purchased (sold) under agreements to resell (repurchase), certain mutual fund and hedge fund investments, certain interest rate, currency and commodity derivative contracts, guaranteed investment agreements (GIAs) for the Direct Investment business, other long-term debt and physical commodities.

- *Level 3:* Fair value measurements based on valuation techniques that use significant inputs that are unobservable. Both observable and unobservable inputs may be used to determine the fair values of positions classified in Level 3. These measurements include circumstances in which there is little, if any, market activity for the asset or liability. Therefore, AIG must make certain assumptions as to the inputs a hypothetical market participant would use to value that asset or liability. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety. AIG's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment. In making the assessment, AIG considers factors specific to the asset or liability. Assets and liabilities measured at fair value on a recurring basis and classified as Level 3 include certain RMBS, CMBS and collateralized debt obligations/asset backed securities (CDO/ABS), corporate debt, certain municipal and sovereign debt, certain derivative contracts (including Capital Markets super senior credit default swap portfolio), policyholder contract deposits carried at fair value, private equity and real estate fund investments, and direct private equity investments. AIG's non-financial instrument assets that are measured at fair value on a non-recurring basis generally are classified as Level 3.

The following is a description of the valuation methodologies used for instruments carried at fair value. These methodologies are applied to assets and liabilities across the levels noted above, and it is the observability of the inputs used that determines the appropriate level in the fair value hierarchy for the respective asset or liability.

Valuation Methodologies

Incorporation of Credit Risk in Fair Value Measurements

- *AIG's Own Credit Risk.* Fair value measurements for certain Direct Investment business debt, GIAs, structured note liabilities and freestanding derivatives, as well as Capital Markets derivatives, incorporate AIG's own credit risk by determining the explicit cost for each counterparty to protect against its net credit exposure to AIG at the balance sheet date by reference to observable AIG credit default swap or cash bond spreads. A derivative counterparty's net credit exposure to AIG is determined based on master netting agreements, when applicable, which take into consideration all derivative positions with AIG, as well as cash collateral posted by AIG with the counterparty at the balance sheet date.

Fair value measurements for embedded policy derivatives and policyholder contract deposits take into consideration that policyholder liabilities are senior in priority to general creditors of AIG and therefore are much less sensitive to changes in AIG credit default swap or cash issuance spreads.

- *Counterparty Credit Risk.* Fair value measurements for freestanding derivatives incorporate counterparty credit by determining the explicit cost for AIG to protect against its net credit exposure to each counterparty at the balance sheet date by reference to observable counterparty credit default swap spreads, when available. When not available, other directly or indirectly observable credit spreads will be used to derive the best estimates of the counterparty spreads. AIG's net credit exposure to a counterparty is determined based on master netting agreements, which take into consideration all derivative positions with the counterparty, as well as cash collateral posted by the counterparty at the balance sheet date.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

A CDS is a derivative contract that allows the transfer of third party credit risk from one party to the other. The buyer of the CDS pays an upfront and/or periodic premium to the seller. The seller's payment obligation is triggered by the occurrence of a credit event under a specified reference security and is determined by the loss on that specified reference security. The present value of the amount of the upfront and/or periodic premium therefore represents a market-based expectation of the likelihood that the specified reference party will fail to perform on the reference obligation, a key market observable indicator of non-performance risk (the CDS spread).

Fair values for fixed maturity securities based on observable market prices for identical or similar instruments implicitly incorporate counterparty credit risk. Fair values for fixed maturity securities based on internal models incorporate counterparty credit risk by using discount rates that take into consideration cash issuance spreads for similar instruments or other observable information.

The cost of credit protection is determined under a discounted present value approach considering the market levels for single name CDS spreads for each specific counterparty, the mid market value of the net exposure (reflecting the amount of protection required) and the weighted average life of the net exposure. CDS spreads are provided to AIG by an independent third party. AIG utilizes an interest rate based on the benchmark London Interbank Offered Rate (LIBOR) curve to derive its discount rates.

While this approach does not explicitly consider all potential future behavior of the derivative transactions or potential future changes in valuation inputs, AIG believes this approach provides a reasonable estimate of the fair value of the assets and liabilities, including consideration of the impact of non-performance risk.

Fixed Maturity Securities — Trading and Available for Sale

Whenever available, AIG obtains quoted prices in active markets for identical assets at the balance sheet date to measure fixed maturity securities at fair value in its trading and available for sale portfolios. Market price data is generally obtained from dealer markets.

Management is responsible for the determination of the value of the investments carried at fair value and the supporting methodologies and assumptions. AIG employs independent third-party valuation service providers to gather, analyze, and interpret market information and derive fair values based upon relevant methodologies and assumptions for individual instruments. When AIG's valuation service providers are unable to obtain sufficient market observable information upon which to estimate the fair value for a particular security, fair value is determined either by requesting brokers who are knowledgeable about these securities to provide a quote, which is generally non-binding, or by employing widely accepted valuation models.

Valuation service providers typically obtain data about market transactions and other key valuation model inputs from multiple sources and, through the use of widely accepted valuation models, provide a single fair value measurement for individual securities for which a fair value has been requested under the terms of service agreements. The inputs used by the valuation service providers include, but are not limited to, market prices from recently completed transactions and transactions of comparable securities, benchmark yields, interest rate yield curves, credit spreads, currency rates, quoted prices for similar securities and other market-observable information, as applicable. The valuation models take into account, among other things, market observable information as of the measurement date as well as the specific attributes of the security being valued, including its term, interest rate, credit rating, industry sector, and when applicable, collateral quality and other security or issuer-specific information. When market transactions or other market observable data is limited, the extent to which judgment is applied in determining fair value is greatly increased.

AIG has processes designed to ensure that the values received or internally estimated are accurately recorded, that the data inputs and the valuation techniques utilized are appropriate and consistently applied and that the assumptions are reasonable and consistent with the objective of determining fair value. AIG assesses the reasonableness of individual security values received from valuation service providers through various analytical techniques. In addition, AIG may validate the reasonableness of fair values by comparing information obtained from AIG's valuation service providers to other third-party valuation sources for selected securities. AIG also

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

validates prices for selected securities obtained from brokers through reviews by members of management who have relevant expertise and who are independent of those charged with executing investing transactions.

The methodology above is relevant for all fixed maturity securities; following are discussions of certain procedures unique to specific classes of securities.

Fixed Maturity Securities issued by Government Entities

For most debt securities issued by government entities, AIG obtains fair value information from independent third-party valuation service providers, as quoted prices in active markets are generally only available for limited debt securities issued by government entities. The fair values received from these valuation service providers may be based on a market approach using matrix pricing, which considers a security's relationship to other securities for which quoted prices in an active market may be available, or alternatively based on an income approach, which uses valuation techniques to convert future cash flows to a single present value amount.

Fixed Maturity Securities issued by Corporate Entities

For most debt securities issued by corporate entities, AIG obtains fair value information from third-party valuation service providers. For certain corporate debt securities, AIG obtains fair value information from brokers. For those corporate debt instruments (for example, private placements) that are not traded in active markets or that are subject to transfer restrictions, valuations are adjusted to reflect illiquidity and/or non-transferability, and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

RMBS, CMBS, CDOs and other ABS

Third-party valuation service providers also provide fair value information for the majority of AIG investments in RMBS, CMBS, CDOs and other ABS. Where pricing is not available from valuation service providers, AIG obtains fair value information from brokers. Broker prices may be based on an income approach, which converts expected future cash flows to a single present value amount, with specific consideration of inputs relevant to structured securities, including ratings, collateral types, geographic concentrations, underlying loan vintages, loan delinquencies, and weighted average coupons and maturities. Broker prices may also be based on a market approach that considers recent transactions involving identical or similar securities. When the volume or level of market activity for an investment in RMBS, CMBS, CDOs or other ABS is limited, certain inputs used to determine fair value may not be observable in the market.

Maiden Lane II and Maiden Lane III

At their inception, AIG's interests in ML II and ML III were valued and recorded at the transaction prices of \$1 billion and \$5 billion, respectively. Subsequently, the Maiden Lane Interests have been valued using a discounted cash flow methodology that uses the estimated future cash flows of the Maiden Lane assets to which the Maiden Lane Interests are entitled and the discount rates applicable to such Interests as derived by the model from the fair value of the entire asset pool. These implicit discount rates are calibrated to the changes in the estimated asset values of the underlying assets commensurate with AIG's Interests in the capital structure of the respective entities and the timing of estimated cash flows. Estimated cash flows and discount rates used in the valuations are validated, to the extent possible, using market observable information for securities with similar asset pools, structure and terms.

The fair value methodology used since inception for the Maiden Lane Interests had assumed that the underlying collateral would continue to be held and generate cash flows into the foreseeable future and did not assume a current liquidation of the assets underlying the Maiden Lane Interests. As a result of the announcement on March 31, 2011 by the FRBNY of its plan to begin selling the assets in the ML II portfolio over time through a competitive sales process, AIG modified its methodology for estimating the fair value of its interest in ML II as of March 31, 2011 to incorporate the assumption of a current liquidation. The impact of this change in methodology was an increase in fair value of \$95 million as of March 31, 2011. AIG does not believe a change in

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

the fair value methodology used for its interest in ML III is appropriate at this time based on current available information. Other methodologies employed or assumptions made in determining fair value for these investments could result in amounts that differ significantly from the amounts reported.

Adjustments to the fair value of AIG's interest in ML II are recorded in the Consolidated Statement of Income (Loss) in Net investment income for SunAmerica's domestic life insurance companies. Adjustments to the fair value of AIG's interest in ML III are recorded in the Consolidated Statement of Income (Loss) in Net investment income for AIG's Other operations.

As of March 31, 2011, AIG expects to receive cash flows (undiscounted) in excess of AIG's initial investment, and any accrued interest, on the Maiden Lane Interests after repayment of the first priority obligations owed to the FRBNY. AIG's fair value methodology considers the capital structure of the collateral securities and their expected credit losses from the underlying asset pools. The fair value of AIG's interest in ML II is most affected by the liquidation proceeds realized by the FRBNY from the sale of the collateral securities. A 10 percent change in the liquidation proceeds realized by the FRBNY would result in a change of approximately \$280 million in the fair value of the ML II interest. The fair value of AIG's interest in ML III is most affected by changes in the discount rates and changes in the estimated future collateral cash flows used in the valuation model. Changes in estimated future cash flows for ML III would primarily be the result of changes in expectations of defaults, recoveries and prepayments on underlying loans.

The LIBOR interest rate curve changes are determined based on observable prices, interpolated or extrapolated to derive a LIBOR for a specific maturity term as necessary. The spreads over LIBOR for the Maiden Lane Interests (including collateral-specific credit and liquidity spreads) can change as a result of changes in market expectations about the future performance of these investments as well as changes in the risk premium that market participants would demand at the time of the transactions.

Changes in the discount rate or the estimated future cash flows used in the valuation would alter AIG's estimate of the fair value of AIG's interest in ML III as shown in the table below.

Three Months Ended March 31, 2011 <i>(in millions)</i>	Maiden Lane III Fair Value Change
Discount Rates:	
200 basis point increase	\$ (751)
200 basis point decrease	865
400 basis point increase	(1,408)
400 basis point decrease	1,866
Estimated Future Cash Flows:	
10% increase	850
10% decrease	(868)
20% increase	1,686
20% decrease	(1,750)

If the FRBNY were to similarly announce a plan to liquidate the assets of ML III at their estimated fair values, the impact of the change in AIG's assumptions would be an increase in the fair value of AIG's interest in ML III by approximately \$370 million at March 31, 2011.

AIG believes that the ranges of discount rates used in these analyses are reasonable on the basis of implied spread volatilities of similar collateral securities and implied volatilities of LIBOR interest rates. The ranges of estimated future cash flows were determined on the basis of variability in estimated future cash flows implied by cumulative loss estimates for similar instruments. Because of these factors, the fair values of the Maiden Lane Interests are likely to vary, perhaps materially, from the amounts estimated.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

Equity Securities Traded in Active Markets — Trading and Available for Sale

Whenever available, AIG obtains quoted prices in active markets for identical assets at the balance sheet date to measure at fair value marketable equity securities in its trading and available for sale portfolios or in Other invested assets. Market price data is generally obtained from exchange or dealer markets.

Direct Private Equity Investments — Other Invested Assets

AIG initially estimates the fair value of direct private equity investments by reference to the transaction price. This valuation is adjusted for changes in inputs and assumptions that are corroborated by evidence such as transactions in similar instruments, completed or pending third-party transactions in the underlying investment or comparable entities, subsequent rounds of financing, recapitalizations and other transactions across the capital structure, offerings in the equity capital markets and/or changes in financial ratios or cash flows. For equity securities that are subject to transfer restrictions, valuations are adjusted to reflect illiquidity and/or non-transferability and such adjustments generally are based on available market evidence. In the absence of such evidence, management's best estimate is used.

Hedge Funds, Private Equity Funds and Other Investment Partnerships — Other Invested Assets

AIG initially estimates the fair value of investments in certain hedge funds, private equity funds and other investment partnerships by reference to the transaction price. Subsequently, AIG generally obtains the fair value of these investments from net asset value information provided by the general partner or manager of the investments, the financial statements of which are generally audited annually. AIG considers observable market data and performs diligence procedures in validating the appropriateness of using the net asset value as a fair value measurement.

Separate Account Assets

Separate account assets are composed primarily of registered and unregistered open-end mutual funds that generally trade daily and are measured at fair value in the manner discussed above for equity securities traded in active markets.

Other Assets Measured at Fair Value

Short-term Investments — For short-term investments that are measured at fair value, AIG obtains fair value information from independent third-party valuation service providers. The determination of fair value for these instruments is consistent with the process for fixed maturity securities, as discussed above.

AIG also reports securities purchased under agreements to resell in Short-term investments in the Consolidated Balance Sheet. AIG estimates the fair value of receivables arising from securities purchased under agreements to resell using dealer quotations, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the coupon rate, yield curves, prepayment rates and other relevant factors.

Loans Receivable — AIG estimates the fair value of mortgage and other loans receivable by using dealer quotations, discounted cash flow analyses and/or internal valuation models. The determination of fair value considers inputs such as interest rate, maturity, the borrower's creditworthiness, collateral, subordination, guarantees, past-due status, yield curves, credit curves, prepayment rates, market pricing for comparable loans and other relevant factors.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

Freestanding Derivatives

Derivative assets and liabilities can be exchange-traded or traded over-the-counter (OTC). AIG generally values exchange-traded derivatives such as futures and options using quoted prices in active markets for identical derivatives at the balance sheet date.

OTC derivatives are valued using market transactions and other market evidence whenever possible, including market-based inputs to models, model calibration to market clearing transactions, broker or dealer quotations or alternative pricing sources with reasonable levels of price transparency. When models are used, the selection of a particular model to value an OTC derivative depends on the contractual terms of, and specific risks inherent in the instrument, as well as the availability of pricing information in the market. AIG generally uses similar models to value similar instruments. Valuation models require a variety of inputs, including contractual terms, market prices and rates, yield curves, credit curves, measures of volatility, prepayment rates and correlations of such inputs. For OTC derivatives that trade in liquid markets, such as generic forwards, swaps and options, model inputs can generally be corroborated by observable market data by correlation or other means, and model selection does not involve significant management judgment.

Certain OTC derivatives trade in less liquid markets with limited pricing information, and the determination of fair value for these derivatives is inherently more difficult. When AIG does not have corroborating market evidence to support significant model inputs and cannot verify the model to market transactions, the transaction price may provide the best estimate of fair value. Accordingly, when a pricing model is used to value such an instrument, the model is adjusted so the model value at inception equals the transaction price. AIG will update valuation inputs in these models only when corroborated by evidence such as similar market transactions, third party pricing services and/or broker or dealer quotations, or other empirical market data. When appropriate, valuations are adjusted for various factors such as liquidity, bid/offer spreads and credit considerations. Such adjustments are generally based on available market evidence. In the absence of such evidence, management's best estimate is used.

Embedded Policy Derivatives

The fair value of embedded policy derivatives contained in certain variable annuity and equity-indexed annuity and life contracts is measured based on actuarial and capital market assumptions related to projected cash flows over the expected lives of the contracts. These cash flow estimates primarily include benefits and related fees assessed, when applicable, and incorporate expectations about policyholder behavior. Estimates of future policyholder behavior are subjective and based primarily on AIG's historical experience. With respect to embedded policy derivatives in AIG's variable annuity contracts, because of the dynamic and complex nature of the expected cash flows, risk neutral valuations are used. Estimating the underlying cash flows for these products involves many estimates and judgments, including those regarding expected market rates of return, market volatility, correlations of market index returns to funds, fund performance, discount rates and policyholder behavior. With respect to embedded policy derivatives in AIG's equity-indexed annuity and life contracts, option pricing models are used to estimate fair value, taking into account assumptions for future equity index growth rates, volatility of the equity index, future interest rates, and determinations on adjusting the participation rate and the cap on equity indexed credited rates in light of market conditions and policyholder behavior assumptions. These methodologies incorporate an explicit risk margin to take into consideration market participant estimates of projected cash flows and policyholder behavior.

Fair value measurements for embedded derivatives associated with variable annuity and equity-indexed annuity and life contracts incorporate AIG insurance subsidiaries' own risk of non-performance by reflecting a market participant's view of AIG insurance subsidiaries' claims paying ability. AIG therefore incorporates an additional spread to the interest rate swap curve to value the embedded policy derivatives.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

AIGFP's Super Senior Credit Default Swap Portfolio

AIGFP values AIGFP's CDS transactions written on the super senior risk layers of designated pools of debt securities or loans using internal valuation models, third-party price estimates and market indices. The principal market was determined to be the market in which super senior credit default swaps of this type and size would be transacted, or have been transacted, with the greatest volume or level of activity. AIG has determined that the principal market participants, therefore, would consist of other large financial institutions who participate in sophisticated over-the-counter derivatives markets. The specific valuation methodologies vary based on the nature of the referenced obligations and availability of market prices.

The valuation of the super senior credit derivatives is challenging given the limitation on the availability of market observable information due to the lack of trading and price transparency in certain structured finance markets. These market conditions have increased the reliance on management estimates and judgments in arriving at an estimate of fair value for financial reporting purposes. Further, disparities in the valuation methodologies employed by market participants and the varying judgments reached by such participants when assessing volatile markets have increased the likelihood that the various parties to these instruments may arrive at significantly different estimates as to their fair values.

AIG's valuation methodologies for the super senior credit default swap portfolio have evolved over time in response to market conditions and the availability of market observable information. AIG has sought to calibrate the methodologies to available market information and to review the assumptions of the methodologies on a regular basis.

Regulatory capital portfolio: In the case of credit default swaps written to facilitate regulatory capital relief, AIG estimates the fair value of these derivatives by considering observable market transactions. The transactions with the most observability are the early terminations of these transactions by counterparties. AIG continues to reassess the expected maturity of the portfolio. AIGFP has not been required to make any payments as part of terminations initiated by counterparties. The regulatory benefit of these transactions for AIGFP's financial institution counterparties is generally derived from the capital regulations promulgated by the Basel Committee on Banking Supervision, known as Basel I. In December 2010, the Basel Committee on Banking Supervision finalized a new framework for international capital and liquidity standards known as Basel III, which, when fully implemented, may reduce or eliminate the regulatory benefits to certain counterparties and thus may impact the period of time that such counterparties are expected to hold the positions. In assessing the fair value of the regulatory capital CDS transactions, AIG also considers other market data to the extent relevant and available. For further discussion, see Note 10 herein.

Multi-sector CDO portfolios: AIG uses a modified version of the Binomial Expansion Technique (BET) model to value AIGFP's credit default swap portfolio written on super senior tranches of multi-sector collateralized debt obligations (CDOs) of ABS. The BET model was developed in 1996 by a major rating agency to generate expected loss estimates for CDO tranches and derive a credit rating for those tranches, and remains widely used.

AIG has adapted the BET model to estimate the price of the super senior risk layer or tranche of the CDO. AIG modified the BET model to imply default probabilities from market prices for the underlying securities and not from rating agency assumptions. To generate the estimate, the model uses the price estimates for the securities comprising the portfolio of a CDO as an input and converts those estimates to credit spreads over current LIBOR-based interest rates. These credit spreads are used to determine implied probabilities of default and expected losses on the underlying securities. This data is then aggregated and used to estimate the expected cash flows of the super senior tranche of the CDO.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

Prices for the individual securities held by a CDO are obtained in most cases from the CDO collateral managers, to the extent available. CDO collateral managers provided market prices for 58.9 percent of the underlying securities used in the valuation at March 31, 2011. When a price for an individual security is not provided by a CDO collateral manager, AIG derives the price through a pricing matrix using prices from CDO collateral managers for similar securities. Matrix pricing is a mathematical technique used principally to value debt securities without relying exclusively on quoted prices for the specific securities, but rather by relying on the relationship of the security to other benchmark quoted securities. Substantially all of the CDO collateral managers who provided prices used dealer prices for all or part of the underlying securities, in some cases supplemented by third-party pricing services.

The BET model also uses diversity scores, weighted average lives, recovery rates and discount rates. AIG employs a Monte Carlo simulation to assist in quantifying the effect on the valuation of the CDO of the unique aspects of the CDO's structure such as triggers that divert cash flows to the most senior part of the capital structure. The Monte Carlo simulation is used to determine whether an underlying security defaults in a given simulation scenario and, if it does, the security's implied random default time and expected loss. This information is used to project cash flow streams and to determine the expected losses of the portfolio.

In addition to calculating an estimate of the fair value of the super senior CDO security referenced in the credit default swaps using its internal model, AIG also considers the price estimates for the super senior CDO securities provided by third parties, including counterparties to these transactions, to validate the results of the model and to determine the best available estimate of fair value. In determining the fair value of the super senior CDO security referenced in the credit default swaps, AIG uses a consistent process that considers all available pricing data points and eliminates the use of outlying data points. When pricing data points are within a reasonable range an averaging technique is applied.

Corporate debt/Collateralized loan obligation (CLO) portfolios: In the case of credit default swaps written on portfolios of investment-grade corporate debt, AIG uses a mathematical model that produces results that are closely aligned with prices received from third parties. This methodology is widely used by other market participants and uses the current market credit spreads of the names in the portfolios along with the base correlations implied by the current market prices of comparable tranches of the relevant market traded credit indices as inputs. One transaction, representing two percent of the total notional amount of the corporate debt transactions, is valued using third party quotes given its unique attributes.

AIG estimates the fair value of its obligations resulting from credit default swaps written on CLOs to be equivalent to the par value less the current market value of the referenced obligation. Accordingly, the value is determined by obtaining third-party quotes on the underlying super senior tranches referenced under the credit default swap contract.

Policyholder Contract Deposits

Policyholder contract deposits accounted for at fair value are measured using an earnings approach by taking into consideration the following factors:

- Current policyholder account values and related surrender charges;
- The present value of estimated future cash inflows (policy fees) and outflows (benefits and maintenance expenses) associated with the product using risk neutral valuations, incorporating expectations about policyholder behavior, market returns and other factors; and
- A risk margin that market participants would require for a market return and the uncertainty inherent in the model inputs.

The change in fair value of these policyholder contract deposits is recorded as Policyholder benefits and claims incurred in the Consolidated Statement of Income (Loss).

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

Other Long-Term Debt

When fair value accounting has been elected, the fair value of non-structured liabilities is generally determined by using market prices from exchange or dealer markets, when available, or discounting expected cash flows using the appropriate discount rate for the applicable maturity. Such instruments are generally classified in Level 2 of the fair value hierarchy as substantially all inputs are readily observable. AIG determines the fair value of structured liabilities and hybrid financial instruments (where performance is linked to structured interest rates, inflation or currency risks) using the appropriate derivative valuation methodology (described above) given the nature of the embedded risk profile. Such instruments are classified in Level 2 or Level 3 depending on the observability of significant inputs to the model. In addition, adjustments are made to the valuations of both non-structured and structured liabilities to reflect AIG's own credit-worthiness based on observable credit spreads of AIG.

Other Liabilities

Other liabilities measured at fair value include securities sold under agreements to repurchase and securities and spot commodities sold but not yet purchased. AIG estimates the fair value of liabilities arising from securities sold under agreements to repurchase under dealer quotations, discounted cash flow analyses and/or internal valuation models. This methodology considers such factors as the coupon rate, yield curves, prepayment rates and other relevant factors. Fair values for securities sold but not yet purchased are based on current market prices. Fair values of spot commodities sold but not yet purchased are based on current market prices of reference spot futures contracts traded on exchanges.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)**Assets and Liabilities Measured at Fair Value on a Recurring Basis**

The following table presents information about assets and liabilities measured at fair value on a recurring basis and indicates the level of the fair value measurement based on the levels of the inputs used:

(a) Represents netting of derivative exposures covered by a qualifying master netting agreement.

(b) Represents cash collateral posted and received. Securities collateral posted for derivative transactions that is reflected in Fixed maturity securities in the Consolidated Balance Sheet, and collateral received, not reflected in the Consolidated Balance Sheet, were \$1.9 billion and \$124 million, respectively, at March 31, 2011 and \$1.4 billion and \$109 million, respectively, at December 31, 2010.

(c) Included in Level 1 are \$12.2 billion and \$11.1 billion at March 31, 2011 and December 31, 2010, respectively, of AIA shares publicly traded on the Hong Kong Stock Exchange. Approximately 4 percent and 5 percent of the fair value of the assets recorded as Level 3 relates to various private equity, real estate, hedge fund and fund-of-funds investments that are consolidated by AIG at March 31, 2011 and December 31, 2010, respectively. AIG's ownership in these funds represented 62.4 percent, or \$0.9 billion, of Level 3 assets at March 31, 2011 and 68.6 percent, or \$1.3 billion, of Level 3 assets at December 31, 2010.

(d) Included in Level 2 is the fair value of \$0.8 billion and \$1.6 billion at March 31, 2011 and December 31, 2010, respectively, of securities purchased under agreements to resell.

(e) Included in Level 3 is the fair value derivative liability of \$3.2 billion and \$3.7 billion at March 31, 2011 and December 31, 2010, respectively, on the Capital Markets super senior credit default swap portfolio.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

(f) Included in Level 2 is the fair value of \$1.2 billion, \$95 million and \$10 million at March 31, 2011 of securities sold under agreements to repurchase, securities and spot commodities sold but not yet purchased and trust deposits and deposits due to banks and other depositors, respectively. Included in Level 2 is the fair value of \$2.1 billion, \$94 million and \$15 million at December 31, 2010 of securities sold under agreements to repurchase, securities and spot commodities sold but not yet purchased and trust deposits and deposits due to banks and other depositors, respectively.

Transfers of Level 1 and Level 2 Assets and Liabilities

AIG's policy is to record transfers of assets and liabilities between Level 1 and Level 2 at their fair values as of the end of each reporting period, consistent with the date of the determination of fair value. Assets are transferred out of Level 1 when they are no longer transacted with sufficient frequency and volume in an active market. During the three-month period ended March 31, 2011, AIG transferred certain assets from Level 1 to Level 2, including approximately \$121 million of investments in securities issued by foreign governments. Conversely, assets are transferred from Level 2 to Level 1 when transaction volume and frequency are indicative of an active market. AIG had no significant transfers from Level 2 to Level 1 during the three-month period ended March 31, 2011.

Changes in Level 3 Recurring Fair Value Measurements

The following tables present changes during the three-month periods ended March 31, 2011 and 2010 in Level 3 assets and liabilities measured at fair value on a recurring basis, and the realized and unrealized gains (losses) recorded in the Consolidated Statement of Income (Loss) during those periods related to the Level 3 assets and liabilities that remained in the Consolidated Balance Sheet at March 31, 2011 and 2010:

* There were no issuances during the three months ended March 31, 2011.

Both observable and unobservable inputs may be used to determine the fair values of positions classified in Level 3 in the tables above. As a result, the unrealized gains (losses) on instruments held at March 31, 2011 and 2010 may include changes in fair value that were attributable to both observable (e.g., changes in market interest rates) and unobservable inputs (e.g., changes in unobservable long-dated volatilities).

Transfers of Level 3 Assets and Liabilities

AIG's policy is to transfer assets and liabilities into Level 3 when a significant input cannot be corroborated with market observable data. This may include circumstances in which market activity has dramatically decreased and transparency to underlying inputs cannot be observed, current prices are not available and substantial price variances in quotations among market participants exist.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

In certain cases, the inputs used to measure the fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement. AIG's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment. In making the assessment, AIG considers factors specific to the asset or liability.

AIG's policy is to record transfers of assets and liabilities into or out of Level 3 at their fair values as of the end of each reporting period, consistent with the date of the determination of fair value. As a result, the Net realized and unrealized gains (losses) included in income or other comprehensive income and as shown in the table above excludes \$26 million of net losses related to assets and liabilities transferred into Level 3 during the three-month period ended March 31, 2011, and includes \$5 million of net gains related to assets and liabilities transferred out of Level 3 during the three-month period ended March 31, 2011.

Transfers of Level 3 Assets

During the three-month period ended March 31, 2011, transfers into Level 3 included certain CMBS and ABS, as well as private placement corporate debt. The transfers into Level 3 related to investments in certain CMBS were due to a decrease in market transparency, downward credit migration and an overall increase in price disparity for certain individual security types. Transfers into Level 3 for private placement corporate debt and certain ABS were primarily the result of AIG adjusting matrix pricing information downward to better reflect the additional risk premium associated with those securities that AIG believes was not captured in the matrix.

Assets are transferred out of Level 3 when circumstances change such that significant inputs can be corroborated with market observable data. This may be due to a significant increase in market activity for the asset, a specific event, one or more significant input(s) becoming observable or when a long-term interest rate significant to a valuation becomes short-term and thus observable. In addition, transfers out of Level 3 arise when investments are no longer carried at fair value as the result of a change in the applicable accounting methodology, given changes in the nature and extent of AIG's ownership interest. During the three-month period ended March 31, 2011, transfers out of Level 3 primarily related to investments in private placement corporate debt, investments in certain CMBS and ABS and certain investment partnerships. Transfers out of Level 3 for private placement corporate debt and for ABS were primarily the result of AIG using observable pricing information or a third party pricing quote that appropriately reflects the fair value of those securities, without the need for adjustment based on AIG's own assumptions regarding the characteristics of a specific security or the current liquidity in the market. Transfers out of Level 3 for CMBS investments were primarily due to increased observations of market transactions and price information for those securities. Certain investment partnerships were transferred out of Level 3 due to these investments no longer being carried at fair value, based on AIG's use of the equity method of accounting consistent with the changes to AIG's ownership and ability to exercise significant influence over the respective investments.

Transfers of Level 3 Liabilities

During the three-month period ended March 31, 2011, there were no significant transfers into or out of Level 3 liabilities.

AIG uses various hedging techniques to manage risks associated with certain positions, including those classified within Level 3. Such techniques may include the purchase or sale of financial instruments that are classified within Level 1 and/or Level 2. As a result, the realized and unrealized gains (losses) for assets and liabilities classified within Level 3 presented in the table above do not reflect the related realized or unrealized gains (losses) on hedging instruments that are classified within Level 1 and/or Level 2.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)**Investments in certain entities carried at fair value using net asset value per share**

The following table includes information related to AIG's investments in certain other invested assets, including private equity funds, hedge funds and other alternative investments that calculate net asset value per share (or its equivalent). For these investments, which are measured at fair value on a recurring or non-recurring basis, AIG uses the net asset value per share as a practical expedient to measure fair value.

(in millions)	Investment Category Includes	March 31, 2011		December 31, 2010	
		Fair Value Using Net Asset Value	Unfunded Commitments	Fair Value Using Net Asset Value	Unfunded Commitments

Distressed	Securities of companies that are already in default, under bankruptcy protection or troubled	330	10	369	20
Other	Non-U.S. companies, futures and commodities, macro and multi-strategy and industry-focused strategies	766	-	708	-
Total hedge funds		2,964	12	3,655	22
Total		\$ 7,334*	\$ 1,354	\$ 7,920*	\$ 1,496

* Includes investments of entities classified as held for sale of \$6 million and \$415 million at March 31, 2011 and December 31, 2010, respectively.

At March 31, 2011, private equity fund investments included above are not redeemable during the lives of the funds and have expected remaining lives that extend in some cases more than 10 years. At that date, 37 percent of the total above had expected remaining lives of less than three years, 53 percent between three and seven years and 10 percent between seven and 10 years. Expected lives are based upon legal maturity, which can be extended at the fund manager's discretion, typically in one-year increments.

At March 31, 2011, hedge fund investments included above are redeemable monthly (14 percent), quarterly (51 percent), semi-annually (5 percent) and annually (30 percent), with redemption notices ranging from 1 day to 180 days. More than 83 percent require redemption notices of less than 90 days. Investments representing approximately 57 percent of the value of the hedge fund investments cannot be redeemed, either in whole or in part, because the investments include various restrictions. The majority of these restrictions were put in place in 2008 and do not have stated end dates. The remaining restrictions, which have pre-defined end dates, are generally expected to be lifted by the end of 2012. The partial restrictions relate to certain hedge funds that hold

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

at least one investment that the fund manager deems to be illiquid. In order to treat investors fairly and to accommodate subsequent subscription and redemption requests, the fund manager isolates these illiquid assets from the rest of the fund until the assets become liquid.

Fair Value Measurements on a Non-Recurring Basis

AIG also measures the fair value of certain assets on a non-recurring basis, generally quarterly, annually or when events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. These assets include cost and equity-method investments, life settlement contracts, flight equipment primarily under operating leases, collateral securing foreclosed loans and real estate and other fixed assets, goodwill and other intangible assets. AIG uses a variety of techniques to measure the fair value of these assets when appropriate, as described below:

- *Cost and Equity-Method Investments:* When AIG determines that the carrying value of these assets may not be recoverable, AIG records the assets at fair value with the loss recognized in earnings. In such cases, AIG measures the fair value of these assets using the techniques discussed above in Valuation Methodologies — Direct Private Equity Investments — Other Invested Assets and Valuation Methodologies — Hedge Funds, Private Equity Funds and Other Investment Partnerships — Other Invested Assets.
- *Life Settlement Contracts:* AIG measures the fair value of individual life settlement contracts (which are included in Other invested assets) whenever the carrying value plus the undiscounted future costs that are expected to be incurred to keep the life settlement contract in force exceed the expected proceeds from the contract. In those situations, the fair value is determined on a discounted cash flow basis, incorporating current life expectancy assumptions. The discount rate incorporates current information about market interest rates, the credit exposure to the insurance company that issued the life settlement contract and AIG's estimate of the risk margin an investor in the contracts would require.
- *Flight Equipment Primarily Under Operating Leases:* When AIG determines that the carrying value of its commercial aircraft may not be recoverable, AIG records the aircraft at fair value with the loss recognized in earnings. AIG measures the fair value of its commercial aircraft using an income approach based on the present value of all cash flows from existing contractual and projected lease payments (based on historical experience and current expectations regarding market participants), including net contingent rentals where appropriate, for the period extending to the end of the aircraft's economic life in its highest and best use configuration, plus its disposition value based on expectations of a market participant.
- *Collateral Securing Foreclosed Loans and Real Estate and Other Fixed Assets:* When AIG takes collateral in connection with foreclosed loans, AIG generally bases its estimate of fair value on the price that would be received in a current transaction to sell the asset by itself, by reference to observable transactions for similar assets.
- *Goodwill:* AIG tests goodwill for impairment annually or more frequently whenever events or changes in circumstances indicate the carrying amount of goodwill may not be recoverable. When AIG determines that goodwill may be impaired, AIG uses techniques including market-based earning multiples of peer companies, discounted expected future cash flows, appraisals, or, in the case of reporting units being considered for sale, third-party indications of fair value of the reporting unit, if available, to determine the amount of any impairment.
- *Long-Lived Assets:* AIG tests its long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of a long-lived asset may not be recoverable. AIG measures the fair value of long-lived assets based on an in-use premise that considers the same factors used to estimate the fair value of its real estate and other fixed assets under an in-use premise.
- *Businesses Held for Sale:* When AIG determines that a business qualifies as held for sale and AIG's carrying amount is greater than the expected sale price less cost to sell, AIG records an impairment loss for the difference.

See Notes 2(d), (f), (g) and (h) to the Consolidated Financial Statements in AIG's 2010 Annual Report on Form 10-K for additional information about how AIG tests various asset classes for impairment.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

The following table presents assets (excluding discontinued operations) measured at fair value on a non-recurring basis on which impairment charges were recorded, and the related impairment charges:

(in millions)	Assets at Fair Value				Impairment Charges	
	Non-Recurring Basis				Three Months Ended March 31,	
	Level 1	Level 2	Level 3	Total	2011	2010
March 31, 2011						
Investment real estate	\$ -	\$ -	\$ 628	\$ 628	\$ 12	\$ 284
Other investments	-	3	2,078	2,081	106	52
Aircraft	-	-	122	122	114	347
Other assets	-	-	-	-	-	7
Total	\$ -	\$ 3	\$ 2,828	\$ 2,831	\$ 232	\$ 690
December 31, 2010						
Investment real estate	\$ -	\$ -	\$ 1,588	\$ 1,588		
Other investments	-	4	2,388	2,392		
Aircraft	-	-	4,224	4,224		
Other assets	-	-	2	2		
Total	\$ -	\$ 4	\$ 8,202	\$ 8,206		

Fair Value Option

Under the fair value option, AIG may elect to measure at fair value financial assets and financial liabilities that are not otherwise required to be carried at fair value. Subsequent changes in fair value for designated items are reported in earnings.

The following table presents the gains or losses recorded related to the eligible instruments for which AIG elected the fair value option:

(in millions)	Gain (Loss) Three Months Ended March 31,	
	2011	2010
Assets:		
Mortgage and other loans receivable	\$ (5)	\$ 40
Trading securities	902	1,437
Trading – Maiden Lane II	251	160
Trading – Maiden Lane III	744	751
Retained interest in AIA	1,062	-
Other invested assets	2	(10)
Short-term investments	14	(4)
Liabilities:		
Policyholder contract deposits	-	44
Debt	17	(485)
Other liabilities	(112)	34
Total gain*	\$ 2,875	\$ 1,967

* Excludes discontinued operations gains or losses on instruments that are required to be carried at fair value. For instruments required to be carried at fair value, AIG recognized gains of \$1.0 billion and losses of \$8 million for the three months ended March 31, 2011 and 2010, respectively, that were primarily due to changes in the fair value of derivatives, trading securities and certain other invested assets for which the fair value option was not elected. Included in these amounts were unrealized market valuation gains of \$323 million and \$119 million for the three months ended March 31, 2011 and 2010, respectively, related to Capital Markets super senior credit default swap portfolio.

Interest income and expense and dividend income on assets and liabilities elected under the fair value option are recognized and classified in the Consolidated Statement of Income (Loss) depending on the nature of the instrument and related market conventions. For Direct Investment business-related activity, interest, dividend

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

income and interest expense are included in Other income. Otherwise, interest and dividend income are included in Net investment income in the Consolidated Statement of Income (Loss). Gains and losses on AIG's Maiden Lane interests are recorded in Net investment income. See Note 2(a) to the Consolidated Financial Statements in AIG's 2010 Annual Report on Form 10-K for additional information about AIG's policies for recognition, measurement, and disclosure of interest and dividend income and interest expense.

During the three-month periods ended March 31, 2011 and 2010, AIG recognized losses of \$11 million and \$378 million, respectively, attributable to the observable effect of changes in credit spreads on AIG's own liabilities for which the fair value option was elected. AIG calculates the effect of these credit spread changes using discounted cash flow techniques that incorporate current market interest rates, AIG's observable credit spreads on these liabilities and other factors that mitigate the risk of nonperformance such as cash collateral posted.

The following table presents the difference between fair values and the aggregate contractual principal amounts of mortgage and other loans receivable and long-term borrowings for which the fair value option was elected:

<i>(in millions)</i>	March 31, 2011			December 31, 2010		
	Fair Value	Outstanding Principal Amount	Difference	Fair Value	Outstanding Principal Amount	Difference
Assets:						
Mortgage and other loans receivable	\$ 138	\$ 187	\$ (49)	\$ 143	\$ 203	\$ (60)
Liabilities:						
Long-term debt	\$ 10,259	\$ 8,655	\$ 1,604	\$ 10,778	\$ 8,977	\$ 1,801

At March 31, 2011 and December 31, 2010, there were no significant mortgage or other loans receivable for which the fair value option was elected that were 90 days or more past due and in non-accrual status.

Fair Value Information about Financial Instruments Not Measured at Fair Value

Information regarding the estimation of fair value for financial instruments not carried at fair value (excluding insurance contracts and lease contracts) is discussed below:

- *Mortgage and other loans receivable:* Fair values of loans on real estate and collateral loans were estimated for disclosure purposes using discounted cash flow calculations based upon discount rates that AIG believes market participants would use in determining the price that they would pay for such assets. For certain loans, AIG's current incremental lending rates for similar type loans is used as the discount rate, as it is believed that this rate approximates the rates that market participants would use. The fair values of policy loans were not estimated as AIG believes it would have to expend excessive costs for the benefits derived.
- *Other Invested Assets:* The majority of Other invested assets that are not measured at fair value represent investments in hedge funds, private equity funds and other investment partnerships for which AIG uses the equity method of accounting. The carrying value of AIG's investment in these funds is measured based on AIG's share of the funds' reported net asset value.
- *Cash and short-term investments:* The carrying values of these assets approximate fair values because of the relatively short period of time between origination and expected realization.
- *Policyholder contract deposits associated with investment-type contracts:* Fair values for policyholder contract deposits associated with investment-type contracts not accounted for at fair value were estimated for disclosure purposes using discounted cash flow calculations based upon interest rates currently being offered for similar contracts with maturities consistent with those remaining for the contracts being valued. Where no similar contracts are being offered, the discount rate is the appropriate tenor swap rate (if available) or current risk-free interest rate consistent with the currency in which the cash flows are denominated.
- *Long-term debt:* Fair values of these obligations were determined for disclosure purposes by reference to quoted market prices, where available and appropriate, or discounted cash flow calculations based upon AIG's current market-observable implicit-credit-spread rates for similar types of borrowings with maturities consistent with those remaining for the debt being valued.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

The following table presents the carrying value and estimated fair value of AIG's financial instruments not measured at fair value:

(in millions)	March 31, 2011		December 31, 2010	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
Assets:				
Mortgage and other loans receivable	\$ 19,553	\$ 19,956	\$ 20,094	\$ 20,285
Other invested assets*	19,819	19,448	19,472	18,864
Short-term investments	21,196	21,196	19,878	19,878
Cash	1,801	1,801	1,558	1,558
Liabilities:				
Policyholder contract deposits associated with investment-type contracts	103,691	113,360	102,585	112,710
Long-term debt (including Federal Reserve Bank of New York credit facility)	70,562	71,059	94,318	93,745

* Excludes aircraft asset investments held by non-Financial Services subsidiaries.

7. Investments**Securities Available for Sale**

The following table presents the amortized cost or cost and fair value of AIG's available for sale securities:

(in millions)	Amortized Cost or Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Other-Than-Temporary Impairments in AOCI ^(a)

Total	\$ 37,686	\$ 1,209	\$ 20,119	\$ 3,930	\$ 57,805	\$ 5,139

* Excludes fixed maturity and equity securities of businesses held for sale. See Note 4 herein.

At March 31, 2011, AIG held 7,121 and 111 of individual fixed maturity and equity securities, respectively, that were in an unrealized loss position, of which 2,278 of individual securities were in a continuous unrealized loss position for longer than 12 months. AIG did not recognize in earnings the unrealized losses on these fixed

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

maturity securities at March 31, 2011, because management neither intends to sell the securities nor does it believe that it is more likely than not that it will be required to sell these securities before recovery of their amortized cost basis. Furthermore, management expects to recover the entire amortized cost basis of these securities. In performing this evaluation, management considered the recovery periods for securities in previous periods of broad market declines. For fixed maturity securities with significant declines, management performed fundamental credit analysis on a security-by-security basis, which included consideration of credit enhancements, expected defaults on underlying collateral, review of relevant industry analyst reports and forecasts and other available market data.

Contractual Maturities of Securities Available for Sale

The following table presents the amortized cost and fair value of fixed maturity securities available for sale by contractual maturity:

March 31, 2011 (in millions)	Total Fixed Maturity Available for Sale Securities		Fixed Maturity Securities in a Loss Position	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Due in one year or less	\$ 8,865	\$ 8,959	\$ 1,177	\$ 1,163
Due after one year through five years	51,671	53,983	12,377	12,122
Due after five years through ten years	60,868	63,733	13,575	13,104
Due after ten years	67,725	71,490	19,014	18,043
Mortgage-backed, asset-backed and collateralized	40,460	40,150	21,048	18,986
Total	\$ 229,589	\$ 238,315	\$ 67,191	\$ 63,418

Actual maturities may differ from contractual maturities because certain borrowers have the right to call or prepay certain obligations with or without call or prepayment penalties.

The following table presents the gross realized gains and gross realized losses from sales or redemptions of AIG's available for sale securities:

Three Months Ended March 31, (in millions)	2011		2010	
	Gross Realized Gains	Gross Realized Losses	Gross Realized Gains	Gross Realized Losses
Fixed maturities	\$ 188	\$ 55	\$ 381	\$ 42
Equity securities	105	2	205	7
Total	\$ 293	\$ 57	\$ 586	\$ 49

For the three-month period ended March 31, 2011, the aggregate fair value of available for sale securities sold was \$11.5 billion, which resulted in net realized capital gains of \$236 million.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)**Trading Securities**

The following table presents the fair value of AIG's trading securities:

(in millions)	March 31, 2011		December 31, 2010	
	Fair Value	Percent of Total	Fair Value	Percent of Total
Fixed Maturities:				
U.S. government and government sponsored entities	\$ 6,713	24%	\$ 6,902	21%

Total	\$ 27,472	100%	\$ 32,834	100%

Evaluating Investments for Other-Than-Temporary Impairments

For a discussion of AIG's policy for evaluating investments for other-than-temporary impairments, see pages 276-279 of Note 7 to the Consolidated Financial Statements in AIG's 2010 Annual Report on Form 10-K.

Credit Impairments

The following table presents a rollforward of the credit impairments recognized in earnings for available for sale fixed maturity securities held by AIG^(a):

Three Months Ended March 31, (in millions)	2011	2010
Balance, beginning of year	\$ 6,786	\$ 7,803
Increases due to:		
Credit impairments on new securities subject to impairment losses	52	137
Additional credit impairments on previously impaired securities	150	468
Reductions due to:		
Credit impaired securities fully disposed for which there was no prior intent or requirement to sell	(170)	(387)
Credit impaired securities for which there is a current intent or anticipated requirement to sell	-	(2)
Accretion on securities previously impaired due to credit ^(b)	(100)	(95)
Hybrid securities with embedded credit derivatives reclassified to Bond trading securities	(179)	-
Other ^(c)	1	(651)
Balance, end of period	\$ 6,540	\$ 7,273

(a) Includes structured, corporate, municipal and sovereign fixed maturity securities.

(b) Represents accretion recognized due to changes in cash flows expected to be collected over the remaining expected term of the credit impaired securities as well as the accretion due to the passage of time.

(c) In 2010, primarily consists of activity associated with held for sale entities.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)**8. Lending Activities**

The following table presents the composition of Mortgage and other loans receivable:

<i>(in millions)</i>	March 31, 2011	December 31, 2010
Commercial mortgages	\$ 13,432	\$ 13,571
Residential mortgages*	8	9
Life insurance policy loans	3,100	3,133
Commercial loans, other loans and notes receivable	3,994	4,402
Total mortgage and other loans receivable	20,534	21,115
Allowance for losses	(843)	(878)
Mortgage and other loans receivable, net	\$ 19,691	\$ 20,237

* Primarily consists of foreign mortgage loans.

Commercial mortgages primarily represent lending for office, retail and industrial properties, with exposures in California and New York representing the largest geographic concentrations (26 percent and 11 percent, respectively, at March 31, 2011). Over 98 percent and 97 percent of the commercial mortgages were current as to payments of principal and interest at March 31, 2011 and December 31, 2010, respectively.

The following table presents the credit quality indicators for the U.S. commercial mortgage loans:

March 31, 2011 <i>(dollars in millions)</i>	Number of Loans	Class						Total	Percent of Total
		Apartments	Offices	Retail	Industrial	Hotel	Others		
Credit Quality Indicator:									
In good standing	1,017	\$ 1,672	\$ 4,678	\$ 2,190	\$ 2,007	\$ 925	\$ 1,397	\$ 12,869	96%
Restructured ^(a)	11	49	183	-	4	-	47	283	2
90 days or less delinquent	2	-	4	9	-	-	-	13	-
>90 days delinquent or in process of foreclosure	17	11	101	10	5	27	77	231	2
Total ^(b)	1,047	\$ 1,732	\$ 4,966	\$ 2,209	\$ 2,016	\$ 952	\$ 1,521	\$ 13,396	100%
Valuation allowance		\$ 71	\$ 132	\$ 52	\$ 53	\$ 31	\$ 61	\$ 400	3%

(a) Performing under restructured terms, which may have included extended maturity dates and revised interest rates.

(b) Does not reflect valuation allowances.

Methodology used to estimate the allowance for credit losses

For commercial mortgage loans, impaired value is based on the fair value of underlying collateral which is determined based on the expected net future cash flows of the collateral, less estimated costs to sell. An allowance is typically established for the difference between the impaired value of the loan and its current carrying amount. Additional allowance amounts are established for incurred but not specifically identified impairments, based on the analysis of internal risk ratings and current loan values. Internal risk ratings are assigned based on the consideration of risk factors including debt service coverage, loan-to-value ratio or the ratio of the loan balance to the estimated value of the property, property occupancy, profile of the borrower and of the major property tenants, economic trends in the market where the property is located, and condition of the property. These factors and the resulting risk ratings also provide a basis for determining the level of monitoring performed at both the individual loan and the portfolio level. When all or a portion of a commercial mortgage loan is deemed uncollectible, the uncollectible portion of the carrying value of the loan is charged off against the allowance.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

AIG may restructure the terms of commercial real estate, mortgage and other loans receivable. Restructuring may involve extending the maturity of a loan or otherwise changing the interest rate or other terms of a loan. When the restructuring is related to financial difficulties of the borrower and the new terms are not consistent with current market terms, AIG considers the loan to be, and accounts for it as, a troubled debt restructuring.

A significant majority of commercial mortgage loans in the portfolio are non-recourse loans and, accordingly, the only guarantees are for specific items that are exceptions to the non-recourse provisions. It is therefore extremely rare for AIG to have cause to enforce the provisions of a guarantee on a commercial real estate or mortgage loan.

The following table presents a rollforward of the changes in the allowance for losses on Mortgage and other loans receivable:

Three Months Ended March 31, (in millions)	2011			2010		
	Commercial Mortgages	Other Loans	Total	Commercial Mortgages	Other Loans	Total
Allowance, beginning of year	\$ 470	\$ 408	\$ 878	\$ 432	\$ 2,012	\$ 2,444
Loans charged off	(29)	(5)	(34)	(121)	(35)	(156)
Recoveries of loans previously charged off	33	-	33	-	8	8
Net charge-offs	4	(5)	(1)	(121)	(27)	(148)
Provision for loan losses	(21)	18	(3)	121	(2)	119
Other	(31)	-	(31)	(1)	103	102
Reclassified to Assets of businesses held for sale	-	-	-	(48)	(38)	(86)
Allowance, end of period	\$ 422*	\$ 421	\$ 843	\$ 383	\$ 2,048	\$ 2,431

* Of the total, \$125 million relates to individually assessed credit losses on \$660 million of commercial mortgage loans. Allowance includes \$22 million for non-U.S. commercial mortgage loans.

9. Variable Interest Entities

A variable interest entity (VIE) is a legal entity that does not have sufficient equity at risk to finance its activities without additional subordinated financial support or is structured such that equity investors lack the ability to make significant decisions relating to the entity's operations through voting rights and do not substantively participate in the gains and losses of the entity. Consolidation of a VIE by its primary beneficiary is not based on majority voting interest, but is based on other criteria discussed below.

While AIG enters into various arrangements with VIEs in the normal course of business, AIG's involvement with VIEs is primarily via its insurance companies as a passive investor in debt securities (rated and unrated) and equity interests issued by VIEs. In all instances, AIG consolidates the VIE when it determines it is the primary beneficiary. This analysis includes a review of the VIE's capital structure, contractual relationships and terms, nature of the VIE's operations and purpose, nature of the VIE's interests issued and AIG's involvements with the entity. AIG also evaluates the design of the VIE and the related risks the entity was designed to expose the variable interest holders to in evaluating consolidation.

For VIEs with attributes consistent with that of an investment company or a money market fund, the primary beneficiary is the party or group of related parties that absorbs a majority of the expected losses of the VIE, receives the majority of the expected residual returns of the VIE, or both.

For all other variable interest entities, the primary beneficiary is the entity that has both (1) the power to direct the activities of the VIE that most significantly affect the entity's economic performance and (2) the obligation to absorb losses or the right to receive benefits that could be potentially significant to the VIE. While also considering these factors, the consolidation conclusion depends on the breadth of AIG's decision-making ability and its ability to influence activities that significantly affect the economic performance of the VIE.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)**Exposure to Loss**

AIG's total off-balance sheet exposure associated with VIEs, primarily consisting of financial guarantees and commitments to real estate and investment funds, was \$0.4 billion and \$1.0 billion at March 31, 2011 and December 31, 2010, respectively.

The following table presents AIG's total assets, total liabilities and off-balance sheet exposure associated with its variable interests in consolidated VIEs:

<i>(in billions)</i>	VIE Assets*		VIE Liabilities		Off-Balance Sheet Exposure	
	March 31, 2011	December 31, 2010	March 31, 2011	December 31, 2010	March 31, 2011	December 31, 2010
AIA/ALICO SPVs	\$ 15.3	\$ 48.6	\$ 0.6	\$ 0.9	\$ -	\$ -
Real estate and investment funds	2.5	3.8	0.9	1.2	0.1	0.1
Commercial paper conduit	0.5	0.5	0.2	0.2	-	-
Affordable housing partnerships	2.8	2.9	0.4	0.4	-	-
Other	4.6	4.7	2.1	2.1	-	-
VIEs of businesses held for sale	-	0.4	-	-	-	-
Total	\$ 25.7	\$ 60.9	\$ 4.2	\$ 4.8	\$ 0.1	\$ 0.1

* Each of the VIE's assets can be used only to settle specific obligations of that VIE.

AIG calculates its maximum exposure to loss to be (i) the amount invested in the debt or equity of the VIE, (ii) the notional amount of VIE assets or liabilities where AIG has also provided credit protection to the VIE with the VIE as the referenced obligation and (iii) other commitments and guarantees to the VIE. Interest holders in VIEs sponsored by AIG generally have recourse only to the assets and cash flows of the VIEs and do not have recourse to AIG, except in limited circumstances when AIG has provided a guarantee to the VIE's interest holders.

The following table presents total assets of unconsolidated VIEs in which AIG holds a variable interest, as well as AIG's maximum exposure to loss associated with these VIEs:

<i>(in billions)</i>	Total VIE Assets	Maximum Exposure to Loss		
		On-Balance Sheet	Off-Balance Sheet	Total
March 31, 2011				
Real estate and investment funds	\$ 18.0	\$ 2.5	\$ 0.3	\$ 2.8
Affordable housing partnerships	0.6	0.6	-	0.6
Maiden Lane Interests	41.1	8.6	-	8.6
Other	1.7	0.1	-	0.1
VIEs of businesses held for sale	0.6	0.6	-	0.6
Total	\$ 62.0	\$ 12.4	\$ 0.3	\$ 12.7
December 31, 2010				
Real estate and investment funds	\$ 18.5	\$ 2.5	\$ 0.3	\$ 2.8
Affordable housing partnerships	0.6	0.6	-	0.6
Maiden Lane Interests	40.1	7.6	-	7.6
Other	1.6	0.1	0.5	0.6
VIEs of businesses held for sale	2.0	0.4	0.1	0.5
Total	\$ 62.8	\$ 11.2	\$ 0.9	\$ 12.1

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)***Balance Sheet Classification**

AIG's interests in the assets and liabilities of consolidated and unconsolidated VIEs were classified in the Consolidated Balance Sheet as follows:

<i>(in billions)</i>	Consolidated VIEs		Unconsolidated VIEs	
	March 31, 2011	December 31, 2010	March 31, 2011	December 31, 2010
Assets:				
Available for sale securities	\$ 0.3	\$ 3.3	\$ -	\$ -
Trading securities	1.7	8.1	8.7	7.7
Mortgage and other loans receivable	0.4	0.7	-	-
Other invested assets	18.7	18.3	3.1	3.1
Other asset accounts	4.6	30.1	-	0.1
Assets held for sale	-	0.4	0.6	0.3
Total	\$ 25.7	\$ 60.9	\$ 12.4	\$ 11.2
Liabilities:				
Other long-term debt	\$ 2.2	\$ 2.6	\$ -	\$ -
Other liability accounts	2.0	2.2	-	-
Total	\$ 4.2	\$ 4.8	\$ -	\$ -

See Notes 6, 7 and 11 to the Consolidated Financial Statements in AIG's 2010 Annual Report on Form 10-K for additional information on RMBS, CMBS, and other asset-backed securities.

10. Derivatives and Hedge Accounting

AIG uses derivatives and other financial instruments as part of its financial risk management programs and as part of its investment operations. AIGFP had also transacted in derivatives as a dealer and had acted as an intermediary between the relevant AIG subsidiary and the counterparty. In a number of situations, AIG has replaced AIGFP with AIG Markets, Inc. (AIG Markets) for purposes of acting as an intermediary between the AIG subsidiary and the third-party counterparty as part of the wind-down of AIGFP's portfolios.

Derivatives are financial arrangements among two or more parties with returns linked to or "derived" from some underlying equity, debt, commodity, or other asset, liability, or foreign exchange rate or other index or the occurrence of a specified payment event. Derivatives, with the exception of bifurcated embedded derivatives, are reflected in the Consolidated Balance Sheet in Derivative assets, at fair value and Derivative liabilities, at fair value. A bifurcated embedded derivative is recorded at fair value whereas the corresponding host contract is recorded on an amortized cost basis. A bifurcated embedded derivative is presented with the host contract in the Consolidated Balance Sheet.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

The following table presents the notional amounts and fair values of AIG's derivative instruments:

(in millions)	March 31, 2011				December 31, 2010			
	Gross Derivative Assets		Gross Derivative Liabilities		Gross Derivative Assets		Gross Derivative Liabilities

Total derivatives	\$ 152,231	\$ 11,862	\$ 167,236	\$ 11,746	\$ 190,257	\$ 16,311	\$ 204,853	\$ 15,380

(a) Notional amount represents a standard of measurement of the volume of derivatives business of AIG. Notional amount is generally not a quantification of market risk or credit risk and is not recorded in the Consolidated Balance Sheet. Notional amounts generally represent those amounts used to calculate contractual cash flows to be exchanged and are not paid or received, except for certain contracts such as currency swaps and certain credit contracts. For credit contracts, notional amounts are net of all underlying subordination.

(b) Fair value amounts are shown before the effects of counterparty netting adjustments and offsetting cash collateral.

(c) Includes cross currency swaps.

The following table presents the fair values of derivative assets and liabilities in the Consolidated Balance Sheet:

(in millions)	March 31, 2011				December 31, 2010			
	Derivative Assets		Derivative Liabilities ^(a)		Derivative Assets		Derivative Liabilities ^(b)	
	Notional Amount	Fair Value	Notional Amount	Fair Value	Notional Amount	Fair Value	Notional Amount	Fair Value
Capital Markets derivatives	\$ 130,093	\$ 8,394	\$ 137,346	\$ 9,333	\$ 168,033	\$ 12,268	\$ 173,226	\$ 12,379
All other derivatives	22,138	3,468	29,890	2,413	22,224	4,043	31,627	3,001
Total derivatives, gross	\$ 152,231	11,862	\$ 167,236	11,746	\$ 190,257	16,311	\$ 204,853	15,380
Counterparty netting ^(c)		(3,841)		(3,841)		(6,298)		(6,298)
Cash collateral ^(d)		(3,024)		(2,036)		(4,096)		(2,902)
Total derivatives, net		4,997		5,869		5,917		6,180
Less: Bifurcated embedded derivatives		-		369		-		445
Total derivatives on balance sheet		\$ 4,997		\$ 5,500		\$ 5,917		\$ 5,735

(a) Included in All other derivatives are bifurcated embedded derivatives, which are recorded in Policyholder contract deposits.

(b) Included in All other derivatives are bifurcated embedded derivatives, which are recorded in Policyholder contract deposits, Bonds available for sale, at fair value, and Common and preferred stock, at fair value.

(c) Represents netting of derivative exposures covered by a qualifying master netting agreement.

(d) Represents cash collateral posted and received.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)**Hedge Accounting**

AIG designated certain derivatives entered into by AIGFP and AIG Markets with third parties as either fair value or cash flow hedges of certain debt issued by AIG Parent and ILFC. The fair value hedges included (i) interest rate swaps that were designated as hedges of the change in the fair value of fixed rate debt attributable to changes in the benchmark interest rate and (ii) foreign currency swaps designated as hedges of the change in fair value of foreign currency denominated debt attributable to changes in foreign exchange rates and in certain cases also the benchmark interest rate. With respect to the cash flow hedges, (i) interest rate swaps were designated as hedges of the changes in cash flows on floating rate debt attributable to changes in the benchmark interest rate, and (ii) foreign currency swaps were designated as hedges of changes in cash flows on foreign currency denominated debt attributable to changes in the benchmark interest rate and foreign exchange rates.

AIG assesses, both at the hedge's inception and on an ongoing basis, whether the derivatives used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items. Regression analysis is employed to assess the effectiveness of these hedges both on a prospective and retrospective basis. AIG does not utilize the shortcut method to assess hedge effectiveness. For net investment hedges, a qualitative methodology is utilized to assess hedge effectiveness.

AIG uses debt instruments in net investment hedge relationships to mitigate the foreign exchange risk associated with AIG's non-U.S. dollar functional currency foreign subsidiaries. AIG assesses the hedge effectiveness and measures the amount of ineffectiveness for these hedge relationships based on changes in spot exchange rates. AIG records the change in the carrying amount of these investments in the foreign currency translation adjustment within Accumulated other comprehensive income (loss). Simultaneously, the effective portion of the hedge of this exposure is also recorded in foreign currency translation adjustment and the ineffective portion, if any, is recorded in earnings. If (i) the notional amount of the hedging debt instrument matches the designated portion of the net investment and (ii) the hedging debt instrument is denominated in the same currency as the functional currency of the hedged net investment, no ineffectiveness is recorded in earnings. For the three months ended March 31, 2011 and 2010, AIG recognized gains (losses) of \$(24) million and \$48 million, respectively, included in Foreign currency translation adjustment in Accumulated other comprehensive loss related to the net investment hedge relationships.

The following table presents the effect of AIG's derivative instruments in fair value hedging relationships in the Consolidated Statement of Income (Loss):

Three Months Ended March 31, <i>(in millions)</i>	2011	2010
Interest rate contracts ^{(a)(b)} :		
Loss recognized in earnings on derivatives	\$ (7)	\$ (16)
Gain recognized in earnings on hedged items ^(c)	48	44
Gain (loss) recognized in earnings for ineffective portion and amount excluded from effectiveness testing	(1)	9

(a) Gains and losses recognized in earnings on derivatives for the effective portion and hedged items are recorded in Other income. Gains and losses recognized in earnings on derivatives for the ineffective portion and amounts excluded from effectiveness testing are recorded in Net realized capital losses and Other income, respectively.

(b) Includes \$(1) million and \$4 million for the three-month periods ended March 31, 2011 and 2010, respectively, related to the ineffective portion and \$5 million for the three-month period ended March 31, 2010, for amounts excluded from effectiveness testing.

(c) Includes \$42 million and \$19 million for the three-month periods ended March 31, 2011 and 2010, respectively, representing the amortization of debt basis adjustment following the discontinuation of hedge accounting on certain positions.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

The following table presents the effect of AIG's derivative instruments in cash flow hedging relationships in the Consolidated Statement of Income (Loss):

Three Months Ended March 31, (in millions)	2011	2010
Interest rate contracts ^(a) :		
Gain recognized in OCI on derivatives	\$ -	\$ 38
Gain (loss) reclassified from Accumulated OCI into earnings ^(b)	(18)	19
Loss recognized in earnings on derivatives for ineffective portion	-	(6)

(a) Gains and losses reclassified from Accumulated other comprehensive loss are recorded in Other income. Gains or losses recognized in earnings on derivatives for the ineffective portion are recorded in Net realized capital losses.

(b) The effective portion of the change in fair value of a derivative qualifying as a cash flow hedge is recorded in Accumulated other comprehensive income until earnings are affected by the variability of cash flows in the hedged item. At March 31, 2011, \$41 million of the deferred net loss in Accumulated other comprehensive loss is expected to be recognized in earnings during the next 12 months.

Derivatives Not Designated as Hedging Instruments

The following table presents the effect of AIG's derivative instruments not designated as hedging instruments in the Consolidated Statement of Income (Loss):

Three Months Ended March 31, (in millions)	Gains (Losses) Recognized in Earnings	
	2011	2010
By Derivative Type:		
Interest rate contracts ^(a)	\$ (274)	\$ (908)
Foreign exchange contracts	20	272
Equity contracts	(104)	126
Commodity contracts	5	(6)
Credit contracts	347	144
Other contracts ^(b)	(18)	130
Total	\$ (24)	\$ (242)
By Classification:		
Premiums	\$ 25	\$ 19
Net investment income	2	4
Net realized capital gains (losses)	32	(514)
Other income	(83)	249
Total	\$ (24)	\$ (242)

(a) Includes cross currency swaps.

(b) Includes embedded derivative gains of \$107 million and \$147 million, respectively, for the three months ended March 31, 2011 and March 31, 2010.

Capital Markets Derivatives

AIGFP enters into derivative transactions to mitigate market risk in its exposures (interest rates, currencies, commodities, credit and equities) arising from its transactions. In most cases, AIGFP did not hedge its exposures related to the credit default swaps it had written. As a dealer, AIGFP structured and entered into derivative transactions to meet the needs of counterparties who may have been seeking to hedge certain aspects of such counterparties' operations or obtain a desired financial exposure.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

Capital Markets derivative transactions involving interest rate swap transactions generally involve the exchange of fixed and floating rate interest payment obligations without the exchange of the underlying notional amounts. AIGFP typically became a principal in the exchange of interest payments between the parties and, therefore, is exposed to counterparty credit risk and may be exposed to loss, if counterparties default. Currency, commodity and equity swaps are similar to interest rate swaps but involve the exchange of specific currencies or cash flows based on the underlying commodity, equity securities or indices. Also, they may involve the exchange of notional amounts at the beginning and end of the transaction. Swaptions are options where the holder has the right but not the obligation to enter into a swap transaction or cancel an existing swap transaction.

AIGFP follows a policy of minimizing interest rate, currency, commodity, and equity risks associated with investment securities by entering into offsetting positions, on a security-by-security basis within its derivatives portfolio, thereby offsetting a significant portion of the unrealized appreciation and depreciation. In addition, to reduce its credit risk, AIGFP has entered into credit derivative transactions with respect to \$334 million of securities to economically hedge its credit risk.

The timing and the amount of cash flows relating to Capital Markets foreign exchange forwards and exchange traded futures and options contracts are determined by each of the respective contractual agreements.

Futures and forward contracts are contracts that obligate the holder to sell or purchase foreign currencies, commodities or financial indices in which the seller/purchaser agrees to make/take delivery at a specified future date of a specified instrument, at a specified price or yield. Options are contracts that allow the holder of the option to purchase or sell the underlying commodity, currency or index at a specified price and within, or at, a specified period of time. As a writer of options, AIGFP generally receives an option premium and then manages the risk of any unfavorable change in the value of the underlying commodity, currency or index by entering into offsetting transactions with third-party market participants. Risks arise as a result of movements in current market prices from contracted prices, and the potential inability of the counterparties to meet their obligations under the contracts.

Capital Markets Super Senior Credit Default Swaps

AIGFP entered into credit default swap transactions with the intention of earning revenue on credit exposure. In the majority of Capital Markets credit default swap transactions, AIGFP sold credit protection on a designated portfolio of loans or debt securities. Generally, AIGFP provides such credit protection on a “second loss” basis, meaning that AIGFP would incur credit losses only after a shortfall of principal and/or interest, or other credit events, in respect of the protected loans and debt securities, exceeds a specified threshold amount or level of “first losses.”

Typically, the credit risk associated with a designated portfolio of loans or debt securities has been tranching into different layers of risk, which are then analyzed and rated by the credit rating agencies. At origination, there is usually an equity layer covering the first credit losses in respect of the portfolio up to a specified percentage of the total portfolio, and then successive layers ranging generally from a BBB-rated layer to one or more AAA-rated layers. A significant majority of AIGFP transactions that were rated by rating agencies had risk layers or tranches rated AAA at origination and are immediately junior to the threshold level above which AIGFP’s payment obligation would generally arise. In transactions that were not rated, AIGFP applied equivalent risk criteria for setting the threshold level for its payment obligations. Therefore, the risk layer assumed by AIGFP with respect to the designated portfolio of loans or debt securities in these transactions is often called the “super senior” risk layer, defined as a layer of credit risk senior to one or more risk layers rated AAA by the credit rating agencies, or, if the transaction is not rated, structured to be the equivalent thereto.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

The following table presents the net notional amount, fair value of derivative (asset) liability and unrealized market valuation gain (loss) of the Capital Markets super senior credit default swap portfolio, including credit default swaps written on mezzanine tranches of certain regulatory capital relief transactions, by asset class:

<i>(in millions)</i>	Net Notional Amount		Fair Value of Derivative (Asset) Liability at		Unrealized Market Valuation Gain (Loss) Three Months Ended March 31,	
	March 31, 2011 ^(a)	December 31, 2010 ^(a)	March 31, 2011 ^{(b)(c)}	December 31, 2010 ^{(b)(c)}	2011 ^(c)	2010 ^(c)
Regulatory Capital:						
Corporate loans	\$ 3,395	\$ 5,193	\$ -	\$ -	\$ -	\$ -
Prime residential mortgages	30,514	31,613	(196)	(190)	6	33
Other	1,211	1,263	8	17	9	6
Total	35,120	38,069	(188)	(173)	15	39
Arbitrage:						
Multi-sector CDOs ^(d)	6,158	6,689	3,076	3,484	273	158
Corporate debt/CLOs ^(e)	12,674	12,269	134	171	37	(7)
Total	18,832	18,958	3,210	3,655	310	151
Mezzanine tranches ^(f)	2,705	2,823	200	198	(2)	(71)
Total	\$ 56,657	\$ 59,850	\$ 3,222	\$ 3,680	\$ 323	\$ 119

(a) Net notional amounts presented are net of all structural subordination below the covered tranches.

(b) Fair value amounts are shown before the effects of counterparty netting adjustments and offsetting cash collateral.

(c) Includes credit valuation adjustment losses of \$6 million and \$113 million in the three-month periods ended March 31, 2011 and 2010, respectively, representing the effect of changes in AIG's credit spreads on the valuation of the derivatives liabilities.

(d) During 2011, AIGFP liquidated one multi-sector super senior CDS transaction with a net notional amount of \$188 million. The primary underlying collateral components, which consisted of individual ABS CDS transactions, were sold in an auction to counterparties, including AIGFP, at their approximate fair value at the time of the liquidation. AIGFP was the winning bidder on approximately \$107 million of individual ABS CDS transactions, which are reported in written single name credit default swaps as of March 31, 2011. As a result, a \$121 million loss, which was previously included in the fair value of the derivative liability as an unrealized market valuation loss, was realized. During 2011, AIGFP also paid \$14 million to its counterparties with respect to multi-sector CDOs. Upon payment, a \$14 million loss, which was previously included in the fair value of the derivative liability as an unrealized market valuation loss, was realized. Multi-sector CDOs also include \$5.2 billion and \$5.5 billion in net notional amount of credit default swaps written with cash settlement provisions at March 31, 2011 and December 31, 2010, respectively.

(e) Corporate debt/CLOs include \$1.4 billion and \$1.3 billion in net notional amount of credit default swaps written on the super senior tranches of CLOs at March 31, 2011 and December 31, 2010, respectively.

(f) Net of offsetting purchased CDS of \$1.5 billion and \$1.4 billion in net notional amount at March 31, 2011 and December 31, 2010, respectively.

All outstanding CDS transactions for regulatory capital purposes and the majority of the arbitrage portfolio have cash-settled structures in respect of a basket of reference obligations, where AIGFP's payment obligations, other than for posting collateral, may be triggered by payment shortfalls, bankruptcy and certain other events such as write-downs of the value of underlying assets. For the remainder of the CDS transactions in respect of the arbitrage portfolio, AIGFP's payment obligations are triggered by the occurrence of a credit event under a single reference security, and performance is limited to a single payment by AIGFP in return for physical delivery by the counterparty of the reference security.

The expected weighted average maturity of AIGFP's super senior credit derivative portfolios as of March 31, 2011 was 1.5 years for the regulatory capital corporate loan portfolio, 3.6 years for the regulatory capital prime residential mortgage portfolio, 4.5 years for the regulatory capital other portfolio, 5.9 years for the multi-sector CDO arbitrage portfolio and 4.8 years for the corporate debt/CLO portfolio.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

Regulatory Capital Portfolio

The regulatory capital portfolio represents derivatives written for financial institutions in Europe, for the purpose of providing regulatory capital relief rather than for arbitrage purposes. In exchange for a periodic fee, the counterparties receive credit protection with respect to a portfolio of diversified loans they own, thus reducing their minimum capital requirements. These CDS transactions were structured with early termination rights for counterparties allowing them to terminate these transactions at no cost to AIGFP at a certain period of time or upon a regulatory event such as certain changes to regulatory capital standards. During the three-month period ended March 31, 2011, \$1.4 billion in net notional amount was terminated or matured at no cost to AIGFP.

The regulatory capital relief CDS transactions require cash settlement and, other than for collateral posting, AIGFP is required to make a payment in connection with a regulatory capital relief transaction only if realized credit losses in respect of the underlying portfolio exceed AIGFP's attachment point.

All of the regulatory capital transactions directly or indirectly reference tranching pools of large numbers of whole loans that were originated by the financial institution (or its affiliates) receiving the credit protection, rather than structured securities containing loans originated by other third parties. In the vast majority of transactions, the loans are intended to be retained by the originating financial institution and in all cases the originating financial institution is the purchaser of the CDS, either directly or through an intermediary.

The super senior tranches of these CDS transactions continue to be supported by high levels of subordination, which, in most instances, have increased since origination. The weighted average subordination supporting the prime residential mortgage and corporate loan referenced portfolios at March 31, 2011 was 15.53 percent and 20.87 percent, respectively. The highest realized losses to date in any single residential mortgage and corporate loan pool were 2.68 percent and 0.52 percent, respectively. Each of the corporate loan transactions consists of several hundred secured and unsecured loans diversified by industry and, in some instances, by country, and have per-issuer concentration limits. Both types of transactions generally allow some substitution and replenishment of loans, subject to defined constraints, as older loans mature or are prepaid. These replenishment rights generally expire within the first few years of the trade, after which the proceeds of any prepaid or maturing loans are applied first to the super senior tranche (sequentially), thereby increasing the relative level of subordination supporting the balance of AIGFP's super senior CDS exposure.

The regulatory benefit of these transactions for AIGFP's financial institution counterparties is generally derived from the capital regulations promulgated by the Basel Committee on Banking Supervision known as Basel I. In December 2010, the Basel Committee on Banking Supervision finalized a new framework for international capital and liquidity standards known as Basel III, which, when fully implemented, may reduce or eliminate the regulatory benefits to certain counterparties from these transactions and thus may impact the period of time that such counterparties are expected to hold the positions. In prior years, it had been expected that financial institution counterparties would complete a transition from Basel I to an intermediate standard known as Basel II, which could have had similar effects on the benefits of these transactions, at the end of 2009. Basel III has now superseded Basel II, but the details of its implementation by the various European Central Banking districts have not been finalized. Should certain counterparties continue to receive favorable regulatory capital benefits from these transactions, those counterparties may not exercise their options to terminate the transactions in the expected time frame. AIGFP continues to reassess the expected maturity of this portfolio. As of March 31, 2011, AIGFP estimated that the weighted average expected maturity of the portfolio was 3.40 years.

Given the current performance of the underlying portfolios, the level of subordination and AIGFP's own assessment of the credit quality of the underlying portfolio, as well as the risk mitigants inherent in the transaction structures, AIGFP does not expect that it will be required to make payments pursuant to the contractual terms of those transactions providing regulatory relief.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

Arbitrage Portfolio

The arbitrage portfolio includes arbitrage-motivated transactions written on multi-sector CDOs or designated pools of investment grade senior unsecured corporate debt or CLOs.

The outstanding multi-sector CDO portfolio at March 31, 2011 was written on CDO transactions (including synthetic CDOs) that generally held a concentration of RMBS, CMBS and inner CDO securities. At March 31, 2011, approximately \$2.9 billion net notional amount (fair value liability of \$1.6 billion) of this portfolio was written on super senior multi-sector CDOs that contain some level of sub-prime RMBS collateral, with a concentration in the 2005 and earlier vintages of sub-prime RMBS. AIGFP's portfolio also included both high grade and mezzanine CDOs.

The majority of multi-sector CDO CDS transactions require cash settlement and, other than for collateral posting, AIGFP is required to make a payment in connection with such transactions only if realized credit losses in respect of the underlying portfolio exceed AIGFP's attachment point. As of March 31, 2011, only one transaction, with a net notional amount of \$381 million, has breached its attachment point. AIGFP has paid a total of \$83 million, of which \$14 million was paid in the first quarter of 2011. In the remainder of the portfolio, AIGFP's payment obligations are triggered by the occurrence of a credit event under a single reference security, and performance is limited to a single payment by AIGFP in return for physical delivery by the counterparty of the reference security.

Included in the multi-sector CDO portfolio are maturity-shortening puts that allow the holders of the securities issued by certain CDOs to treat the securities as short-term 2a-7 eligible investments under the Investment Company Act of 1940 (2a-7 Puts). Holders of securities are required, in certain circumstances, to tender their securities to the issuer at par. If an issuer's remarketing agent is unable to resell the securities so tendered, AIGFP must purchase the securities at par so long as the security has not experienced a payment default or certain bankruptcy events with respect to the issuer of such security have not occurred. During 2010, AIGFP terminated all 2a-7 Puts in respect of notes held by holders other than AIGFP and its affiliates. AIGFP is not a party to any commitments to issue any additional 2a-7 Puts.

The corporate arbitrage portfolio consists principally of CDS transactions written on portfolios of senior unsecured corporate obligations that were generally rated investment grade at inception of the CDS. These CDS transactions require cash settlement. Also, included in this portfolio are CDS transactions with a net notional amount of \$1.4 billion written on the senior part of the capital structure of CLOs, which require physical settlement.

Certain of the super senior credit default swaps provide the counterparties with an additional termination right if AIG's rating level falls to BBB or Baa2. At that level, counterparties to the CDS transactions with a net notional amount of \$1.5 billion at March 31, 2011 have the right to terminate the transactions early. If counterparties exercise this right, the contracts provide for the counterparties to be compensated for the cost to replace the transactions, or an amount reasonably determined in good faith to estimate the losses the counterparties would incur as a result of the termination of the transactions.

Because of long-term maturities of the CDS in the arbitrage portfolio, AIG is unable to make reasonable estimates of the periods during which any payments would be made. However, the net notional amount represents the maximum exposure to loss on the super senior credit default swap portfolio.

Collateral

Most of AIGFP's super senior credit default swaps are subject to collateral posting provisions, which typically are governed by International Swaps and Derivatives Association, Inc. (ISDA) Master Agreements (Master Agreements) and related Credit Support Annexes (CSA). These provisions differ among counterparties and asset classes. AIGFP has received collateral calls from counterparties in respect of certain super senior credit default swaps, of which a large majority relate to multi-sector CDOs. To a lesser extent, AIGFP has also received

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

collateral calls in respect of certain super senior credit default swaps entered into by counterparties for regulatory capital relief purposes and in respect of corporate arbitrage.

The amount of future collateral posting requirements is a function of AIG's credit ratings, the rating of the reference obligations and the market value of the relevant reference obligations, with the latter being the most significant factor. While a high level of correlation exists between the amount of collateral posted and the valuation of these contracts in respect of the arbitrage portfolio, a similar relationship does not exist with respect to the regulatory capital portfolio given the nature of how the amount of collateral for these transactions is determined. Given the lack of observable data and the uncertainty regarding the potential effects on market prices of measures undertaken by the federal government to address the credit market disruption, AIGFP is unable to reasonably estimate the amounts of collateral that it may be required to post in the future.

At March 31, 2011 and December 31, 2010, the amounts of collateral postings with respect to AIGFP's super senior credit default swap portfolio (prior to offsets for other transactions) were \$3.4 billion and \$3.8 billion, respectively.

AIGFP Written Single Name Credit Default Swaps

AIGFP has also entered into credit default swap contracts referencing single-name exposures written on corporate, index and asset-backed credits, with the intention of earning spread income on credit exposure. Some of these transactions were entered into as part of a long-short strategy allowing AIGFP to earn the net spread between CDS it wrote and ones it purchased. At March 31, 2011, the net notional amount of these written CDS contracts was \$494 million. AIGFP has hedged these exposures by purchasing offsetting CDS contracts of \$199 million in net notional amount. The net unhedged position of \$295 million represents the maximum exposure to loss on these CDS contracts. The average maturity of the written CDS contracts is 16.68 years. At March 31, 2011, the fair value of derivative liability (which represents the carrying value) of the portfolio of CDS was \$77 million.

Upon a triggering event (e.g., a default) with respect to the underlying credit, AIGFP would normally have the option to settle the position through an auction process (cash settlement) or pay the notional amount of the contract to the counterparty in exchange for a bond issued by the underlying credit obligor (physical settlement).

AIGFP wrote these written CDS contracts under Master Agreements. The majority of these Master Agreements include CSA, which provide for collateral postings at various ratings and threshold levels. At March 31, 2011, AIGFP had posted \$97 million of collateral under these contracts.

All Other Derivatives

AIG's non-Capital Markets businesses also use derivatives and other instruments as part of their financial risk management. Interest rate derivatives (such as interest rate swaps) are used to manage interest rate risk associated with embedded derivatives contained in insurance contract liabilities, fixed income securities, outstanding medium- and long-term notes as well as other interest rate sensitive assets and liabilities. Foreign exchange derivatives (principally foreign exchange forwards and options) are used to economically mitigate risk associated with non-U.S. dollar denominated debt, net capital exposures, and foreign currency transactions. Equity derivatives are used to mitigate financial risk embedded in certain insurance liabilities. The derivatives are effective economic hedges of the exposures that they are meant to offset.

In addition to hedging activities, AIG also enters into derivative instruments with respect to investment operations, which include, among other things, credit default swaps and purchasing investments with embedded derivatives, such as equity linked notes and convertible bonds.

Matched Investment Program Written Credit Default Swaps

AIG's Matched Investment Program (MIP) operations, which are reported in AIG's Other operations category as part of Asset Management — Direct Investment business, are currently in run-off. Through the MIP, AIG has

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

entered into CDS contracts as a writer of protection, with the intention of earning spread income on credit exposure in an unfunded form. The portfolio of CDS contracts were single-name exposures and, at inception, were predominantly high-grade corporate credits.

These contracts were written through AIG Markets, which then transacted directly with unaffiliated third parties under ISDA agreements. As of March 31, 2011, the notional amount of written CDS contracts was \$1.4 billion with an average credit rating of BBB+. At that date, the average remaining maturity of the written CDS contracts was 1.3 years and the fair value of the derivative liability (which represents the carrying value) of the MIP's written CDS contracts was \$18.8 million.

The majority of the ISDA agreements include CSA provisions, which provide for collateral postings at various ratings and threshold levels. At March 31, 2011, \$1.3 million of collateral was posted for CDS contracts related to the MIP. The notional amount represents the maximum exposure to loss on the written CDS contracts. However, because of the average investment grade rating and expected default recovery rates, actual losses are expected to be less.

Upon a triggering event (e.g., a default) with respect to the underlying credit, AIG Markets would normally have the option to settle the position on behalf of the MIP through an auction process (cash settlement) or pay the notional amount of the contract to the counterparty in exchange for a bond issued by the underlying credit (physical settlement).

Credit Risk-Related Contingent Features

AIG transacts in derivative transactions directly with unaffiliated third parties under ISDA agreements. Many of the ISDA agreements also include CSA provisions, which provide for collateral postings at various ratings and threshold levels. In addition, AIG attempts to reduce credit risk with certain counterparties by entering into agreements that enable collateral to be obtained from a counterparty on an upfront or contingent basis.

The aggregate fair value of AIG's derivative instruments, including those of AIGFP, that contain credit risk-related contingent features that were in a net liability position at March 31, 2011, was approximately \$4.5 billion. The aggregate fair value of assets posted as collateral under these contracts at March 31, 2011, was \$4.8 billion.

AIG estimates that at March 31, 2011, based on AIG's outstanding financial derivative transactions, including those of AIGFP at that date, a one-notch downgrade of AIG's long-term senior debt ratings to BBB+ by Standard & Poor's Financial Services LLC, a subsidiary of The McGraw-Hill Companies, Inc. (S&P), would permit counterparties to make additional collateral calls and permit the counterparties to elect early termination of contracts, resulting in a negligible amount of corresponding collateral postings and termination payments; a one-notch downgrade to Baa2 by Moody's Investors' Services, Inc. (Moody's) and an additional one-notch downgrade to BBB by S&P would result in approximately \$300 million in additional collateral postings and termination payments and a further one-notch downgrade to Baa3 by Moody's and BBB- by S&P would result in approximately \$200 million in additional collateral postings and termination payments. Additional collateral postings upon downgrade are estimated based on the factors in the individual collateral posting provisions of the CSA with each counterparty and current exposure as of March 31, 2011. Factors considered in estimating the termination payments upon downgrade include current market conditions, the complexity of the derivative transactions, historical termination experience and other observable market events such as bankruptcy and downgrade events that have occurred at other companies. Management's estimates are also based on the assumption that counterparties will terminate based on their net exposure to AIG. The actual termination payments could significantly differ from management's estimates given market conditions at the time of downgrade and the level of uncertainty in estimating both the number of counterparties who may elect to exercise their right to terminate and the payment that may be triggered in connection with any such exercise.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

Hybrid Securities with Embedded Credit Derivatives

AIG invests in hybrid securities (such as credit-linked notes). Upon the issuance of credit-linked notes, the cash received by the issuer is generally used to invest in highly rated securities in addition to entering into a derivative contract that exchanges the return on its highly-rated securities for the return on a separate portfolio of assets. The investments owned by the issuer serve as collateral for the derivative instrument written by the issuer. The return on the separate portfolio received by the issuer is used to pay the return owed on the credit-linked notes. These hybrid securities expose AIG to risks similar to the risks in RMBS, CMBS, CDOs and ABS, but such risk is derived from the separate portfolio rather than from direct mortgage or loan investments owned by the issuer. As with other investments in RMBS, CMBS, CDOs and other ABS, AIG invested in these hybrid securities with the intent of generating income, and not specifically to acquire exposure to embedded derivative risk. Similar to AIG's other investments in RMBS, CMBS, CDOs and ABS, AIG's investments in these hybrid securities are exposed to losses only up to the amount of AIG's initial investment in the hybrid security, as losses on the derivative contract will be paid via the collateral held by the entity that issues the hybrid security. Losses on the embedded derivative contracts may be triggered by events such as bankruptcy, failure to pay or restructuring associated with the obligations referenced by the derivative, and these losses in turn result in the reduction of the principal amount to be repaid to AIG and other investors in the hybrid securities. Other than AIG's initial investment in the hybrid securities, AIG has no further obligation to make payments on the embedded credit derivatives in the related hybrid securities.

Effective July 1, 2010, AIG elected to account for its investments in these hybrid securities with embedded written credit derivatives at fair value, with changes in fair value recognized in earnings. Through June 30, 2010, these hybrid securities had been accounted for as available for sale securities, and had been subject to other than temporary impairment accounting as applicable.

AIG's investments in these hybrid securities are reported as Bond trading securities in the Consolidated Balance Sheet. The fair value of these hybrid securities was \$155 million at March 31, 2011. These securities have a current par amount of \$561 million and have remaining stated maturity dates that extend to 2056.

11. Commitments, Contingencies and Guarantees

In the normal course of business, various commitments and contingent liabilities are entered into by AIG and certain of its subsidiaries. In addition, AIG guarantees various obligations of certain subsidiaries.

Although AIG cannot currently quantify its ultimate liability for unresolved litigation and investigation matters including those referred to below, it is possible that such liability could have a material adverse effect on AIG's consolidated financial condition or its consolidated results of operations or consolidated cash flows for an individual reporting period.

(a) Litigation and Investigations

Overview. AIG and its subsidiaries, in common with the insurance and financial services industries in general, are subject to litigation, including claims for punitive damages, in the normal course of their business. In AIG's insurance operations (including United Guaranty Corporation (UGC)), litigation arising from claims settlement activities is generally considered in the establishment of AIG's liability for unpaid claims and claims adjustment expense. However, the potential for increasing jury awards and settlements makes it difficult to assess the ultimate outcome of such litigation. AIG is also subject to derivative, class action and other claims asserted by its shareholders and others alleging, among other things, breach of fiduciary duties by its directors and officers and violations of federal and state securities laws. In the case of any derivative action brought on behalf of AIG, any recovery would accrue to the benefit of AIG.

Various regulatory and governmental agencies have been reviewing certain public disclosures, transactions and practices of AIG and its subsidiaries in connection with industry-wide and other inquiries into, among other matters, AIG's liquidity, compensation paid to certain employees, payments made to counterparties, and certain

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

business practices and valuations of current and former operating insurance subsidiaries. AIG has cooperated, and will continue to cooperate, in producing documents and other information in response to subpoenas and other requests.

AIG's Subprime Exposure, Capital Markets Credit Default Swap Portfolio and Related Matters

AIG, AIGFP and certain directors and officers of AIG, AIGFP and other AIG subsidiaries have been named in various actions relating to AIG's exposure to the U.S. residential subprime mortgage market, unrealized market valuation losses on AIGFP's super senior credit default swap portfolio, losses and liquidity constraints relating to AIG's securities lending program and related disclosure and other matters (Subprime Exposure Issues).

Consolidated 2008 Securities Litigation. Between May 21, 2008 and January 15, 2009, eight purported securities class action complaints were filed against AIG and certain directors and officers of AIG and AIGFP, AIG's outside auditors, and the underwriters of various securities offerings in the United States District Court for the Southern District of New York (the Southern District of New York), alleging claims under the Securities Exchange Act of 1934 (the Exchange Act) or claims under the Securities Act of 1933 (the Securities Act). On March 20, 2009, the Court consolidated all eight of the purported securities class actions as *In re American International Group, Inc. 2008 Securities Litigation* (the Consolidated 2008 Securities Litigation).

On May 19, 2009, lead plaintiff in the Consolidated 2008 Securities Litigation filed a consolidated complaint on behalf of purchasers of AIG stock during the alleged class period of March 16, 2006 through September 16, 2008, and on behalf of purchasers of various AIG securities offered pursuant to AIG's shelf registration statements. The consolidated complaint alleges that defendants made statements during the class period in press releases, AIG's quarterly and year-end filings, during conference calls, and in various registration statements and prospectuses in connection with the various offerings that were materially false and misleading and that artificially inflated the price of AIG's stock. The alleged false and misleading statements relate to, among other things, the Subprime Exposure Issues. The consolidated complaint alleges violations of Sections 10(b) and 20(a) of the Exchange Act and Sections 11, 12(a)(2), and 15 of the Securities Act. On August 5, 2009, defendants filed motions to dismiss the consolidated complaint, and on September 27, 2010 the Court denied the motions to dismiss.

On November 24, 2010 and December 10, 2010, AIG and all other defendants filed answers to the consolidated complaint denying the material allegations therein and asserting their defenses.

On April 1, 2011, the lead plaintiff in the Consolidated 2008 Securities Litigation filed a motion to certify a class of plaintiffs.

As of May 2, 2011, plaintiffs have not specified an amount of alleged damages, discovery has only recently commenced and the Court has not determined if a class action is appropriate or the size or scope of any class. As a result, AIG is unable to reasonably estimate the possible loss or range of losses, if any, arising from the litigation.

ERISA Actions — Southern District of New York. Between June 25, 2008, and November 25, 2008, AIG, certain directors and officers of AIG, and members of AIG's Retirement Board and Investment Committee were named as defendants in eight purported class action complaints asserting claims on behalf of participants in certain pension plans sponsored by AIG or its subsidiaries. On March 19, 2009, the Court consolidated these eight actions as *In re American International Group, Inc. ERISA Litigation II*. On June 26, 2009, lead plaintiffs' counsel filed a consolidated amended complaint. The action purports to be brought as a class action under the Employee Retirement Income Security Act of 1974, as amended (ERISA), on behalf of all participants in or beneficiaries of certain benefit plans of AIG and its subsidiaries that offered shares of AIG's common stock. In the consolidated amended complaint, plaintiffs allege, among other things, that the defendants breached their fiduciary responsibilities to plan participants and their beneficiaries under ERISA, by continuing to offer the AIG Stock Fund as an investment option in the plans after it allegedly became imprudent to do so. The alleged ERISA violations relate to, among other things, the defendants' purported failure to monitor and/or disclose certain

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

matters, including the Subprime Exposure Issues. On September 18, 2009, defendants filed motions to dismiss the consolidated amended complaint.

On March 31, 2011, the Court granted defendants' motions to dismiss with respect to one plan at issue, and denied defendants' motions to dismiss with respect to the other two plans at issue.

As of May 2, 2011, plaintiffs have not specified an amount of alleged damages, discovery has not commenced, and the Court has not determined if a class action is appropriate or the size or scope of any class. As a result, AIG is unable to reasonably estimate the possible loss or range of losses, if any, arising from the litigation.

Consolidated 2007 Derivative Litigation. On November 20, 2007 and August 6, 2008, purported shareholder derivative actions were filed in the Southern District of New York naming as defendants directors and officers of AIG and its subsidiaries and asserting claims on behalf of nominal defendant AIG. The actions have been consolidated as *In re American International Group, Inc. 2007 Derivative Litigation* (the Consolidated 2007 Derivative Litigation). On June 3, 2009, lead plaintiff filed a consolidated amended complaint naming additional directors and officers of AIG and its subsidiaries as defendants. As amended, the factual allegations include the Subprime Exposure Issues and AIG and AIGFP employee retention payments and related compensation issues. The claims asserted on behalf of nominal defendant AIG include breach of fiduciary duty, waste of corporate assets, unjust enrichment, contribution and violations of Sections 10(b) and 20(a) of the Exchange Act. On August 5 and 26, 2009, AIG and defendants filed motions to dismiss the consolidated amended complaint. On December 18, 2009, a separate action, previously commenced in the United States District Court for the Central District of California (Central District of California) and transferred to the Southern District of New York on June 5, 2009, was consolidated into the Consolidated 2007 Derivative Litigation and dismissed without prejudice to the pursuit of the claims in the Consolidated 2007 Derivative Litigation.

On March 30, 2010, the Court dismissed the action due to plaintiff's failure to make a pre-suit demand on AIG's Board of Directors. On March 17, 2011, the United States Court of Appeals for the Second Circuit (the Second Circuit) affirmed the Southern District of New York's dismissal of the Consolidated 2007 Derivative Litigation due to plaintiff's failure to make a pre-suit demand.

Other Derivative Actions. Separate purported derivative actions, alleging similar claims as the Consolidated 2007 Derivative Litigation, have been brought asserting claims on behalf of the nominal defendant AIG in various jurisdictions. These actions are described below:

- *Supreme Court of New York, Nassau County.* On February 29, 2008, a purported shareholder derivative complaint was filed in the Supreme Court of Nassau County, naming as defendants certain directors and officers of AIG and its subsidiaries. On March 9, 2009, this action was stayed.
- *Supreme Court of New York, New York County.* On March 20, 2009, a purported shareholder derivative complaint was filed in the Supreme Court of New York County naming as defendants certain directors and officers of AIG and recipients of AIGFP retention payments. The complaint has not been served on any defendant.
- *Delaware Court of Chancery.* On September 17, 2008, a purported shareholder derivative complaint was filed in the Delaware Court of Chancery, naming as defendants certain directors and officers of AIG and its subsidiaries. On July 17, 2009 the case was stayed. On May 4, 2011, the parties filed a stipulation with the court agreeing to lift the stay, and granting plaintiff leave to file an amended complaint.
- *Delaware Court of Chancery.* On January 15, 2009, a purported shareholder derivative complaint was filed in the Delaware Court of Chancery, naming as defendants certain directors of AIG and Joseph Cassano, the former Chief Executive Officer of AIGFP. On April 27, 2011, the Court signed a stipulation and dismissed the complaint without prejudice.
- *Superior Court for the State of California, Los Angeles County.* On April 1, 2009 and November 20, 2009, two purported shareholder derivative complaints were filed in the Superior Court for the State of California, Los Angeles County, naming as defendants certain directors and officers of AIG and its subsidiaries. On

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

February 9, 2010, the case filed on November 20, 2009 was stayed. On January 10, 2011, the case filed on April 1, 2009 was voluntarily dismissed.

Southern District of New York. On January 4, 2011, Wanda Mimms, a participant in the AIG Incentive Savings Plan (the “Plan”), filed a purported derivative action on behalf of the Plan in the United States District Court for the Southern District of New York against PricewaterhouseCoopers, LLP (PwC) and asserting a claim for professional malpractice in conducting audits of AIG’s 2007 financial statements. The complaint, as amended on April 20, 2011, also asserts a claim for breach of fiduciary duty under ERISA against members of the Plan’s Retirement Board for failing to pursue a claim for professional malpractice on behalf of the Plan against PwC.

As of May 2, 2011, plaintiff has not specified an amount of alleged damages and no motions to dismiss have been filed by defendants. As a result, AIG is unable to reasonably estimate the possible loss or range of losses, if any, arising from the litigation.

Canadian Securities Class Action — Ontario Superior Court of Justice. On November 12, 2008, an application was filed in the Ontario Superior Court of Justice for leave to bring a purported class action against AIG, AIGFP, certain directors and officers of AIG and Joseph Cassano, the former Chief Executive Officer of AIGFP, pursuant to the Ontario Securities Act. If the Court grants the application, a class plaintiff will be permitted to file a statement of claim against defendants. The proposed statement of claim would assert a class period of November 10, 2006 through September 16, 2008 (later amended to March 16, 2006 through September 16, 2008) and would allege that during this period defendants made false and misleading statements and omissions in quarterly and annual reports and during oral presentations in violation of the Ontario Securities Act.

On April 17, 2009, defendants filed a motion record in support of their motion to stay or dismiss for lack of jurisdiction and forum non conveniens. On July 12, 2010, the Court adjourned a hearing on the motion pending a decision by the Supreme Court of Canada in another action with respect to similar issues raised in the action pending against AIG.

In plaintiff’s proposed statement of claim, plaintiff alleged general and special damages of \$500 million, and punitive damages of \$50 million plus prejudgment interest or such other sums as the Court finds appropriate. As of May 2, 2011, the Court has not determined whether it has jurisdiction or granted plaintiff’s application to file a statement of claim and no discovery has occurred. As a result, AIG is unable to reasonably estimate the possible loss or range of losses, if any, arising from the litigation.

Other Litigation Related to AIGFP

On September 30, 2009, Brookfield Asset Management, Inc. and Brysons International, Ltd. (together, Brookfield) filed a complaint against AIG and AIGFP in the Southern District of New York. Brookfield seeks a declaration that a 1990 interest rate swap agreement between Brookfield and AIGFP (guaranteed by AIG) terminated upon the occurrence of certain alleged events that Brookfield contends constituted defaults under the swap agreement’s standard “bankruptcy” default provision. Brookfield claims that it is excused from all future payment obligations under the swap agreement on the basis of the purported termination. At March 31, 2011, the estimated present value of expected future cash flows discounted at LIBOR was \$1.3 billion, which represents AIG’s maximum contractual loss from the alleged termination of the contract. It is AIG’s position that no termination event has occurred and that the swap agreement remains in effect. A determination that a termination event has occurred could result in AIG losing its entitlement to all future payments under the swap agreement and result in a loss to AIG of the full value at which AIG is carrying the swap agreement.

A determination that AIG triggered a “bankruptcy” event of default under the swap agreement could also, depending on the Court’s precise holding, affect other AIG or AIGFP agreements that contain the same or similar default provisions. Such a determination could also affect derivative agreements or other contracts between third parties, such as credit default swaps under which AIG is a reference credit, which could affect the trading price of AIG securities.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

On December 17, 2009 defendants filed a motion to dismiss. On September 28, 2010, the Court issued a decision granting defendants' motion in part and denying it in part, holding that the complaint: (i) failed to allege that an event of default had occurred based upon defendants' failure to pay or inability to pay debts as they became due; but, (ii) sufficiently alleged that an event of default had occurred based upon other sections of the swap agreement's "bankruptcy" default provision. On January 26, 2011, Brookfield filed an amended complaint that seeks to reassert, on the basis of additional factual allegations, the claims that were dismissed from the initial complaint. On February 9, 2011, AIG filed a motion to dismiss the claim that Brookfield seeks to reassert in its amended complaint.

Securities Lending Dispute with Transatlantic Holdings Inc.

On May 24, 2010, Transatlantic Holdings, Inc. (Transatlantic) and two of its subsidiaries, Transatlantic Reinsurance Company and Trans Re Zurich Reinsurance Company Ltd. (collectively, Claimants), commenced an arbitration proceeding before the American Arbitration Association in New York against AIG and two of its subsidiaries (the AIG Respondents). Claimants allege breach of contract, breach of fiduciary duty, and common law fraud in connection with certain securities lending agency agreements between AIG's subsidiaries and Claimants. Claimants allege that AIG and its subsidiaries should be liable for the losses that Claimants purport to have suffered in connection with securities lending and investment activities, and seek damages of \$350 million and other unspecified damages.

On June 29, 2010, AIG brought a petition in the Supreme Court of the State of New York, seeking to enjoin the arbitration on the ground that AIG is not a party to the securities lending agency agreements with Claimants. On July 29, 2010, the parties agreed to resolve that petition by consolidating the arbitration commenced by Claimants with a separate arbitration, commenced by AIG on June 29, 2010, in which AIG is seeking damages of Euro 17.6 million (\$24.9 million at the March 31, 2011 exchange rate) from Transatlantic for breach of a Master Separation Agreement among Transatlantic, AIG and one of its subsidiary companies.

On September 13, 2010, the AIG Respondents submitted an answer to Claimants' claims asserting, among other things, that there was no breach of the securities lending agency agreements, and that Claimants' other allegations including purported breach of fiduciary duty and fraud are not meritorious. Transatlantic submitted an answer denying liability with respect to AIG's claim on September 13, 2010. The arbitration hearing is scheduled for December 2011. As of May 2, 2011, because of the stage of the proceeding, and the wide difference in damages sought by the parties, AIG is unable to reasonably estimate the possible loss or range of losses, if any, arising from this arbitration.

Employment Litigation against AIG and AIG Global Real Estate Investment Corporation

On December 9, 2009, AIG Global Real Estate Investment Corporation's (AIGGRE) former President, Kevin P. Fitzpatrick, several entities he controls, and various other single purpose entities (the SPEs) filed a complaint in the Supreme Court of the State of New York, New York County against AIG and AIGGRE (the Defendants). The case was removed to the Southern District of New York, and an amended complaint was filed on March 8, 2010. The amended complaint asserts that the Defendants violated fiduciary duties to Fitzpatrick and his controlled entities and breached Fitzpatrick's employment agreement and agreements of SPEs that purportedly entitled him to carried interest fees arising out of the sale or disposition of certain real estate. Fitzpatrick has also brought derivative claims on behalf of the SPEs, purporting to allege that the Defendants breached contractual and fiduciary duties in failing to fund the SPEs with various amounts allegedly due under the SPE agreements. Fitzpatrick has also requested injunctive relief, an accounting, and that a receiver be appointed to manage the affairs of the SPEs. He has further alleged that the SPEs are subject to a constructive trust. Fitzpatrick also has alleged a violation of ERISA relating to retirement benefits purportedly due. Fitzpatrick has claimed that he is currently owed damages totaling approximately \$196 million, and that potential future amounts owed to him are approximately \$78 million, for a total of approximately \$274 million. Fitzpatrick further claims unspecified amounts of carried interest on certain additional real estate assets of AIG and its affiliates. He also seeks punitive damages for the alleged breaches of fiduciary duties. Defendants assert that Fitzpatrick has been paid all amounts

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

currently due and owing pursuant to the various agreements through which he seeks recovery. As set forth above, the possible range of loss to AIG is \$0 to \$274 million, although Fitzpatrick claims that he is also entitled to additional unspecified amounts of carried interest and punitive damages.

Defendants filed counterclaims against Fitzpatrick and a motion to dismiss. On September 28, 2010, the Court dismissed the Defendants' counterclaims, and denied Defendants' motion to dismiss. On March 14, 2011, both plaintiffs and defendants filed motions for partial summary judgment.

ALICO Life International Limited's Italian Internal Fund Suspensions

Certain policyholders of certain unit-linked funds offered by the Italian branch of ALICO Life International Limited (ALIL), the Irish subsidiary of ALICO, have either commenced or threatened litigation against ALIL's Italian branch as a result of the suspension of withdrawals from and diminution in value of those funds since late 2008, alleging damages for misrepresentation, mis-selling, improper or inadequate disclosures and other related claims against ALIL. Most of the lawsuits remain in the early stages of litigation.

In March 2010, ALIL learned that the public prosecutor in Milan had opened a formal investigation into the actions of employees and former employees of ALIL, as well as employees of ALIL's major distributor, based on a policyholder's complaint. The policyholder's complaint underlying the investigation was withdrawn in November 2010.

On March 16, 2011, ALIL publicly announced a settlement offer to policyholders who were invested in the suspended funds at the time of suspension. Policyholders have until May 27, 2011 to accept the settlement offer. If all eligible policyholders accepted the settlement, ALIL would be required to pay up to Euro 143 million (\$203 million at the March 31, 2011 exchange rate) pursuant to the settlement offer. AIG has an accrual for the estimated net cost of the settlement offer as of March 31, 2011.

Under the terms of the ALICO stock purchase agreement, pursuant to which MetLife acquired ALICO as of November 1, 2010, AIG has agreed to indemnify MetLife and its affiliates in respect of any third party claims and regulatory fines associated with ALIL's suspended funds. Such indemnities, including payments made pursuant to the settlement offer described above, will be paid from the funds held in escrow pursuant to the terms of the ALICO stock purchase agreement.

False Claims Act Complaint.

On February 25, 2010, a complaint was filed in the United States District Court for the Southern District of California by two individuals (Relators) seeking to assert claims on behalf of the United States against AIG and certain other defendants, including Goldman Sachs and Deutsche Bank, under the False Claims Act. Relators filed a First Amended Complaint on September 30, 2010, adding certain additional defendants, including Bank of America and Societe Generale. The amended complaint alleges that defendants engaged in fraudulent business practices in respect of their activities in the over-the-counter market for collateralized debt obligations, and submitted false claims to the United States in connection with the FRBNY Credit Facility, the Maiden Lane Interests through, among other things, misrepresenting AIG's ability and intent to repay amounts drawn on the FRBNY Credit Facility, and misrepresenting the value of the securities that the Maiden Lane Interests acquired from AIG and certain of its counterparties. The complaint seeks unspecified damages pursuant to the False Claims Act in the amount of three times the damages allegedly sustained by the United States as well as interest, attorneys' fees, costs and expenses. The complaint and amended complaints were initially filed and maintained under seal while the United States considered whether to intervene in the action. On or about April 28, 2011, after the United States declined to intervene, the District Court lifted the seal.

As of May 2, 2011, AIG has not yet been served with the complaint, defendants have not had an opportunity to answer or seek dismissal of the action, and, if the case does go forward, the Relators have not specified an amount of alleged damages. As a result, AIG is unable to reasonably estimate the possible loss or range of losses, if any, arising from the litigation.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

Settlement Agreement with the Starr Parties

On November 25, 2009, a settlement agreement and memorandum of understanding (the AIG/Greenberg MOU) was entered into by AIG, on the one hand, and AIG's former Chief Executive Officer, Maurice R. Greenberg, AIG's former Chief Financial Officer, Howard I. Smith, C.V. Starr & Company, Inc. (C.V. Starr) and Starr International Company, Inc. (SICO), on the other hand (the Starr Parties). Under the terms of the AIG/Greenberg MOU, the parties have agreed to release each other from all claims, including any claims by Greenberg and Smith against AIG for indemnification of future legal fees and expenses, or settlement costs.

In addition, pursuant to the AIG/Greenberg MOU:

- SICO agreed to undertake to dismiss with prejudice an action it brought against AIG in the Tribuna del Circuito Civil, Panama City, Panama. On February 10, 2010, the parties filed a joint request to dismiss the case. On March 2, 2010, the Court posted its approval of the dismissal of claims and the action was terminated.
- AIG agreed to undertake to dismiss with prejudice its direct claims against Greenberg and Smith in the Delaware 2004/2005 Derivative Litigation. On February 5, 2010, AIG, Greenberg and Smith submitted a stipulation to the Court dismissing AIG's direct claims against Greenberg and Smith.

The Starr Parties had taken the position that the AIG/Greenberg MOU also releases certain of the derivative claims being pursued by the shareholder plaintiffs in the Delaware 2004/2005 Derivative Litigation and the New York 2004/2005 Derivative Litigation. AIG had taken the opposite position. This issue as well as any others between the Starr Parties and AIG have been resolved by the settlement among the parties to the derivative actions, reached on August 25, 2010 (see The Delaware 2004/2005 Derivative Litigation herein for a description of the settlement).

2006 Regulatory Settlements and Related Regulatory Matters

2006 Regulatory Settlements. In February 2006, AIG reached a resolution of claims and matters under investigation with the DOJ, the SEC, the Office of the New York Attorney General (NYAG) and the New York State Department of Insurance (DOI). The settlements resolved investigations conducted by the SEC, NYAG and DOI in connection with the accounting, financial reporting and insurance brokerage practices of AIG and its subsidiaries, as well as claims relating to the underpayment of certain workers' compensation premium taxes and other assessments. These settlements did not, however, resolve investigations by regulators from other states into insurance brokerage practices related to contingent commissions and other broker-related conduct, such as alleged bid rigging. Nor did the settlements resolve any obligations that AIG may have to state guarantee funds in connection with any of these matters.

As a result of these settlements, AIG made payments or placed amounts in escrow in 2006 totaling approximately \$1.64 billion, \$225 million of which represented fines and penalties.

In addition to the escrowed funds, \$800 million was deposited into, and subsequently disbursed by, a fund under the supervision of the SEC, to resolve claims asserted against AIG by investors, including the securities class action and shareholder lawsuits described below. Amounts held in escrow totaling approximately \$338 million, including interest thereon (The Workers' Compensation Fund), are included in Other assets at March 31, 2011, and are specifically designated to satisfy liabilities related to workers' compensation premium reporting issues.

Also, as part of the settlements, AIG agreed to retain, for a period of three years which has been extended through June 30, 2011, an independent consultant to conduct a review that included, among other things, the adequacy of AIG's internal control over financial reporting, the policies, procedures and effectiveness of AIG's regulatory, compliance and legal functions and the remediation plan that AIG implemented as a result of its own internal review.

Other Regulatory Settlements. AIG's 2006 regulatory settlements with the SEC, DOJ, NYAG and DOI did not resolve investigations by regulators from other states into insurance brokerage practices. AIG entered into

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

agreements effective in early 2008 with the Attorneys General of the States of Florida, Hawaii, Maryland, Michigan, Oregon, Texas and West Virginia; the Commonwealths of Massachusetts and Pennsylvania; and the District of Columbia; as well as the Florida Department of Financial Services and the Florida Office of Insurance Regulation, relating to their respective industry-wide investigations into producer compensation and insurance placement practices. The settlements called for total payments of \$26 million by AIG, of which \$4.4 million was paid under previous settlement agreements. During the term of the settlement agreements, which run through early 2018, AIG will continue to maintain certain producer compensation disclosure and ongoing compliance initiatives. AIG will also continue to cooperate with the industry-wide investigations. On April 7, 2010, it was announced that AIG and the Ohio Attorney General entered into a settlement agreement to resolve the Ohio Attorney General's claim concerning producer compensation and insurance placement practices. AIG paid the Ohio Attorney General \$9 million as part of that settlement.

NAIC Examination of Workers' Compensation Premium Reporting. During 2006, the Settlement Review Working Group of the National Association of Insurance Commissioners (NAIC), under the direction of the States of Indiana, Minnesota and Rhode Island, began an investigation into AIG's reporting of workers' compensation premiums. In late 2007, the Settlement Review Working Group recommended that a multi-state targeted market conduct examination focusing on workers' compensation insurance be commenced under the direction of the NAIC's Market Analysis Working Group. AIG was informed of the multi-state targeted market conduct examination in January 2008. The lead states in the multi-state examination are Delaware, Florida, Indiana, Massachusetts, Minnesota, New York, Pennsylvania, and Rhode Island. All other states (and the District of Columbia) have agreed to participate in the multi-state examination. The examination focused on legacy issues related to AIG's writing and reporting of workers' compensation insurance prior to 1996 and current compliance with legal requirements applicable to such business.

On December 17, 2010, AIG and the lead states reached an agreement to settle all regulatory liabilities arising out of the subjects of the multistate examination. The regulatory settlement agreement, which has been agreed to by all 50 states and the District of Columbia, includes, among other terms, (i) AIG's payment of \$100 million in regulatory fines and penalties; (ii) AIG's payment of \$46.5 million in outstanding premium taxes; (iii) AIG's agreement to enter into a compliance plan describing agreed-upon specific steps and standards for evaluating AIG's ongoing compliance with state regulations governing the setting of workers' compensation insurance premium rates and the reporting of workers' compensation premiums; and (iv) AIG's agreement to pay up to \$150 million in contingent fines in the event that AIG fails to comply substantially with the compliance plan requirements. The \$146.5 million in fines, penalties and premium taxes can be funded out of the \$338 million held in the Workers' Compensation Fund to the extent that such monies have not already been used to fund the class action settlement discussed below. The regulatory settlement is contingent upon and will not become effective until, among other events: (i) a final, court-approved settlement is reached in all the lawsuits that comprise the Workers' Compensation Premium Reporting Litigation, discussed below, including the putative class action, except that such settlement need not resolve claims between AIG and the Liberty Mutual Group in order for the regulatory settlement to become effective and (ii) a settlement is reached and consummated between AIG and certain state insurance guaranty funds that may assert claims against AIG for underpayment of guaranty-fund assessments.

AIG has established a reserve equal to the amounts payable under the proposed settlement.

Litigation Related to the Matters Underlying the 2006 Regulatory Settlements

AIG and certain present and former directors and officers of AIG have been named in various actions related to the matters underlying the 2006 Regulatory Settlements. These actions are described below.

The Consolidated 2004 Securities Litigation. Beginning in October 2004, a number of putative securities fraud class action suits were filed in the Southern District of New York against AIG and consolidated as *In re American International Group, Inc. Securities Litigation* (the Consolidated 2004 Securities Litigation). Subsequently, a separate, though similar, securities fraud action was also brought against AIG by certain Florida pension funds.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

The lead plaintiff in the Consolidated 2004 Securities Litigation is a group of public retirement systems and pension funds benefiting Ohio state employees, suing on behalf of themselves and all purchasers of AIG's publicly traded securities between October 28, 1999 and April 1, 2005. The named defendants are AIG and a number of present and former AIG officers and directors, as well as Starr, SICO, General Reinsurance Corporation (General Re), and PricewaterhouseCoopers LLP (PwC), among others. The lead plaintiff alleges, among other things, that AIG: (1) concealed that it engaged in anti-competitive conduct through alleged payment of contingent commissions to brokers and participation in illegal bid-rigging; (2) concealed that it used "income smoothing" products and other techniques to inflate its earnings; (3) concealed that it marketed and sold "income smoothing" insurance products to other companies; and (4) misled investors about the scope of government investigations. In addition, the lead plaintiff alleges that Greenberg manipulated AIG's stock price. The lead plaintiff asserts claims for violations of Sections 11 and 15 of the Securities Act, Section 10(b) of the Exchange Act and Rule 10b-5 promulgated thereunder, and Sections 20(a) and Section 20A of the Exchange Act.

In October 2009, the lead plaintiff advised the Court that it had entered into a settlement agreement with Greenberg, Smith, Christian M. Milton, Michael J. Castelli, SICO and Starr. At the lead plaintiff's request, the Court has entered an order dismissing all of the lead plaintiff's claims against these defendants "without prejudice" to any party. The settlement agreement between lead plaintiff and these defendants was filed with the Court on January 6, 2011.

On February 22, 2010, the Court issued an opinion granting, in part, lead plaintiffs' motion for class certification. The Court rejected lead plaintiffs' request to include in the class purchasers of certain AIG bonds and declined to certify a class with respect to certain counts of the complaint and dismissed those claims for lack of standing. With respect to the remaining claims under the Exchange Act on behalf of putative class members who had purchased AIG Common Stock, the Court declined to certify a class as to certain defendants other than AIG and rejected lead plaintiffs' claims that class members could establish injury based on disclosures on two of the six dates lead plaintiffs had proposed, but certified a class consisting of all shareholders who purchased or otherwise acquired AIG Common Stock during the class period of October 28, 1999 to April 1, 2005, and who possessed that stock over one or more of the dates October 14, 2004, October 15, 2004, March 17, 2005 or April 1, 2005, as well as persons who held AIG Common Stock in two companies at the time they were acquired by AIG in exchange for AIG Common Stock, and were allegedly damaged thereby. In light of the class certification decision, on March 5, 2010, the Court denied as moot General Re's and lead plaintiffs' motion to certify their proposed settlement, and on March 18, 2010, PwC withdrew its motion to approve its proposed settlement with lead plaintiffs. Lead plaintiffs and AIG each filed petitions requesting permission to file an interlocutory appeal of the class certification decision. AIG, General Re, Richard Napier and Ronald Ferguson each filed opposition briefs to lead plaintiffs' petition.

On May 17, 2010, PwC and lead plaintiffs jointly moved for final approval of their settlement as proposed prior to class certification. On November 30, 2010, the Court approved the settlement between lead plaintiffs and PwC. On December 13, 2010, four shareholders filed a notice of appeal of the final judgment. The appeal is currently pending in the Second Circuit.

On June 23, 2010, General Re and lead plaintiffs jointly moved for preliminary approval of their settlement. On September 10, 2010, the Court issued an opinion denying the motion for preliminary approval and, on September 23, 2010, the Court dismissed the lead plaintiffs' causes of action with respect to General Re. On October 21, 2010, lead plaintiffs filed a notice of appeal of the Court's September 23, 2010 order dismissing the claims against the Gen Re defendants, as well as the March 4, 2010 order refusing to preliminarily approve a settlement with the Gen Re defendants, and the February 22, 2010 class certification order to the extent it denied class certification for the claims against the Gen Re defendants.

On June 28, 2010, the Second Circuit granted AIG's petition seeking permission to file an interlocutory appeal of the class certification decision, and denied the petition by lead plaintiffs. On September 1, 2010, AIG and lead plaintiffs entered into a stipulation to withdraw AIG's interlocutory appeal without prejudice to reinstate the appeal in the future, which has been endorsed by the Second Circuit. On February 4, 2011, AIG and lead

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

plaintiffs entered into a stipulation to extend the time by which the appeal must be reinstated, which has been endorsed by the U.S. Court of Appeals for the Second Circuit.

On July 14, 2010, AIG approved the terms of a settlement (the Settlement) with lead plaintiffs. The Settlement is conditioned on, among other things, court approval and a minimum level of shareholder participation. Under the terms of the Settlement, if consummated, AIG will pay an aggregate of \$725 million, \$175 million of which is to be paid into escrow within ten days of preliminary court approval. AIG's obligation to fund the remainder of the settlement amount is conditioned on its having consummated one or more common stock offerings raising net proceeds of at least \$550 million prior to final court approval (Qualified Offering). AIG has agreed to use best efforts, consistent with the fiduciary duties of AIG's management and Board of Directors, to effect a Qualified Offering, but the decision as to whether market conditions or pending or contemplated corporate transactions make it commercially reasonable to proceed with such an offering will be within AIG's unilateral discretion. In the event that AIG effects a registered secondary offering of common stock on behalf of the Department of the Treasury resulting in the Department of the Treasury receiving proceeds of at least \$550 million, then market access will be deemed to have been demonstrated and AIG shall be deemed to have consummated a Qualified Offering. AIG, in its sole discretion, also may fund the \$550 million from other sources. If AIG does not fund the \$550 million before final court approval of the Settlement, lead plaintiffs may terminate the agreement, elect to acquire freely transferable shares of AIG Common Stock with a market value of \$550 million provided AIG is able to obtain all necessary approvals, or extend the period for AIG to complete a Qualified Offering. As of March 31, 2011, AIG had an accrued liability for the full amount of the Settlement.

On July 20, 2010, at the joint request of AIG and lead plaintiffs, the District Court entered an order staying all deadlines in the case. On November 30, 2010, AIG and lead plaintiffs executed their agreement of settlement and compromise. On November 30, 2010, lead plaintiffs filed a motion for preliminary approval of the settlement with AIG, which is currently pending.

The New York 2004/2005 Derivative Litigation. Between October 25, 2004 and July 14, 2005, seven separate derivative actions were filed in the Southern District of New York, five of which were consolidated into a single action (the New York 2004/2005 Derivative Litigation). The complaint in this action contains nearly the same types of allegations made in the Consolidated 2004 Securities Litigation. The named defendants include current and former officers and directors of AIG, as well as Marsh & McLennan Companies, Inc. (Marsh), SICO, Starr, ACE Limited and subsidiaries (Ace), General Re, PwC, and certain employees or officers of these entity defendants. Plaintiffs assert claims for breach of fiduciary duty, gross mismanagement, waste of corporate assets, unjust enrichment, insider selling, auditor breach of contract, auditor professional negligence and disgorgement from Greenberg and Smith of incentive-based compensation and AIG share proceeds under Section 304 of the Sarbanes-Oxley Act, among others. Plaintiffs seek, among other things, compensatory damages, corporate governance reforms, and a voiding of the election of certain AIG directors. AIG's Board of Directors appointed a special committee of independent directors (Special Committee) to review the matters asserted in the operative consolidated derivative complaint. The Court entered an order staying this action pending resolution of the Delaware 2004/2005 Derivative Litigation discussed below. The Court also entered an order that termination of certain named defendants from the Delaware action applies to this action without further order of the Court. On February 26, 2009, the Court dismissed those AIG officer and director defendants against whom the shareholder plaintiffs in the Delaware action had not pursued claims.

Under the AIG/Greenberg MOU, AIG agreed to undertake to dismiss with prejudice its claims against Greenberg and Smith in the New York 2004/2005 Derivative Litigation. The Starr Parties had taken the position that the AIG/Greenberg MOU released the derivative claims being pursued by the shareholder plaintiffs; AIG had taken the opposite position.

This action was resolved by the settlement among the parties to the derivative actions reached on August 25, 2010. See the Delaware 2004/2005 Derivative Litigation for a description of the settlement. By order dated March 11, 2011, the Court dismissed this action with prejudice. On April 13, 2011, the period for filing an appeal expired with no appeals filed. This matter has been concluded.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

The Delaware 2004/2005 Derivative Litigation. From October 2004 to April 2005, AIG shareholders filed five derivative complaints in the Delaware Chancery Court. All of these derivative lawsuits were consolidated into a single action as *In re American International Group, Inc. Consolidated Derivative Litigation* (the Delaware 2004/2005 Derivative Litigation). The amended consolidated complaint named 43 defendants (not including nominal defendant AIG) who, as in the New York 2004/2005 Derivative Litigation, were current and former officers and directors of AIG, as well as other entities and certain of their current and former employees and directors. The factual allegations, legal claims and relief sought in this action are similar to those alleged in the New York 2004/2005 Derivative Litigation, except that the claims are only under state law.

In early 2007, the Court approved an agreement that AIG be realigned as plaintiff, and, on June 13, 2007, acting on the direction of the Special Committee, AIG filed an amended complaint against former directors and officers Greenberg and Smith, alleging breach of fiduciary duty and indemnification. Also on June 13, 2007, the Special Committee filed a motion to terminate the litigation as to certain defendants, while taking no action as to others. Defendants Greenberg and Smith filed answers to AIG's complaint and brought third-party complaints against certain current and former AIG directors and officers, PwC and INS Regulatory Insurance Services, Inc. On September 28, 2007, AIG and the shareholder plaintiffs filed a combined amended complaint in which AIG continued to assert claims against defendants Greenberg and Smith and took no position as to the claims asserted by the shareholder plaintiffs in the remainder of the combined amended complaint. In that pleading, the shareholder plaintiffs are no longer pursuing claims against certain AIG officers and directors. On February 12, 2008, the Court granted AIG's motion to stay discovery pending the resolution of claims against AIG in the Consolidated 2004 Securities Litigation.

On April 11, 2008, the shareholder plaintiffs filed the First Amended Combined Complaint, which added claims against former AIG directors and officers Greenberg, Edward Matthews, and Thomas Tizzio for breach of fiduciary duty based on alleged bid-rigging in the municipal derivatives market. On June 13, 2008, certain defendants filed motions to dismiss the shareholder plaintiffs' portions of the complaint. On February 10, 2009, the Court denied the motions to dismiss filed by Greenberg, Matthews, and Tizzio; granted the motion to dismiss filed by PwC without prejudice; and granted the motion to dismiss filed by certain former employees of AIG without prejudice for lack of personal jurisdiction. On March 6, 2009, the Court granted an Order of Dismissal, Notice and Order of Voluntary Dismissal and Stipulation and Order of Dismissal to dismiss those individual defendants who were similarly situated to the individuals dismissed by the Court for lack of personal jurisdiction. On March 12, 2009, Defendant Greenberg filed his verified answer to AIG's complaint; cross-claims against Marsh, ACE, General Re, and Tizzio and a third-party complaint against certain current and former AIG directors and officers, as well as INS Regulatory Insurance Services, Inc. Defendant Smith has also filed his answer to AIG's complaint, which was amended on July 9, 2009 to add cross-claims against Tizzio and third-party claims against certain current and former AIG directors and officers, as well as INS Regulatory Insurance Services, Inc. On June 17, 2009, the Court issued an opinion granting the motions to dismiss filed by General Re, Marsh, ACE, and Susan Rivera. On July 13, 2009 and July 17, 2009, the Court entered final judgments in favor of PwC, General Re, Marsh, ACE, and Susan Rivera. Shortly thereafter, the shareholder plaintiffs filed separate appeals: one addressing the dismissal of PwC, and the other addressing the dismissals of ACE, General Re, and Marsh. The Delaware Supreme Court certified the question to the New York Court of Appeals as to whether, under certain circumstances, New York's *in pari delicto* doctrine would bar a derivative claim against a corporation's accountants for negligently failing to uncover a fraud by the corporation. On October 21, 2010 the New York Court of Appeals affirmatively answered the certified question.

On November 10, 2009, the Delaware Supreme Court granted AIG's motion to consolidate the appeal of its dismissal from the *In re Marsh Derivative Litigation* (see below, "*Derivative Action — Delaware Chancery Court (Marsh)*") with the appeal of the dismissals of Marsh, General Re and ACE from the Delaware 2004/2005 Derivative Litigation, and subsequently issued an order notifying the parties that the appeal would be heard by the Court *en banc*. On December 29, 2010, the Delaware Supreme Court affirmed the Chancery Court's decision dismissing claims against AIG, General Re, Marsh, and ACE.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

On February 5, 2010, a stipulation of dismissal was filed with the Court dismissing AIG's direct claims against Greenberg and Smith, pursuant to the AIG/Greenberg MOU. On February 10, 2010, the shareholder plaintiffs informed the Court that they did not object to the dismissal of AIG's direct claims against Greenberg and Smith, but stated that the dismissal did not apply to their claim against Greenberg and Smith, and further stated that they intended to seek attorneys' fees for having initiated the claims against Greenberg and Smith. The Starr Parties had taken the position that the AIG/Greenberg MOU releases the derivative claims being pursued by the shareholder plaintiffs; AIG had taken the opposite position.

On August 25, 2010, AIG and the parties to the various derivative litigations relating to the matters underlying the 2006 Regulatory Settlements entered into a settlement agreement to resolve the New York 2004/2005 Derivative Litigation, the 2004/2005 Delaware Derivative Litigation and the Supreme Court of New York Derivative Action as well as AIG's outstanding disputes with the Starr Parties (the Derivative Actions Settlement). The settlement was conditioned on a separate agreement with AIG's directors and officers liability (D&O) insurers, under which the insurers would pay \$150 million, \$90 million of which would fund the settlement of the derivative claims and which, after the deduction of expenses and plaintiffs' counsel's attorneys' fees, would be paid to AIG. The remaining \$60 million would go to Greenberg and Smith in satisfaction of any obligation that AIG or the insurers had with respect to their legal fees. On November 11, 2010, the insurers and the parties fully executed the insurance settlement agreement.

On January 25, 2011 the Delaware Court approved the Derivative Actions Settlement and dismissed the suit with prejudice. The action has concluded. Pursuant to the terms of the Derivative Action Settlement agreement, after dismissal of the Delaware 2004/2005 Derivative Litigation, the plaintiffs in the New York 2004/2005 Derivative Litigation and the Supreme Court of New York Derivative Action sought dismissal of those actions. By April 14, 2011, all derivative actions relating to the matters underlying the 2006 Regulatory Settlements had been dismissed with prejudice and no appeals taken. On April 14, 2011, AIG received the proceeds from the Derivative Actions Settlement, totaling approximately \$66 million which will be recorded as income in the second quarter of 2011. Any outstanding issues between AIG and the Starr Parties relating to the AIG/Greenberg MOU have been mooted. In addition, pursuant to the insurance settlement agreement, an interpleader action filed by Great American Insurance Company related to competing claims on its D&O coverage policy was dismissed pursuant to stipulation, which was so-ordered by the court on April 20, 2011.

Derivative Action — Supreme Court of New York. On February 11, 2009, shareholder plaintiffs in the Delaware 2004/2005 Derivative Litigation filed a derivative complaint in the Supreme Court of New York against the individual defendants who moved to dismiss the complaint in the Delaware 2004/2005 Derivative Litigation on personal jurisdiction grounds. The defendants include current and former officers and employees of AIG, Marsh, and General Re; AIG is named as a nominal defendant. The complaint in this action contains similar allegations to those made in the Delaware 2004/2005 Derivative Litigation described above. Defendants filed motions to dismiss the complaint on May 1, 2009. The shareholder plaintiffs have reached an agreement staying discovery as well as any motions to dismiss the General Re and Marsh defendants pending final adjudication of any claims against those parties in the Delaware 2004/2005 Derivative Litigation. The individual defendants have also filed motions to dismiss. Pursuant to the stipulation of settlement executed by the parties (see *The New York 2004/2005 Derivative Litigation herein*), the Court denied all pending motions to dismiss as moot.

This action was also resolved by the settlement among the parties to the derivative actions, reached on August 25, 2010. See *The Delaware 2004/2005 Derivative Litigation* for a description of the settlement. By order dated February 10, 2011, the Court dismissed this action with prejudice. On March 24, 2011, the period for filing an appeal expired with no appeals filed. This matter has concluded.

The Multi-District Litigation. Commencing in 2004, policyholders brought multiple federal antitrust and RICO class actions in jurisdictions across the nation against insurers and brokers, including AIG and a number of its subsidiaries, alleging that the insurers and brokers engaged in one or more broad conspiracies to allocate customers, steer business, and rig bids. These actions, including 24 complaints filed in different federal courts naming AIG or an AIG subsidiary as a defendant, were consolidated by the judicial panel on multi-district

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

litigation and transferred to the United States District Court for the District of New Jersey (District of New Jersey) for coordinated pretrial proceedings. The consolidated actions have proceeded in that Court in two parallel actions, *In re Insurance Brokerage Antitrust Litigation* (the Commercial Complaint) and *In re Employee Benefits Insurance Brokerage Antitrust Litigation* (the Employee Benefits Complaint, and, together with the Commercial Complaint, the Multi-District Litigation).

The plaintiffs in the Commercial Complaint are a group of corporations, individuals and public entities that contracted with the broker defendants for the provision of insurance brokerage services for a variety of insurance needs. The broker defendants are alleged to have placed insurance coverage on the plaintiffs' behalf with a number of insurance companies named as defendants, including AIG subsidiaries. The Commercial Complaint also named various brokers and other insurers as defendants (three of which have since settled). The Commercial Complaint alleges that defendants engaged in a number of overlapping "broker-centered" conspiracies to allocate customers through the payment of contingent commissions to brokers and through purported "bid-rigging" practices. It also alleges that the insurer and broker defendants participated in a "global" conspiracy not to disclose to policyholders the payment of contingent commissions. Plaintiffs assert that the defendants violated the Sherman Antitrust Act, the Racketeer Influenced and Corrupt Organizations Act (RICO), and the antitrust laws of 48 states and the District of Columbia, and are liable under common law breach of fiduciary duty and unjust enrichment theories. Plaintiffs seek treble damages plus interest and attorneys' fees as a result of the alleged RICO and Sherman Antitrust Act violations.

The plaintiffs in the Employee Benefits Complaint are a group of individual employees and corporate and municipal employers alleging claims on behalf of two separate nationwide purported classes: an employee class and an employer class that acquired insurance products from the defendants from January 1, 1998 to December 31, 2004. The Employee Benefits Complaint names AIG, as well as various other brokers and insurers, as defendants. The activities alleged in the Employee Benefits Complaint, with certain exceptions, track the allegations of customer allocation through steering and bid-rigging made in the Commercial Complaint.

The District Court, in connection with the Commercial and Employee Benefits Complaints, granted (without leave to amend) defendants' motions to dismiss the federal antitrust and RICO claims on August 31, 2007 and September 28, 2007, respectively. The Court declined to exercise supplemental jurisdiction over the state law claims in the Commercial Complaint and therefore dismissed it in its entirety. Plaintiffs appealed the dismissal of the Commercial Complaint to the United States Court of Appeals for the Third Circuit (the Third Circuit) on October 10, 2007. On January 14, 2008, the District Court granted summary judgment to defendants on plaintiffs' ERISA claims in the Employee Benefits Complaint. On February 12, 2008, plaintiffs filed a notice of appeal to the Third Circuit with respect to the dismissal of the antitrust and RICO claims in the Employee Benefits Complaint.

On August 16, 2010, the Third Circuit affirmed the dismissal of the Employee Benefits Complaint in its entirety, affirmed in part and vacated in part the District Court's dismissal of the Commercial Complaint, and remanded the case for further proceedings consistent with the opinion. Specifically, the Third Circuit affirmed the dismissal of plaintiffs' broader antitrust and RICO claims, but the Court reversed the District Court's dismissal of alleged "Marsh-centered" antitrust and RICO claims based on allegations of bid-rigging involving excess casualty insurance. The Court remanded these Marsh-centered claims to the District Court for consideration as to whether plaintiffs had adequately pleaded them. Because the Third Circuit vacated in part the judgment dismissing the federal claims in the Commercial Complaint, the Third Circuit also vacated the District Court's dismissal of the state-law claims in the Commercial Complaint.

On October 1, 2010, defendants named in the Commercial Complaint filed motions to dismiss the remaining remanded claims in the District of New Jersey. That motion is currently pending. On March 18, 2011, AIG and certain other defendants announced that they had entered into a memorandum of understanding (MOU) with class plaintiffs to settle the claims asserted against them in the Commercial Complaint. Under the terms of the MOU, it is anticipated that AIG will pay approximately \$7 million of a total aggregate settlement amount of approximately \$37 million. The settlement is conditioned on, among other things, the execution of a formal

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

settlement agreement, court approval, and a minimum level of participation in the settlement fund by eligible purchasers of excess casualty insurance policies. Plaintiffs' attorneys' fees and litigation expenses, and the aggregate costs of notice and claims administration in connection with the settlement, would be paid from the settlement fund. As of March 31, 2011, AIG has an accrued liability for its portion of the settlement.

A number of complaints making allegations similar to those in the Multi-District Litigation have been filed against AIG and other defendants in state and federal courts around the country. The defendants have thus far been successful in having the federal actions transferred to the District of New Jersey and consolidated into the Multi-District Litigation. These additional consolidated actions are still pending in the District of New Jersey, but are currently stayed. In one of those consolidated actions, *Palm Tree Computer Systems, Inc. v. Ace USA*, which is brought by two named plaintiffs on behalf of a proposed class of insurance purchasers, the plaintiffs allege specifically with respect to their claim for breach of fiduciary duty against the insurer defendants that neither named plaintiff nor any member of the proposed class suffered damages "exceeding \$74,999 each." Plaintiffs do not specify damages as to other claims against the insurer defendants in the complaint. The plaintiffs in *Palm Tree* have not yet sought certification of the class, as that case has been stayed by the District Court in New Jersey. Because discovery has not been completed and the District Court has not determined if a class action is appropriate or the size or scope of any class, AIG is unable to reasonably estimate the possible loss or range of losses, if any, arising from the *Palm Tree* litigation. In another consolidated action, *The Heritage Corp. of South Florida v. National Union Fire Ins. Co.*, an individual plaintiff alleges damages "in excess of \$75,000." Because discovery has not been completed, AIG is unable to reasonably estimate the possible loss or range of losses, if any, arising from the *Heritage Corp.* litigation. For the remaining consolidated actions, as of May 2, 2011, plaintiffs have not specified an amount of alleged damages arising from these actions. AIG is therefore unable to reasonably estimate the possible loss or range of losses, if any, arising from these matters.

The AIG defendants have also sought to have state court actions making similar allegations stayed pending resolution of the Multi-District Litigation proceeding. These efforts have generally been successful, although four cases have proceeded; one each in Florida and New Jersey state courts that have settled, and one each in Texas and Kansas state courts have proceeded (although discovery is stayed in both actions). In the Texas action, plaintiff filed its Fourth Amended Petition on July 13, 2009 and on August 14, 2009, defendants filed renewed special exceptions. Plaintiff in the Texas action alleges a "maximum" of \$125 million in total damages (after trebling). Because the Court has not rendered a decision on defendants' renewed special exceptions and discovery has not been completed, AIG is unable to reasonably estimate the possible loss or range of losses, if any, arising from the Texas action. In the Kansas action, defendants are appealing to the Kansas Supreme Court the trial court's denial of defendants' motion to dismiss on statute of limitations grounds. Briefing on the appeal was completed in December 2010. In the Kansas action, the plaintiff alleges damages in an amount "greater than \$75,000" for each of the three claims directed against AIG in the complaint. Because the Kansas Supreme Court has not decided the appeal of the trial court's denial of defendants' motion to dismiss, and discovery has not been completed, AIG is unable to reasonably estimate the possible loss or range of losses, if any, from the Kansas action.

Workers' Compensation Premium Reporting. On May 24, 2007, the National Council on Compensation Insurance (NCCI), on behalf of the participating members of the National Workers' Compensation Reinsurance Pool (the NWCRP), filed a lawsuit in the United States District Court for the Northern District of Illinois (Northern District of Illinois) against AIG with respect to the underpayment by AIG of its residual market assessments for workers' compensation insurance. The complaint alleged claims for violations of RICO, breach of contract, fraud and related state law claims arising out of AIG's alleged underpayment of these assessments between 1970 and the present and sought damages purportedly in excess of \$1 billion. On August 6, 2007, the Court denied AIG's motion seeking to dismiss or stay the complaint or, in the alternative, to transfer to the Southern District of New York. On December 26, 2007, the Court denied AIG's motion to dismiss the complaint.

On March 17, 2008, AIG filed an amended answer, counterclaims and third-party claims against NCCI (in its capacity as attorney-in-fact for the NWCRP), the NWCRP, its board members, and certain of the other insurance

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

companies that are members of the NWCPR alleging violations of RICO, as well as claims for conspiracy, fraud, and other state law claims. The counterclaim- defendants and third-party defendants filed motions to dismiss on June 9, 2008. On January 26, 2009, AIG filed a motion to dismiss all claims in the complaint for lack of subject-matter jurisdiction. On February 23, 2009, the Court issued a decision and order sustaining AIG's counterclaims and sustaining, in part, AIG's third-party claims. The Court also dismissed certain of AIG's third-party claims without prejudice.

On April 13, 2009, third-party defendant Liberty Mutual filed third-party counterclaims against AIG, certain of its subsidiaries, and former AIG executives. On August 23, 2009, the Court granted AIG's motion to dismiss the NCCI complaint for lack of standing. On September 25, 2009, AIG filed its First Amended Complaint, reasserting its RICO claims against certain insurance companies that both underreported their workers' compensation premium and served on the NWCPR Board, and repleading its fraud and other state law claims. Defendants filed a motion to dismiss the First Amended Complaint on October 30, 2009. On October 8, 2009, Liberty Mutual filed an amended counterclaim against AIG. The amended counterclaim is substantially similar to the complaint initially filed by NCCI, but also seeks damages related to non-NWCPR states, guaranty funds, and special assessments, in addition to asserting claims for other violations of state law. The amended counterclaim also removes as defendants the former AIG executives. On October 30, 2009, AIG filed a motion to dismiss the Liberty amended counterclaim.

On April 1, 2009, Safeco Insurance Company of America and Ohio Casualty Insurance Company filed a complaint in the Northern District of Illinois, on behalf of a purported class of all NWCPR participant members, against AIG and certain of its subsidiaries with respect to the underpayment by AIG of its residual market assessments for workers' compensation insurance. The complaint was styled as an "alternative complaint," should the Court grant AIG's motion to dismiss the NCCI lawsuit for lack of subject-matter jurisdiction. The allegations in the class action complaint are substantially similar to those filed by the NWCPR, but the complaint names former AIG executives as defendants and asserts a RICO claim against those executives. On August 28, 2009, the class action plaintiffs filed an amended complaint, removing the AIG executives as defendants. On October 30, 2009, AIG filed a motion to dismiss the amended complaint. On July 16, 2010, Safeco Insurance Company and Ohio Casualty Insurance Company filed their motion for class certification, which AIG opposed on October 8, 2010.

On July 1, 2010, the Court ruled on the pending motions to dismiss that were directed at all parties' claims. With respect to the underreporting NWCPR companies' and board members' motion to dismiss AIG's first amended complaint, the Court denied the motion to dismiss all counts except AIG's claim for unjust enrichment, which it found to be precluded by the surviving claims for breach of contract. With respect to NCCI and the NWCPR's motion to dismiss AIG's first amended complaint, the Court denied the NCCI and the NWCPR's motions to dismiss AIG's claims for an equitable accounting and an action on an open, mutual, and current account. With respect to AIG's motions to dismiss Liberty's counterclaims and the class action complaint, the Court denied both motions, except that it dismissed the class claim for promissory estoppel. On July 30, 2010, the NWCPR filed a motion for reconsideration of the Court's ruling denying its motion to dismiss AIG's claims for an equitable accounting and an action on an open, mutual, and current account. The Court denied the NWCPR's motion for reconsideration on September 16, 2010. The plaintiffs filed a motion for class certification on July 16, 2010. AIG opposed the motion.

On January 5, 2011, AIG executed a term sheet with a group of intervening plaintiffs, made up of seven participating members of the NWCPR that filed a motion to intervene in the class action for the purpose of settling the claims at issue on behalf of a settlement class. The proposed class-action settlement would require AIG to pay \$450 million to satisfy all liabilities to the class members arising out of the workers' compensation premium reporting issues, a portion of which would be funded out of the remaining amount held in the Workers' Compensation Fund less any amounts previously withdrawn to satisfy AIG's regulatory settlement obligations, as addressed above. On January 13, 2011, their motion to intervene was granted. On January 19, 2011, the intervening class plaintiffs filed their Complaint in Intervention. On January 28, 2011, AIG and the intervening class plaintiffs entered into a settlement agreement embodying the terms set forth in the January 5, 2011 term

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

sheet and filed a joint motion for certification of the settlement class and preliminary approval of the settlement. If approved by the Court (and such approval becomes final), the settlement agreement will resolve and dismiss with prejudice all claims that have been made or that could have been made in the consolidated litigations pending in the Northern District of Illinois arising out of workers' compensation premium reporting, including the class action, other than claims that are brought by any class member that opts out of the settlement. On April 29, 2011, Liberty Mutual Group filed papers in opposition to preliminary approval of the proposed settlement and in opposition to certification of a settlement class, in which it alleged AIG's actual exposure, should the class action continue through judgment, to be in excess of \$3 billion. AIG disputes and will defend against this allegation. The \$450 million settlement amount along with the \$146.5 million in fines, penalties, and premium taxes discussed in the NAIC Examination of Workers' Compensation Premium Reporting matter above may be funded in part from the \$338 million held in the Workers' Compensation Fund. In the event that the proposed class action settlement is not approved, or that certain class members opt out of the settlement and continue to pursue their claims against AIG, the litigation will resume. AIG has an accrued liability equal to the amounts payable under the settlement. Amounts held in escrow totaling approximately \$338 million, including interest thereon, are included in Other assets at March 31, 2011, and are specifically designated to satisfy liabilities related to workers' compensation premium reporting issues.

Litigation Matters Relating to AIG's Insurance Operations

Caremark. AIG and certain of its subsidiaries have been named defendants in two putative class actions in state court in Alabama that arise out of the 1999 settlement of class and derivative litigation involving Caremark Rx, Inc. (Caremark). The plaintiffs in the second-filed action intervened in the first-filed action, and the second-filed action was dismissed. An excess policy issued by a subsidiary of AIG with respect to the 1999 litigation was expressly stated to be without limit of liability. In the current actions, plaintiffs allege that the judge approving the 1999 settlement was misled as to the extent of available insurance coverage and would not have approved the settlement had he known of the existence and/or unlimited nature of the excess policy. They further allege that AIG, its subsidiaries, and Caremark are liable for fraud and suppression for misrepresenting and/or concealing the nature and extent of coverage. In addition, the intervenors originally alleged that various lawyers and law firms who represented parties in the underlying class and derivative litigation (the Lawyer Defendants) were also liable for fraud and suppression, misrepresentation, and breach of fiduciary duty.

The complaints filed by the plaintiffs and the intervenors request compensatory damages for the 1999 class in the amount of \$3.2 billion, plus punitive damages. AIG and its subsidiaries deny the allegations of fraud and suppression, assert that information concerning the excess policy was publicly disclosed months prior to the approval of the settlement, that the claims are barred by the statute of limitations, and that the statute cannot be tolled in light of the public disclosure of the excess coverage. The plaintiffs and intervenors, in turn, have asserted that the disclosure was insufficient to inform them of the nature of the coverage and did not start the running of the statute of limitations.

In November 2007, the trial court dismissed the intervenors' complaint against the Lawyer Defendants, and the Alabama Supreme Court affirmed that dismissal in September 2008. After the case was sent back down to the trial court, the intervenors retained additional counsel and filed an Amended Complaint in Intervention that named only Caremark and AIG and various subsidiaries as defendants, purported to bring claims against all defendants for deceit and conspiracy to deceive, and purported to bring a claim against AIG and its subsidiaries for aiding and abetting Caremark's alleged deception. The defendants moved to dismiss the Amended Complaint in Intervention, and the plaintiffs moved to disqualify all of the lawyers for the intervenors because, among other things, the newly retained firm had previously represented Caremark. The intervenors, in turn, moved to disqualify the lawyers for the plaintiffs in the first-filed action. The cross-motions to disqualify were withdrawn after the two sets of plaintiffs agreed that counsel for the original plaintiffs would act as lead counsel, and intervenors also withdrew their Amended Complaint in Intervention. The trial Court approved all of the foregoing steps and, in April 2009, established a schedule for class action discovery that was to lead to a hearing on class certification in March 2010. The Court has since appointed a special master to oversee class action discovery and has directed the

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

parties to submit a new discovery schedule after certain discovery disputes are resolved. Class discovery is ongoing, and no schedule for the class certification hearing has been set.

As of May 2, 2011, the parties have not completed class action discovery, general discovery has not commenced, and the court has not determined if a class action is appropriate or the size or scope of any class. As a result, AIG is unable to reasonably estimate the possible loss or range of losses, if any, arising from the litigation.

(b) Commitments

Flight Equipment

At March 31, 2011, ILFC had committed to purchase 236 new aircraft deliverable from 2011 through 2019, at an estimated aggregate purchase price of approximately \$17.6 billion. ILFC will be required to find lessees for any aircraft acquired and to arrange financing for a substantial portion of the purchase price.

During 2011, ILFC entered into a contract for the purchase of 75 A320 New Engine Option (neo) and 25 A321neo aircraft from Airbus with deliveries beginning in 2015 and canceled its previous purchase commitment for ten A380s. In addition, ILFC signed a purchase agreement for 33 737-800 aircraft from Boeing with deliveries beginning in 2012.

Other Commitments

In the normal course of business, AIG enters into commitments to invest in limited partnerships, private equities, hedge funds and mutual funds and to purchase and develop real estate in the U.S. and abroad. These commitments totaled \$3.4 billion at March 31, 2011.

(c) Contingencies

Liability for unpaid claims and claims adjustment expense

Although AIG regularly reviews the adequacy of the established Liability for unpaid claims and claims adjustment expense, there can be no assurance that AIG's ultimate Liability for unpaid claims and claims adjustment expense will not develop adversely and materially exceed AIG's current Liability for unpaid claims and claims adjustment expense. Estimation of ultimate net claims, claims adjustment expenses and Liability for unpaid claims and claims adjustment expense is a complex process for long-tail casualty lines of business, which include excess and umbrella liability, D&O, professional liability, medical malpractice, workers' compensation, general liability, products liability and related classes, as well as asbestos and environmental exposures. Generally, actual historical loss development factors are used to project future loss development. However, there can be no assurance that future loss development patterns will be the same as in the past. Moreover, any deviation in loss cost trends or in loss development factors might not be discernible for an extended period of time subsequent to the recording of the initial loss reserve estimates for any accident year. Thus, there is the potential for reserves with respect to a number of years to be significantly affected by changes in loss cost trends or loss development factors that were relied upon in setting the reserves. These changes in loss cost trends or loss development factors could be attributable to changes in inflation, in labor and material costs or in the judicial environment, or in other social or economic phenomena affecting claims.

(d) Guarantees

Subsidiaries

AIG has issued unconditional guarantees with respect to the prompt payment, when due, of all present and future payment obligations and liabilities of AIGFP arising from transactions entered into by such companies.

In connection with AIGFP's leasing business, AIGFP has issued, in a limited number of transactions, standby letters of credit or similar facilities to equity investors in an amount equal to the termination value owing to the equity investor by the lessee in the event of a lessee default (the equity termination value). The total amount

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

outstanding at March 31, 2011 was \$901 million. In those transactions, AIGFP has agreed to pay such amount if the lessee fails to pay. The amount payable by AIGFP is, in certain cases, partially offset by amounts payable under other instruments typically equal to the present value of a scheduled payment to be made by AIGFP. In the event that AIGFP is required to make a payment to the equity investor, the lessee is unconditionally obligated to reimburse AIGFP. To the extent that the equity investor is paid the equity termination value from the standby letter of credit and/or other sources, including payments by the lessee, AIGFP takes an assignment of the equity investor's rights under the lease of the underlying property. Because the obligations of the lessee under the lease transactions are generally economically defeased, lessee bankruptcy is the most likely circumstance in which AIGFP would be required to pay.

Asset Dispositions

General

AIG is subject to financial guarantees and indemnity arrangements in connection with the completed sales of businesses pursuant to its asset disposition plan. The various arrangements may be triggered by, among other things, declines in asset values, the occurrence of specified business contingencies, the realization of contingent liabilities, developments in litigation or breaches of representations, warranties or covenants provided by AIG. These arrangements are typically subject to various time limitations, defined by the contract or by operation of law, such as statutes of limitation. In some cases, the maximum potential obligation is subject to contractual limitations, while in other cases such limitations are not specified or are not applicable.

AIG is unable to develop a reasonable estimate of the maximum potential payout under certain of these arrangements. Overall, AIG believes that it is unlikely it will have to make any material payments related to completed sales under these arrangements, and no material liabilities related to these arrangements have been recorded in the Consolidated Balance Sheet. See Notes 1 and 4 herein for additional information on sales of businesses and asset dispositions.

ALICO Sale

Pursuant to the terms of the ALICO stock purchase agreement, AIG has agreed to provide MetLife with certain indemnities, the most significant of which include:

- Indemnification related to breaches of general representations and warranties with an aggregate deductible of \$125 million and a maximum payout of \$2.25 billion. The indemnification extends for 21 months after November 1, 2010.
- Indemnifications related to specific product, investment, litigation and other matters that are excluded from the general representations and warranties indemnity. These indemnifications provide for various deductible amounts, which in certain cases are zero, and maximum exposures, which in certain cases are unlimited, and extend for various periods after the completion of the sale.
- Tax indemnifications related to insurance reserves that extend for taxable periods ending on or before December 31, 2013 and that are limited to an aggregate of \$200 million, and certain other tax-related representations and warranties that extend to the expiration of the statute of limitations and are subject to an aggregate deductible of \$50 million.
- Indemnification for taxes incurred by ALICO as a result of the proposed elections under Section 338 of the Internal Revenue Code (the Code). Such elections have the effect of shifting the federal income tax liability on the sale from the seller to ALICO. On March 8, 2011, AIG paid MetLife \$300 million related to this indemnity.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

In connection with the above, AIG has placed \$2.7 billion of proceeds from the ALICO Sale (consisting of \$3.0 billion of initial cash proceeds from the sale of MetLife securities received upon the completion of the ALICO Sale, less payment of \$300 million to MetLife as explained above) into an escrow arrangement. The amount required to be held in escrow declines to zero over a 30-month period ending in April 2013, with claims submitted related to the indemnifications reducing the amount that can be released to AIG. AIG has accrued for estimated liabilities for indemnities, including the Italian internal fund suspension matter discussed above.

Star/Edison Sale

Pursuant to the terms of the Star/Edison stock purchase agreement, AIG has agreed to provide Prudential Financial, Inc. with certain indemnities, the most significant of which is indemnification related to breaches of general representations and warranties that exceed 4.1 billion Yen (\$49 million at the March 31, 2011 exchange rate), with a maximum payout of 102 billion Yen (\$1.2 billion at the March 31, 2011 exchange rate). Except for certain specified representations and warranties that may have a longer survival period, the indemnification extends until November 1, 2012.

For additional information on AIG's guarantees, see Notes 9, 10 and 15 herein.

12. Total Equity and Earnings (Loss) Per Share**Shares Outstanding**

The following table presents a rollforward of outstanding shares:

Three Months Ended March 31, 2011	Preferred Stock				Common Stock	Treasury Stock
	AIG Series E	AIG Series F	AIG Series C	AIG Series G		
Shares issued, beginning of year	400,000	300,000	100,000	-	147,124,067	6,660,908
Issuances	-	-	-	20,000	1,218,766	(56)

Shares issued, end of period	-	-	-	20,000	1,803,380,795	6,660,852

Preferred Stock

See Note 1 herein for a discussion of the Recapitalization.

Equity Units

In November 2010, AIG exchanged 49,474,600 of its Equity Units, each consisting of interests in subordinated debentures and stock purchase contracts, for 4,881,667 shares of AIG Common Stock and approximately \$162 million in cash. Each Equity Unit was exchanged for 0.09867 shares of AIG Common Stock and \$3.2702 in cash. The stock and cash received by the Equity Unit holders was the result of netting payments from two separate transactions — a repurchase of the subordinated debentures and a cancellation of the stock purchase contracts.

Following the completion of the exchange offer, a total of 28,925,400 Equity Units remained outstanding. In addition, the remaining debentures continue to be subject to remarketing. In January 2011, AIG remarketed the first of three series of the remaining debentures included in the Equity Units. AIG purchased and retired all of the Series B-1 Debentures representing \$723 million in aggregate principal and as a result, no Series B-1 Debentures remain outstanding. In March 2011, AIG remarketed the second of three series of the remaining debentures included in the Equity Units. AIG purchased and retired all of the Series B-2 Debentures representing \$723 million in aggregate principal and as a result, no Series B-2 Debentures remain outstanding. The remarketing of the remaining Series B-3 Debentures included in the Equity Units is expected to occur later in

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

2011. In February 2011, AIG issued approximately 1.2 million shares of its common stock in connection with the settlement of the stock purchase contract portion of the Equity Units subject to the First Stock Purchase Date of the Equity Units.

Accumulated Other Comprehensive Income (Loss)

A rollforward of Accumulated other comprehensive income (loss) is as follows:

Three Months Ended March 31, 2011 (in millions)	Unrealized Appreciation (Depreciation) of Fixed Maturity Investments on Which Other-Than- Temporary Credit Impairments Were Taken	Unrealized Appreciation (Depreciation) of All Other Investments	Foreign Currency Translation Adjustments	Net Derivative Gains (Losses) Arising from Cash Flow Hedging Activities	Retirement Plan Liabilities Adjustment	Total

Noncontrolling interests

In connection with the ongoing execution of its orderly asset disposition plan, as well as plans to timely repay the FRBNY Credit Facility, AIG transferred two of its wholly owned businesses, AIA and ALICO, to two newly created special purpose vehicles (SPVs) in exchange for all the common and preferred interests of those SPVs. On December 1, 2009, AIG transferred the preferred interests in the SPVs to the FRBNY in consideration for a \$25 billion reduction of the outstanding loan balance and of the maximum amount of credit available under the FRBNY Credit Facility and amended the terms of the FRBNY Credit Facility. The remaining preferred interests, with an aggregate liquidation preference of approximately \$26.4 billion at December 31, 2010, were transferred by the FRBNY to the Department of the Treasury as part of the closing of the Recapitalization. The remaining preferred interests, which have an aggregate liquidation preference of approximately \$20.3 billion following a partial repayment on January 14, 2011, which included proceeds from the sale of ALICO, were transferred by the FRBNY to AIG and subsequently transferred to the Department of the Treasury as part of the Recapitalization. Under the terms of the SPVs' limited liability company agreements, the SPVs generally may not distribute funds to AIG until the liquidation preferences and preferred returns on the preferred interests have been repaid in full and concurrent distributions have been made on certain participating returns attributable to the preferred interests.

The common interests, which were retained by AIG, entitle AIG to 100 percent of the voting power of the SPVs. The voting power allows AIG to elect the boards of managers of the SPVs, who oversee the management and operation of the SPVs. Primarily due to the substantive participation rights of the preferred interests, the

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

SPVs were determined to be variable interest entities. As the primary beneficiary of the SPVs, AIG consolidates the SPVs.

The rights held by the FRBNY through their ownership of the preferred interests are now held by the Department of the Treasury. In connection with the Recapitalization, AIG agreed to cause the proceeds of certain asset dispositions to be used to redeem the remaining preferred interests.

As a result of the closing of the Recapitalization on January 14, 2011, the SPV Preferred Interests held by the Department of Treasury are not considered permanent equity on AIG's Consolidated Balance Sheet, and were classified as redeemable non-controlling interests in partially owned consolidated subsidiaries. As part of the Recapitalization, AIG used approximately \$6.1 billion of the cash proceeds from the sale of ALICO to repay a portion of the liquidation preference and accrued return of the SPV Preferred Interests. The SPV Preferred Interests were further reduced during the first quarter of 2011 by approximately \$9.1 billion using proceeds from the sale of AIG Star, AIG Edison and the sale of MetLife securities received in the sale of ALICO.

A rollforward of non-controlling interests is as follows:

<i>(in millions)</i>	Redeemable Noncontrolling interests			Non-redeemable Noncontrolling interests		
	Held by Department of Treasury	Other	Total	Held by FRBNY	Other	Total

Earnings (Loss) Per Share (EPS)

Basic and diluted earnings (loss) per share are based on the weighted average number of common shares outstanding, adjusted to reflect all stock dividends and stock splits. Diluted earnings per share is based on those shares used in basic EPS plus shares that would have been outstanding assuming issuance of common shares for all dilutive potential common shares outstanding, adjusted to reflect all stock dividends and stock splits. Basic earnings (loss) per share is not affected by outstanding stock purchase contracts. Diluted earnings per share is determined considering the potential dilution from outstanding stock purchase contracts using the treasury stock method and will not be affected by outstanding stock purchase contracts until the applicable market value per share exceeds \$912.

In connection with the issuance of the Series C Preferred Stock, in 2010 AIG applied the two-class method for calculating EPS. The two-class method is an earnings allocation method for computing EPS when a company's capital structure includes either two or more classes of common stock or common stock and participating securities. This method determines EPS based on dividends declared on common stock and participating securities (i.e., distributed earnings) as well as participation rights of participating securities in any undistributed earnings. The Series C Preferred Stock was retired as part of the Recapitalization on January 14, 2011.

AIG applied the two-class method due to the participation rights of the Series C Preferred Stock through January 14, 2011. However, application of the two-class method had no effect on earnings per share because AIG recognized a net loss from continuing operations for the three months ended March 31, 2011. Subsequent to that date, AIG did not have any outstanding participating securities that subjected AIG to the two-class method.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

The following table presents the computation of basic and diluted EPS:

Three Months Ended March 31, <i>(dollars in millions, except per share data)</i>	2011	2010
Numerator for EPS:		
Income (loss) from continuing operations	\$ (1,180)	\$ 2,088
Net income from continuing operations attributable to noncontrolling interests:		
Noncontrolling nonvoting, callable, junior and senior preferred interests held by Federal Reserve Bank of New York	252	519
Other	(55)	119
Total net income from continuing operations attributable to noncontrolling interests	197	638
Net income (loss) attributable to AIG from continuing operations	(1,377)	1,450
Income from discontinued operations	\$ 1,653	\$ 343
Income from discontinued operations attributable to noncontrolling interests	7	10
Net income attributable to AIG from discontinued operations	1,646	333
Deemed dividends	(812)	-
Income allocated to the Series C Preferred Stock – continuing operations	-	(1,158)
Net income (loss) attributable to AIG from continuing operations, applicable to common stock for EPS	(2,189)	292
Income allocated to the Series C Preferred Stock – discontinued operations	-	(266)
Net income attributable to AIG from discontinued operations, applicable to common stock for EPS	\$ 1,646	\$ 67
Denominator for EPS:		
Weighted average shares outstanding – basic	1,557,748,353	135,658,680
Dilutive shares	-	66,259
Weighted average shares outstanding – diluted*	1,557,748,353	135,724,939
EPS attributable to AIG:		
Basic:		
Income (loss) from continuing operations	\$ (1.41)	\$ 2.16
Income from discontinued operations	\$ 1.06	\$ 0.50
Diluted:		
Income (loss) from continuing operations	\$ (1.41)	\$ 2.16
Income from discontinued operations	\$ 1.06	\$ 0.50

* Dilutive shares are calculated using the treasury stock method and include dilutive shares from share-based employee compensation plans, and the warrant issued to the Department of the Treasury on April 17, 2009 to purchase up to 150 shares of AIG Common Stock (Series F Warrant). The number of shares excluded from diluted shares outstanding were 65 million and 12 million for the three-month periods ended March 31, 2011 and 2010, respectively, because the effect would have been anti-dilutive. Shares excluded for the three months ended March 31, 2011 include 59 million shares representing the weighted average amount of warrants to purchase AIG Common Stock that were issued to shareholders on January 19, 2011.

Deemed dividends represent the excess of (i) the fair value of the consideration transferred to the Department of the Treasury, which consists of 1,092,169,866 shares of AIG Common Stock, \$20.2 billion of redeemable SPV Preferred Interests, and a liability for a commitment by AIG to pay the Department of the Treasury's costs to dispose of all of its shares, over (ii) the carrying value of the Series E and F Preferred Stock. The fair value of the AIG Common Stock issued for the Series C Preferred Stock over the carrying value of the Series C Preferred Stock is not a deemed dividend because the Series C Preferred Stock was contingently convertible into the 562,868,096 shares of AIG Common Stock for which it was exchanged. See Consolidated Statement of Equity and Note 1 Basis of Presentation and Recent Events — Recent Events — Recapitalization — Exchange of AIG's Series C, E, and F Preferred Stock for AIG Common Stock and Series G Preferred Stock herein for further discussion.

Impact of AIG Star and AIG Edison Divestiture

At December 31, 2010, AIG's projected benefit obligation and fair value of plan assets for its non-U.S. pension plans were \$2.0 billion and \$954 million, respectively. These amounts have been reduced by approximately \$804 million and \$279 million for pension plans related to AIG Star and AIG Edison, respectively, which were assumed by the purchaser on February 1, 2011.

At December 31, 2010, AIG estimated its 2011 annual pension expense and contributions would be \$282 million and \$144 million, respectively. Included in those totals were \$53 million of pension expense and \$54 million of contributions for AIG Star and Edison.

For the three-month period ended March 31, 2011, AIG contributed \$30 million to its U.S. and non-U.S. pension plans and estimates it will contribute an additional \$68 million for the remainder of 2011. These estimates are subject to change since contribution decisions are affected by various factors, including AIG's liquidity, asset dispositions, market performance and management discretion.

14. Income Taxes**Interim Tax Calculation Method**

Beginning with the first quarter of 2011, AIG utilized the estimated annual effective tax rate method in computing its interim tax provision. The recent stabilization of operations and expected financial results allows AIG to estimate the annual effective tax rate to be applied to year-to-date income.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

Since the third quarter of 2008, the discrete period method was utilized due to the significant variations in the customary relationship between income tax expense and pre-tax accounting income, which were partly due to the effects of AIG's asset disposition program and restructuring.

Included in the estimated annual effective rate is a full valuation allowance against the tax expense of the U.S. consolidated income tax group, and statutory rates were used for computing the tax expense of foreign subsidiaries.

Certain items, including those deemed to be unusual, infrequent or that cannot be reliably estimated, are excluded from the estimated annual effective tax rate. In these cases, the actual tax expense or benefit applicable to that item is treated discretely, and is reported in the same period as the related item. For the three-month period ended March 31, 2011, the tax effects of the loss on extinguishment of debt, other-than-temporary impairments, realized capital gains and losses, the sale of Met Life securities, and divestiture gains or losses were treated as discrete items.

Interim Tax Expense (Benefit)

For the three-month period ended March 31, 2011, the effective tax rate on pretax loss from continuing operations was 14.5 percent. The effective tax rate for the three-month period ended March 31, 2011, attributable to continuing operations differs from the statutory rate of 35 percent primarily due to an increase in the valuation allowance attributable to continuing operations for the U.S. consolidated income tax group, tax effects associated with tax exempt interest income, investments in partnerships, and changes in uncertain tax positions.

For the three-month period ended March 31, 2010, the effective tax rate on the pre-tax income from continuing operations was (27.2) percent. The effective tax rate was negative because AIG recorded a tax benefit on pre-tax income. The tax benefit was primarily due to decreases in the deferred tax asset valuation allowance resulting from changes in the expected taxable gain on subsidiaries to be sold, the tax benefit associated with tax exempt interest, and the bargain purchase gain associated with the acquisition of Fuji.

Assessment of Deferred Tax Asset Valuation Allowances

AIG evaluates the recoverability of the deferred tax asset and establishes a valuation allowance, if necessary, to reduce the deferred tax asset to an amount that is more likely than not to be realized (a likelihood of more than 50 percent). Significant judgment is required to determine whether a valuation allowance is necessary and the amount of such valuation allowance, if appropriate.

When assessing the realization of its deferred tax asset, AIG considers all available evidence, including:

- the nature, frequency, and severity of cumulative financial reporting losses in recent years;
- the carryforward periods for the net operating loss, capital loss and foreign tax credit carryforwards;
- predictability of future operating profitability of the character necessary to realize the asset;
- the recognition of the gains and losses on dispositions;
- prudent and feasible tax planning strategies that would be implemented, if necessary, to protect against the loss of the deferred tax asset; and
- the effect of reversing taxable temporary differences.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

The evaluation of the recoverability of the deferred tax asset requires AIG to weigh all positive and negative evidence to reach a conclusion that it is more likely than not that all or some portion of the deferred tax assets will not be realized. The weight given to the evidence is commensurate with the extent to which it can be objectively verified. The more negative evidence that exists, the more positive evidence is necessary and the more difficult it is to support a conclusion that a valuation allowance is not needed. Despite several favorable developments, including the completion of the Recapitalization in January 2011, the wind-down of AIGFP's portfolios, and the sale of certain businesses, AIG has recent negative evidence of cumulative operating losses and a lack of consistent profits. Based on this evidence at March 31, 2011, AIG cannot assert that it is more likely than not that any U.S. member deferred tax assets will be realizable.

However, if in the future AIG demonstrates consistent profitability or develops prudent and feasible tax planning strategies, the evaluation of the recoverability of the deferred tax asset could change and the valuation allowance could be released in whole or in part.

Tax Examinations and Litigation

On March 29, 2011, the district court ruled on a motion for partial summary judgment that AIG filed on July 30, 2010 related to the disallowance of foreign tax credits associated with cross border financing transactions. The court denied AIG's motion with leave to renew following the completion of discovery regarding certain transactions referred to in AIG's motion, which AIG believes may be significant to the outcome of the action.

Accounting for Uncertainty in Income Taxes

At both March 31, 2011 and December 31, 2010, AIG's unrecognized tax benefits, excluding interest and penalties, were \$5.3 billion. At March 31, 2011 and December 31, 2010, AIG's unrecognized tax benefits were \$1.5 billion and \$1.7 billion, respectively, related to tax positions that if recognized would not affect the effective tax rate as they relate to such factors as the timing, rather than the permissibility, of the deduction. Accordingly, at March 31, 2011 and December 31, 2010, the amounts of unrecognized tax benefits that, if recognized, would favorably affect the effective tax rate were \$3.8 billion and \$3.6 billion, respectively.

Interest and penalties related to unrecognized tax benefits are recognized in income tax expense. At March 31, 2011 and December 31, 2010, AIG had accrued \$917 million and \$952 million, respectively, for the payment of interest (net of the federal benefit) and penalties. For the three-month periods ended March 31, 2011 and 2010, AIG had recognized \$(35) million and \$11 million, respectively, of income tax expense (benefit), for interest (net of the federal benefit) and penalties.

Although it is reasonably possible that a change in the balance of unrecognized tax benefits may occur within the next twelve months, at this time it is not possible to estimate the range of the change due to the uncertainty of the potential outcomes, except with respect to uncertain tax positions related to jurisdictions other than federal that were effectively settled subsequent to March 31, 2011. AIG estimates that it will record a tax benefit of \$240 million in the second quarter of 2011.

Tax Asset Protection Plan

On March 9, 2011, AIG's Board of Directors adopted a Tax Asset Protection Plan (the Plan) to help protect AIG's ability to recognize certain tax benefits from certain tax attributes (the Tax Benefits) in order to reduce AIG's future income tax liability.

In connection with the Plan, on March 9, 2011, AIG's Board of Directors declared a dividend of one right per each outstanding share of AIG Common Stock held of record as of the close of business on March 18, 2011 (each, a Right). Subject to the terms, provisions and conditions of the Plan, if the Rights become exercisable, each Right would initially entitle its registered holder to purchase from AIG one ten-thousandth of a share of Participating Preferred Stock, par value \$5.00 per share (the Participating Preferred Stock), for \$185.00 (the Exercise Price), subject to adjustment.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS *(unaudited)*

The Rights become exercisable following the earlier of (i) a public announcement by AIG that a person or group has acquired 4.99 percent or more of the outstanding shares of AIG Common Stock and (ii) 10 business days after the commencement of a tender offer or exchange offer by a person or group if, upon consummation of the offer, the person or group would directly, indirectly or constructively own 4.99 percent or more of the outstanding AIG Common Stock.

Shareholders who owned 4.99 percent or more of AIG Common Stock as of the close of business on March 9, 2011, which includes the Department of the Treasury, generally will not trigger the Plan so long as they do not acquire any additional shares of AIG Common Stock. AIG's Board of Directors may exempt an Acquiring Person if it receives, at its request, a report from AIG's advisors that such exemption would not create a significant risk of material adverse tax consequences to AIG, or the AIG Board of Directors otherwise determines that the exemption is in the best interests of AIG. Furthermore, AIG's Board of Directors is required to approve any proposed transfer by the Department of the Treasury that would not result in an "owner shift" of more than 40 percent under Section 382 of the Code.

15. Information Provided in Connection With Outstanding Debt

The following condensed consolidating financial statements reflect the results of SunAmerica Financial Group, Inc. (SAFG, Inc.) formerly known as AIG Life Holdings (US), Inc. (AIGLH), a holding company and a wholly owned subsidiary of AIG. AIG provides a full and unconditional guarantee of all outstanding debt of SAFG, Inc.

16. Subsequent Event

On April 20, 2011, Chartis announced that it entered into an agreement with National Indemnity Company (NICO), a subsidiary of Berkshire Hathaway Inc., under which the majority of Chartis' U.S. asbestos liabilities will be transferred to NICO. At the closing of this transaction, but effective as of January 1, 2011, Chartis will cede the bulk of its net asbestos liabilities to NICO under a retroactive reinsurance agreement with an aggregate limit of \$3.5 billion. Chartis will pay NICO approximately \$1.65 billion in respect of the cession. For those asbestos claims subject to the reinsurance from NICO, NICO will assume responsibility for claims handling. It will also assume collection responsibility and collectability risk for third-party reinsurance related to those claims. This transaction will be accounted for as retroactive reinsurance and is expected to result in a deferred gain of approximately \$200 million in the second quarter of 2011 which is expected to be amortized over the settlement period of the underlying claims. The closing of the transaction is subject to receipt of required regulatory approvals, execution of definitive transaction documentation and satisfaction of other conditions.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Cautionary Statement Regarding Forward-Looking Information

This Quarterly Report on Form 10-Q and other publicly available documents may include, and officers and representatives of American International Group, Inc. (AIG) may from time to time make, projections, goals, assumptions and statements that may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These projections, goals, assumptions and statements are not historical facts but instead represent only AIG's belief regarding future events, many of which, by their nature, are inherently uncertain and outside AIG's control. These projections, goals, assumptions and statements may address, among other things:

- the timing of the disposition of the ownership position of the United States Department of the Treasury (Department of the Treasury) in AIG;
- the timing and method of repayment of the preferred interests (the SPV Preferred Interests) in AIA Aurora LLC held by the Department of the Treasury;
- AIG's exposures to subprime mortgages, monoline insurers, the residential and commercial real estate markets and state and municipal bond issuers;
- AIG's strategy for risk management;
- AIG's ability to retain and motivate its employees;
- AIG's generation of deployable capital;
- AIG's return on equity and earnings per share long-term aspirational goals;
- AIG's strategy to grow net investment income, efficiently manage capital and reduce expenses;
- AIG's strategy for customer retention, growth, product development, market position, financial results and reserves; and
- The revenues and combined ratios of AIG's subsidiaries.

It is possible that AIG's actual results and financial condition will differ, possibly materially, from the anticipated results and financial condition indicated in these projections, goals, assumptions and statements. Factors that could cause AIG's actual results to differ, possibly materially, from those in the specific projections, goals, assumptions and statements include:

- actions by credit rating agencies;
- changes in market conditions;
- the occurrence of catastrophic events;
- significant legal proceedings;
- concentrations in AIG's investment portfolios, including its municipal bond portfolio;
- judgments concerning casualty insurance underwriting and reserves;
- judgments concerning the recognition of deferred tax assets; and
- such other factors as are discussed throughout this Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A), in Part II, Item 1A. Risk Factors in this Quarterly Report on Form 10-Q and in Part I, Item 1A. Risk Factors of the Annual Report on Form 10-K of AIG for the year ended December 31, 2010 (AIG's 2010 Annual Report on Form 10-K).

AIG is not under any obligation (and expressly disclaims any obligation) to update or alter any projections, goals, assumptions or other statements, whether written or oral, that may be made from time to time, whether as a result of new information, future events or otherwise.

Use of Non-GAAP Measures

Throughout this MD&A, AIG presents its operations in the way it believes will be most meaningful and representative of ongoing operations as well as most transparent. Certain of the measurements used by AIG management are “non-GAAP financial measures” under SEC rules and regulations.

In light of its significant divestiture and restructuring related activities, AIG defines after-tax operating income (loss) attributable to AIG to exclude income (loss) from any discontinued operations, income (loss) from divested businesses that did not qualify for discontinued operations accounting treatment, net gain (loss) on sale of divested business, amortization of the Federal Reserve Bank of New York (FRBNY) prepaid commitment fee asset, goodwill impairment charges arising from divestiture-related activities, realized capital gains (losses) net of the SunAmerica Financial Group (SunAmerica) deferred policy acquisition costs (DAC) offset, bargain purchase gains, the effect of non-qualifying derivative hedging gains (losses), and deferred income tax valuation allowance charges and releases. AIG believes that this measure of after-tax operating income (loss) permits a better assessment and enhanced understanding of the operating performance of its businesses by highlighting the results from ongoing operations and the underlying profitability of its businesses, without the distortive effects of the highly unusual events that have affected AIG since 2008. A reconciliation of after-tax operating income attributable to AIG to net income attributable to AIG for the year ended December 31, 2010 is set forth below.

AIG has set certain long-term goals for operating return on equity (ROE) and annual percentage growth rate of operating earnings per share (EPS) that are calculated using after-tax operating income (loss), as defined above. ROE is defined as after-tax operating income attributable to AIG as a percentage of AIG adjusted shareholders' equity (which is shareholder's equity excluding accumulated other comprehensive income). EPS is defined as after-tax operating income attributable to AIG divided by AIG's diluted weighted average outstanding shares. AIG focuses on these measures because it believes they provide the most effective means for assessing AIG's business performance against its long-term aspirational goals. To the extent that the non-GAAP financial measures discussed below constitute forward-looking information, a reconciliation to the most directly comparable measure under GAAP is not available without unreasonable efforts.

AIG analyzes the operating performance of Chartis, Inc. (Chartis) using underwriting profit (loss). Operating income (loss), which is before net realized capital gains (losses) and related DAC and sales inducement asset (SIA) amortization and goodwill impairment charges, is utilized to report results for SunAmerica operations. Management believes that these measures enhance the understanding of the underlying profitability of the ongoing operations of these businesses and allow for more meaningful comparisons with AIG's insurance competitors.

Executive Overview

This executive overview of management's discussion and analysis highlights selected information and may not contain all of the information that is important to readers of AIG's financial statements. This Quarterly Report on Form 10-Q should be read in its entirety, together with AIG's 2010 Annual Report on Form 10-K, for a complete description of events, trends and uncertainties as well as the capital, liquidity, credit, operational and market risks and the critical accounting estimates affecting AIG and its subsidiaries.

AIG reports the results of its operations through the following reportable segments:

- **Chartis** — AIG's property and casualty operations are conducted through multiple-line companies writing substantially all commercial and consumer lines both domestically and abroad. Chartis offers its products through a diverse, multi-channel distribution network that includes agents, wholesalers, global and local brokers, and direct-to-consumer platforms. Beginning in the third quarter of 2010, reporting includes the results of Fuji Fire & Marine Insurance Company Limited (Fuji), a recently consolidated business which writes primarily consumer lines in Japan.
- **SunAmerica Financial Group (SunAmerica)** — SunAmerica offers a comprehensive suite of products and services to individuals and groups, including term life, universal life, accident and health (A&H), fixed and variable deferred annuities, fixed payout annuities, mutual funds and financial planning. SunAmerica offers

its products and services through a diverse, multi-channel distribution network that includes banks, national, regional and independent broker-dealers, affiliated financial advisors, independent marketing organizations, independent and career insurance agents, structured settlement brokers, benefit consultants and direct-to-consumer platforms.

- **Financial Services** — AIG's financial services businesses engage primarily in commercial aircraft leasing through International Lease Finance Corporation (ILFC) and the management of the remaining Capital Markets derivatives portfolios through AIG Financial Products Corp. and AIG Trading Group Inc. and their respective subsidiaries (collectively, AIGFP).

Highlights of Restructuring Activities

AIG substantially completed its recapitalization plan (the Recapitalization) and its asset disposition plan with the following significant milestones in 2011:

- On January 14, 2011 (the Closing), AIG completed the Recapitalization, which included:
 - repaying the \$20.7 billion outstanding balance and terminating the credit facility provided by the FRBNY (such credit facility, the FRBNY Credit Facility). As a result of the termination of the FRBNY Credit Facility, AIG recorded a net \$3.3 billion pre-tax charge for a loss on extinguishment of debt in the first quarter of 2011, primarily representing the accelerated amortization of the remaining prepaid commitment fee asset;
 - applying proceeds from the AIA Group Limited (AIA) initial public offering and the American Life Insurance Company (ALICO) sale to partially repay the U.S. government's ownership interests in special purpose vehicles that held AIA and ALICO (the AIA SPV and the ALICO SPV, respectively, and collectively, the SPVs). As part of the Recapitalization, AIG used approximately \$6.1 billion of the cash proceeds from the sale of ALICO to repay a portion of the liquidation preference and accrued return of the SPV Preferred Interests. The SPV Preferred Interests were further reduced during the first quarter of 2011 by approximately \$9.1 billion using proceeds from the sale of AIG Star Life Insurance Co., Ltd. (AIG Star), AIG Edison Life Insurance Company (AIG Edison) and the sale of MetLife, Inc. (MetLife) securities received in the sale of ALICO, in each case, discussed below; and
 - exchanging preferred stock held by the Department of the Treasury and the AIG Credit Facility Trust (the Trust) for AIG common stock, par value \$2.50 per share (AIG Common Stock).
- On January 12, 2011, AIG entered into an agreement to sell its 97.57 percent interest in Nan Shan Life Insurance Company, Ltd. (Nan Shan) to a Taiwan-based consortium for \$2.16 billion in cash, subject to regulatory approvals and other conditions. Discussions with regulators and other interested parties are ongoing.
- On January 31, 2011, ILFC entered into an unsecured \$2.0 billion three-year revolving credit facility. On March 30, 2011, ILFC entered into a secured \$1.3 billion term loan with the right to add an additional \$200 million of lender commitments. On April 21, 2011, ILFC increased its secured \$1.3 billion term loan for a total commitment of \$1.5 billion.
- On February 1, 2011, AIG completed the sale of its Japan-based life insurance subsidiaries, AIG Star and AIG Edison, to Prudential Financial, Inc., for \$4.8 billion, consisting of \$4.2 billion in cash and \$0.6 billion in the assumption of third-party debt.
- On March 8, 2011, AIG completed the disposition of MetLife securities received upon the sale of ALICO to MetLife and used \$6.6 billion of the proceeds to repay all of the liquidation preference and accrued return of the Department of the Treasury's ALICO SPV Preferred Interests and a portion of the liquidation preference and accrued return of the Department of the Treasury's AIA SPV Preferred Interests.
- On April 20, 2011, Chartis announced that it entered into an agreement with National Indemnity Company (NICO), a subsidiary of Berkshire Hathaway Inc., under which the majority of Chartis' U.S. asbestos

liabilities will be transferred to NICO. At the closing of this transaction, but effective as of January 1, 2011, Chartis will cede the bulk of its net asbestos liabilities to NICO under a retroactive reinsurance agreement with an aggregate limit of \$3.5 billion. Chartis will pay NICO approximately \$1.65 billion in respect of the cession. Subject to required regulatory approvals, execution of definitive transaction documentation and satisfaction of other conditions, this transaction is expected to close in the second quarter of 2011.

See Capital Resources and Liquidity herein and Notes 1, 4 and 16 to the Consolidated Financial Statements for additional information on these transactions.

Long-Term Aspirational Goals

Following the completion of the Recapitalization, AIG is developing business plans for its operations in relation to certain long-term aspirational goals. Among the most significant of AIG's enterprise-wide long-term aspirational goals are the following:

- to increase its ROE to 10 percent or more by the year ended December 31, 2015, from its 6.2 percent normalized ROE as of and for the year ended December 31, 2010; and
- to achieve average annual percentage growth of its EPS in the mid-teens through the year ended December 31, 2015, from normalized EPS of \$2.62 for the year ended December 31, 2010.

ROE and EPS in this context are the non-GAAP measures described above. The calculation of ROE and EPS for the year ended December 31, 2010 which is used as a baseline was determined by making certain adjustments to after-tax operating income (loss) attributable to AIG, as described in the reconciliation below, to calculate normalized after-tax operating income attributable to AIG. The baseline ROE was calculated using adjusted shareholders' equity reduced by the net prepaid commitment fee asset remaining at December 31, 2010 and assuming full conversion of AIG's Equity Units, as described in the reconciliation below. All amounts or percentages in this section are approximate.

These aspirational goals are premised on a number of significant assumptions, including the following assumptions, and are by their nature subject to significant uncertainties and contingencies, many of which are outside AIG's control:

- ***AIG's goal is to generate, by seeking to take advantage of global opportunities, approximately \$4 billion to \$5 billion of incremental aggregate pre-tax operating income in 2015 compared to its normalized pre-tax operating income for 2010.*** AIG's goals are to continue to strengthen and grow its businesses by seeking to capitalize on global opportunities, maintaining well-positioned broad franchises in appropriate markets, diversifying AIG's businesses in product and geography and utilizing AIG's underwriting skills across multiple lines and multiple geographies. The achievement of this goal is dependent upon improved performance by AIG's businesses. In particular, for this goal, AIG assumes that:
 - Chartis will have achieved an average annual growth rate in net premiums written of approximately 6 percent from 2010 to 2015, and, by the year ended December 31, 2015, a combined ratio of between 90 and 95, which would result in an unleveraged return on equity of 10 to 12 percent (assuming an annual investment yield of approximately 4 percent) for the year ended December 31, 2015.
 - SunAmerica will have achieved by the year ended December 31, 2015, assets under management of \$320 billion and life insurance in force of \$1 trillion, which would result in an unleveraged return on equity of 9 percent for the year ended December 31, 2015. These compare to assets under management of \$249 billion and life insurance in force of \$909 billion at December 31, 2010 and an unleveraged return on equity of 7.4 percent for the year ended December 31, 2010 (normalized to exclude the Maiden Lane II and call and tender income adjustments described in the table below).
 - The goals of ILFC and UGC are to achieve improvements in their businesses to enable them to contribute to the growth in AIG's after-tax operating income.

- AIG's interests in Maiden Lane III will have produced an annual pre-tax return of approximately 9 percent.
- ***The goals of AIG's investment strategy include generating approximately \$500 million to \$700 million in additional annual pre-tax net investment income by fully investing its investable cash.*** At December 31, 2010, AIG had approximately \$21 billion of investable cash, a large portion of which was originally intended to be used for the purchase of the Maiden Lane II securities. As of March 31, 2011, this investable cash had been reduced to approximately \$14 billion. Had AIG been fully invested during 2010, AIG estimates that its net investment income for 2010 would have been approximately \$500 to \$700 million higher. AIG has been actively redeploying its investable cash into higher yielding assets with the goal of achieving attractive risk-adjusted returns in relation to its insurance liabilities. AIG assumes it will achieve an average yield of 4 percent to 5 percent on those new cash investments by employing AIG's current investment strategy.
- ***The goal of AIG's cost rationalization effort is to reduce AIG's annual general and administration expenses by approximately \$1 billion by the year ended December 31, 2015 compared to 2010 expenses.*** AIG has made and expects to continue to make substantial investments in infrastructure to serve its business portfolio efficiently and eliminate redundancies, including its information technology, finance, underwriting and claims infrastructure, and is also expanding its sourcing capabilities globally.
- ***AIG's goal is to generate through December 31, 2015 approximately \$25 billion to \$30 billion of deployable capital to be applied to, among other things, potential share repurchases, dividend payments, acquisitions or organic business opportunities.*** For purposes of setting the ROE and EPS goals, such capital deployment has been assumed to take the form of share repurchases without material increase in financial leverage or reduction in interest coverage. Any share repurchase programs approved by AIG's Board of Directors and regulators are expected to be sufficiently flexible such that they may be modified in the event of a major catastrophic loss, significant change in the underwriting cycle or change in future investment performance. To the extent that AIG applies this deployable capital for dividend payments, acquisitions or organic business opportunities, rather than for share repurchases, AIG may not be able to achieve its aspirational ROE and EPS goals.

In setting these aspirational goals, AIG has made significant assumptions with respect to, among other things, the general conditions of markets in which it operates, revenues and combined ratios of its subsidiaries, investment yields, subsidiaries' capacity to distribute dividends to AIG Parent, AIG's ability to apply deployable capital to share repurchases, dividend payments, acquisitions or organic growth, AIG's ability to maintain financial leverage commensurate with its current credit ratings, the exclusion of the impact on shareholders' equity of the reversal of the tax valuation allowance, the effectiveness of AIG's cost rationalization measures, the approval of planned actions (including with respect to any share repurchases, dividend payments or acquisitions) by AIG's regulators, the overall credit rating implications of AIG's proposed strategic actions and general financial market and interest rate conditions. Given the significance of the assumptions used and the uncertainties surrounding them, there are significant risks that these assumptions may not be realized and thus the aspirational goals may not be achieved. Accordingly, AIG's actual results are likely to differ from these goals and the differences may be material and adverse. The aspirational goals and their underlying assumptions are forward-looking statements. AIG strongly cautions its shareholders and other investors not to place undue reliance on any of these assumptions or goals. AIG is not under any obligation (and expressly disclaims any obligation) to update or alter any assumptions, goals, projections or other related statements, whether written or oral, that may be made from time to time, whether as a result of new information, future events or otherwise. See "Cautionary Statement Regarding Forward-Looking Information" in Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations and Part II, Item 1A. Risk Factors in this Quarterly Report on Form 10-Q and in Part I, Item 1A. Risk Factors in AIG's 2010 Report on Form 10-K for additional information regarding these forward-looking statements.

The Long-Term Aspirational Goals section included in this Quarterly Report on Form 10-Q has been prepared by, and is the responsibility of, AIG. AIG's independent registered public accounting firm, PricewaterhouseCoopers LLP, has neither examined, compiled nor performed any procedures with respect to the

accompanying Long-Term Aspirational Goals information and, accordingly, PricewaterhouseCoopers LLP does not express an opinion or any other form of assurance with respect thereto.

The following table reconciles Net income attributable to AIG to Normalized after-tax operating income attributable to AIG for the year ended December 31, 2010:

Year Ended December 31, 2010	
<i>(dollars in millions, except share data)</i>	
Net income attributable to AIG	\$ 7,786
Less:	
Net gains (losses) on sale of divested businesses	13,527
Amortization of FRBNY prepaid commitment fee asset	(2,255)
Net income (loss) from discontinued operations, net of tax	(2,118)
Net income from divested businesses (mainly AIA)	1,657
Deferred income tax valuation allowance charge	(1,517)
Net realized capital gains (losses), net of SunAmerica DAC offset	(915)
Bargain purchase gain	332
Non-qualifying derivative hedging gains / losses	(27)
After-tax operating loss attributable to AIG	\$ (898)
Less:	
Prior year loss reserve development	(2,364)
Noncontrolling nonvoting, callable, junior and senior preferred interests	(1,818)
Aircraft impairments and lease related charges	(1,108)
Maiden Lane III fair value change in excess of 9 percent annual return	900
Credit valuation adjustment on Direct Investment Business	610
Tax effect of difference between book and tax realized capital gains (losses)	(574)
FRBNY Credit Facility interest expense	(413)
Real estate impairments	(393)
Restructuring expense	(337)
Maiden Lane II fair value change in excess of 9 percent annual return	294
Call and tender income in excess of 5-year average	141
Other	(548)
Normalized after-tax operating income attributable to AIG	\$ 4,712
Outstanding shares of AIG common stock as of January 14, 2011	1,795,501,842
Normalized EPS	\$ 2.62
Total shareholders' equity as of December 31, 2010	\$ 85,319
Less:	
Accumulated other comprehensive income	7,624
Net FRBNY prepaid commitment fee asset	3,328
Conversion of Equity Units	(2,169)
Adjusted shareholders' equity as of December 31, 2010	\$ 76,536
Normalized ROE	6.2%

Priorities for 2011

AIG is focused on the following priorities for 2011:

- continuing to strengthen and grow AIG's businesses;
- executing one or more primary offerings of AIG Common Stock;
- implementing plans to maximize the value of resources available for repayment of the AIA SPV Preferred Interests held by the Department of the Treasury;
- continuing to build, strengthen and streamline the financial and operating systems infrastructure throughout the organization, particularly in financial reporting, financial operations and human resources;

- restructuring AIG's operations consistent with its smaller size and plans to increase its competitiveness;
- managing its capital more efficiently;
- investing its available cash in order to increase its net investment income;
- streamlining operations and controlling expenses;
- completing the active unwind of AIGFP's portfolios by June 30, 2011; and
- closing the Nan Shan sale.

Chartis

Given current property and casualty industry capital levels and overall economic conditions, 2011 is anticipated to be a challenging year as Chartis expects a weak growth environment in most developed economies. The weakness of ratable exposures (i.e., asset values, payrolls, and sales) in 2010 and its negative impact on the overall market premium base, as well as continued weakness in U.S. commercial insurance rates, are likely to continue well into 2011. However, in the first quarter of 2011, Chartis has observed that the extent of ratable exposure weakness in the United States is beginning to abate. In certain growth economies such as Brazil, Turkey, India, and Asia Pacific countries, Chartis expects improved growth rates.

In 2011, Chartis continues to execute on its strategy of growing its higher margin and less capital intensive lines of business and, as required, implementing corrective actions on underperforming businesses. Management continues to review its underlying businesses to ensure that they meet overall performance measures while seeking to reduce the overall volatility of results. In connection with these ongoing reviews, during the three months ended March 31, 2011, management took certain remedial actions relating to certain Consumer line programs that did not meet internal performance or operating targets, including the decision to reduce its net premiums written for two specific programs. Notwithstanding these actions, Chartis U.S. expects to continue to grow its Consumer lines business and, excluding these specific actions, the overall Consumer business continues to see growth in line with management's expectations.

To the extent that the aforementioned ratable exposures continue to improve, Chartis U.S. expects moderate growth in both gross and net written premiums in 2011. Chartis U.S. expects continued growth within its Consumer lines business and an overall decline in certain classes of its Commercial lines businesses. Because the consumer lines of business generally carry higher origination costs than commercial lines, Chartis U.S. expects an overall increase in its expense ratio due to the change in mix of business. However, these increases are expected to be largely offset by on-going expense saving initiatives that were introduced in 2010.

Chartis International expects continued growth of its net written premiums in 2011. Given its well-established franchises and operations, expectations for continued globalization and growth in the gross domestic product within countries included in the Growth Economies region, Chartis International intends to increase its insurance penetration and growth within commercial liability businesses overseas. This growth is expected in the Far East and Growth Economies regions. Strong pricing discipline in a continued soft market is expected to keep the Europe region net written premiums at levels consistent with 2010. Far East growth in 2011 is expected to be attributable in part to the full-year inclusion of the Fuji results of operations, compared to only six months of results in 2010. Further, in connection with the acquisition of a controlling interest in Fuji in 2010, Chartis recognized certain net intangible liabilities related to the difference between the fair value and the carrying value of the insurance contracts acquired.

On February 10, 2011, Chartis announced a cash tender offer for the 45.2 percent of outstanding Fuji shares that it did not already own, as well as outstanding stock acquisition rights. As a result of the offer, at March 31, 2011, Chartis owned 98.4 percent of the aggregate shares of Fuji. Chartis intends ultimately to acquire the remaining minority shares, making Fuji a wholly-owned subsidiary of Chartis. This acquisition is consistent with Chartis' strategy to diversify its portfolio of businesses on both a geographic and product line basis and is intended to strengthen Chartis' position in the consolidating Japanese market, while enabling Fuji to benefit from Chartis' global operational resources and financial strength. See Note 5 to the Consolidated Financial Statements for further discussion.

On March 11, 2011, a major earthquake occurred near the northeast coast of Honshu, Japan, triggering a tsunami in the Pacific Ocean. This disaster is now named the Great Tohoku Earthquake & Tsunami (the Tohoku Catastrophe).

The following table summarizes Chartis charges related to the Tohoku Catastrophe:

Three Months Ended March 31, 2011 (in millions)	Chartis U.S.*	Chartis International	Total
Claims and claims adjustment expenses	\$ 434	\$ 864	\$ 1,298
Reinsurance reinstatement premiums	(4)	43	39
Total	\$ 430	\$ 907	\$ 1,337

* Chartis U.S. losses included approximately \$200 million relating to reinsurance protection it provides to Chartis International as part of Chartis' overall capital management and reinsurance strategies. Chartis U.S. received reinstatement premiums of \$25 million from Chartis International in connection with this protection.

The claims and claims adjustment expenses above include \$436 million relating to Chartis' participation in the Japanese Earthquake Reinsurance Company (JERC). The JERC is a joint government-private sector insurance system that is the exclusive provider of earthquake coverage for personal dwellings and their contents in Japan. Under the JERC system, a maximum of 5.5 trillion Yen (\$67 billion at the March 31, 2011 exchange rate) of industry-wide losses will be covered by the Japanese government, the JERC, and private, general insurance companies in Japan through five layers of liability. Fuji is a 6.2 percent shareholder of the JERC. As such, Fuji, in accordance with Japanese statutory accounting rules, as well as the requirements of private sector participants in the JERC, had previously established reserves of approximately \$482 million for potential claims associated with earthquake damage to personal dwellings. These reserves, which are backed by funds held by the JERC, exist to cover the potential losses that Fuji could sustain in connection with JERC-related claims. Given these statutory reserves, and its current estimate of losses, Chartis expects minimal net effects on the statutory capital and liquidity of its Japanese operations.

The Tohoku Catastrophe caused significant damage to Japan's transportation, power, manufacturing and service sectors and resulted in disruptions to supply chains, particularly in the technology and automobile industries. These disruptions may result in contingent business interruption (CBI) claims from insureds.

Generally, CBI coverage reimburses insureds for loss of business income or extra expense as a result of physical damage sustained by a supplier. The insured's supplier must have sustained physical damage by a peril otherwise covered by the insured's property policy and subject to its respective policy terms and conditions. Potential CBI losses are difficult to initially ascertain due to the unique facts and circumstances of each insured's supply chain and the specific conditions of its CBI coverage.

Chartis believes that the estimated loss liabilities for this catastrophe, including reserves established for CBI claims and JERC-related losses, are reasonable. However, given the unprecedented nature of the catastrophe and the inherent nature of the underlying claims, the subsequent development of these liabilities in future periods could vary materially from amounts included in the accompanying financial statements.

In addition to its policyholder obligations, Chartis responded to the Tohoku Catastrophe with humanitarian and financial assistance through its extensive networks in Japan and abroad.

On April 20, 2011, Chartis announced that it had entered into an agreement with National Indemnity Company (NICO), a subsidiary of Berkshire Hathaway, Inc., under which the majority of Chartis' U.S. asbestos liabilities will be transferred to NICO as part of Chartis' ongoing strategy to reduce its overall loss reserve development risk. The transaction with NICO covers potentially volatile U.S.-related asbestos exposures. The transaction does not cover asbestos accounts that Chartis believes have already been reserved to their limit of liability or certain other ancillary asbestos exposure assumed by Chartis affiliates.

Upon the closing of this transaction, but effective as of January 1, 2011, Chartis will cede the bulk of its net asbestos liabilities to NICO under a retroactive reinsurance agreement with an aggregate limit of \$3.5 billion. Chartis will pay NICO approximately \$1.65 billion as consideration for this cession and NICO will assume approximately \$1.85 billion of net asbestos liabilities. As a result of this transaction, Chartis expects to record a

deferred gain of approximately \$200 million in the second quarter 2011, which will be deferred and amortized into the Chartis results of operations over the settlement period of the underlying claims.

Subject to required regulatory approvals, execution of definitive transaction documentation, and satisfaction of other conditions, this transaction is expected to close in the second quarter of 2011.

Chartis presents its financial information in the manner by which the business is currently being managed, with Chartis U.S. and Chartis International as the primary units included in the segment. On March 31, 2011 AIG announced a reorganization of its Chartis operations and named a new management team. Under the new structure, Chartis will consist of two major global groups — commercial and consumer — with the supporting claims, actuarial, and underwriting disciplines integrated into these two major business operations. In addition, Chartis will be organized geographically as four principal regions: the United States & Canada, Europe, the Far East, and Growth Economies (primarily Asia Pacific, the Middle East and Latin America). As the new structure is implemented, the presentation of Chartis results will be modified accordingly and prior periods' presentations will be conformed. Chartis currently anticipates that the completion of its organization and operating design and related segment reporting changes will be completed in the third quarter of 2011.

SunAmerica

SunAmerica intends in 2011 to expand its distribution capabilities, reposition its excess cash and liquidity, maintain a strong statutory surplus, pro-actively manage expenses and, subject to regulatory approval, increase dividends paid to AIG Parent. SunAmerica made progress on all of these fronts during the first quarter of 2011.

SunAmerica built up a large cash and short-term position with the desire to purchase assets from the Maiden Lane II portfolio. With the FRBNY's decision to sell the MLII assets through a competitive sales process, SunAmerica began to acquire other fixed income investments that generally had lower investment yields. SunAmerica intends to improve net investment income results in 2011 by investing its excess cash and liquid assets in longer-term higher-yielding securities to improve spreads, while actively managing credit and liquidity risks. SunAmerica made progress in the latter part of the first quarter of 2011 reducing its cash and short-term investment position from \$19.4 billion at December 31, 2010 to \$13.1 billion at March 31, 2011.

After a period of historic lows, interest rates generally increased at the longer part of the yield curve during the latter part of 2010 and through the first quarter of 2011. This change in the interest rate environment increased the relative attractiveness of fixed annuities compared to alternative products. Should interest rates remain at first quarter 2011 levels or continue to rise, SunAmerica believes that its fixed annuity sales should remain strong in 2011.

SunAmerica has experienced an increase in its variable annuity sales as various distribution partners have resumed sales of SunAmerica's products during 2010 and 2011. SunAmerica recently announced that its largest pre-financial crisis variable annuity distribution partner has agreed to resume distribution of SunAmerica's products in mid-2011. As a result of broader distribution opportunities and improvement in the equity markets, SunAmerica expects continued improvement in its variable annuity sales.

The estimated gross profits used to amortize Deferred Policy Acquisition Costs (DAC), Value of Business Acquired (VOBA) and Sales Inducement Assets (SIA) are subject to differing market returns and interest rate environments in any single period. Estimated gross profit is comprised of net interest income, net realized investment gains and losses, fees, surrender charges, expenses, and mortality and morbidity gains and losses. SunAmerica uses a reversion to mean methodology to account for fluctuations in separate account returns for its variable annuity business. Continued favorable separate account returns could trigger a favorable unlocking, where the reversion to mean assumption is reset. If current favorable equity market returns continue in 2011, such an unlocking could occur in 2011, which could result in higher amortization requirements in future periods. Such positive unlocking is not expected to be significant to SunAmerica's operating results.

SunAmerica focuses on identifying cost effective opportunities to manage its intercompany reinsurance transactions, particularly with respect to certain redundant statutory reserve requirements on term insurance and universal life with secondary guarantees (XXX and AXXX reserves). For this purpose, SunAmerica had a \$2.65 billion syndicated letter of credit facility and \$215 million of letters of credit on a bilateral basis outstanding at March 31, 2011, all of which relate to intercompany life reinsurance transactions. All of these letters of credit are due to mature on December 31, 2015. During the quarter, SunAmerica modified certain of these intercompany reinsurance agreements to extend the reinsurance benefits, increase capacity and reduce costs.

Financial Services

ILFC

ILFC continues to execute on its strategy to manage its fleet of aircraft, and expects to continue selling certain aircraft throughout the year. Depending on market conditions and the specific aircraft that may be sold, ILFC may incur additional losses on sales or record asset impairment charges, although these are not currently expected to be at the level of charges recognized in 2010.

AIGFP

AIG expects the active unwind of the AIGFP derivatives portfolio to be completed by the end of the second quarter of 2011, and the remaining AIGFP derivatives portfolio will consist predominantly of transactions AIG believes will be of low complexity, low risk, supportive of AIG's risk management objectives or not economically appropriate to unwind based on a cost versus benefit analysis. The cost and liquidity needs of executing the AIGFP portfolio wind-down will depend on many factors, many of which are not within AIG's control, including market conditions, AIGFP's access to markets via market counterparties, the availability of liquidity and the potential implications of further rating downgrades.

Other Operations

Mortgage Guaranty

United Guaranty Corporation (UGC) aims to continue to improve its book of business aided by differentiated pricing and improvements in underwriting practices. UGC continues to deny claims and rescind coverage on loans (collectively referred to as rescissions) in situations related to fraudulent or undocumented claims, underwriting guideline violations and other deviations from contractual terms, mostly with respect to the 2006 and 2007 vintage books of business. These policy violations have resulted in loan rescissions totaling \$211 million of claims on first-lien business during the first three months of 2011 compared to \$80 million during the same period in 2010. Although rescissions will continue to affect UGC's financial results, they have declined as a percentage of claims due to a higher level of appeals and overturns resulting from additional resources deployed by lenders and mortgage servicers to address loan documentation issues. Although these items may increase volatility in the future, AIG believes it has provided appropriate reserves for currently delinquent loans after consideration of rescissions and overturns, consistent with industry practice.

Foreclosure moratoriums as a result of state attorneys' general investigations into lenders' foreclosure practices and new financial regulations initiated in 2010 may affect UGC's future financial results. Final resolution of these issues is unclear and UGC cannot reasonably estimate the ultimate financial impact that any of these actions individually or collectively may have on its future results of operations or financial condition.

In March 2011, federal regulators (as required by the Dodd-Frank Act) issued a proposed risk retention rule that included a definition of a Qualified Residential Mortgage (QRM) whereby a maximum loan-to-value ratio (LTV) of 80 percent is required for a home purchase transaction. The LTV is calculated without imputing any benefit from private mortgage insurance coverage that may be purchased for that loan. The final regulations, depending on the conclusive definition of a QRM, the maximum LTV allowed and the benefit, if any, prescribed to the presence of private mortgage insurance, could materially adversely impact UGC's volume of domestic first lien new insurance written.

Direct Investment Business

During 2011, AIG expects to continue the exit and wind-down of non-strategic assets within the Global Real Estate investment portfolio. AIG carefully evaluates each investment within the portfolio with a view towards optimizing the value of higher quality assets by considering the risk adjusted returns, overall investment risks and

funding commitment, among other aspects. This strategy may extend the hold times for certain assets within the portfolio in order to maximize returns.

The remainder of MD&A is organized as follows:

Index	Page
Results of Operations	100
Consolidated Results	100
Segment Results	104
Chartis Operations	105
Liability for unpaid claims and claims adjustment expense	115
SunAmerica Operations	119
Financial Services Operations	124
Other Operations	126
Capital Resources and Liquidity	129
Investments	141
Investment Strategy	141
Other-Than-Temporary Impairments	150
Enterprise Risk Management	154
Critical Accounting Estimates	157

AIG has incorporated into this discussion a number of cross-references to additional information included throughout this Quarterly Report on Form 10-Q to assist readers seeking additional information related to a particular subject.

Results of Operations

Consolidated Results

The following table presents AIG's condensed consolidated results of operations:

Three Months Ended March 31, (in millions)	2011	2010	Percentage Increase/ (Decrease)
Revenues:			
Premiums	\$ 9,482	\$ 10,914	(13)%
Policy fees	684	648	6
Net investment income	5,569	5,200	7
Net realized capital losses	(651)	(334)	(95)
Aircraft leasing revenue	1,156	1,243	(7)
Other income	1,196	884	35
Total revenues	17,436	18,555	(6)
Benefits, claims and expenses:			
Policyholder benefits and claims incurred	8,959	8,593	4
Interest credited to policyholder account balances	1,105	1,109	-
Amortization of deferred acquisition costs	1,716	2,022	(15)
Other acquisition and insurance expenses	1,551	1,610	(4)
Interest expense	1,061	1,751	(39)
Aircraft leasing expenses	670	1,004	(33)
Loss on extinguishment of debt	3,313	-	-
Net loss on sale of divested businesses and properties	72	76	(5)
Other expenses	369	749	(51)
Total benefits, claims and expenses	18,816	16,914	11
Income (loss) from continuing operations before income tax expense (benefit)	(1,380)	1,641	-
Income tax benefit	(200)	(447)	55
Income (loss) from continuing operations	(1,180)	2,088	-
Income from discontinued operations, net of income tax benefit	1,653	343	382
Net income	473	2,431	(81)
Less: Net income attributable to noncontrolling interests	204	648	(69)
Net income attributable to AIG	\$ 269	\$ 1,783	(85)%

The following commentary discusses significant fluctuations for the three-months ended March 31, 2011 compared to the same period in 2010.

Premiums

Premiums decreased primarily due to the deconsolidation of AIA in the fourth quarter of 2010, partially offset by an increase in Chartis premiums, which reflects the consolidation of Fuji commencing in the third quarter of 2010.

Policy Fees

Policy fees increased primarily due to higher variable annuity fees on the separate account assets consistent with the growth in variable accounts assets as a result of positive equity market conditions in 2010 through the first quarter of 2011.

Net Investment Income

The following table summarizes the components of Net investment income:

Three Months Ended March 31, (in millions)	2011	2010	Percentage Increase/ (Decrease)
Fixed maturities, including short-term investments	\$ 2,691	\$ 3,581	(25)%
ML II	251	160	57
ML III	744	751	(1)
Change in fair value of AIA securities	1,062	-	-
Change in the fair value of MetLife securities prior to the sale	(157)	-	-
Other equity securities	41	53	(23)
Interest on mortgage and other loans	267	341	(22)
Partnerships	654	381	72
Mutual funds	49	14	250
Real estate	25	26	(4)
Other investments	69	19	263
Total investment income before policyholder income and trading gains	5,696	5,326	7
Policyholder investment income and trading gains (losses)	-	(75)	-
Total investment income	5,696	5,251	8
Investment expenses	127	51	149
Net investment income	\$ 5,569	\$ 5,200	7%

Net investment income increased primarily due to fair value gains on the investment in AIA securities and higher income from partnership investments due to an improved market environment, partially offset by the effect of the deconsolidation of AIA in the fourth quarter of 2010.

Net Realized Capital Gains (Losses)

Three Months Ended March 31, (in millions)	2011	2010	Percentage Increase (Decrease)
Sales of fixed maturity securities	\$ 133	\$ 339	(61)%
Sales of equity securities	103	198	(48)
Other-than-temporary impairments:			
Severity	(8)	(31)	74
Change in intent	(4)	(8)	50
Foreign currency declines	(2)	(3)	33
Issuer-specific credit events	(227)	(822)	72
Adverse projected cash flows on structured securities	(13)	-	-
Provision for loan losses	15	(125)	-
Change in the fair value of MetLife securities prior to the sale	(191)	-	-
Foreign exchange transactions	(691)	658	-
Derivative instruments	306	(514)	-
Other	(72)	(26)	(177)
Net realized capital losses	\$ (651)	\$ (334)	(95)%

Net realized capital losses increased reflecting the following:

- foreign exchange transaction losses incurred compared to gains primarily resulting from the weakening of the U.S. dollar against the Euro and the British pound; and
- lower gains on sales of fixed maturity and equity securities.

These declines were partially offset by lower other-than-temporary impairment charges and gains from derivative instruments not designated for hedge accounting compared to losses in the year-ago period which resulted from the weakening of the U.S. dollar against the Euro and British pound, along with an increase in interest rates.

Aircraft Leasing Revenue

Aircraft leasing revenue decreased due to a reduction in the size of ILFC's aircraft fleet under operating leases as a result of the sales of aircraft throughout 2010 and 2011. At March 31, 2011, ILFC had 933 aircraft in its fleet, compared to 993 at March 31, 2010.

Other Income

Other income includes unrealized gains and losses on derivatives including unrealized market valuation gains and losses associated with Capital Markets' super senior credit default swap (CDS) portfolio as well as income from Asset Management operations. Other income increased due to:

- an increase of \$204 million in unrealized market valuation gains related to the super senior credit default swap portfolio resulting primarily from CDS transactions written on multi-sector CDOs driven by price improvement and amortization of the underlying assets;
- increases in credit valuation adjustments on Capital Markets derivative assets and liabilities and Direct Investment business assets and liabilities, which are measured at fair value, of \$206 million and \$58 million, respectively, resulting from the net effect of changes in credit spreads; and
- the effects of the continued wind-down of the AIGFP derivatives portfolio.

These increases were partially offset by the effect of a bargain purchase gain of \$332 million recognized in the first quarter of 2010 related to the acquisition of Fuji. See Note 5 to the Consolidated Financial Statements.

See Segment Results — Financial Services Operations — Financial Services Results — Capital Markets Results and Critical Accounting Estimates — Valuation of Level 3 Assets and Liabilities and Note 6 to the Consolidated Financial Statements.

Policyholder Benefits and Claims Incurred

Policyholder benefits and claims incurred increased primarily due to higher catastrophe losses for Chartis, primarily resulting from the Tohoku Catastrophe, partially offset by the deconsolidation of AIA in the fourth quarter of 2010.

Amortization of Deferred Acquisition Costs

The decline in amortization of Deferred acquisition costs primarily results from the deconsolidation of AIA in the fourth quarter of 2010.

Other Acquisition and Other Insurance Expenses

Policy acquisition and other insurance expenses decreased slightly as a result of the deconsolidation of AIA in the fourth quarter of 2010, partially offset by the consolidation of Fuji commencing in the third quarter of 2010.

Interest Expense

Interest expense decreased primarily as a result of the repayment and termination of the FRBNY Credit Facility on January 14, 2011. See Note 1 to the Consolidated Financial Statements for further discussion.

Aircraft Leasing Expenses

Aircraft leasing expenses decreased due to lower asset impairment and operating lease related charges recorded on aircraft. During the three months ended March 31, 2011, ILFC recorded asset impairment and operating lease related charges of \$113 million on certain aircraft related primarily to sales and potential sales of 10 aircraft. During the three months ended March 31, 2010, ILFC recorded asset impairment and operating lease related charges of \$431 million related to aircraft agreed to be sold.

Loss on Extinguishment of Debt

The loss on extinguishment of debt for the first quarter of 2011 represents a \$3.3 billion charge, primarily consisting of the accelerated amortization of the prepaid commitment fee asset resulting from the termination of the FRBNY Credit Facility on January 14, 2011. See Note 1 to the Consolidated Financial Statements for further discussion.

Other Expenses

Other expenses includes expenses associated with Capital Markets, Asset Management and AIG Parent. Other expenses decreased due to:

- lower operating costs for the Institutional Asset Management business due to the effect of deconsolidation of certain portfolio investments and the sale of AIG's third party asset management business; and
- lower provisions for credit losses for consumer finance businesses not presented as discontinued operations.

Income Tax Benefits

Interim Tax Calculation Method

Beginning with the first quarter of 2011, AIG utilized the estimated annual effective tax rate method in computing its interim tax provision. The recent stabilization of operations and expected financial results allows AIG to estimate the annual effective tax rate to be applied to year-to-date income.

Since the third quarter of 2008, the discrete period method was utilized due to the significant variations in the customary relationship between income tax expense and pre-tax accounting income, which were partly due to the effects of AIG's asset disposition program and restructuring.

Included in the estimated annual effective rate is a full valuation allowance against the tax expense of the U.S. consolidated income tax group, and statutory rates were used for computing the tax expense of foreign subsidiaries.

Certain items, including those deemed to be unusual, infrequent or that cannot be reliably estimated, are excluded from the estimated annual effective tax rate. In these cases, the actual tax expense or benefit applicable to that item is treated discretely, and is reported in the same period as the related item. For the three-month period ended March 31, 2011, the tax effects of the loss on extinguishment of debt, other-than-temporary impairments, realized capital gains and losses, the sale of Met Life securities, and divestiture gains or losses were treated as discrete items.

Interim Tax Expense (Benefit)

For the three-month period ended March 31, 2011, the effective tax rate on pretax income from continuing operations was 14.5 percent. The effective tax rate for the three-month period ended March 31, 2011, attributable to continuing operations differs from the statutory rate of 35 percent primarily due to an increase in the valuation allowance attributable to continuing operations for the U.S. consolidated income tax group, tax effects associated with tax exempt interest income, investments in partnerships, and changes in uncertain tax positions.

For the three-month period ended March 31, 2010, the effective tax rate on the pre-tax income from continuing operations was (27.2) percent. The effective tax rate was negative because AIG recorded a tax benefit on pre-tax income. The tax benefit was primarily due to decreases in the deferred tax asset valuation allowance resulting from changes in the expected taxable gain on subsidiaries to be sold, the tax benefit associated with tax exempt interest, and the bargain purchase gain associated with the acquisition of Fuji.

See Note 14 to the Consolidated Financial Statements for additional information.

Discontinued Operations

Income (loss) from Discontinued Operations consists of the following:

Three Months Ended March 31, (in millions)	2011	2010
Foreign life insurance businesses*	\$ 542	\$ 757
AGF	-	44
Net gain (loss) on sale	1,594	(107)
Consolidation adjustments	(1)	(113)
Interest allocation	(2)	(19)
Income from discontinued operations	\$ 2,133	\$ 562
Income tax expense	480	219
Income from discontinued operations, net of tax	\$ 1,653	\$ 343

* Represents results of ALICO, AIG Star, AIG Edison and Nan Shan.

Results from discontinued operations for the three months ended March 31, 2011 include a pre-tax gain of \$1.9 billion on the sale of AIG Star and AIG Edison. See Note 4 to the Consolidated Financial Statements for further discussion.

Segment Results

AIG believes it should present and discuss its financial information in a manner most meaningful to its financial statement users. AIG analyzes the operating performance of Chartis, using underwriting profit (loss). AIG analyzes the operating performance of SunAmerica using Operating income (loss), which is before net realized capital gains (losses) and related DAC and SIA amortization and goodwill impairment charges. Results from discontinued operations and net gains (losses) on sales of divested businesses are excluded from these measures. AIG believes that these measures allow for a better assessment and enhanced understanding of the operating performance of each business by highlighting the results from ongoing operations and the underlying profitability of its businesses. When such measures are disclosed, reconciliations to GAAP pre-tax income are provided.

The following table summarizes the operations of each reportable segment. See also Note 3 to the Consolidated Financial Statements.

Three Months Ended March 31, (in millions)	2011	2010	Percentage Increase/ (Decrease)
Total revenues:			
Chartis	\$ 9,877	\$ 9,181	8%
SunAmerica	3,839	3,226	19
Financial Services	1,568	1,290	22
Total reportable segments	15,284	13,697	12

Chartis Operations

Chartis, AIG's property and casualty insurance operation, offers a broad range of commercial and consumer insurance products and services worldwide. Its commercial business includes casualty, property and specialty lines and its consumer business includes Accident and Health (A&H), personal and life products.

Chartis U.S. distributes its products in the United States and Canada through independent retail and wholesale brokers, and writes business on both an admitted and surplus line basis. Chartis U.S. business is conducted through American Home Assurance Company, National Union Fire Insurance Company of Pittsburgh, PA, Lexington Insurance Company, the market leader in surplus lines, and certain other property-casualty insurance company subsidiaries.

Chartis International writes commercial and consumer lines of insurance through a network of agencies, branches and foreign based insurance subsidiaries. Chartis International uses various marketing methods and multiple distribution channels to write both commercial and consumer lines of insurance with certain refinements for local laws, customs and needs. Chartis International organizes its operations into three broad regions: Europe, the Far East, and Growth Economies (which primarily include Asia-Pacific, the Middle East, and Latin America).

Chartis Results

The following table presents Chartis' results:

Three Months Ended March 31, (in millions)	2011	2010	Percentage Increase/ (Decrease)
Underwriting results:			
Net premiums written	\$ 9,166	\$ 7,644	20%
Increase in unearned premiums	(515)	(3)	-
Net premiums earned	8,651	7,641	13
Claims and claims adjustment expenses incurred	7,756	5,459	42
Underwriting expenses	2,537	2,374	7
Underwriting loss	(1,642)	(192)	(755)
Investing and other results:			
Net investment income	1,179	1,071	10
Net realized capital gains	47	137	(66)
Bargain purchase gain	-	332	-
Pre-tax income (loss)	\$ (416)	\$ 1,348	-%

Underwriting profit is derived by reducing net premiums earned by claims and claims adjustment expenses incurred and underwriting expenses. Net premiums written are initially deferred and earned based upon the terms of the underlying policies for short duration contracts. The unearned premium reserve constitutes deferred revenues which are generally recognized in earnings ratably over the policy period. Net premiums written for long duration contracts are earned when due from the policyholder. Net premiums written reflect the premiums retained after purchasing reinsurance protection.

AIG, along with most property and casualty insurance companies, uses the loss ratio, the expense ratio and the combined ratio as measures of underwriting performance. The loss ratio is the sum of claims and claims adjustment expenses divided by net premiums earned. The expense ratio is underwriting expenses, which consist of acquisition costs plus other insurance expenses, divided by net premiums earned. The combined ratio is a sum of loss ratio and expense ratio. These ratios are relative measurements that describe, for every \$100 of net premiums earned, the amount of claims and claims adjustment expenses, and other underwriting expenses that would be incurred. A combined ratio of less than 100 indicates an underwriting profit and over 100 indicates an underwriting loss.

The underwriting environment varies from country to country, as does the degree of litigation activity. Regulation, product type and competition have a direct effect on pricing and consequently on profitability as reflected in underwriting profit and the combined ratio.

Chartis Net Premiums Written

The following table presents Chartis net premiums written by major line of business:

Three Months Ended March 31, (in millions)	2011	2010	Percentage Increase/ (Decrease)
Consumer lines:			
Accident & health	\$ 1,523	\$ 1,389	10%
Personal lines	1,676	1,029	63
Life insurance	181	-	-
Total Consumer lines	3,380	2,418	40
Commercial lines:			
Casualty	2,515	2,189	15
Property	918	863	6
Specialty	2,353	2,174	8
Total Commercial lines	5,786	5,226	11
Total net premiums written	\$ 9,166	\$ 7,644	20%

Chartis' net premiums written increased in the first three months of 2011 compared to the same period in 2010 due to growth in both Consumer and Commercial lines of business. Growth in both lines is primarily related to the acquisition of Fuji. For the three months ended March 31, 2011 Fuji contributed net premiums written of approximately \$1 billion, of which \$0.9 billion relates to Consumer lines and \$0.1 billion relates to Commercial (Casualty) lines. Excluding Fuji, net premiums written increased approximately 7 percent over the comparable 2010 three-month period.

Excluding Fuji, Consumer lines increased 3 percent over the comparable 2010 period, as Chartis continues to execute on its strategy of growing its higher margin, less capital intensive classes of business and as appropriate, taking corrective actions, including exiting certain classes of underperforming businesses.

Excluding Fuji, overall Commercial lines increased approximately \$460 million or 9 percent over the comparable 2010 period. Similarly, Casualty lines increased \$226 million or 10 percent excluding Fuji, primarily reflecting improvements in ratable exposures (i.e., asset values, payrolls and sales), general rate improvement and retrospective premium adjustments on loss-sensitive contracts for Chartis U.S.

Management continues to execute on its plan to reduce its exposure to certain classes of its Casualty lines of business. As an example, at March 31, 2011 policies-in-force for Chartis U.S. specialty workers' compensation business decreased approximately 9 percent from the comparable 2010 three-month period. Further, excluding the effects of 2011 rate increases, and exposure and retrospective based premium adjustments, as of March 31, 2011, specialty workers' compensation premium decreased 6 percent compared to the 2010 three-month period.

The increase in Property net premiums written reflects the effects of continued execution of reinsurance strategies designed to reduce overall costs, maintain limits consistent with prior years, minimize credit exposure and reduce probable maximum losses. In connection with this strategy, a property quota share treaty was not renewed in 2011, resulting in an increase in Property net premiums written of approximately \$38 million.

The increase in Specialty net premiums written is due primarily to the issuance of a large Chartis U.S. errors and omissions policy.

Overall, Chartis continues to see improved retention ratios, new business submissions, and a relatively stable rate environment across all of its major product lines and regions.

AIG transacts business in most major foreign currencies. The following table summarizes the effect of changes in foreign currency exchange rates on Chartis net premiums written:

Three Months Ended March 31,	2011 vs. 2010
Increase in original currency*	18.7%
Foreign exchange effect	1.2
Increase as reported in U.S. dollars	19.9%

* Computed using a constant exchange rate for each period.

Chartis Underwriting Ratios

The following table summarizes Chartis GAAP combined ratios:

Three Months Ended March 31,	2011	2010	Increase (Decrease)
Loss ratio	89.7	71.4	18.3
Expense ratio	29.3	31.1	(1.8)
Combined ratio	119.0	102.5	16.5

Loss ratio:

The increase in the loss ratio reflects the effects of increased catastrophe losses in the first three months of 2011 compared to the same period in 2010 as shown in the table below. Also, for the three months ended March 31, 2011, Chartis recorded net adverse prior year development of \$23 million (net of additional premium adjustments of \$37 million relating to loss sensitive insurance contracts and including reserve discount charges of \$34 million). During the three months ended March 31, 2010, Chartis recorded net favorable prior year loss development of \$185 million (net of returned premium adjustments of \$59 million relating to loss sensitive contracts), primarily relating to short tail lines of business (primarily for property lines of business).

The following table presents catastrophe losses by major event:

Three Months Ended March 31, (in millions)	2011			2010		
	Chartis U.S.	Chartis International	Total	Chartis U.S.	Chartis International	Total
Event:						
Tohoku Catastrophe	\$ 434	\$ 864	\$ 1,298	\$ -	\$ -	\$ -
New Zealand Christchurch earthquake	11	196	207	-	-	-
U.S. winter storms	67	-	67	-	-	-
Australia (Brisbane) floods	-	58	58	-	-	-
Chile earthquake	-	-	-	58	252	310
Northeast rainstorms (I and II)	-	-	-	119	-	119
All other events	17	41	58	20	42	62
Claims and claim expenses	529	1,159	1,688	197	294	491
Reinstatement premiums	(4)	43	39	-	10	10
Total catastrophe-related charges	\$ 525	\$ 1,202	\$ 1,727	\$ 197	\$ 304	\$ 501

The following table presents the impact of catastrophe losses, prior year development and related reinstatement premiums and premium adjustments on loss-sensitive contracts on the Chartis consolidated loss ratio:

	Three Months Ended March 31,		Increase/ (Decrease)
	2011	2010	
Loss ratio	89.7	71.4	18.3
Catastrophe losses and reinstatement premiums	(19.9)	(6.5)	(13.4)
Prior year development net of premium adjustments and including reserve discount	(0.4)	2.7	(3.1)
Loss ratio, as adjusted	69.4	67.6	1.8

For the three months ended March 31, 2011, the overall adjusted loss ratio increased primarily due to:

- An increase in the 2011 accident year loss ratio for the Chartis U.S. Specialty Workers' Compensation and Excess Casualty business, and an increase to the 2011 accident loss ratio for the Chartis International Primary Casualty and Indemnity lines (within the Europe region) as a result of the current year loss ratios established in connection with its 2010 annual loss reserve study;
- An increase in losses on shorter tail lines of business; and
- The acquisition of Fuji, which for the three months ended March 31, 2011 reported an adjusted loss ratio (excluding the effects of catastrophes, prior year development and reinstatement premiums) of 69.6.

Expense ratio:

The improvement in the overall expense ratio is due in large part to the net benefits of the amortization of the net intangible liabilities relating to the acquisition of Fuji. For the three months ended, March 31, 2011, Fuji reported an expense ratio of 19.8. Excluding Fuji, the overall expense ratio of 30.5 is generally consistent with the comparable 2010 period, as decreases in Chartis U.S. were offset by increases in Chartis International. The increase in Chartis International relates to costs that are consistent with management's strategic objectives, including the implementation of improved regional governance and risk management capabilities, global accounting and claims systems initiatives and Solvency II readiness.

Chartis Investing and Other Results

For the three months ended March 31, 2011, net investment income for Chartis increased due to the acquisition of Fuji, which contributed \$78 million of net investment income in the current year period. Additionally, returns on partnership investments improved by \$92 million compared to the same period in 2010 as general market conditions continued to improve.

Net realized capital gains declined in the 2011 period as compared to the same period in 2010 due primarily to a decrease in realized gains within the Chartis International fixed maturity securities portfolio. The bargain purchase gain of \$332 million in 2010 relates to the acquisition of Fuji.

See Consolidated Results for further discussion on net investment income and net realized capital losses.

Chartis U.S. Results

The following table presents Chartis U.S. results:

Three Months Ended March 31, (in millions)	2011	2010	Percentage Increase/ (Decrease)
Underwriting results:			
Net premiums written	\$ 4,128	\$ 3,787	9%
Decrease in unearned premiums	354	775	(54)
Net premiums earned	4,482	4,562	(2)
Claims and claims adjustment expenses incurred	4,103	3,474	18
Underwriting expenses	1,095	1,199	(9)
Underwriting loss	(716)	(111)	(545)
Net investment income	874	844	4
Net realized capital gains	66	(3)	-
Pre-tax income	\$ 224	\$ 730	(69)%

Chartis U.S. Net Premiums Written

The following table presents Chartis U.S. net premiums written by line of business:

Three Months Ended March 31, (in millions)	2011	2010	Percentage Increase/ (Decrease)
Consumer lines:			
Accident & health	\$ 386	\$ 407	(5)%
Personal lines	392	462	(15)
Total Consumer lines	778	869	(10)
Commercial lines:			
Casualty	1,528	1,304	17
Property	418	386	8
Specialty	1,404	1,228	14
Total Commercial lines	3,350	2,918	15
Total net premiums written	\$ 4,128	\$ 3,787	9%

Chartis U.S. net premiums written increased primarily due to:

- an increase of \$96 million within the Commercial Casualty loss-sensitive business. Loss-sensitive business relates to policies whose premiums vary with the level of underlying losses. Accordingly, for the three months ended March 31, 2011, additional premiums of \$37 million were recorded because a comparable amount of additional prior year losses were recognized. Conversely, the comparable 2010 three-month period includes returned premiums of \$59 million because insured loss experience emerged more favorably;
- an increase of \$62 million due to improvement in ratable exposures compared to the weakness these exposures experienced in 2009 and 2010. Certain workers' compensation policies are subject to final determination of premiums after the policy has expired and Chartis re-evaluates (audits) the underlying ratable exposure (i.e., payroll). Given the decline in these exposures in 2009 and 2010 due to generally weak economic conditions, audits conducted in 2010 of policies issued in 2009 resulted in returned premiums of approximately \$54 million. In 2011, final premium audits on policies written in 2010 resulted in additional premiums due Chartis of \$8 million;

- an increase in Property net premiums written reflecting the effects of continued execution of reinsurance strategies designed to reduce overall costs, maintain limits consistent with prior years, minimize credit exposure and reduce probable maximum losses. In connection with this strategy, a property quota share treaty was not renewed in 2011, resulting in an increase in Property net premiums written of approximately \$38 million;
- an increase in Specialty net premiums written due primarily to the issuance of a large errors and omissions policy.

Growing the higher margin Consumer lines of business continues to be a key Chartis U.S. strategy. Where Consumer line programs do not meet internal performance or operating targets, management takes appropriate remedial actions, including in the first quarter of 2011, the decision to de-emphasize two specific programs, resulting in a decline in Consumer lines net premiums written in the quarter. Excluding the effects of these de-emphasized programs, the Chartis U.S. Consumer lines business continues to see growth in line with management's expectations.

Chartis U.S. Underwriting Ratios

The following table presents Chartis U.S. GAAP combined ratios:

Three Months Ended March 31,	2011	2010	Increase (Decrease)
Loss ratio	91.5	76.2	15.3
Expense ratio	24.4	26.3	(1.9)
Combined ratio	115.9	102.5	13.4

The following table shows the impact of catastrophe losses, prior year development and related reinstatement premiums and premium adjustments on loss sensitive contracts on the Chartis U.S. loss ratio:

Three Months Ended March 31,	2011	2010	Increase (Decrease)
Loss ratio	91.5	76.2	15.3
Catastrophe losses and reinstatement premiums	(11.7)	(4.3)	(7.4)
Prior year development net of premium adjustments and including reserve discount	(1.8)	3.1	(4.9)
Loss ratio, as adjusted	78.0	75.0	3.0

Loss ratio:

The increase in the loss ratio reflects the effects of increased catastrophe losses in the first three months of 2011 compared to the same period in 2010 as discussed above. Also, for the three months ended March 31, 2011, Chartis U.S. recorded net adverse prior year development of \$73 million (net of additional premium adjustments of \$37 million relating to loss-sensitive insurance contracts and including reserve discount charges of \$25 million). During the three months ended March 31, 2010, Chartis U.S. recorded net favorable prior year loss development of \$131 million (net of returned premium adjustments of \$59 million relating to loss sensitive insurance contracts), primarily relating to property lines of business.

Included within 2011 adverse development for prior years of \$73 million, Chartis U.S. recorded a \$34 million charge for two programs relating to accident year 1999 because improvements in reporting from third party administrators resulted in additional losses being recorded. Additionally, Chartis U.S. recorded \$38 million of losses relating to a reallocation of its participation in Workers' Compensation residual markets resulting from the settlement described under Litigation Related to the Matters Underlying the 2006 Regulatory Settlements — Workers' Compensation Premium Reporting in Note 11 to the Consolidated Financial Statements.

For the three months ended March 31, 2011, the overall adjusted loss ratio increased primarily due to:

- an increase to the 2011 accident year loss ratio for the Chartis U.S. Specialty Workers' Compensation and Excess Casualty business as a result of the current year loss ratios established in connection with its 2010 annual loss reserve study; and
- an increase in losses on short tail lines of business (primarily within its property lines).

Expense ratio:

The overall decline in the expense ratio is due to a 2011 reduction in certain insurance and reinsurance credit risk related allowances based on ongoing improvements relating to the analysis of certain account balances and related credit and financial statement exposure. In the first three months of 2011, Chartis U.S. reduced its bad debt allowance by approximately \$44 million as compared to an increase of \$24 million in the same period in 2010. In addition, expenses declined due to strategic reductions in certain direct marketing activities and other commission reductions due to declines in writings of certain classes of Consumer lines business. Further, 2011 is beginning to reflect the effects of cost saving initiatives introduced during the latter part of 2010. Partially offsetting these declines are increased personnel costs-relating to Chartis' U.S. strategy to continue to attract, retain and develop its human capital and to better align employee performance incentive programs with profitability, capital management, risk management, and other AIG performance measures.

Chartis U.S. Investing Results

Net investment income for Chartis U.S. increased primarily as a result of partnership investments returning to profitability as market conditions improved. Chartis U.S. recorded a Net realized capital gain due to sales of fixed maturity securities and equity securities as market conditions improved and lower other-than-temporary impairments on investments due to improved cash flow expectations on structured securities.

Chartis International Results

The following table presents Chartis International results:

Three Months Ended March 31, (in millions)	2011	2010	Percentage Increase/ (Decrease)
Underwriting results:			
Net premiums written	\$ 5,038	\$ 3,857	31%
Increase in unearned premiums	(869)	(778)	(12)
Net premiums earned	4,169	3,079	35
Claims and claims adjustment expenses incurred	3,653	1,985	84
Underwriting expenses	1,442	1,175	23
Underwriting loss	(926)	(81)	(1,043)
Investing and other results:			
Net investment income	305	227	34

Bargain purchase gain	-	332	-
Pre-tax income (loss)	\$ (640)	\$ 618	-%

Chartis International Net Premiums Written

The following table presents Chartis International net premiums written by line of business:

Three Months Ended March 31, (in millions)	2011	2010	Percentage Increase/ (Decrease)
Consumer lines:			
Accident & health	\$ 1,137	\$ 982	16%
Personal lines	1,284	567	126
Life insurance	181	-	-
Total consumer lines	2,602	1,549	68
Commercial lines:			
Casualty	987	885	12
Property	500	477	5
Specialty	949	946	-
Total commercial lines	2,436	2,308	6
Total net premiums written	\$ 5,038	\$ 3,857	31%

Chartis International net premiums written increased primarily due to:

- the acquisition of Fuji. Beginning on July 1, 2010, Fuji's net premiums written were included in Chartis International. For the three months ended March 31, 2011, Fuji's net premiums written were \$1.0 billion, of which \$0.9 billion relates to Consumer lines and \$0.1 billion relates to Commercial lines. In addition, Chartis International's Life insurance business included in Consumer lines is produced by Fuji; and
- continued stabilization of developed economies. This increased stabilization resulted in improved pricing, increased new business submissions and improved policyholder retention rates in both Consumer and Commercial lines.

From a regional perspective, growth in the Far East region was driven primarily by the Fuji acquisition. The Growth Economy countries, with well established franchises and operations, continue to increase insurance penetration and growth within Consumer and Commercial lines. The Europe region's net premium written levels were consistent with 2010 due to continued strong pricing discipline in a recovering soft market.

AIG transacts business in most major foreign currencies. The following table summarizes the effect of changes in foreign currency exchange rates on the growth of Chartis International net premiums written:

Three Months Ended March 31,	2011 vs. 2010
Increase in original currency ^(a)	28.1% ^(b)
Foreign exchange effect	2.5
Increase as reported in U.S. dollars	30.6%

(a) Computed using a constant exchange rate for each period.

(b) Substantially all of this increase was attributable to the Fuji acquisition.

Chartis International Underwriting Ratios

The following table presents Chartis International combined ratios:

Three Months Ended March 31,	2011	2010	Increase (Decrease)
Loss ratio	87.6	64.5	23.1
Expense ratio	34.6	38.2	(3.6)
Combined ratio	122.2	102.7	19.5

Loss ratio:

The following table shows the impact of catastrophe losses, prior year development, related reinstatement premiums and premium adjustments on loss sensitive contracts on the Chartis International loss ratio:

Three Months Ended March 31,	2011	2010	Increase (Decrease)
Loss ratio	87.6	64.5	23.1
Catastrophe losses and reinstatement premium	(28.4)	(9.7)	(18.7)
Prior year development net of premium adjustments and including reserve discount	1.2	1.7	(0.5)
Loss ratio, as adjusted	60.4	56.5	3.9

For the three months ended March 31, 2011, the adjusted loss ratio increased compared to the same period in 2010 primarily due to:

- an increase to the 2011 accident year loss ratio for the Chartis International Primary Casualty and Indemnity lines (within the Europe region) as a result of the current year loss ratios established in connection with its 2010 annual loss reserve study; and
- the acquisition of Fuji, which for the three months ended March 31, 2011 reported an adjusted loss ratio (excluding the effects of catastrophes, prior year development and reinstatement premiums) of 69.6.

Expense ratio:

The decline in the expense ratio is due to the acquisition of Fuji. For the three months ended March 31, 2011, Fuji reported an expense ratio of 19.8. This ratio reflects the benefits from the amortization of net intangible liabilities relating to the Fuji acquisition. Excluding Fuji, the expense ratio increased 1 point. This increase relates to costs that are consistent with management's strategic objectives, including the implementation of improved regional governance and risk management capabilities, global accounting and claims systems initiatives and Solvency II readiness. Additionally, Chartis International incurred approximately \$14 million of expenses relating to the implementation of its business continuity plans and charges related to fixed asset damage as a result of the Tohoku Catastrophe in Japan.

Chartis International Investing and Other Results

Chartis International net investment income increased primarily due to the acquisition of Fuji, which contributed \$78 million of net investment income for the three months ended March 31, 2011.

Chartis International recorded a net realized capital loss in the first three months of 2011 compared to a net realized capital gain in 2010. The 2010 period included \$164 million of gains relating to fixed maturity securities.

The bargain purchase gain of \$332 million in 2010 was recognized in connection with the acquisition of Fuji.

Liability for unpaid claims and claims adjustment expense

The following discussion of the consolidated liability for unpaid claims and claims adjustment expenses (loss reserves) presents loss reserves for the Chartis U.S. and Chartis International reporting units in the Chartis operating segment and loss reserves pertaining to the Mortgage Guaranty reporting unit which is reported in AIG's Other operations category.

The following table presents the components of the loss reserves by major lines of business on a statutory basis*:

<i>(in millions)</i>	March 31, 2011	December 31, 2010
Other liability occurrence	\$ 23,539	\$ 23,583
International	18,796	16,583
Workers' compensation	17,858	17,683
Other liability claims made	11,438	11,446
Property	5,697	3,846
Mortgage Guaranty/Credit	4,011	4,220
Auto liability	3,143	3,337
Products liability	2,628	2,377
Medical malpractice	1,748	1,754
Accident and health	1,388	1,444
Aircraft	1,163	1,149
Commercial multiple peril	1,116	1,006
Fidelity/surety	858	934
Reinsurance	126	130
Other	1,469	1,659
Total	\$ 94,978	\$ 91,151

* Presented by lines of business pursuant to statutory reporting requirements as prescribed by the National Association of Insurance Commissioners.

AIG's gross loss reserves represent the accumulation of estimates of ultimate losses, including estimates for IBNR and loss expenses. The methods used to determine loss reserve estimates and to establish the resulting reserves are continually reviewed and updated. Any adjustments resulting from this review are currently reflected in pre-tax income. Because loss reserve estimates are subject to the outcome of future events, changes in estimates are unavoidable given that loss trends vary and time is often required for changes in trends to be recognized and confirmed. Reserve changes that increase previous estimates of ultimate cost are referred to as unfavorable or adverse development or reserve strengthening. Reserve changes that decrease previous estimates of ultimate cost are referred to as favorable development.

The net loss reserves represent loss reserves reduced by reinsurance recoverables, net of an allowance for unrecoverable reinsurance and applicable discount for future investment income.

The following table classifies the components of net loss reserves by business unit:

<i>(in millions)</i>	March 31, 2011	December 31, 2010
Chartis:		
Chartis U.S.	\$ 53,581	\$ 53,111
Chartis International	16,620	14,963
Total Chartis	70,201	68,074
Mortgage Guaranty	3,273	3,433
Net liability for unpaid claims and claims adjustment expense at end of period	\$ 73,474	\$ 71,507

Discounting of Reserves

At March 31, 2011, net loss reserves reflect a loss reserve discount of \$3.19 billion, including tabular and non-tabular calculations. The tabular workers' compensation discount is calculated using a 3.5 percent interest rate and the 1979-81 Decennial Mortality Table. The non-tabular workers' compensation discount is calculated separately for companies domiciled in New York and Pennsylvania, and follows the statutory regulations for each state. For New York companies, the discount is based on a five percent interest rate and the companies' own payout patterns. For Pennsylvania companies, the statute has specified discount factors for accident years 2001 and prior, which are based on a six percent interest rate and an industry payout pattern. For accident years 2002 and subsequent, the discount is based on the payout patterns and investment yields of the companies. Those asbestos liabilities that are fixed and determinable are discounted based on investment yields. The discount is comprised of the following: \$790 million — tabular discount for workers' compensation in Chartis U.S. and \$2.27 billion — non-tabular discount for workers' compensation in Chartis U.S.; and \$128 million — non-tabular discount for asbestos for Chartis.

Quarterly Reserving Process

AIG believes that its net loss reserves are adequate to cover net losses and loss expenses as of March 31, 2011. While AIG regularly reviews the adequacy of established loss reserves, there can be no assurance that AIG's ultimate loss reserves will not develop adversely and materially exceed AIG's loss reserves as of March 31, 2011. In the opinion of management, such adverse development and resulting increase in reserves are not likely to have a material adverse effect on AIG's consolidated financial condition, although such events could have a material adverse effect on AIG's consolidated results of operations for an individual reporting period.

The following table presents the rollforward of net loss reserves:

Three Months Ended March 31, <i>(in millions)</i>	2011	2010
Net liability for unpaid claims and claims adjustment expense at beginning of year	\$ 71,507	\$ 67,899
Foreign exchange effect	546	(553)
Acquisitions*	-	1,538
Dispositions	-	(25)
Losses and loss expenses incurred:		
Current year	7,684	5,998
Prior years, other than accretion of discount	(16)	(476)
Prior years, accretion of discount	115	86
Losses and loss expenses incurred	7,783	5,608
Losses and loss expenses paid	6,362	5,916
Reclassified to liabilities held for sale	-	(2)
Net liability for unpaid claims and claims adjustment expense at end of period	\$ 73,474	\$ 68,549

* Represents the acquisition of Fuji on March 31, 2010.

The following tables summarize development, (favorable) or unfavorable, of incurred losses and loss expenses for prior years (other than accretion of discount):

Prior years, other than accretion of discount	\$ (16)	\$ (476)

In determining the loss development from prior accident years, AIG conducts analyses to determine the change in estimated ultimate loss for each accident year for each class of business. For example, if loss emergence for a class of business is different than expected for certain accident years, the actuaries examine the indicated effect such emergence would have on the reserves of that class of business. In some cases, the higher or lower than expected emergence may result in no clear change in the ultimate loss estimate for the accident years in question, and no adjustment would be made to the reserves for the class of business for prior accident years. In other cases, the higher or lower than expected emergence may result in a larger change, either favorable or unfavorable, than the difference between the actual and expected loss emergence. Such additional analyses were conducted for each class of business, as appropriate, in the three-month period ended March 31, 2011 to determine the loss development from prior accident years for the three-month period ended March 31, 2011. As part of its reserving process, AIG also considers notices of claims received with respect to emerging and/or evolving issues, such as those related to the U.S. mortgage and housing market.

See Chartis Results herein for further discussion of net loss development.

Asbestos and Environmental Reserves

The estimation of loss reserves relating to asbestos and environmental claims on insurance policies written many years ago is subject to greater uncertainty than other types of claims due to inconsistent court decisions as well as judicial interpretations and legislative actions that in some cases have tended to broaden coverage beyond the original intent of such policies and in others have expanded theories of liability.

As described more fully in AIG's 2010 Annual Report on Form 10-K, AIG's reserves relating to asbestos and environmental claims reflect a comprehensive ground-up analysis. In the three-month period ended March 31, 2011, a minor amount of incurred loss pertaining to the asbestos loss reserve discount and a minor adjustment to the environmental gross and net reserves are reflected in the table below.

On April 20, 2011, Chartis announced that it has entered into an agreement with NICO under which the bulk of Chartis' legacy asbestos liabilities will be transferred to NICO as part of Chartis' ongoing strategy to reduce its reserve development risk. At the closing of this transaction, but effective as of January 1, 2011, Chartis will cede the majority of its net asbestos liabilities to NICO under a retroactive reinsurance agreement with an aggregate limit of \$3.5 billion. Chartis will pay NICO approximately \$1.65 billion in respect of the cession. See Priorities for 2011 — Chartis herein and Note 16 to the Consolidated Financial Statements.

The following table provides a summary of reserve activity, including estimates for applicable IBNR, relating to asbestos and environmental claims separately and combined:

Three Months Ended March 31, (in millions)	2011		2010	
	Gross	Net	Gross	Net
Asbestos:				
Liability for unpaid claims and claims adjustment expense at beginning of year	\$ 5,526	\$ 2,223	\$ 3,236	\$ 1,151
Losses and loss expenses incurred*	81	34	1	2
Losses and loss expenses paid*	(135)	(58)	(188)	(48)
Liability for unpaid claims and claims adjustment expense at end of period	\$ 5,472	\$ 2,199	\$ 3,049	\$ 1,105
Environmental:				
Liability for unpaid claims and claims adjustment expense at beginning of year	\$ 240	\$ 127	\$ 338	\$ 159
Losses and loss expenses incurred*	8	5	-	1
Losses and loss expenses paid*	(28)	(12)	(12)	(8)
Liability for unpaid claims and claims adjustment expense at end of period	\$ 220	\$ 120	\$ 326	\$ 152
Combined:				
Liability for unpaid claims and claims adjustment expense at beginning of year	\$ 5,766	\$ 2,350	\$ 3,574	\$ 1,310
Losses and loss expenses incurred*	89	39	1	3
Losses and loss expenses paid*	(163)	(70)	(200)	(56)
Liability for unpaid claims and claims adjustment expense at end of period	\$ 5,692	\$ 2,319	\$ 3,375	\$ 1,257

* All amounts pertain to policies underwritten in prior years, primarily to policies issued in 1984 and prior years.

The following table presents the estimate of the gross and net IBNR included in the Liability for unpaid claims and claims adjustment expense, relating to asbestos and environmental claims separately and combined:

Three Months Ended March 31, (in millions)	2011		2010	
	Gross	Net	Gross	Net
Asbestos	\$ 4,383	\$ 1,907	\$ 2,016	\$ 838
Environmental	77	33	159	63
Combined	\$ 4,460	\$ 1,940	\$ 2,175	\$ 901

The following table presents a summary of asbestos and environmental claims count activity:

Three Months Ended March 31, 2011	2011			2010		
	Asbestos	Environmental	Combined	Asbestos	Environmental	Combined
Claims at beginning of year	4,933	4,087	9,020	5,417	5,994	11,411
Claims during year:						
Opened	376	41	417	133	111	244
Settled	(20)	(19)	(39)	(55)	(44)	(99)
Dismissed or otherwise resolved	(151)	(174)	(325)	(287)	(1,321)	(1,608)
Claims at end of period	5,138	3,935	9,073	5,208	4,740	9,948

Survival Ratios — Asbestos and Environmental

The following table presents AIG's survival ratios for asbestos and environmental claims at March 31, 2011 and 2010. The survival ratio is derived by dividing the current carried loss reserve by the average payments for the three most recent calendar years for these claims. Therefore, the survival ratio is a simplistic measure estimating the number of years it would be before the current ending loss reserves for these claims would be paid off using recent year average payments. In addition, AIG's survival ratio for asbestos claims was negatively affected by certain favorable settlements during 2008 and 2007. These settlements reduced gross and net asbestos survival ratios at March 31, 2010 by approximately 0.5 years and 1.4 years, respectively.

Many factors, such as aggressive settlement procedures, mix of business and level of coverage provided, have a significant effect on the amount of asbestos and environmental reserves and payments and the resultant survival ratio. Moreover, as discussed above, the primary basis for AIG's determination of its reserves are not survival ratios, but instead the ground-up and top-down analysis. Thus, caution should be exercised in attempting to determine reserve adequacy for these claims based simply on this survival ratio.

Further, these ratios are expected to be significantly affected by the NICO asbestos reinsurance agreement commencing in the second quarter of 2011.

The following table presents AIG's survival ratios for asbestos and environmental claims, separately and combined, which were based upon a three-year average payment:

Three Months Ended March 31,	2011		2010	
	Gross	Net	Gross	Net
Survival ratios:				
Asbestos	9.0	10.0	4.5	3.9
Environmental	3.2	3.0	4.4	3.3
Combined	8.4	8.9	4.5	3.8

SunAmerica Operations

SunAmerica offers a comprehensive suite of products and services to individuals and groups including term life, universal life, accident & health products, fixed and variable deferred annuities, fixed payout annuities, mutual funds and financial planning. SunAmerica offers its products and services through a diverse, multi-channel distribution network that includes banks, national, regional and independent broker-dealers, affiliated financial advisors, independent marketing organizations, independent and career insurance agents, structured settlement brokers, benefit consultants and direct to-consumer platforms.

In managing SunAmerica, AIG analyzes the operating performance of each business using Operating income (loss), which is before net realized capital gains (losses) and related DAC and SIA amortization and goodwill impairment charges. Operating income (loss) is not a substitute for pre-tax income determined in accordance with U.S. GAAP. However, AIG believes that the presentation of Operating income (loss) enhances the understanding

of the underlying profitability of the ongoing operations of SunAmerica. The reconciliations to pre-tax income are provided in the tables that follow.

SunAmerica Results

The following table presents SunAmerica results:

Three Months Ended March 31, (in millions)	2011	2010	Percentage Increase/ (Decrease)
Domestic Life Insurance:

Amortization of deferred acquisition costs	209	112	87
Policy acquisition and other expenses	203	199	2
Operating income	726	754	(4)
Net realized capital losses	(138)	(656)	79
Benefit of DAC, VOBA and SIA related to net realized capital losses	14	2	600
Pre-tax income	\$ 602	\$ 100	502%
Total SunAmerica:			
Revenue:			
Premiums	\$ 621	\$ 667	(7)%
Policy fees	684	648	6
Net investment income	2,754	2,707	2
Operating expenses:			
Policyholder benefits and claims incurred	1,015	1,094	(7)
Interest credited to policyholder account balances	1,105	1,109	-
Amortization of deferred acquisition costs	340	268	27
Policy acquisition and other expenses	456	432	6
Operating income	1,143	1,119	2
Net realized capital losses	(220)	(796)	72
Benefit of DAC, VOBA and SIA related to net realized capital losses	17	4	325
Pre-tax income	\$ 940	\$ 327	187%

SunAmerica reported a slight increase in operating income primarily due to the following:

- Higher net investment income due to a \$178 million increase in partnership income and \$91 million higher income related to the valuation of ML II. These increases were partially offset by the effects of a decline in base yields as investment purchases in 2010 and early 2011 were made at yields lower than the weighted average yields of the overall base portfolio.
- The increases in net investment income were partially offset by a DAC and SIA unlocking charge of \$76 million in the three-month period ended March 31, 2011, resulting from reductions in spread assumptions for group retirement products. There were no unlockings in the three months ended March 31, 2010.

Pre-tax income for SunAmerica reflected a decline in net realized capital losses due principally to a significant decline in other-than-temporary impairments and a decrease in fair value losses on derivatives primarily used to hedge the effect of interest rate and foreign exchange movements on GIC reserves. See Results of Operations — Consolidated Results — Premiums and Other Considerations; — Net Investment Income; and — Net Realized Capital Gains (Losses).

Premiums

Premiums represent premiums received on traditional life insurance policies and deposits on life contingent payout annuities. Premiums, deposits and other considerations is a non-GAAP measure which includes life insurance premiums, deposits on annuity contracts and mutual funds.

The following table presents a reconciliation of premiums, deposits and other considerations to premiums:

Three Months Ended March 31, (in millions)	2011	2010
Premiums, deposits and other considerations	\$ 6,226	\$ 4,737
Deposits	(5,619)	(4,038)
Other	14	(32)
Premiums	\$ 621	\$ 667

Sales and Deposits

The following tables summarize SunAmerica Premiums, deposits and other considerations by product*:

Three Months Ended March 31, (in millions)	2011	2010	Percentage Increase/ (Decrease)
Premiums, deposits and other considerations			
Life insurance	\$ 1,187	\$ 1,323	(10)%
Group retirement product deposits	1,702	1,608	6
Individual fixed annuity deposits	2,151	1,153	87
Individual variable annuity deposits	759	357	113
Retail mutual funds	410	276	49
Individual annuities runoff	17	20	(15)
Total premiums, deposits and other considerations	\$ 6,226	\$ 4,737	31%
Life insurance sales	\$ 55	\$ 47	17%

* Life insurance sales include periodic premiums from new business expected to be collected over a one-year period and single premiums and unscheduled deposits from new and existing policyholders. Annuity sales represent deposits from new and existing customers. Sales of group accident and health insurance represent annualized first-year premiums from new policies.

Total premiums, deposits and other considerations increased as deposits from individual fixed annuities, individual variable annuities and retail mutual funds all showed significant increases. The decline in Life insurance was primarily driven by lower payout annuities, lower deferred annuities driven by the interest rate environment and lower life insurance renewals. Individual fixed annuity deposits increased in the three-month period ended March 31, 2011 compared to the same period in 2010 as certain bank distributors negotiated a lower commission in exchange for a higher rate offered to policyholders which made AIG's individual fixed products more attractive. Variable annuity sales increased due to reinstatements at a number of key broker-dealers, increased wholesaler productivity and improvements in the equity markets. Retail mutual funds increased as a result of increased sales due to a sales strategy surrounding cyclical investment themes. Life insurance sales grew over the first quarter of last year as efforts to re-engage independent distribution and improve productivity of the career agency force continue to produce results.

Domestic Retirement Services Sales and Deposits

The following table presents the account value rollforward for Domestic Retirement Services:

Three Months Ended March 31, (in millions)	2011	2010
Group retirement products		
Balance, beginning of year	\$ 68,365	\$ 63,419
Deposits – annuities	1,291	1,254
Deposits – mutual funds	411	354
Total Deposits	1,702	1,608
Surrenders and other withdrawals	(1,503)	(1,676)
Death benefits	(83)	(73)
Net inflows (outflows)	116	(141)
Change in fair value of underlying investments, interest credited, net of fees	2,084	1,591
Balance, end of period	\$ 70,565	\$ 64,869
Individual fixed annuities		
Balance, beginning of year	\$ 48,489	\$ 47,202
Deposits	2,151	1,153
Surrenders and other withdrawals	(840)	(905)
Death benefits	(402)	(370)
Net inflows (outflows)	909	(122)
Change in fair value of underlying investments, interest credited, net of fees	456	467
Balance, end of period	\$ 49,854	\$ 47,547
Individual variable annuities		
Balance, beginning of year	\$ 25,581	\$ 24,637
Deposits	759	357
Surrenders and other withdrawals	(838)	(674)
Death benefits	(110)	(120)
Net outflows	(189)	(437)
Change in fair value of underlying investments, interest credited, net of fees	885	666
Balance, end of period	\$ 26,277	\$ 24,866
Total Domestic Retirement Services		
Balance, beginning of year	\$ 142,435	\$ 135,258
Deposits	4,612	3,118
Surrenders and other withdrawals	(3,181)	(3,255)
Death benefits	(595)	(563)
Net inflows (outflows)	836	(700)
Change in fair value of underlying investments, interest credited, net of fees	3,425	2,724
Balance, end of period, excluding runoff	146,696	137,282
Individual annuities runoff	4,386	4,579
GIC runoff	7,823	8,427
Balance, end of period	\$ 158,905	\$ 150,288
General and separate account reserves and mutual funds		
General account reserve	\$ 98,505	\$ 95,400
Separate account reserve	50,776	46,639
Total general and separate account reserves	149,281	142,039
Group retirement mutual funds	9,624	8,249
Total reserves and mutual funds	\$ 158,905	\$ 150,288

Net flows improved in 2011 due to the impact of both the significant increase in deposits and continued favorable surrender experience in group retirement and individual fixed annuities. Surrender rates for individual fixed annuities have decreased in 2011 due to the low interest rate environment and the relative competitiveness of interest credited rates on the existing block of fixed annuities versus interest rates on alternative investment options available in the marketplace. Surrender rates for group retirement products declined due to a decrease in certain large group surrenders.

The following table presents reserves by surrender charge category and surrender rates:

At March 31, (in millions)	2011			2010		
	Group Retirement Products*	Individual Fixed Annuities	Individual Variable Annuities	Group Retirement Products*	Individual Fixed Annuities	Individual Variable Annuities
No surrender charge	\$ 54,117	\$ 14,783	\$ 12,248	\$ 48,590	\$ 12,211	\$ 11,488
0% - 2%	1,247	3,676	4,044	1,952	3,029	4,216
Greater than 2% - 4%	1,282	5,265	2,253	1,906	5,660	2,040
Greater than 4%	3,519	23,008	7,592	3,338	23,483	6,692
Non-Surrenderable	776	3,122	140	834	3,164	430
Total reserves	\$ 60,941	\$ 49,854	\$ 26,277	\$ 56,620	\$ 47,547	\$ 24,866
Surrender rates	8.7%	6.9%	13.0%	10.6%	7.7%	11.2%

* Excludes mutual funds of \$9.6 billion and \$8.2 billion at March 31, 2011 and 2010, respectively.

The following table summarizes the major components of the changes in SunAmerica DAC/VOBA:

Three Months Ended March 31, (in millions)	2011	2010
Balance, beginning of year	\$ 9,606	\$ 11,098
Acquisition costs deferred	299	233
Amortization expense	(326)	(267)
Change in unrealized losses on securities	(244)	(422)
Other	42	47
Balance, end of period	\$ 9,377	\$ 10,689

As SunAmerica operates in various markets, the estimated gross profits used to amortize DAC and VOBA are subject to differing market returns and interest rate environments in any single period. The combination of market returns and interest rates may lead to acceleration of amortization in some products and simultaneous deceleration of amortization in other products.

DAC and VOBA for insurance-oriented, investment-oriented and retirement services products are reviewed for recoverability, which involves estimating the future profitability of current business. This review involves significant management judgment. If actual future profitability is substantially lower than estimated, SunAmerica's DAC and VOBA may be subject to an impairment charge and its results of operations could be significantly affected in future periods.

Financial Services Operations

AIG's Financial Services subsidiaries engage primarily in commercial aircraft leasing and the management of the remaining Capital Markets derivatives business.

AIG's Aircraft Leasing operations are the operations of ILFC, which generates its revenues primarily from leasing new and used commercial jet aircraft to foreign and domestic airlines. Aircraft Leasing operations also include gains and losses that result from the remarketing of commercial jet aircraft for ILFC's own account, and remarketing and fleet management services for airlines and other aircraft fleet owners.

AIG's Capital Markets operations are the run off of the remaining AIGFP derivative portfolios. AIGFP has continued to unwind its portfolios, including those associated with credit protection written through credit default swaps on super senior risk tranches of diversified pools of loans and debt securities. As a consequence of its strategy to wind down its portfolios, AIGFP is entering into new derivative transactions only to hedge its current portfolio, reduce risk and hedge the currency, interest rate and other market risks associated with the businesses of other AIG subsidiaries. See Management's Discussion and Analysis of Financial Condition and Results of Operations — Liquidity of Parent and Subsidiaries — Financial Services — Capital Markets. Prior to the portfolio wind-down, AIGFP engaged as principal in a wide variety of financial transactions, including standard and customized financial products involving commodities, credit, currencies, energy, equities and interest rates.

Historically, AIGFP derived a significant portion of its revenues from hedged financial positions entered into in connection with counterparty transactions. Prior to the portfolio wind-down, AIGFP also participated as a dealer in a wide variety of financial derivatives transactions.

Financial Services Results

Financial Services results were as follows:

Three Months Ended March 31, <i>(in millions)</i>	2011	2010	Percentage Increase/ (Decrease)
Revenues:			
Aircraft Leasing	\$ 1,159	\$ 1,218	(5)%
Capital Markets	370	(22)	-
Other, including intercompany adjustments	39	94	(59)
Total	\$ 1,568	\$ 1,290	22%
Pre-tax income (loss):			
Aircraft Leasing	\$ 120	\$ (81)	-%
Capital Markets	277	(86)	-
Other, including intercompany adjustments	(72)	(35)	(106)
Total	\$ 325	\$ (202)	-%

Aircraft Leasing Results

ILFC reported pre-tax income in the first quarter of 2011 compared to a pre-tax loss in the same period of 2010 primarily due to lower asset impairment and operating lease related charges recorded on aircraft. During the first quarter of 2011, ILFC recorded asset impairment and operating lease related charges of \$113 million related primarily to sales and potential sales of 10 aircraft. In the same quarter in 2010, ILFC recorded asset impairment and operating lease related charges of \$431 million related to aircraft agreed to be sold. ILFC also incurred increased interest expense driven by higher composite borrowing rates, and lower rental revenues and depreciation expense as a result of a reduction in its aircraft fleet.

Capital Markets Results

Capital Markets reported pre-tax income in 2011 compared to a pre-tax loss in 2010 primarily due to higher unrealized market valuation gains related to the super senior credit default swap portfolio and an increase related to the net effect of changes in credit spreads on the valuation of Capital Markets derivative assets and liabilities. During the first quarter of 2011, Capital Markets recorded an unrealized market valuation gain of \$323 million compared to an unrealized market valuation gain of \$119 million in the first quarter of 2010. The gain resulted primarily from CDS transactions written on multi-sector CDOs driven by price improvement and amortization of the underlying assets (See Critical Accounting Estimates — Level 3 Assets and Liabilities — Valuation of Level 3 Assets and Liabilities for a discussion of Capital Markets super senior credit default swap portfolio). With respect to the valuation of Capital Markets derivative assets and liabilities, which are measured at fair value, Capital Markets incurred a net credit valuation adjustment gain of \$28 million in the first quarter of 2011 compared to a net credit valuation adjustment loss of \$178 million in the first quarter of 2010.

Other Operations

AIG's Other operations includes results from Parent & Other operations, after allocations to AIG's business segments, Mortgage Guaranty operations, Asset Management operations, and results from those divested businesses not included in Discontinued operations.

AIG's Parent & Other operations consist primarily of interest expense, intercompany interest income that is eliminated in consolidation, expenses of corporate staff not attributable to specific reportable segments (including restructuring costs), expenses related to efforts to improve internal controls and the financial and operating platforms, corporate initiatives, certain compensation plan expenses, corporate-level net realized capital gains and losses, certain litigation-related charges and net gains and losses on sale of divested businesses which did not qualify for discontinued operations accounting treatment. In addition, fair value gains or losses on AIG's remaining interest in AIA and in the MetLife securities received as consideration from the sale of ALICO are included in Parent & Other.

Divested businesses include results of certain businesses that have been divested or are being wound down or repositioned.

Other Results

The following table presents pre-tax income for AIG's Other operations:

Three Months Ended March 31, (in millions)	2011	2010	Percentage Increase/ (Decrease)
Parent & Other:			
Intercompany interest income, net	\$ 10	\$ 154	(94)%
Interest expense on FRBNY Credit Facility*	(72)	(833)	91
Other interest expense	(427)	(475)	10
Unallocated corporate expenses	(68)	(180)	62
Change in the fair value of MetLife securities prior to the sale	(157)	-	-
Change in fair value of AIA securities	1,062	-	-
Loss on extinguishment of debt	(3,313)	-	-
Net realized capital gain (loss)	(421)	285	-
Net loss on sale of divested businesses	(72)	(76)	5
Other miscellaneous, net	17	27	(37)
Total Parent & Other	\$ (3,441)	\$ (1,098)	(213)%
Other businesses:			
Mortgage Guaranty	\$ 7	\$ 96	(93)%
Asset Management:			
Direct Investment business	448	(147)	-
Institutional Asset Management	15	(74)	-
Divested businesses	22	675	(97)
Change in fair value of ML III	744	751	(1)
Total Other businesses	\$ 1,236	\$ 1,301	(5)%
Total Other operations	\$ (2,205)	\$ 203	-%

* Includes interest expense of \$2 million and \$19 million for 2011 and 2010, respectively, allocated to discontinued operations in consolidation.

Parent & Other

Parent & Other reported an increased pre-tax loss in the first quarter of 2011 compared to the same period in 2010 primarily due to a loss on extinguishment of debt of \$3.3 billion in connection with the Recapitalization, primarily consisting of the accelerated amortization of the prepaid commitment fee asset resulting from the termination of the FRBNY Credit Facility.

This loss was partially offset by:

- a \$1.1 billion increase in fair value of AIG's equity interest in AIA;
- a decline in interest expense as a result of the repayment of the FRBNY Credit Facility; and
- a reduction in unallocated corporate expenses, principally due to a decrease in restructuring-related expenses.

Other Businesses

Mortgage Guaranty

The main business of the subsidiaries of UGC is the issuance of residential mortgage guaranty insurance, both domestically and internationally, that covers mortgage lenders from the first loss for credit defaults on high loan-to-value conventional first-lien mortgages for the purchase or refinance of one- to four-family residences.

Mortgage Guaranty pre-tax income decreased in 2011, driven by:

- increases in earned premiums from first-lien business that were more than offset by a decline in earned premiums from the second-lien, private student loan and international businesses resulting from these businesses being placed into runoff during the fourth quarter of 2008; and
- an increase in claims and claims adjustment expenses for the first-lien and second-lien businesses compared to the first quarter of 2010, partially offset by a decline for the international business. The higher claims and claims adjustment expenses include provisions for increased overturns of previously denied and rescinded claims and lower favorable development than experienced in the same period in 2010, all primarily in first-lien business. The increased overturns result from additional resources deployed by lenders and mortgage servicers to address loan documentation issues. The higher claims and claims adjustment expenses were partially offset by lower levels of newly reported delinquencies in the first-lien, second-lien and international products and higher denials and rescissions on first-lien claims and an increase in denials of second-lien claims arising from an operational change in the mitigation of second lien claims in the first quarter of 2011.

UGC, like other participants in the mortgage insurance industry, has made claims against various counterparties in relation to alleged underwriting failures, and received similar claims from counterparties. These claims and counterclaims allege breach of contract, breach of good faith and fraud, among other allegations.

Risk-in-Force

The following table presents risk in force and delinquency ratio information for UGC's domestic business:

At March 31, <i>(dollars in billions)</i>	2011	2010
Domestic first-lien:		
Risk in force	\$ 24.9	\$ 26.1
60+ day delinquency ratio on primary loans ^(a)	15.2%	18.7%
Domestic second-lien:		
Risk in force ^(b)	\$ 1.8	\$ 2.5

(a) Based on number of policies, consistent with mortgage industry practice.

(b) Represents the full amount of second-lien loans insured reduced for contractual aggregate loss limits on certain pools of loans, usually 10 percent of the full amount of loans insured in each pool. Certain second-lien pools have reinstatement provisions, which will expire as the loan balances are repaid.

Change in Fair Value of ML III

The gain attributable to AIG's interest in ML III for the first quarter of 2011 was primarily due to the shortening of weighted average life by 0.55 years and the tightening of credit spreads.

Asset Management Operations

AIG's Asset Management operations include the results of the Direct Investment businesses and the Institutional Asset Management business.

The revenues of the Institutional Asset Management business are primarily derived from providing asset management services to AIG and its subsidiaries and are eliminated in AIG's consolidated financial results. The Direct Investment businesses' operating results are impacted by performance in the credit, equity and real estate markets.

Direct Investment Business Results

The Direct Investment business includes results for the Matched Investment Program (MIP), AIG Global Real Estate and the results of certain non-derivative assets and liabilities of AIGFP now managed by the Asset Management Group.

The Direct Investment business' pre-tax income increased in 2011 driven by:

- net unrealized gain on AIGFP assets and liabilities accounted for under the fair value option where improving asset spreads outpaced the impact of tightening liability spreads (as shown in the table below); and
- significantly lower impairments on fixed maturity and real estate investments.

The following table presents credit valuation adjustment gains (losses) for the Direct Investment business (excluding intercompany transactions):

<i>(in millions)</i>			
	Counterparty Credit Valuation Adjustment on Assets		AIG's Own Credit Valuation Adjustment on Liabilities
Three Months Ended March 31, 2011			
Bond trading securities	\$ 325	Notes and bonds payable	\$ (18)
Loans and other assets	16	Hybrid financial instrument liabilities	(30)
		GIAs	9
		Other liabilities	(2)
Increase in assets	\$ 341	Increase in liabilities	\$ (41)
Net pre-tax increase to Other income	\$ 300		
Three Months Ended March 31, 2010			
Bond trading securities	\$ 823	Notes and bonds payable	\$ (196)
Loans and other assets	46	Hybrid financial instrument liabilities	(249)
		GIAs	(145)
		Other liabilities	(37)
Increase in assets	\$ 869	Increase in liabilities	\$ (627)
Net pre-tax increase to Other income	\$ 242		

Institutional Asset Management Results

Institutional Asset Management includes AIG's internal asset management business and AIG Markets, Inc. (AIG Markets). AIG Markets acts as a derivative intermediary transacting with AIG and its subsidiaries and third parties.

Institutional Asset Management recognized pre-tax income in 2011 which was driven by increased fees charged to AIG subsidiaries for asset management services beginning in the first quarter of 2011 as well as fair value adjustments on derivatives associated with changes in counterparty credit risk. The positive increase over the prior year is driven by the sale of AIG's third party asset management business and the deconsolidation of certain private equity investments in the first quarter of 2010 which significantly reduced operating expenses.

Divested Businesses

Divested businesses include the operating results of divested businesses that did not qualify for discontinued operations accounting through the date of their sale as well as certain non-core businesses currently in run-off. The Divested businesses results for the three months ended March 31, 2010 primarily represent the historical results of AIA, which was deconsolidated in November 2010.

Capital Resources and Liquidity

Overview

As a result of the closing of the Recapitalization and various actions taken in the first quarter of 2011, AIG Parent has generated and used substantial cash and short-term investment balances, and has established significant sources of contingent liquidity.

Liquidity Adequacy Management

In 2010, AIG implemented a stress testing and liquidity framework to systematically assess AIG's aggregate exposure to its most significant risks. This framework is built on AIG's existing Enterprise Risk Management (ERM) stress testing methodology for both insurance and non-insurance operations. The scenarios are performed with a two-year time horizon and capital adequacy requirements consider both financial and insurance risks.

AIG's insurance operations must comply with numerous constraints on their minimum capital positions. These constraints are guiding requirements for capital adequacy for individual businesses, based on capital assessments under rating agency, regulatory and business requirements. Using ERM's stress testing methodology, the capital impact of potential stresses is evaluated relative to the binding capital constraint of each business operation in order to determine AIG Parent's liquidity needs to support the insurance operations and maintain their target capitalization levels. Added to this amount is the contingent liquidity required under stressed scenarios for non-insurance operations, including the AIGFP derivatives portfolio, the Direct Investment business and ILFC.

AIG's consolidated risk target is to maintain a minimum liquidity buffer such that AIG Parent's liquidity needs under the ERM stress scenarios do not exceed 80 percent of AIG Parent's overall liquidity sources over the specified two-year horizon. If the 80 percent minimum threshold is projected to be breached over this defined time horizon, AIG will take appropriate actions to further increase liquidity sources or reduce liquidity needs to maintain the target threshold, although no assurance can be given that this can be achieved under then-prevailing market conditions.

As a result of these ERM stress tests at March 31, 2011 and other considerations discussed in Note 1 to the Consolidated Financial Statements, AIG believes that it has sufficient liquidity at the AIG Parent level to satisfy future liquidity requirements and meet its obligations, including reasonably foreseeable contingencies or events. However, no assurance can be given that AIG's cash needs will not exceed projected amounts. Additional collateral calls, deterioration in investment portfolios or reserve strengthening affecting statutory surplus, higher surrenders of annuities and other policies, further downgrades in AIG's credit ratings, or catastrophic losses may

result in significant additional cash needs, loss of some sources of liquidity or both. Regulatory and other legal restrictions could limit AIG's ability to transfer funds freely, either to or from its subsidiaries.

During the first quarter of 2011, AIG entered into unconditional capital maintenance agreements (CMAs) with certain domestic Chartis and SAFG insurance companies. These CMAs are expected to enhance AIG's capital management practices, and will help manage the flow of capital and funds between AIG Parent and its insurance company subsidiaries. For additional details regarding CMAs, see Liquidity of Parent and Subsidiaries — Chartis, and Liquidity of Parent and Subsidiaries — SunAmerica below.

Analysis of sources and uses of cash

The following table presents selected data from AIG's Consolidated Statement of Cash Flows:

Three Months Ended March 31, (in millions)	2011	2010
Summary:		
Net cash provided by (used in) operating activities	\$ (5,312)	\$ 3,195
Net cash provided by (used in) investing activities	39,617	(4,516)
Net cash used in financing activities	(34,485)	(266)
Effect of exchange rate changes on cash	23	(42)
Decrease in cash	(157)	(1,629)
Cash at beginning of year	1,558	4,400
Change in cash of businesses held for sale	400	(638)
Cash at end of period	\$ 1,801	\$ 2,133

Net cash used in operating activities for the first three months of 2011 reflects the payment of FRBNY Credit Facility accrued compounded interest and fees totaling \$6.4 billion, which in prior periods were paid in kind and, accordingly did not reduce operating cash flow in prior periods.

Excluding the payment of FRBNY Credit Facility accrued interest and fees, AIG generated positive operating cash flows in both periods. Insurance companies generally receive most premiums in advance of the payment of claims or policy benefits, but the ability of Chartis to generate positive cash flow is affected by operating expenses, the frequency and severity of losses under its insurance policies and policy retention rates. Cash used by Chartis operations was \$228 million for the first three months of 2011 compared to \$421 million in the same period of 2010, as a reduction in claims paid was more than offset by declines in premiums collected, arising primarily from a decrease in domestic production. Catastrophic events and significant casualty losses, the timing and effect of which are inherently unpredictable, reduce operating cash flow for Chartis operations. Cash provided by AIG's life insurance subsidiaries, including entities presented as discontinued operations, was \$1.4 billion for the first three months of 2011 compared to \$2.7 billion in the same period in 2010, as 2010 included operating cash flows for AIA and ALICO, which were divested in 2010. Cash used by Financial Services was \$136 million for the first three months of 2011, compared to cash provided of \$588 million for the same period in 2010, primarily attributable to the continued wind-down of AIGFP's portfolio.

The AIGFP portfolio wind-down and other segment developments affecting pre-tax income (loss) described above are discussed further in Management's Discussion and Analysis of Financial Condition and Results of Operations, Liquidity of Parent and Subsidiaries — Financial Services — Capital Markets.

The significant increase in cash from investing activities in the first three months of 2011 was driven by the deployment of restricted cash generated from the AIA IPO and ALICO Sale and disposition of MetLife securities. Net cash used in investing activities in the first three months of 2010 primarily resulted from net purchases of fixed maturity securities, resulting from AIG's investment of cash generated from operating activities, and the redeployment of liquidity that had been accumulated by the insurance companies in 2008 and 2009.

Net cash used in financing activities for the first three months of 2011 primarily represents the repayment of the FRBNY Credit Facility and the \$9.1 billion partial repayment of the SPV Preferred Interests on January 14, 2011 in connection with the Recapitalization described in Note 1 of the Consolidated Financial Statements.

Liquidity of Parent and Subsidiaries

AIG Parent

The Recapitalization in January 2011 involved a series of integrated transactions which directly impacted AIG Parent's liquidity activities and position. These transactions included the repayment of the FRBNY Credit Facility, and the repurchase and exchange of the SPV Preferred Interests. These transactions are excluded from the Sources and Uses discussion below.

In addition, in the first quarter of 2011, several significant asset sales were completed, including the sale of AIG Star and AIG Edison in February 2011, and the sale of MetLife securities in March 2011. These transactions are more fully described in Sales of Businesses and Sales of MetLife Securities above, and are excluded from the Sources and Uses discussion below.

Sources of Liquidity

AIG Parent's primary sources of cash flow are dividends, distributions, and other payments from subsidiaries. In the first three months of 2011, AIG Parent collected \$32 million in payments from subsidiaries.

As a result of the closing of the Recapitalization, AIG has established and maintains substantial sources of actual and contingent liquidity.

The following table presents AIG Parent's sources of liquidity, other than liquidity that is expected to result from cash flows from operations:

<i>(in millions)</i>	As of March 31, 2011
Cash*	\$ 42
Short-term investments*	6,685
Available capacity under Syndicated Credit Facilities	3,000
Available capacity under Contingent Liquidity Facility	500
Available capacity under the Department of the Treasury Commitment (Series G)	2,000
Total AIG Parent liquidity sources	\$ 12,227

* Excludes Cash and Short-term Investments held by AIGFP (excluding Banque AIG S.A.) which are considered to be unrestricted and available for use by AIG Parent; these balances totaled \$326 million at March 31, 2011.

AIG's ability to borrow under the syndicated credit and contingent liquidity facilities is not contingent on its credit ratings. For further discussion of the terms and conditions relating to the bank credit facilities, see Credit Facilities below. For additional information on the contingent liquidity facility, see Debt below. The available funding under the Series G Drawdown Right that may be used for general corporate purposes will be reduced by the amount of the net proceeds of future AIG equity offerings.

Uses of Liquidity

AIG's primary uses of cash flow are for debt service, operating expenses and subsidiary capital needs. In the first three months of 2011, AIG Parent retired \$1.4 billion of debt and made interest payments totaling \$483 million. As noted above, approximately \$5.0 billion of AIG Parent's cash and short-term investment balances represents balances attributable to the MIP and available to meet obligations of the MIP. See Liquidity of Parent and Subsidiaries — Other Operations — Asset Management — Direct Investment Business below for additional details.

AIG Parent made \$3.8 billion in net capital contributions to subsidiaries in the first quarter of 2011, of which \$3.7 billion was contributed to Chartis as a result of the reserve strengthening in the fourth quarter of 2010. This transaction was funded from the retention of \$2 billion of net cash proceeds from the sale of AIG Star and AIG

Edison (which the Department of the Treasury provided a waiver for AIG to use for this purpose instead of using the amount to repay SPV Preferred Interests) and available cash at AIG Parent.

AIG believes that it has sufficient liquidity at the AIG Parent level to satisfy future liquidity requirements and meet its obligations, including reasonably foreseeable contingencies or events.

Several Chartis U.S. insurance subsidiaries have deferred tax assets on a separate company basis, including those resulting from net operating losses incurred. In the event that the deferred tax assets become non-admitted for insurance regulatory reporting purposes, Chartis may require additional capital contributions from AIG. Based on the December 31, 2010 statutory balances, which are the latest available, such contributions could be as much as \$2.3 billion. For additional information, see Chartis liquidity overview below.

Chartis

AIG currently expects that its Chartis subsidiaries will be able to continue to satisfy future liquidity requirements and meet their obligations, including reasonably foreseeable contingencies or events, through cash from operations and, to the extent necessary, asset dispositions. Chartis subsidiaries maintain substantial liquidity in the form of cash and short-term investments, totaling \$14.8 billion as of March 31, 2011. Further, Chartis businesses maintain significant levels of investment-grade fixed income securities, including substantial holdings in government and corporate bonds, which Chartis could monetize in the event liquidity levels are deemed insufficient. In the first quarter of 2011, Chartis received a capital contribution of \$3.7 billion in cash from AIG as a result of the reserve strengthening in the fourth quarter of 2010. Chartis used \$1.8 billion of this amount to purchase certain assets from the Direct Investment Business (DIB). Additionally, Chartis subsequently returned capital to AIG Parent of \$2.2 billion in the form of all of the outstanding stock of UGC in the first quarter of 2011.

One or more large catastrophes may require AIG to provide additional support to the affected Chartis operations. In addition, downgrades in AIG's credit ratings could put pressure on the insurer financial strength ratings of its subsidiaries which could result in non-renewals or cancellations by policyholders and adversely affect the relevant subsidiary's ability to meet its own obligations, and require AIG to provide capital or liquidity support to the subsidiary. Increases in market interest rates may adversely affect the financial strength ratings of Chartis subsidiaries, as rating agency capital models may reduce the amount of available capital relative to required capital. Other potential events that could cause a liquidity strain include economic collapse of a nation or region significant to Chartis operations, nationalization, catastrophic terrorist acts, pandemics or other events causing economic or political upheaval.

In February 2011, AIG entered into CMAs with certain Chartis domestic property and casualty insurance companies. Among other things, the CMAs provide that AIG will maintain the total adjusted capital of these Chartis insurance companies at or above a specified minimum percentage of the companies' projected total authorized control level Risk-Based Capital (RBC) (as defined under applicable insurance laws). In addition, the CMAs also provide that if the total adjusted capital of these Chartis insurance companies is in excess of a specified minimum percentage of their respective total authorized control level RBCs (as reflected in the companies' quarterly or annual statutory financial statements), subject to board and regulatory approval(s), the companies would declare and pay ordinary dividends to their equity holders in amounts representing the excess over that required to maintain the specified minimum percentage.

Several Chartis U.S. insurance subsidiaries have deferred tax assets on a separate company basis, including those resulting from net operating losses incurred. Chartis intends to rely on prudent and feasible effective tax planning actions and/or strategies to preserve admissibility of such deferred tax assets for insurance regulatory reporting (statutory) purposes. In the event that Chartis cannot execute such actions, if required, and the related deferred tax assets become non-admitted for insurance regulatory reporting purposes, such insurance companies would require additional capital contributions of up to \$2.3 billion from AIG, based on December 31, 2010 statutory balances, which are the latest available. The Chartis U.S. deferred tax assets have a full valuation allowance at the AIG consolidated level as described in Note 14 to the Consolidated Financial Statements.

Chartis continues to identify cost effective opportunities to manage its capital allocation through the use of intercompany reinsurance.

SunAmerica

Management considers the sources of liquidity for SunAmerica subsidiaries adequate to satisfy future liquidity requirements and meet foreseeable liquidity needs, including reasonably foreseeable contingencies or events. The SunAmerica companies continue to maintain substantial liquidity in the form of cash and short-term investments, totaling \$13.1 billion as of March 31, 2011. These subsidiaries generally have been lengthening their maturity profile by purchasing investment grade fixed income securities in order to reduce the levels of cash, cash equivalents and other short-term instruments that had been maintained during 2009 and 2010.

The most significant potential liquidity needs of SunAmerica companies are the funding of product surrenders, withdrawals and maturities. Given the size and liquidity profile of SunAmerica's investment portfolios, AIG believes that any deviations from projected claim experience would not constitute a significant liquidity risk.

In March 2011, AIG entered into CMAs with certain SunAmerica insurance companies. Among other things, the CMAs provide that AIG will maintain the total adjusted capital of these SunAmerica insurance companies at or above a specified minimum percentage of the companies' projected company action level RBCs (as defined under applicable insurance laws). In addition, the CMAs also provide that if the total adjusted capital of these SunAmerica insurance companies is in excess of a specified minimum percentage of their respective total company action level RBCs (as reflected in the companies' quarterly or annual statutory financial statements), subject to board and regulatory approval(s), the companies would declare and pay ordinary dividends to their equity holders in amounts representing the excess over that required to maintain the specified minimum percentage.

Financial Services

AIG's major Financial Services operations consist of ILFC and the remaining portfolios of AIGFP, which are in wind-down.

International Lease Finance Corporation

ILFC's sources of liquidity include collections of lease payments, borrowing in the public markets, and proceeds from asset sales. Uses of liquidity for ILFC primarily consist of aircraft purchases and debt repayments. In 2011, ILFC improved its liquidity position by entering into an unsecured \$2.0 billion three-year revolving credit facility and a secured \$1.3 billion term loan with the right to add an additional \$200 million of lender commitments. On April 21, 2011, ILFC increased its secured \$1.3 billion term loan for a total commitment of \$1.5 billion. ILFC also sold nine aircraft to third parties in the first three months of 2011, which generated \$199 million in gross proceeds.

See Debt — Debt Maturities — ILFC for further details on ILFC's outstanding debt.

Capital Markets

Due to the wind-down of AIGFP's remaining portfolios, AIGFP continues to rely upon AIG Parent to meet most of its collateral and other liquidity needs.

The following table presents a rollforward of the amount of collateral posted by the Capital Markets operations:

<i>(in millions)</i>	Collateral Posted as of December 31, 2010	Additional Postings, Netted by Counterparty	Collateral Returned by Counterparties	Collateral Posted as of March 31, 2011
Super senior credit default swap (CDS) portfolio	\$ 3,786	\$ 195	\$ 594	\$ 3,387
All other derivatives	1,335	298	212	1,421
Total	\$ 5,121	\$ 493	\$ 806	\$ 4,808

During 2010, AIG's Asset Management Group undertook the management responsibilities for certain non-derivative assets and liabilities of AIGFP. These assets and liabilities are being managed on a spread basis, in concert with the MIP. Accordingly, gains and losses related to these assets and liabilities, primarily consisting of credit valuation adjustment gains and losses, are reported in AIG's Other operations category as part of Asset Management — Direct Investment business. For additional details regarding liquidity considerations related to these assets and liabilities, see Other Operations below.

The following table presents the net notional amount and number of outstanding trade positions in AIGFP's portfolios:

<i>(dollars in billions)</i>	March 31, 2011	December 31, 2010	Percentage Decrease
Net notional amount ^(a)	\$ 278	\$ 353	(21)%
Super senior CDS contracts (included in net notional amount above)	57	60	(5)
Outstanding trade positions ^(b)	2,800	3,900	(28)

(a) Includes \$11.0 billion and \$11.5 billion of intercompany derivatives in 2011 and 2010, respectively.

(b) Excludes approximately 4,800 non-derivative trade positions that were transferred to Direct Investment business in 2010.

AIG expects the active unwind of the AIGFP derivatives portfolio to be completed by the end of the second quarter of 2011, and the remaining AIGFP derivatives portfolio will consist predominantly of transactions AIG believes will be of low complexity, low risk, supportive of AIG's risk management objectives or not economically appropriate to unwind based on a cost versus benefit analysis.

The cost and liquidity needs of executing the AIGFP portfolio wind-down will depend on many factors, many of which are not within AIG's control, including market conditions, AIGFP's access to markets via market counterparties, the availability of liquidity and the potential implications of further rating downgrades.

Other Operations

Asset Management — Direct Investment Business

The DIB includes results for the MIP, AIG Global Real Estate and the results of certain non-derivative assets and liabilities of AIGFP now managed by the Asset Management Group. AIG's Existing CDS contracts for the MIP under International Swaps and Derivatives Association, Inc. (ISDA) agreements may require collateral postings at various ratings and threshold levels. Approximately \$5.0 billion of AIG, Inc.'s cash and short-term investment balances included in the summary table in AIG Parent — Sources of Liquidity represents balances attributable to the MIP.

While a significant portion of the DIB's liquidity needs are supported by existing liquidity sources or maturing investments, mismatches in the timing of cash inflows and outflows may require assets to be sold to satisfy liquidity needs. Depending on market conditions and the ability to sell assets if required, proceeds from asset sales may not be sufficient to satisfy the full amount required. Management believes that sufficient liquidity is maintained by the DIB to meet near-term liquidity needs. Any additional liquidity shortfalls would need to be

funded by AIG Parent. The amount of collateral posted by the DIB for collateralized GIAs as of March 31, 2011 and December 31, 2010 was \$5.4 billion and \$5.7 billion, respectively.

During the first quarter of 2011, \$1.8 billion of assets held by the DIB were sold to certain Chartis U.S. subsidiaries. In addition, during the first quarter of 2011, AIG assigned approximately 52 percent of AIG's interest in Maiden Lane III to the DIB, subject to liens on those interests as set forth in the Master Transaction Agreement dated December 8, 2010, among AIG Parent, AM Holdings LLC (formerly known as ALICO Holdings LLC), AIA Aurora LLC, the FRBNY, the Department of the Treasury, and the Trust.

Debt

Debt Maturities

The following table summarizes maturing debt at March 31, 2011 of AIG and its subsidiaries for the next four quarters:

<i>(in millions)</i>	Second Quarter 2011	Third Quarter 2011	Fourth Quarter 2011	First Quarter 2012	Total
ILFC	\$ 1,262	\$ 2,232	\$ 336	\$ 1,998	\$ 5,828
Borrowings supported by assets	1,794	1,342	1,163	1,369	5,668
General borrowings	-	-	604	-	604
Other	1	1	1	1	4
Total	\$ 3,057	\$ 3,575	\$ 2,104	\$ 3,368	\$ 12,104

AIG's plans for meeting these maturing obligations are as follows:

- ILFC's sources of liquidity available to meet these needs include existing cash, future cash flows from operations, debt issuances and aircraft sales, subject to market and other conditions, (see Liquidity of Parent and Subsidiaries — Financial Services — ILFC). In March 2011, ILFC entered into a secured \$1.3 billion term loan with the right to add an additional \$200 million of lender commitments. On April 21, 2011, ILFC increased its secured \$1.3 billion term loan for a total commitment of \$1.5 billion. During 2011, ILFC sold nine aircraft to third parties, which generated \$199 million in gross proceeds. AIG expects that ILFC will refinance or issue additional debt as necessary to meet its maturing debt obligations.
- AIG borrowings supported by assets consist of debt under the MIP as well as AIGFP debt being managed in the DIB. Approximately \$5.1 billion of \$5.7 billion of debt maturities in the DIB through March 31, 2012 are supported by maturities of investments and short term cash investments. Mismatches in the timing of cash inflows on the assets and outflows with respect to the liabilities may require assets to be sold to satisfy maturing liabilities. Depending on market conditions and the ability to sell assets at that time, proceeds from sales may not be sufficient to satisfy the full amount due on maturing liabilities. Any shortfalls would need to be funded by AIG Parent.

The following table provides the rollforward of AIG's total debt outstanding:

Three Months Ended March 31, 2011 (in millions)	Balance at December 31, 2010	Issuances	Maturities and Repayments	Effect of Foreign Exchange	Other Changes	Balance at March 31, 2011
Debt issued or guaranteed by AIG:						
General borrowings:						
FRBNY Credit Facility	\$ 20,985	\$ -	\$ (20,985) ^(a)	\$ -	\$ -	\$ -
Notes and bonds payable	11,511	-	-	72	-	11,583
Junior subordinated debt	11,740	-	-	227	-	11,967
Junior subordinated debt attributable to equity units	2,169	-	(1,446) ^(b)	-	-	723
Loans and mortgages payable	218	-	(143)	(3)	1	73
SunAmerica Financial Group, Inc. (SAFG, Inc.) notes and bonds payable	298	-	-	-	-	298
Liabilities connected to trust preferred stock	1,339	-	-	-	-	1,339
Total general borrowings	48,260	-	(22,574)	296	1	25,983
Borrowings supported by assets:						
MIP notes payable	11,318	-	-	217	(37)	11,498
Series AIGFP matched notes and bonds payable	3,981	-	(12)	-	(10)	3,959
GIAs, at fair value	8,212	118	(481)	-	(131) ^(c)	7,718
Notes and bonds payable, at fair value	3,253	9	(136)	-	130 ^(c)	3,256
Loans and mortgages payable, at fair value	678	-	(92)	-	44 ^(c)	630
Total borrowings supported by assets	27,442	127	(721)	217	(4)	27,061
Total debt issued or guaranteed by AIG	75,702	127	(23,295)	513	(3)	53,044
Debt not guaranteed by AIG:						
ILFC:						
Notes and bonds payable, ECA facility, bank financings and other secured financings ^(d)	26,700	-	(1,491)	84	4	25,297
Junior subordinated debt	999	-	-	-	-	999
Total ILFC debt	27,699	-	(1,491)	84	4	26,296
Other subsidiaries	446	-	(20)	5	1	432
Debt of consolidated investments ^(e)	2,614	56	(165)	8	(119)	2,394
Total debt not guaranteed by AIG	30,759	56	(1,676)	97	(114)	29,122
Total debt	\$ 106,461	\$ 183	\$ (24,971)	\$ 610	\$ (117)	\$ 82,166

(a) Terminated on January 14, 2011 in connection with the Recapitalization. Includes \$6.4 billion of paid in kind interest and fees. See Note 1 to the Consolidated Financial Statements.

(b) Represents remarketing of debentures related to Equity Units.

(c) Primarily represents adjustments to the fair value of debt.

(d) Includes \$110 million of secured financings that are non-recourse to ILFC.

(e) At March 31, 2011, includes debt of consolidated investments held through AIG Global Real Estate Investment, AIG Credit and SunAmerica of \$2.0 billion, \$293 million and \$108 million, respectively.

The following table summarizes maturities of long-term debt, excluding borrowings of consolidated investments:

March 31, 2011 (in millions)	Total	Remainder of 2011	Year Ending					
			2012	2013	2014	2015	2016	Thereafter
General borrowings:								
Notes and bonds payable	\$ 11,583	\$ 604	\$ 27	\$ 1,467	\$ 500	\$ 998	\$ 1,812	\$ 6,175
Junior subordinated debt	11,967	-	-	-	-	-	-	11,967

(a) AIG does not guarantee these borrowings.

(b) Reflects future minimum payment for ILFC's borrowings under the 2004 Export Credit Agency (ECA) Facility.

Credit Facilities

AIG relies on credit facilities as potential sources of liquidity for general corporate purposes. Currently, AIG, Chartis and ILFC maintain committed, revolving credit facilities and a letter of credit facility summarized in the following table for general corporate purposes. AIG and Chartis intend to replace or extend these credit facilities on or prior to their expiration, although no assurance can be given that these facilities will be replaced on favorable terms or at all. One of the facilities, as noted below, contains a "term-out option" allowing for the conversion by the borrower of any outstanding loans at expiration into one-year term loans. All facilities, except for the ILFC five-year syndicated credit facility maturing October 2012, are unsecured.

March 31, 2011 (in millions) Facility	Size	Borrower(s)	Available Amount	Expiration	One-Year Term-Out Option	Effective Date
AIG:						
364-Day Syndicated Facility	\$ 1,500	AIG	\$ 1,500	January 2012	Yes	1/14/2011
3-Year Syndicated Facility	1,500	AIG	1,500	January 2014	No	1/14/2011
Total AIG	\$ 3,000		\$ 3,000			
Chartis 364-Day Syndicated Letter of Credit Facility	\$ 1,300	Chartis	\$ -	December 2011	No	1/14/2011
ILFC:						
5-Year Syndicated Facility	\$ 235	ILFC	\$ -	October 2011	No	10/13/2006
5-Year Syndicated Facility	1,465	ILFC	-	October 2012	No	10/13/2006
3-Year Syndicated Facility	2,000	ILFC	2,000	January 2014	No	1/31/2011
Total ILFC	\$ 3,700		\$ 2,000			

The available amounts shown above for the AIG facilities do not reflect an increase of \$25 million in the size of each of the AIG 364-Day Syndicated Facility and the AIG 3-Year Syndicated Facility that was made available on April 25, 2011, for a total increase in availability of \$50 million.

AIG's ability to borrow under these facilities is conditioned on the satisfaction of certain legal, operating, administrative and financial covenants and other requirements contained in the facilities, including covenants relating to AIG's maintenance of a specified total consolidated net worth and consolidated total debt to consolidated total capitalization. Failure to satisfy these and other requirements contained in the credit facilities would restrict AIG's access to the facilities and, consequently, could have a material adverse effect on AIG's financial condition and results of operations.

The Chartis letter of credit facility provides for the issuance of letters of credit in favor of certain of its general insurance companies to permit those companies to obtain statutory recognition of reinsurance recoverables from unauthorized reinsurers. This facility requires Chartis to maintain a minimum combined statutory surplus and a minimum combined net worth, and contains certain customary affirmative and negative covenants, including limitations with respect to incurrence of certain types of indebtedness or liens, certain dispositions, entry into certain restrictive agreements and transactions with affiliates and certain fundamental changes, as well as customary events of default. At March 31, 2011, the Chartis letter of credit facility was fully drawn and no additional amounts are available under this facility.

ILFC's three-year credit facility which became effective January 31, 2011 contains customary events of default and restrictive financial covenants that require ILFC to maintain a minimum fixed charge coverage ratio, a minimum consolidated tangible net worth, and a maximum ratio of consolidated debt to consolidated tangible net worth. Prior to April 16, 2010, ILFC had a \$2.5 billion five-year syndicated facility which was scheduled to expire in October 2011. On April 16, 2010, ILFC extended the maturity date of \$2.16 billion of its \$2.5 billion revolving credit facility from October 2011 to October 2012. In December 2010, ILFC paid down \$800 million on the \$2.5 billion revolving credit facility. The amended facility prohibits ILFC from re-borrowing amounts repaid under this facility for any reason; therefore the size of the outstanding facility is \$1.7 billion.

Credit Ratings

The cost and availability of unsecured financing for AIG and its subsidiaries are generally dependent on their short-and long-term debt ratings. The following table presents the credit ratings of AIG and certain of its subsidiaries as of April 29, 2011. In parentheses, following the initial occurrence in the table of each rating, is an indication of that rating's relative rank within the agency's rating categories. That ranking refers only to the generic or major rating category and not to the modifiers appended to the rating by the rating agencies to denote relative position within such generic or major category.

	Short-Term Debt		Senior Long-Term Debt		
	Moody's	S&P	Moody's ^(a)	S&P ^(b)	Fitch ^(c)
AIG	P-2 (2nd of 3) <i>Stable Outlook</i>	A-2 (2nd of 8)	Baa 1 (4th of 9) <i>Stable Outlook</i>	A- (3rd of 8) <i>Stable Outlook</i>	BBB (4th of 9) <i>Stable Outlook</i>
AIG Financial Products Corp. ^(d)	P-2 <i>Stable Outlook</i>	A-2	Baa 1 <i>Stable Outlook</i>	A- <i>Stable Outlook</i>	-
AIG Funding, Inc. ^(d)	P-2 <i>Stable Outlook</i>	A-2	-	-	-
ILFC	Not prime <i>Stable Outlook</i>	-	B1 (6th of 9) <i>Stable Outlook</i>	BBB- (4th of 8) <i>Negative Outlook</i>	BB (5th of 9) <i>Evolving Outlook</i>

(a) Moody's appends numerical modifiers 1, 2 and 3 to the generic rating categories to show relative position within the rating categories.

(b) S&P ratings may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

(c) Fitch ratings may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

(d) AIG guarantees all obligations of AIG Financial Products Corp. and AIG Funding, Inc.

These credit ratings are current opinions of the rating agencies. As such, they may be changed, suspended or withdrawn at any time by the rating agencies as a result of changes in, or unavailability of, information or based on other circumstances. Ratings may also be withdrawn at AIG management's request. This discussion of ratings is not a complete list of ratings of AIG and its subsidiaries.

"Ratings triggers" have been defined by one independent rating agency to include clauses or agreements the outcome of which depends upon the level of ratings maintained by one or more rating agencies. "Ratings triggers" generally relate to events that (i) could result in the termination or limitation of credit availability, or require accelerated repayment, (ii) could result in the termination of business contracts or (iii) could require a company to post collateral for the benefit of counterparties.

A significant portion of the GIAs, structured financing arrangements and financial derivative transactions have provisions that require collateral to be posted upon a downgrade of AIG's long-term debt ratings or, with the consent of the counterparties, assignment or repayment of the positions or arrangement of a substitute guarantee of AIG's obligations by an obligor with higher debt ratings. Furthermore, certain downgrades of AIG's long-term senior debt ratings would permit either AIG or the counterparties to elect early termination of contracts.

The actual amount of collateral required to be posted to counterparties in the event of such downgrades, or the aggregate amount of payments that AIG could be required to make, depends on market conditions, the fair value of outstanding affected transactions and other factors prevailing at the time of the downgrade. For a discussion of the effects of downgrades in the financial strength ratings of AIG's insurance companies or AIG's credit ratings, see Part II, Item 1A. Risk Factors in AIG's 2010 Annual Report on Form 10-K and Note 10 to the Consolidated Financial Statements.

Contractual Obligations

The following table summarizes contractual obligations in total, and by remaining maturity:

March 31, 2011 (in millions)	Total Payments	Remainder of 2011	Payments due by Period			
			2012 - 2013	2014 - 2015	2016	Thereafter
Borrowings	\$ 79,772	\$ 8,736	\$ 16,095	\$ 9,194	\$ 5,298	\$ 40,449
Interest payments on borrowings	48,256	3,467	7,574	6,454	2,840	27,921
Loss reserves	94,978	16,526	28,303	15,766	5,129	29,254
Insurance and investment contract liabilities	435,542	13,911	26,810	25,540	47,544	321,737
Aircraft purchase commitments	17,552	174	1,324	4,074	2,868	9,112
Other long-term obligations ^(a)	317	109	87	11	-	110
Total^(b)	\$ 676,417	\$ 42,923	\$ 80,193	\$ 61,039	\$ 63,679	\$ 428,583

(a) Primarily includes contracts to purchase future services and other capital expenditures.

(b) Does not reflect unrecognized tax benefits of \$5.3 billion, the timing of which is uncertain. In addition, the majority of Capital Markets credit default swaps require AIGFP to provide credit protection on a designated portfolio of loans or debt securities. At March 31, 2011, the fair value derivative liability was \$3.1 billion, relating to AIGFP's super senior multi-sector CDO credit default swap portfolio, realized in extinguishing derivative obligations. Due to the long-term maturities of these credit default swaps, AIG is unable to make reasonable estimates of the periods during which any payments would be made. However, at March 31, 2011 AIGFP had posted collateral of \$2.6 billion with respect to these swaps.

Off Balance Sheet Arrangements and Commercial Commitments

The following table summarizes Off Balance Sheet Arrangements and Commercial Commitments in total, and by remaining maturity:

March 31, 2011 (in millions)	Total Amounts Committed	Amount of Commitment Expiration				
		Remainder of 2011	2012 - 2013	2014 - 2015	2016	Thereafter
Guarantees:						
Liquidity facilities ^(a)	\$ 695	\$ -	\$ 594	\$ -	\$ -	\$ 101
Standby letters of credit	989	963	14	11	-	1
Guarantees of indebtedness	212	-	-	-	-	212
All other guarantees ^{(b)(c)}	636	63	217	187	53	116
Commitments:						
Investment commitments ^(d)	3,360	2,137	893	250	64	16
Commitments to extend credit	319	245	49	24	-	1
Letters of credit	1,552	1,470	82	-	-	-
Other commercial commitments ^(e)	720	19	-	-	-	701
Total^(f)	\$ 8,483	\$ 4,897	\$ 1,849	\$ 472	\$ 117	\$ 1,148

(a) Primarily represents liquidity facilities provided in connection with certain municipal swap transactions and collateralized bond obligations.

(b) Includes SunAmerica construction guarantees connected to affordable housing investments.

(c) Excludes potential amounts attributable to indemnifications included in asset sales agreements. See Note 11 to the Consolidated Financial Statements.

(d) Includes commitments to invest in limited partnerships, private equity, hedge funds and mutual funds and commitments to purchase and develop real estate in the United States and abroad. The commitments to invest in limited partnerships and other funds are called at the discretion of each fund, as needed for funding new investments or expenses of the fund. The expiration of these commitments is estimated in the table above based on the expected life cycle of the related fund, consistent with past trends of requirements for funding. Investors under these commitments are primarily insurance and real estate subsidiaries.

(e) Includes options to acquire aircraft. Excludes commitments with respect to pension plans. The remaining pension contribution for 2011 is expected to be approximately \$68 million for U.S. and non-U.S. plans.

(f) Does not include guarantees, capital maintenance agreements or other support arrangements among AIG consolidated entities.

Securities Financing

The fair value of securities transferred under repurchase agreements accounted for as sales was \$2.8 billion and \$2.7 billion at March 31, 2011 and December 31, 2010, respectively, and the related cash collateral obtained was \$2.0 billion and \$2.1 billion at March 31, 2011 and December 31, 2010, respectively.

Dividend Restrictions

See Note 18 to the Consolidated Financial Statements in AIG's 2010 Annual Report on Form 10-K for discussion of restrictions on payments of dividends.

Arrangements with Variable Interest Entities

While AIG enters into various arrangements with variable interest entities (VIEs) in the normal course of business, AIG's involvement with VIEs is primarily as a passive investor in fixed maturities (rated and unrated) and equity interests issued by VIEs. AIG consolidates a VIE when it is the primary beneficiary of the entity. For a further discussion of AIG's involvement with VIEs, see Note 9 to the Consolidated Financial Statements.

Investments

Investment Strategy

AIG's investment strategies are tailored to the specific business needs of each operating unit. The investment objectives are driven by the business model for each of the businesses: general insurance, life insurance, retirement services and the Direct Investment business. The primary objectives are generation of investment income, preservation of capital, liquidity management and growth of surplus to support the insurance products.

At the local operating unit level, investment strategies are based on considerations that include the local market, liability duration and cash flow characteristics, rating agency and regulatory capital considerations, legal investment limitations, tax optimization and diversification.

The majority of assets backing insurance liabilities at AIG consist of intermediate and long duration fixed maturity securities. In the case of life insurance and retirement services companies, as well as in the Direct Investment business, the fundamental investment strategy is, as nearly as is practicable, to match the duration characteristics of the liabilities with assets of comparable duration. Fixed maturity securities held by the insurance companies included in Chartis U.S. historically have consisted primarily of laddered holdings of tax-exempt municipal bonds, which provided attractive after-tax returns and limited credit risk. In order to meet the current risk/return and tax objectives of Chartis U.S., the domestic property and casualty companies have begun to shift investment allocations away from tax-exempt municipal bonds towards taxable instruments which meet the companies' liquidity, duration and credit quality objectives as well as current risk-return and tax objectives. Fixed maturity securities held by Chartis International companies consist primarily of intermediate duration high-grade securities.

The market price of fixed maturity securities reflects numerous components, including interest rate environment, credit spread, embedded optionality (such as call features), liquidity, structural complexity, foreign exchange risk and other credit and non-credit factors. However, in most circumstances, pricing is most sensitive to interest rates, such that the market price declines as interest rates rise, and increases as interest rates fall. This effect is more pronounced for longer duration securities.

AIG accounts for the vast majority of the invested assets held by its insurance companies at fair value. However, with limited exceptions (primarily with respect to separate account products on AIG's Consolidated Balance Sheet), AIG does not modify the fair value of its insurance liabilities for changes in interest rates, even though rising interest rates have the effect of reducing the fair value of such liabilities, and falling interest rates have the opposite effect. This results in the recording of changes in unrealized gains (losses) on securities in Accumulated other comprehensive income resulting from changes in interest rates without any correlative, inverse changes in gains (losses) on AIG's liabilities. Because AIG's asset duration in certain low-yield currencies, particularly Japan and Taiwan, is shorter than its liability duration, AIG views increasing interest rates in these countries as economically advantageous, notwithstanding the effect that higher rates have on the market value of its fixed maturity portfolio.

At March 31, 2011, approximately 88 percent of the fixed maturity securities were held by domestic entities. Approximately 24 percent of such securities were rated AAA by one or more of the principal rating agencies. Approximately 11 percent were below investment grade or not rated. AIG's investment decision process relies primarily on internally generated fundamental analysis and internal risk ratings. Third-party rating services' ratings and opinions provide one source of independent perspective for consideration in the internal analysis.

A significant portion of the foreign fixed maturity portfolio is rated by Moody's, S&P or similar foreign rating services. Rating services are not available in all overseas locations. AIG's Credit Risk Committee closely reviews the credit quality of the foreign portfolio's non-rated fixed maturity securities. At March 31, 2011, approximately 25 percent of the foreign fixed income investments were either rated AAA or, on the basis of AIG's internal analysis, were equivalent from a credit standpoint to securities so rated. Approximately 4 percent were below investment grade or not rated at that date. Approximately 37 percent of the foreign fixed maturity portfolio is sovereign fixed maturity securities supporting policy liabilities in the country of issuance.

The following table presents the credit ratings of AIG's fixed maturity investments based on fair value:

	March 31, 2011	December 31, 2010
Rating:		
AAA	25%	24%
AA	21	22
A	21	21
BBB	23	22
Below investment grade	7	7
Non-rated	3	4
Total	100%	100%

Investments by Segment

The following tables summarize the composition of AIG's investments by reportable segment:

<i>(in millions)</i>	Chartis	SunAmerica	Financial Services	Other	Total
March 31, 2011					
Fixed maturity securities:					
Bonds available for sale, at fair value	\$ 92,620	\$ 139,530	\$ 105	\$ 6,060	\$ 238,315

Pennsylvania	579	130	286	995
All Other	2,512	2,036	6,661	11,209
Total^{(a)(b)}	\$ 8,019	\$ 9,692	\$ 26,024	\$ 43,735

(a) Excludes certain university and not-for-profit entities that issue in the corporate debt market. Includes industrial revenue bonds.

(b) Includes \$6.4 billion of pre-refunded U.S. municipal bonds.

At March 31, 2011, the U.S. municipal bond portfolio was composed primarily of essential service revenue bonds and high-quality tax-backed bonds with 98 percent of the portfolio rated A or higher.

The following table presents the industry categories of AIG's available for sale corporate debt securities^(a) based on amortized cost:

Industry Category	March 31, 2011	December 31, 2010
Financial institutions:		
Money Center/Global Bank Groups	12%	12%
Regional banks – other	3	3
Life insurance	4	4
Securities firms and other finance companies	1	2
Insurance non-life	1	4
Regional banks – North America	2	2
Other financial institutions	6	5
Utilities	16	16
Communications	8	8
Consumer noncyclical	9	8
Capital goods	7	6
Energy	7	6
Consumer cyclical	6	8
Other	18	16
Total^(b)	100%	100%

(a) Excludes corporate debt of businesses held for sale.

(b) At March 31, 2011 and December 31, 2010, approximately 94 percent and 93 percent, respectively, of these investments were rated investment grade.

Investments in RMBS

* The weighted average expected life is 7 years and 6 years at March 31, 2011 and December 31, 2010, respectively.

AIG's underwriting practices for investing in RMBS, other asset-backed securities and CDOs take into consideration the quality of the originator, the manager, the servicer, security credit ratings, underlying characteristics of the mortgages, borrower characteristics, and the level of credit enhancement in the transaction. AIG's strategy is typically to invest in securities rated AA or better at the time of the investment.

Investments in CMBS

The following table presents the amortized cost, gross unrealized gains (losses) and fair value of AIG's CMBS investments:

<i>(in millions)</i>	March 31, 2011					December 31, 2010

	March 31, 2011	December 31, 2010
Industry:		
Office	32%	34%
Retail	25	27
Multi-family	22	17
Lodging	8	8
Industrial	6	6
Other	7	8
Total	100%	100%

There have been disruptions in the CMBS market due to weakness in underlying commercial real estate fundamentals and the market's anticipation of increasing delinquencies and defaults. Although the market value of the holdings has improved and CMBS spreads have tightened during the first quarter of 2011, it continues to be below amortized cost. The majority of AIG's investments in CMBS are in tranches that contain substantial protection features through collateral subordination. As indicated in the tables, downgrades have occurred on many CMBS holdings. The majority of CMBS holdings are traditional conduit transactions, broadly diversified across property types and geographical areas.

Investments in CDOs

The following table presents AIG's CDO investments by collateral type:

<i>(in millions)</i>	March 31, 2011					December 31, 2010

Total	\$ 247	\$ 4	\$ 330	\$ 34	\$ 249	\$ 864

* Includes other-than-temporary impairment charges on partnership investments and direct private equity investments.

Notwithstanding AIG's intent and ability to hold its securities which suffered severity losses until they had recovered their cost or amortized cost basis, and despite structures that indicated, at the time, that a substantial amount of the securities should have continued to perform in accordance with original terms, AIG concluded, at the time, that it could not reasonably assert that the impairment would be temporary.

Determinations of other-than-temporary impairments are based on fundamental credit analyses of individual securities without regard to rating agency ratings. Based on this analysis, AIG expects to receive cash flows sufficient to cover the amortized cost of all below investment grade securities for which credit losses were not recognized.

AIG recorded other-than-temporary impairment charges in the three-month periods ended March 31, 2011 and 2010 related to:

- securities for which AIG has changed its intent to hold or sell;
- declines due to foreign exchange rates;
- issuer-specific credit events;
- certain structured securities; and
- other impairments, including equity securities, partnership investments and private equity investments.

With respect to the issuer-specific credit events shown above, no other-than-temporary impairment charge with respect to any one single credit was significant to AIG's consolidated financial condition or results of operations, and no individual other-than-temporary impairment charge exceeded 0.03 percent and 0.10 percent of Total equity in the three-month periods ended March 31, 2011 and 2010, respectively.

In periods subsequent to the recognition of an other-than-temporary impairment charge for available for sale fixed maturity securities that is not foreign exchange related, AIG generally prospectively accretes into earnings the difference between the new amortized cost and the expected undiscounted recovery value over the remaining expected holding period of the security. The amounts of accretion recognized in earnings were \$103 million and \$92 million for the three-month periods ended March 31, 2011 and 2010, respectively. For a discussion of AIG's other-than-temporary impairment accounting policy, see Note 7 to the Consolidated Financial Statements in AIG's 2010 Annual Report on Form 10-K.

An aging of the pre-tax unrealized losses of fixed maturity and equity securities, distributed as a percentage of cost relative to unrealized loss (the extent by which the fair value is less than amortized cost or cost), including the number of respective items was as follows:

March 31, 2011 Aging ^(a) (dollars in millions)	Less Than or Equal to 20% of Cost ^(b)			Greater Than 20% to 50% of Cost ^(b)			Greater Than 50% of Cost ^(b)			Total

Total	\$ 335	\$ 24	92	\$ 16	\$ 5	19	\$ -	\$ -	-	\$ 351	\$ 29	111

(a) Represents the number of consecutive months that fair value has been less than cost by any amount.

(b) Represents the percentage by which fair value is less than cost at March 31, 2011.

(c) For bonds, represents amortized cost.

(d) The effect on Net income of unrealized losses after taxes will be mitigated upon realization because certain realized losses will result in current decreases in the amortization of certain DAC.

(e) Item count is by CUSIP by subsidiary.

For the three-month period ended March 31, 2011, net unrealized gains related to fixed maturity and equity securities increased by \$1.0 billion primarily resulting from the narrowing of credit spreads.

As of March 31, 2011, the majority of AIG's fixed maturity investments in an unrealized loss position of more than 50 percent for more than 12 months consisted of the unrealized loss of \$240 million related to CMBS and RMBS securities originally rated investment grade that are floating rate or that have low fixed coupons relative to current market yields. A total of 52 securities with an amortized cost of \$173 million and a net unrealized loss of \$110 million are still investment grade. As part of its credit evaluation procedures applied to these and other securities, AIG considers the nature of both the specific securities and the market conditions for those securities. For most security types supported by real estate-related assets, current market yields continue to be higher than the yields were at the respective issuance dates of the securities. This is largely due to investors demanding additional yield premium for securities whose performance is closely linked to the commercial and residential real estate sectors. In addition, for floating rate securities, persistently low LIBOR levels continue to make these securities less attractive.

AIG believes that the lack of demand for commercial and residential real estate collateral-based securities, low contractual coupons and interest rate spreads, and the deterioration in the level of collateral support due to real estate market conditions are the primary reasons for these securities trading at significant price discounts. Based on its analysis, and taking into account the level of subordination below these securities, AIG continues to believe that the expected cash flows from these securities will be sufficient to recover the amortized cost of its investment. AIG continues to monitor these positions for potential credit impairments that could result from further deterioration in commercial and residential real estate fundamentals.

See also Note 7 to the Consolidated Financial Statements for further discussion of AIG's investment portfolio.

Enterprise Risk Management

For a complete discussion of AIG's risk management program, see Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations — Risk Management in AIG's 2010 Annual Report on Form 10-K.

Credit Risk Management

AIG defines its aggregate credit exposures to a counterparty as the sum of its fixed maturities, loans, finance leases, reinsurance recoverables, derivatives (mark-to-market), deposits, reverse repurchase agreements, collateral extended to counterparties and letters of credit (in the case of financial institutions) and the specified credit equivalent exposure to certain insurance products which embody credit risk.

The following table presents AIG's largest credit exposures as a percentage of Total equity:

March 31, 2011		Credit Exposure as a Percentage of Total Equity ^(b)
Category	Risk Rating ^(a)	
<i>Investment Grade:</i>		
10 largest combined ^(c)	A+	100.8%
Single largest financial institution	AA-	6.8
Single largest corporate	AAA	3.9
Single largest sovereign	AAA	34.8
<i>Non-Investment Grade:</i>		
10 largest combined	BB	4.8
Single largest financial institution	BB-	0.6
Single largest corporate	BB	0.7
Single largest sovereign	BB+	0.6

(a) Reflects AIG's internal risk ratings.

(b) Amounts shown include Nan Shan which was held for sale at March 31, 2011.

(c) Six of the ten largest credit exposures are to financial institutions, three are to investment-grade rated sovereigns and one is to an AAA-rated corporate. Based on support from the U.S. Government, the exposure to government-sponsored entities (GSEs) and to mortgage-backed securities guaranteed by the GSEs is included in the U.S. Government total, rather than in financial institutions. None of the top ten is rated lower than BBB or its equivalent.

AIG monitors its aggregate cross-border exposures by country and regional group of countries. AIG includes in its cross-border exposures both aggregated cross-border credit exposures to unrelated third parties, its cross-border investments in its own international subsidiaries and operating aircraft leases. Eight countries have cross-border exposures in excess of 10 percent of Total equity at March 31, 2011. Based on AIG's internal risk ratings, as of March 31, 2011, six countries were rated AAA, one was rated AA, and one was rated A. The two largest cross-border exposures are to the United Kingdom and France.

In addition, AIG reviews and manages its industry concentrations. AIG's single largest industry credit exposure is to the global financial institutions sector, which includes banks and finance companies, securities firms and insurance and reinsurance companies. These exposures include fixed income securities, operating account balances, deposit placements, reverse repurchase agreements, the mark-to-market and potential future exposure to derivative exposures, collateral placed with counterparties, letters of credit received as collateral to insurance programs and credit exposure to captive insurance programs.

The following table presents AIG's largest credit exposures to the global financial institution sector as a percentage of Total equity:

March 31, 2011	Credit Exposure as a Percentage of Total Equity*
Industry Category:	
Money center/Global bank groups	67.8%
Global reinsurance companies	14.6
European regional financial institutions	14.4
Global life insurance companies	12.1
Global non-life insurance companies	7.8
North American based regional financial institutions	7.5

* Amounts shown include Nan Shan which was held for sale at March 31, 2011.

AIG's exposure to its five largest money center/global bank group institutions was 26.8 percent of Total equity at March 31, 2011 compared to 21.4 percent of Total equity at December 31, 2010, reflecting the effect of the Recapitalization on total equity.

AIG also has a risk concentration through the investment portfolios of its insurance companies in the U.S. municipal sector. AIG holds approximately \$42.9 billion (amortized cost) of tax-exempt and taxable securities, \$5.9 billion of which are pre-refunded, issued by a wide number of municipal authorities across the U.S. and its territories. A majority of these securities are held in available-for-sale portfolios of AIG's domestic property-casualty insurance companies. These securities are comprised of the general obligations of states and local governments, revenue bonds issued by these same governments and bonds issued by transportation authorities, universities, state housing finance agencies and hospital systems. The weighted average credit quality of these issuers is A. AIG has \$906 million of additional exposure to the municipal sector outside of its insurance company portfolios.

Currently, several states, local governments and other issuers are facing pressures on their budgets from the effects of the recession and have had to cut spending, raise taxes and fees and draw on reserve funds. Consequently, several municipal issuers in AIG's portfolios have been downgraded one or more notches by the major nationally recognized statistical rating agencies. The most notable of these issuers is the State of California, of which AIG holds approximately \$653 million of general obligation bonds, \$45 million of which are pre-refunded, and the State of Illinois, of which AIG holds approximately \$221 million, \$69 million of which are pre-refunded.

AIG has credit exposure to several European sovereign governments whose ratings have been downgraded or placed under review in recent months by one or more major rating agencies. The downgrades primarily reflect the large government budget deficits and rising government debt to GDP ratios of these countries. As of March 31, 2011, AIG's exposure to the governments of Portugal, Ireland, Italy, Spain and Hungary amounted to \$860 million. AIG has no direct sovereign exposure to Greece. Four of the aforementioned six governments have experienced rating downgrades during the first quarter of 2011.

See also Investments herein for further information.

The Credit Risk Committee (CRC) reviews quarterly concentration reports in all categories listed above as well as credit trends by risk ratings. The CRC periodically adjusts limits to provide reasonable assurance that AIG does not incur excessive levels of credit risk and that AIG's credit risk profile is properly calibrated across business units.

Market Risk Management

Insurance and Financial Services (excluding Capital Markets) Sensitivities

The following table provides estimates of AIG's sensitivity to changes in yield curves, equity prices and foreign currency exchange rates:

(dollars in millions)	Exposure		Sensitivity Factor	Effect	
	March 31, 2011	December 31, 2010		March 31, 2011	December 31, 2010
Yield sensitive assets ^(a)	\$ 370,300	\$ 403,500	100 bps parallel increase in all yield curves	\$ (18,300)	\$ (19,700)
Equity and alternative investments exposure ^(b)	\$ 44,600	\$ 54,300	20% decline in stock prices and value of alternative investments	\$ (8,900)	\$ (10,861)
Foreign currency exchange rates net exposure ^(c)	\$ 5,000	\$ 6,200	10% depreciation of all foreign currency exchange rates against the U.S. dollar	\$ (500)	\$ (620)

(a) Excluding Nan Shan, which is held for sale, at March 31, 2011 and December 31, 2010, Yield sensitive assets were \$317.8 billion and \$350.7 billion, respectively.

(b) Excluding Nan Shan, which is held for sale, at March 31, 2011 and December 31, 2010, Equity and Alternative Investments were \$40.7 billion to \$50.6 billion, respectively.

(c) Excluding Nan Shan, which is held for sale, at March 31, 2011 and December 31, 2010, Total foreign exchange exposures were \$4.2 billion and \$5.7 billion, respectively.

Exposures for yield curves include assets that are directly sensitive to yield curve movements, such as fixed maturity securities, loans, finance receivables and short-term investments (excluding consolidated separate account assets). Exposures for equity and alternative investment prices include investments in common stocks, preferred stocks, mutual funds, hedge funds, private equity funds, commercial real estate and real estate funds (excluding consolidated separate account assets and consolidated managed partnerships and funds). Exposures to foreign currency exchange rates reflect AIG's consolidated non-U.S. dollar net capital investments on a GAAP basis, net of Nan Shan DAC adjustment.

- Total yield sensitive assets decreased 8 percent or \$33.2 billion at March 31, 2011 compared to December 31, 2010, primarily due to the divestiture of AIG Star/Edison in the first quarter of 2011 (\$41.7 billion) as well as a decline in cash and other assets of \$7 billion. This decline was partially offset by increases in fixed income assets of \$15.4 billion.
- Total equity and alternative investments exposure decreased 18 percent or \$9.7 billion compared to December 31, 2010, primarily due to: AIG's sale of MetLife equity securities (\$6.5 billion); lower common and preferred stock holdings in Japan (\$1.5 billion) due to the sale of AIG Star/Edison; and decrease in mutual fund value (\$0.9 billion) and real estate investment (\$0.9 billion). The decrease was partially offset by the appreciation of AIA stock (\$1.1 billion).
- The \$1.2 billion decrease in foreign currency exchange rates net exposure is primarily due to the divestiture of AIG Star/Edison (\$2.4 billion), partly offset by increases in AIG's continuing insurance operations (up \$0.8 billion) and in Nan Shan (up \$0.4 billion).

The above sensitivities of a 100 basis point increase in yield curves, a 20 percent decline in equities and alternative assets, and a 10 percent depreciation of all foreign currency exchange rates against the U.S. dollar were chosen solely for illustrative purposes. The selection of these specific events should not be construed as a prediction, but only as a demonstration of the potential effects of such events. These scenarios should not be construed as the only risks AIG faces; these events are shown as an indication of several possible losses AIG could experience. In addition, losses from these and other risks could be materially higher than illustrated. The sensitivity factors are the same as those used in AIG's 2010 Annual Report on Form 10-K.

Critical Accounting Estimates

The preparation of financial statements in conformity with GAAP requires the application of accounting policies that often involve a significant degree of judgment. AIG considers its accounting policies that are most dependent on the application of estimates and assumptions, and therefore viewed as critical accounting estimates, to be those relating to items considered by management in the determination of:

- insurance liabilities, including general insurance unpaid claims and claims adjustment expenses and future policy benefits for life and accident and health contracts;
- recoverability of assets, including deferred policy acquisition costs (DAC) and flight equipment;
- estimated gross profits for investment-oriented products;
- impairment charges, including other-than-temporary impairments on financial instruments;
- liabilities for legal contingencies;
- estimates with respect to income taxes, including recoverability of deferred tax assets; and
- fair value measurements of certain financial assets and liabilities, including credit default swaps (CDS) and AIG's economic interest in ML II and equity interest in ML III.

These accounting estimates require the use of assumptions about matters, some of which are highly uncertain at the time of estimation. To the extent actual experience differs from the assumptions used, AIG's financial condition and results of operations would be directly affected. Following is a discussion of updates to Critical Accounting Estimates during 2011. For a complete discussion of AIG's accounting estimates, see AIG's 2010 Annual Report on Form 10-K.

Deferred Policy Acquisition Costs — Short Duration (general insurance):

- *Recoverability:* based upon the current terms and profitability of the underlying insurance contracts.

Policy acquisition costs are deferred and amortized over the period in which the related premiums written are earned, generally 12 months. DAC is grouped consistent with the manner in which the insurance contracts are acquired, serviced and measured for profitability and is reviewed for recoverability based on the profitability of the underlying insurance contracts. AIG assesses the recoverability of its DAC on an annual basis or more frequently if circumstances indicate an impairment may have occurred. This assessment is performed by comparing recorded unearned premium to the sum of expected claims, claims adjustment expenses and maintenance cost, unamortized DAC and anticipated maintenance costs. If the sum of these costs exceeds the amount of recorded unearned premium, the excess is recognized as an offset against the asset established for DAC. This offset is referred to as a premium deficiency charge. Investment income is not anticipated in assessing the recoverability of DAC. Increases in the expected claims, and claims adjustment expenses can have a significant impact on the likelihood and amount of a premium deficiency charge. Management tested the recoverability of DAC and determined that recorded unearned premiums of its Chartis U.S. and Chartis International operating segments exceeded the sum of these costs at March 31, 2011, by one percent and 19 percent, respectively, and, therefore, the DAC of these reporting units was considered to be recoverable. DAC for Chartis U.S. and Chartis International amounted to \$1.7 billion and \$1.8 billion, respectively, at March 31, 2011.

Fair Value Measurements of Certain Financial Assets and Liabilities:

Overview

The following table presents the fair value of fixed income and equity securities by source of value determination:

March 31, 2011 (in billions)	Fair Value	Percent of Total
Fair value based on external sources ^(a)	\$ 242	90%
Fair value based on internal sources	28	10
Total fixed income and equity securities ^(b)	\$ 270	100%

(a) Includes \$22.6 billion for which the primary source is broker quotes.

(b) Includes available for sale and trading securities.

See Note 6 to the Consolidated Financial Statements for more detailed information about AIG's accounting policy for the incorporation of credit risk in fair value measurements and the measurement of fair value of financial assets and financial liabilities.

Level 3 Assets and Liabilities

Assets and liabilities recorded at fair value in the Consolidated Balance Sheet are classified in a hierarchy for disclosure purposes consisting of three "levels" based on the observability of inputs available in the marketplace used to measure the fair value. See Note 6 to the Consolidated Financial Statements for additional information about the three levels of observability.

At March 31, 2011, AIG classified \$37.0 billion and \$5.8 billion of assets and liabilities, respectively, measured at fair value on a recurring basis as Level 3. This represented 6.0 percent and 1.1 percent of the total assets and liabilities, respectively, at March 31, 2011. At December 31, 2010, AIG classified \$36.3 billion and \$6.2 billion of assets and liabilities, respectively, measured at fair value on a recurring basis as Level 3. This represented 5.3 percent and 1.1 percent of the total assets and liabilities, respectively, at December 31, 2010. Level 3 fair value measurements are based on valuation techniques that use at least one significant input that is unobservable. These measurements are made under circumstances in which there is little, if any, market activity for the asset or liability. AIG's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment.

Refer to Note 6 to the Consolidated Financial Statements for discussion of transfers of Level 3 assets and liabilities.

Capital Markets Super Senior Credit Default Swap Portfolio: AIGFP wrote credit protection on the super senior risk layer of collateralized loan obligations (CLOs), multi-sector CDOs and diversified portfolios of corporate debt, and prime residential mortgages. In these transactions, AIGFP is at risk of credit performance on the super senior risk layer related to such assets. To a lesser extent, AIGFP also wrote protection on tranches below the super senior risk layer, primarily in respect of regulatory capital relief transactions.

The following table presents the net notional amount, fair value of derivative (asset) liability and unrealized market valuation gain (loss) of the Capital Markets super senior credit default swap portfolio, including credit default swaps written on mezzanine tranches of certain regulatory capital relief transactions, by asset class:

<i>(in millions)</i>	Net Notional Amount		Fair Value of Derivative (Asset) Liability at		Unrealized Market Valuation Gain (Loss) Three Months Ended March 31,	
	March 31, 2011 ^(a)	December 31, 2010 ^(a)	March 31, 2011 ^{(b)(c)}	December 31, 2010 ^{(b)(c)}	2011 ^(c)	2010 ^(c)
Regulatory Capital:						
Corporate loans	\$ 3,395	\$ 5,193	\$ -	\$ -	\$ -	\$ -
Prime residential mortgages	30,514	31,613	(196)	(190)	6	33
Other	1,211	1,263	8	17	9	6
Total	35,120	38,069	(188)	(173)	15	39
Arbitrage:						
Multi-sector CDOs ^(d)	6,158	6,689	3,076	3,484	273	158
Corporate debt/CLOs ^(e)	12,674	12,269	134	171	37	(7)
Total	18,832	18,958	3,210	3,655	310	151
Mezzanine tranches ^(f)	2,705	2,823	200	198	(2)	(71)
Total	\$ 56,657	\$ 59,850	\$ 3,222	\$ 3,680	\$ 323	\$ 119

(a) Net notional amounts presented are net of all structural subordination below the covered tranches.

(b) Fair value amounts are shown before the effects of counterparty netting adjustments and offsetting cash collateral.

(c) Includes credit valuation adjustment losses of \$6 million and \$113 million in the three-month periods ended March 31, 2011 and 2010, respectively, representing the effect of changes in AIG's credit spreads on the valuation of the derivatives liabilities.

(d) During 2011, AIGFP liquidated one multi-sector super senior CDS transaction with a net notional amount of \$188 million. The primary underlying collateral components, which consisted of individual ABS CDS transactions, were sold in an auction to counterparties, including AIGFP, at their approximate fair value at the time of the liquidation. AIGFP was the winning bidder on approximately \$107 million of individual ABS CDS transactions, which are reported in written single name credit default swaps as of March 31, 2011. As a result, a \$121 million loss, which was previously included in the fair value of the derivative liability as an unrealized market valuation loss, was realized. During 2011, AIGFP also paid \$14 million to its counterparties with respect to multi-sector CDOs. Upon payment, a \$14 million loss, which was previously included in the fair value of the derivative liability as an unrealized market valuation loss, was realized. Multi-sector CDOs also include \$5.2 billion and \$5.5 billion in net notional amount of credit default swaps written with cash settlement provisions at March 31, 2011 and December 31, 2010, respectively.

(e) Corporate debt/CLOs include \$1.4 billion and \$1.3 billion in net notional amount of credit default swaps written on the super senior tranches of CLOs at March 31, 2011 and December 31, 2010, respectively.

(f) Net of offsetting purchased CDS of \$1.5 billion and \$1.4 billion in net notional amount at March 31, 2011 and December 31, 2010, respectively.

The following table presents changes in the net notional amount of the Capital Markets super senior credit default swap portfolio, including credit default swaps written on mezzanine tranches of certain regulatory capital relief transactions:

<i>(in millions)</i>	Net Notional Amount December 31, 2010 ^(a)	Terminations	Effect of Foreign Exchange Rates ^(b)	Amortization/ Reclassification, net of Replenishments	Net Notional Amount March 31, 2011 ^(a)
Regulatory Capital:					
Corporate loans	\$ 5,193	\$ (1,425)	\$ 238	\$ (611)	\$ 3,395
Prime residential mortgages	31,613	-	2,007	(3,106)	30,514
Other	1,263	-	39	(91)	1,211
Total	38,069	(1,425)	2,284	(3,808)	35,120
Arbitrage:					
Multi-sector CDOs ^(c)	6,689	(188)	164	(507)	6,158
Corporate debt/CLOs ^(d)	12,269	-	418	(13)	12,674
Total	18,958	(188)	582	(520)	18,832
Mezzanine tranches ^(e)	2,823	(280)	165	(3)	2,705
Total	\$ 59,850	\$ (1,893)	\$ 3,031	\$ (4,331)	\$ 56,657

(a) Net notional amounts presented are net of all structural subordination below the covered tranches.

(b) Relates to the weakening of the U.S. dollar; primarily against the Euro and the British Pound.

(c) Multi-sector CDOs include \$5.2 billion and \$5.5 billion in net notional amount of credit default swaps written with cash settlement provisions at March 31, 2011 and December 31, 2010, respectively.

(d) Corporate debt/CLOs include \$1.4 billion and \$1.3 billion in net notional amount of credit default swaps written on the super senior tranches of CLOs at March 31, 2011 and December 31, 2010, respectively.

(e) Net of offsetting purchased CDS of \$1.5 billion and \$1.4 billion in net notional amount at March 31, 2011 and December 31, 2010, respectively.

The following table presents summary statistics for Capital Markets super senior credit default swaps at March 31, 2011 and totals for March 31, 2011 and December 31, 2010:

Regulatory Capital Portfolio

During the three-month period ended March 31, 2011, \$1.4 billion in net notional amount of regulatory capital CDSs were terminated or matured at no cost to AIGFP. AIGFP continues to reassess the expected maturity of this portfolio. As of March 31, 2011, AIGFP estimated that the weighted average expected maturity of the portfolio was 3.40 years. AIGFP has not been required to make any payments as part of terminations initiated by

counterparties. The regulatory benefit of these transactions for AIGFP's financial institution counterparties was generally derived from Basel I. In December 2010, the Basel Committee on Banking Supervision finalized Basel III, which, when fully implemented, may reduce or eliminate the regulatory benefits to certain counterparties for these transactions, and this may reduce the period of time that such counterparties are expected to hold the positions. In prior years, it had been expected that financial institution counterparties would complete a transition from Basel I to an intermediate standard known as Basel II, which could have had similar effects on the benefits of these transactions, at the end of 2009. Basel III has now superseded Basel II, but the details of its implementation by the various European Central Banking districts have not been finalized. Should certain counterparties continue to receive favorable regulatory capital benefits from these transactions, those counterparties may not exercise their options to terminate the transactions in the expected time frame.

The weighted average expected maturity of the Regulatory Capital Portfolio increased as of March 31, 2011 by approximately 0.2 years from December 31, 2010 due to certain counterparties not terminating transactions with a combined net notional amount of \$3.8 billion. Where these counterparties continue to have a right to terminate the transaction early, AIGFP has extended the expected maturity dates by one year, which is based on how long AIGFP believes the relevant rules under Basel I will remain effective. Where the counterparties no longer have the right to terminate early, AIGFP has used the weighted average life of those transactions as their expected maturity. These counterparties in the Corporate Loan and Prime Residential Mortgage portfolios continue to receive favorable regulatory capital benefits under Basel I rules and, thus, AIG continues to categorize them as Regulatory Capital transactions.

Included in the Regulatory Capital portfolio are transactions with one counterparty that notified AIG that it would not terminate early two of its Prime Residential Mortgage transactions with a combined net notional amount of \$24.1 billion that were expected to be terminated in the first quarter of 2010. With respect to these transactions, the counterparty no longer has any rights to terminate the transactions early and is required to pay AIG fees on the original notional amounts reduced only by realized losses through the final contractual maturity. Since the two transactions have weighted average lives that are considerably less than their final contractual maturities, there is value to AIGFP representing counterparty contractual fees to be received beyond the date at which the net notional amounts have fully amortized through to the final contractual maturity date. The fair value of these two super senior transactions as of March 31, 2011 was a derivative asset of \$196 million. With respect to these two transactions, AIGFP has also written CDS transactions on the mezzanine tranches of these portfolios; however, the majority of the transactions on the mezzanine tranches were hedged by AIGFP with other third-party CDS transactions. In October 2008, following a credit ratings agency downgrade of AIG, AIGFP entered into a Credit Support Annex (CSA) to the agreements governing the transactions with this counterparty that requires AIGFP to post collateral. The CSA provides that one of two methodologies will be used for determining the amount of collateral to be posted. The same methodology has been used throughout the term of the CSA, and, at March 31, 2011, AIGFP had posted \$222 million of collateral. The counterparty has provided quotations from dealers that it contends support using the second methodology, and contends that a total amount of approximately \$1.9 billion should be posted by AIGFP. AIGFP continues to believe that the methodology currently being used is the correct one for computing collateral, that it has posted the amount of collateral required under the CSA, that the counterparty has not provided qualifying quotations and that the methodology the counterparty has used for calculating the amount of collateral to be posted is not valid. The counterparty recently notified AIGFP that it could bring litigation as soon as May 6, 2011 unless an agreement is reached either regarding the method for determining the amount of collateral to be posted, or regarding an alternative resolution of the matter.

In light of early termination experience to date and after analyses of other market data, to the extent deemed relevant and available, AIG determined that there was no unrealized market valuation adjustment for any of the transactions in this regulatory capital relief portfolio for 2011 other than (1) for transactions where AIGFP believes the counterparty is no longer using the transaction to obtain regulatory capital relief as discussed above and (2) for transactions where the counterparty has failed to terminate the transaction early as expected and no longer has any rights to terminate early in the future. Although AIGFP believes the value of contractual fees receivable on these transactions through maturity exceeds the economic benefits of any potential payments to the

counterparties, the counterparties' early termination rights, and AIGFP's expectation that such rights will be exercised, preclude the recognition of a derivative asset for these transactions.

The following table presents, for each of the regulatory capital CDS transactions in the corporate loan portfolio, the gross transaction notional amount, net notional amount, attachment points, inception to date realized losses and percent non-investment grade:

<i>(dollars in millions)</i>	Gross Transaction Notional Amount at March 31, 2011	Net Notional Amount at March 31, 2011	Attachment Point at Inception ^(a)	Attachment Point at March 31, 2011 ^(a)	Realized Losses through March 31, 2011 ^(b)	Percent Non-investment Grade at March 31, 2011 ^(c)
CDS						
1	\$ 291	\$ 189	10.03%	34.85%	0.52%	42.14%
2	1,186	935	10.00%	21.13%	0.20%	41.08%
3	2,814	2,271	13.26%	19.32%	0.00%	65.07%
Total	\$ 4,291	\$ 3,395				

- (a) Expressed as a percentage of gross transaction notional amount of the referenced obligations. As a result of participation ratios, replenishment rights and partial terminations, the attachment point may not always be computed by dividing net notional amount by gross transaction notional amount.
- (b) Represents realized losses incurred by the transaction (defaulted amounts less amounts recovered) from inception through March 31, 2011 expressed as a percentage of the initial gross transaction notional amount.
- (c) Represents non-investment grade obligations in the underlying pools of corporate loans expressed as a percentage of gross transaction notional amount.

The following table presents, for each of the regulatory capital CDS transactions in the prime residential mortgage portfolio, the gross transaction notional amount, net notional amount, attachment points, and inception to date realized losses:

<i>(dollars in millions)</i>	Gross Transaction Notional Amount at March 31, 2011	Net Notional Amount at March 31, 2011	Attachment Point at Inception ^(a)	Attachment Point at March 31, 2011 ^(a)	Realized Losses through March 31, 2011 ^(b)

Total	\$ 36,134	\$ 30,514			

- (a) Expressed as a percentage of gross transaction notional amount of the referenced obligations. As a result of participation ratios, replenishment rights and partial terminations, the attachment point may not always be computed by dividing net notional amount by gross transaction notional amount.
- (b) Represents realized losses incurred by the transaction (defaulted amounts less amounts recovered) from inception through March 31, 2011 expressed as a percentage of the initial gross transaction notional amount.
- (c) Delinquency information is not provided to Capital Markets for the underlying pools of residential mortgages of this transaction. However, information with respect to principal amount outstanding, defaults, recoveries, remaining term, property use, geography, interest rates, and ratings of the underlying junior tranches are provided to Capital Markets for such referenced pools.

All of the regulatory capital CDS transactions directly or indirectly reference tranching pools of large numbers of whole loans that were originated by the financial institution (or its affiliates) receiving the credit protection, rather than structured securities containing loans originated by other third parties. In the vast majority of transactions,

the loans are intended to be retained by the originating financial institution and in all cases the originating financial institution is the purchaser of the CDS, either directly or through an intermediary.

As further discussed below, AIGFP receives information monthly or quarterly regarding the performance and credit quality of the underlying referenced assets. AIGFP also obtains other information, such as ratings of the tranches below the super senior risk layer. The nature of the information provided or otherwise available to AIGFP with respect to the underlying assets in each regulatory capital CDS transaction is not consistent across all transactions. Furthermore, in a majority of corporate loan transactions and all of the residential mortgage transactions, the pools are blind, meaning that the identities of the obligors are not disclosed to AIGFP. In addition, although AIGFP receives periodic reports on the underlying asset pools, virtually all of the regulatory capital CDS transactions contain confidentiality restrictions that preclude AIGFP's public disclosure of information relating to the underlying referenced assets. The originating financial institutions, calculation agents or trustees (each a Report Provider) provide periodic reports on all underlying referenced assets as described below, including for those within the blind pools. While much of this information received by AIGFP cannot be aggregated in a comparable way for disclosure purposes because of the confidentiality restrictions and the inconsistency of the information, it does provide a sufficient basis for AIGFP to evaluate the risks of the portfolio and to determine a reasonable estimate of fair value.

For regulatory capital CDS transactions written on underlying pools of corporate loans, AIGFP receives monthly or quarterly updates from one or more Report Providers for each such referenced pool detailing, with respect to the corporate loans comprising such pool, the principal amount outstanding and defaults. In virtually all of these reports, AIGFP also receives information on recoveries and realized losses. AIGFP also receives quarterly stratification tables for each pool incorporating geography, industry and, when not publicly rated, the counterparty's assessment of the credit quality of the underlying corporate loans. Additionally, for a significant majority of these regulatory capital CDS transactions, upon the occurrence of a credit event with respect to any corporate loan included in any such pool, AIGFP receives a notice detailing the identity or identification number of the borrower, notional amount of such loan and the effective date of such credit event.

Ratings from independent ratings agencies for the underlying assets of the corporate loan portfolio are not universally available, but AIGFP estimates the ratings for the assets not rated by independent agencies by mapping the information obtained from the Report Providers to rating agency criteria. The "Percent Non-Investment Grade" information in the table above is provided as an indication of the nature of loans underlying the transactions, not necessarily as an indicator of relative risk of the CDS transactions, which is determined by the individual transaction structures. For example, Small and Medium Enterprise (SME) loan balances tend to be rated lower than loans to large, well-established enterprises. However, the greater number of loans and the smaller average size of the SME loans mitigate the risk profile of the pools. In addition, the transaction structures reflect AIGFP's assessment of the loan collateral arrangements, expected recovery values and reserve accounts in determining the level of subordination required to minimize the risk of loss. The percentage of non-investment grade obligations in the underlying pools of corporate loans varies considerably. One pool containing the highest percentages of non-investment grade obligations, which include all transactions with pools having non-investment grade percentages greater than 45 percent, are all granular SME loan pools which benefit from collateral arrangements made by the originating financial institutions and from work out of recoveries by the originating financial institutions. The number of loans in this pool is 6,635. This large number of SME loans increases the predictability of the expected loss and lessens the probability that discrete events will have a meaningful impact on the results of the overall pool. This transaction benefits from a tranche junior to it which was still rated AAA by at least two rating agencies at March 31, 2011. Two other pools, with a total net notional amount of \$1.1 billion, have non-investment grade percentages less than 45 percent, with a weighted average remaining life to maturity of 3.7 years. These pools have weighted average realized losses of 0.29 percent from inception through March 31, 2011 and have current weighted average attachment points of 23.83 percent. Approximately 4.18 percent of the assets underlying the corporate loan transactions are in default. The percentage of assets in default by transaction was available for all transactions and ranged from 3.29 percent to 6.63 percent.

For regulatory capital CDS transactions written on underlying pools of residential mortgages, AIGFP receives quarterly reports for each such referenced pool detailing, with respect to the residential mortgages comprising such pool, the aggregate principal amount outstanding, defaults and realized losses. These reports include additional information on delinquencies for the large majority of the transactions and recoveries for substantially all transactions. AIGFP also receives quarterly stratification tables for each pool incorporating geography for the underlying residential mortgages. The stratification tables also include information on remaining term, property use and interest rates for a large majority of the transactions.

Delinquency information for the mortgages underlying the residential mortgage transactions was available on 95.96 percent of the total gross transaction notional amount and mortgages delinquent more than 30 days ranged from 0.11 percent to 2.24 percent, averaging 0.82 percent. Except for one transaction, which comprised less than 1.25 percent of the total gross transaction notional amount, the average default rate (expressed as a percentage of gross transaction notional amount) was 0.26 percent and the default rates ranged from 0.00 percent to 5.78 percent. The default rate on this one transaction was 20.99 percent with a subordination level of 56.23 percent.

For all regulatory capital transactions, where the rating agencies directly rate the junior tranches of the pools, AIG monitors the rating agencies' releases for any affirmations or changes in such ratings, as well as any changes in rating methodologies or assumptions used by the rating agencies to the extent available. The tables below show the percentage of regulatory capital CDS transactions where there is an immediately junior tranche that is rated and the average rating of that tranche across all rated transactions.

AIGFP analyzes the information regarding the performance and credit quality of the underlying pools of assets to make its own risk assessment and to determine any changes in credit quality with respect to such pools of assets. This analysis includes a review of changes in pool balances, subordination levels, delinquencies, realized losses and expected performance under more adverse credit conditions. Using data provided by the Report Providers and information available from rating agencies, governments and other public sources that relate to macroeconomic trends and loan performance, AIGFP is able to analyze the expected performance of the overall portfolio because of the large number of loans that comprise the collateral pools.

Given the current performance of the underlying portfolios, the level of subordination and AIGFP's own assessment of the credit quality, as well as the risk mitigants inherent in the transaction structures, AIGFP does not expect that it will be required to make payments pursuant to the contractual terms of those transactions providing regulatory relief. Further, AIGFP expects that counterparties will, to the extent they retain termination rights, continue to terminate these transactions prior to their maturity.

The following table presents the Capital Markets Regulatory Capital CDS transactions in the Corporate loans portfolio by geographic location:

March 31, 2011 Exposure Portfolio	Net Notional Amount (in millions)	Percent of Total	Current Average Attachment Point ^(a)	Realized Losses through March 31, 2011 ^(b)	Weighted Average Maturity (Years)		Number of Transactions	Ratings of Junior Tranches ^(d)	
					To First Call ^(c)	To Maturity		Percent Rated	Average Rating
Primarily Single Country – Germany	\$ 3,395	100%	20.87%	0.11%	1.49	8.24	3	100%	A+

(a) Expressed as a percentage of gross transaction notional amount of the referenced obligations.

(b) Represents realized losses incurred by the transaction (defaulted amounts less amounts recovered) from inception through March 31, 2011 expressed as a percentage of the initial gross transaction notional amount.

(c) Where no call right remains, the weighted average expected maturity is used.

(d) Represents the weighted average ratings, when available, of the tranches immediately junior to Capital Markets super senior tranche. The percentage rated represents the percentage of net notional amount where there exists a rated tranche immediately junior to Capital Markets super senior tranche.

The following table presents the Capital Markets Regulatory Capital CDS transactions in the Prime residential mortgage portfolio summarized by geographic location:

March 31, 2011	Net Notional Amount (in millions)	Percent of Total	Current Average Attachment Point ^(a)	Realized Losses through March 31, 2011 ^(b)	Weighted Average Maturity (Years)		Number of Transactions	Ratings of Junior Tranches ^(d)	
					To First Call ^(c)	To Maturity		Percent Rated	Average Rating
Country:									
Denmark	\$ 24,065	78.87%	11.19%	0.13%	4.45	28.50	2	100%	AAA
France	1,085	3.56	25.55%	0.05%	0.73	27.73	1	100	AAA
Germany	2,110	6.91	33.27%	0.95%	1.23	38.46	5	100	AAA
Sweden	3,254	10.66	26.08%	0.00%	0.85	28.85	1	100	AAA
Total	\$ 30,514	100.00%	15.53%	0.21%	3.58	29.39	9	100%	AAA

(a) Expressed as a percentage of gross transaction notional amount of the referenced obligations.

(b) Represents realized losses incurred by the transaction (defaulted amounts less amounts recovered) from inception through March 31, 2011 expressed as a percentage of the initial gross transaction notional amount.

(c) Where no call right remains, the weighted average expected maturity is used.

(d) Represents the weighted average ratings, when available, of the tranches immediately junior to AIGFP's super senior tranche. The percentage rated represents the percentage of net notional amount where there exists a rated tranche immediately junior to AIGFP's super senior tranche.

Arbitrage Portfolio

A portion of the Capital Markets super senior credit default swaps as of March 31, 2011 are arbitrage-motivated transactions written on multi-sector CDOs or designated pools of investment grade senior unsecured corporate debt or CLOs.

Multi-Sector CDOs

The following table summarizes gross transaction notional amount of the multi-sector CDOs on which AIGFP wrote protection on the super senior tranche, subordination below the super senior risk layer, net notional amount and fair value of derivative liability by underlying collateral type:

March 31, 2011	Gross Transaction Notional Amount ^(a)	Subordination Below the Super Senior Risk Layer	Net Notional Amount	Fair Value of Derivative Liability
<i>(in millions)</i>				
High grade with sub-prime collateral	\$ 2,930	\$ 1,532	\$ 1,398	\$ 538
High grade with no sub-prime collateral	6,781	4,358	2,423	959
Total high grade ^(b)	9,711	5,890	3,821	1,497
Mezzanine with sub-prime collateral	2,275	734	1,541	1,056
Mezzanine with no sub-prime collateral	1,624	828	796	523
Total mezzanine ^(c)	3,899	1,562	2,337	1,579
Total	\$ 13,610	\$ 7,452	\$ 6,158	\$ 3,076

(a) Total outstanding principal amount of securities held by a CDO.

(b) "High grade" refers to transactions in which the underlying collateral credit ratings on a stand-alone basis were predominantly AA or higher at origination.

(c) "Mezzanine" refers to transactions in which the underlying collateral credit ratings on a stand-alone basis were predominantly A or lower at origination.

The following table summarizes net notional amounts of the remaining multi-sector CDOs on which AIGFP wrote protection on the super senior tranche, by settlement alternative and currency:

<i>(in millions)</i>	March 31, 2011	December 31, 2010
CDS transactions with cash settlement provisions		
U.S. dollar-denominated	\$ 3,733	\$ 4,010
Euro-denominated	1,454	1,475
Total CDS transactions with cash settlement provisions	5,187	5,485
CDS transactions with physical settlement provisions		
U.S. dollar-denominated	7	68
Euro-denominated	964	1,136
Total CDS transactions with physical settlement provisions	971	1,204
Total	\$ 6,158	\$ 6,689

The following table summarizes changes in the fair values of the derivative liability of the Capital Markets super senior multi-sector CDO credit default swap portfolio:

<i>(in millions)</i>	Three Months Ended March 31, 2011	Year Ended December 31, 2010
Fair value of derivative liability, beginning of year	\$ 3,484	\$ 4,418
Unrealized market valuation gain	(273)	(663)
Other terminations and realized losses	(135)	(271)
Fair value of derivative liability, end of period	\$ 3,076	\$ 3,484

The following table presents, for each multi-sector CDO that is a reference obligation in a CDS written by AIGFP, the gross and net notional amounts, attachment points and percentage of gross notional amount rated less than B-/B-3:

<i>(dollars in millions)</i>	Gross Transaction Notional Amount at March 31, 2011	Net Notional Amount at March 31, 2011	Attachment Point at Inception ^(a)	Attachment Point at March 31, 2011 ^(a)	Percentage of Gross Notional Amount Rated Less than B-/B-3 at March 31, 2011
CDO					
1	\$ 930	\$ 421	40.00%	54.75%	66.32%
2	667	326	53.00%	51.12%	65.49%
3	957	470	53.00%	50.91%	95.17%
4	1,038	291	76.00%	71.98%	86.36%
5	695	3	10.83%	0.19%	29.49%
6	860	411	12.27%	11.56%	6.32%
7	833	553	25.24%	28.78%	8.94%
8	1,197	1,105	10.00%	7.67%	36.11%
9	2,192	1,454	16.50%	18.75%	3.44%
10	300	171	32.00%	42.98%	83.47%
11	381	381	24.49%	0.00% ^(b)	74.12%
12	436	384	32.90%	11.76%	99.22%
13	228	184	34.51%	19.44%	97.27%
14	2,896	4	9.72%	21.73%	79.92%
Total	\$ 13,610	\$ 6,158			

(a) Expressed as a percentage of gross transaction notional amount of the referenced obligations. As a result of participation ratios, replenishment rights and partial terminations, the attachment point may not always be computed by dividing net notional amount by gross transaction notional amount.

(b) AIGFP began making payments on realized losses in excess of the attachment point on this trade in 2010.

In a number of instances, the level of subordination with respect to individual CDOs has increased since inception relative to the overall size of the CDO. While the super senior tranches are amortizing, subordinate layers have not been reduced by realized losses to date. Such losses are expected to emerge in the future. At inception, substantially all of the underlying assets were rated B-/B3 or higher and in most cases at least BBB or Baa. Thus, the percentage of gross notional amount rated less than B-/B3 represents a deterioration in the credit quality of the underlying assets.

The following table summarizes the gross transaction notional amount, percentage of the total CDO collateral pools and ratings and vintage breakdown of collateral securities in the multi-sector CDOs, by asset-backed securities (ABS) category:

March 31, 2011 <i>(in millions)</i>

Corporate Debt/CLOs

The corporate arbitrage portfolio consists principally of CDS written on portfolios of corporate obligations that were generally rated investment grade at the inception of the CDS. These CDS transactions require cash settlement. This portfolio also includes CDS with a net notional amount of \$1.4 billion written on the senior part of the capital structure of CLOs, which require physical settlement.

The following table summarizes gross transaction notional amount of CDS transactions written on portfolios of corporate obligations, percentage of the total referenced portfolios, and ratings by industry sector, in addition to the subordinations below the super senior risk layer, AIGFP's net notional amounts and fair value of derivative liability:

March 31, 2011 <i>(in millions)</i>	Gross Transaction Notional Amount	Percent of Total	Ratings

15	CLO	120	31.23%	30.10%	0.00%
Total		\$ 12,674			

(a) Expressed as a percentage of gross transaction notional amount of the referenced obligations.

(b) Represents defaults (assets that are technically defaulted but for which the losses have not yet been realized) from inception through March 31, 2011 expressed as a percentage of the gross transaction notional amount at March 31, 2011.

Collateral

Most of the Capital Markets credit default swaps are subject to collateral posting provisions. These provisions differ among counterparties and asset classes. Although AIGFP has collateral posting obligations associated with both regulatory capital relief transactions and arbitrage transactions, the large majority of these obligations to date have been associated with arbitrage transactions in respect of multi-sector CDOs.

Regulatory Capital Relief Transactions

As of March 31, 2011, 90.7 percent of the Capital Markets regulatory capital relief transactions (measured by net notional amount) were subject to CSAs linked to AIG's credit rating and 9.3 percent of the regulatory capital relief transactions were not subject to collateral posting provisions. In general, each regulatory capital relief transaction is subject to a stand-alone Master Agreement or similar agreement, under which the aggregate exposure is calculated with reference to only a single transaction.

The underlying mechanism that determines the amount of collateral to be posted varies by counterparty and there is no standard formula. The varied mechanisms resulted from individual negotiations with different counterparties. The following is a brief description of the primary mechanisms that are currently being employed to determine the amount of collateral posting for this portfolio.

Reference to Market Indices — Under this mechanism, the amount of collateral to be posted is determined based on a formula that references certain tranches of a market index, such as either iTraxx or CDX. This mechanism is used for CDS transactions that reference either corporate loans or residential mortgages. While the market index is not a direct proxy, it has the advantage of being readily obtainable.

Negotiated Amount — Under this mechanism, the amount of collateral to be posted is determined based on terms negotiated between AIGFP and the counterparty, which could be a fixed percentage of the notional amount or present value of premiums to be earned by AIGFP.

The following table presents the amount of collateral postings by underlying mechanism as described above with respect to the regulatory capital relief portfolio (prior to consideration of transactions other than the Capital Markets super senior credit default swaps subject to the same Master Agreements) as of the periods ended:

<i>(in millions)</i>	December 31, 2010	March 31, 2011
Reference to market indices	\$ 19	\$ 7
Negotiated amount	217	222
Total	\$ 236	\$ 229

Arbitrage Portfolio — Multi-Sector CDOs

In the CDS transactions with physical settlement provisions, in respect of multi-sector CDOs, the standard CSA provisions for the calculation of exposure have been modified, with the exposure amount determined pursuant to an agreed formula that is based on the difference between the net notional amount of such transaction and the market value of the relevant underlying CDO security, rather than the replacement value of the transaction. As of any date, the “market value” of the relevant CDO security is the price at which a marketplace participant would be willing to purchase such CDO security in a market transaction on such date, while the “replacement value of the transaction” is the cost on such date of entering into a credit default swap transaction with substantially the same terms on the same referenced obligation (e.g., the CDO security). In cases where a formula is utilized, a transaction-specific threshold is generally factored into the calculation of exposure, which reduces the amount of collateral required to be posted. These thresholds typically vary based on the credit ratings of AIG and/or the reference obligations, with greater posting obligations arising in the context of lower ratings. For the large majority of counterparties to these transactions, the Master Agreement and CSA cover non-CDS transactions (e.g., interest rate and cross currency swap transactions) as well as CDS transactions. As a result, the amount of collateral to be posted by AIGFP in relation to the CDS transactions will be added to or offset by the amount, if any, of the exposure AIG has to the counterparty on the non-CDS transactions.

Arbitrage Portfolio — Corporate Debt/CLOs

All of the Capital Markets corporate arbitrage-CLO transactions are subject to CSAs. These transactions are treated the same as other transactions subject to the same Master Agreement and CSA, with the calculation of collateral in accordance with the standard CSA procedures outlined above.

The vast majority of corporate debt transactions are no longer subject to future collateral postings. In exchange for an upfront payment to an intermediary counterparty, AIGFP has eliminated all future obligations to post collateral on corporate debt transactions that mature after 2011.

Collateral Calls

AIGFP has received collateral calls from counterparties in respect of certain super senior credit default swaps, of which a large majority relate to multi-sector CDOs. To a lesser extent, AIGFP has also received collateral calls in respect of certain super senior credit default swaps entered into by counterparties for regulatory capital relief purposes and in respect of corporate arbitrage.

From time to time, valuation methodologies used and estimates made by counterparties with respect to certain super senior credit default swaps or the underlying reference CDO securities, for purposes of determining the amount of collateral required to be posted by AIGFP in connection with such instruments, have resulted in estimates that differ, at times significantly, from AIGFP’s estimates. In almost all cases, AIGFP has been able to successfully resolve the differences or otherwise reach an accommodation with respect to collateral posting levels, including in certain cases by entering into compromise collateral arrangements. Due to the ongoing nature of collateral arrangements, AIGFP regularly is engaged in discussions with one or more counterparties in respect of these differences, including at the present time. Valuation estimates made by counterparties for collateral purposes

are, like any other third-party valuation, considered in the determination of the fair value estimates of the Capital Markets super senior credit default swap portfolio.

The following table presents the amount of collateral postings with respect to the Capital Markets super senior credit default swap portfolio (prior to offsets for other transactions) as of the periods ended:

<i>(in millions)</i>	December 31, 2010	March 31, 2011
Regulatory capital	\$ 236	\$ 229
Arbitrage – multi-sector CDO	3,013	2,617
Arbitrage – corporate	537	541
Total	\$ 3,786	\$ 3,387

The amount of future collateral posting requirements generally is a function of AIG's credit ratings, the rating of the reference obligations and any further decline in the market value of the relevant reference obligations, with the latter being the most significant factor. While a high level of correlation exists between the amount of collateral posted and the valuation of these contracts in respect of the arbitrage portfolio, a similar relationship does not exist with respect to the regulatory capital portfolio given the nature of how the amount of collateral for these transactions is determined. Given the lack of observable data and the uncertainty regarding the potential effects on market prices of measures undertaken by the federal government to address the credit market disruption, AIGFP is unable to reasonably estimate the amounts of collateral that it may be required to post in the future.

Valuation Sensitivity — Arbitrage Portfolio

Multi-Sector CDOs

AIG utilizes sensitivity analyses that estimate the effects of using alternative pricing and other key inputs on AIG's calculation of the unrealized market valuation loss related to the Capital Markets super senior credit default swap portfolio. While AIG believes that the ranges used in these analyses are reasonable, given the current difficult market conditions, AIG is unable to predict which of the scenarios is most likely to occur. As recent experience demonstrates, actual results in any period are likely to vary, perhaps materially, from the modeled scenarios, and there can be no assurance that the unrealized market valuation loss related to the Capital Markets super senior credit default swap portfolio will be consistent with any of the sensitivity analyses. On average, prices for CDOs increased during 2011. Further, it is difficult to extrapolate future experience based on current market conditions.

For the purposes of estimating sensitivities for the super senior multi-sector CDO credit default swap portfolio, the change in valuation derived using the BET model is used to estimate the change in the fair value of the derivative liability. Out of the total \$6.2 billion net notional amount of CDS written on multi-sector CDOs outstanding at March 31, 2011, a BET value is available for \$3.8 billion net notional amount. No BET value is determined for \$2.4 billion of CDS written on European multi-sector CDOs as prices on the underlying securities held by the CDOs are not provided by collateral managers; instead these CDS are valued using counterparty prices. Therefore, sensitivities disclosed below apply only to the net notional amount of \$3.8 billion.

The most significant assumption used in the BET model is the estimated price of the securities within the CDO collateral pools. If the actual price of the securities within the collateral pools differs from the price used in estimating the fair value of the super senior credit default swap portfolio, there is potential for material variation in the fair value estimate. Any further declines in the value of the underlying collateral securities held by a CDO will similarly affect the value of the super senior CDO securities. While the models attempt to predict changes in the prices of underlying collateral securities held within a CDO, the changes are subject to actual market conditions which have proved to be highly volatile, especially given current market conditions. AIG cannot predict reasonably likely changes in the prices of the underlying collateral securities held within a CDO at this time.

The following table presents key inputs used in the BET model, and the potential increase (decrease) to the fair value of the derivative liability by ABS category at March 31, 2011 corresponding to changes in these key inputs:

(dollars in millions)	Average Inputs Used at March 31, 2011	Change	Increase (Decrease) to Fair Value of Derivative Liability						
			Entire Portfolio	RMBS Prime	RMBS Alt-A	RMBS Subprime	CMBS	CDOs	Other
Bond prices	47 points	Increase of 5 points Decrease of 5 points	\$ (258) 253	\$ (6) 7	\$ (18) 19	\$ (119) 110	\$ (80) 86	\$ (23) 13	\$ (12) 18
Weighted average life	5.92 years	Increase of 1 year Decrease of 1 year	24 (42)	1 (1)	1 (2)	16 (31)	5 (5)	1 (2)	- (1)
Recovery rates	20%	Increase of 10% Decrease of 10%	(35) 29	- -	(4) 4	(19) 14	(10) 10	(1) -	(1) 1
Diversity score ^(a)	11	Increase of 5 Decrease of 5	(14) 51						
Discount curve ^(b)	N/A	Increase of 100bps	16						

(a) The diversity score is an input at the CDO level. A calculation of sensitivity to this input by type of security is not possible.

(b) The discount curve is an input at the CDO level. A calculation of sensitivity to this input by type of security is not possible. Furthermore, for this input it is not possible to disclose a weighted average input as a discount curve consists of a series of data points.

These results are calculated by stressing a particular assumption independently of changes in any other assumption. No assurance can be given that the actual levels of the key inputs will not exceed, perhaps significantly, the ranges assumed by AIGFP for purposes of the above analysis. No assumption should be made that results calculated from the use of other changes in these key inputs can be interpolated or extrapolated from the results set forth above.

Corporate Debt

The following table represents the relevant market credit inputs used to estimate the sensitivity for the credit default swap portfolio written on investment-grade corporate debt and the estimated increase (decrease) in fair value of derivative liability at March 31, 2011 corresponding to changes in these market credit inputs:

Input Used at March 31, 2011 (in millions)	Increase (Decrease) in Fair Value of Derivative Liability
Credit spreads for all names	
Effect of an increase by 10 basis points	\$ 13
Effect of a decrease by 10 basis points	\$ (14)
All base correlations	
Effect of an increase by 1%	\$ 4
Effect of a decrease by 1%	\$ (4)
Assumed recovery rate	
Effect of an increase by 1%	\$ (3)
Effect of a decrease by 1%	\$ 3

These results are calculated by stressing a particular assumption independently of changes in any other assumption. No assurance can be given that the actual levels of the key inputs will not exceed, perhaps significantly, the ranges assumed by AIGFP for purposes of the above analysis. No assumption should be made that results calculated from the use of other changes in these key inputs can be interpolated or extrapolated from the results set forth above.

Other derivatives. Valuation models that incorporate unobservable inputs initially are calibrated to the transaction price. Subsequent valuations are based on observable inputs to the valuation model (e.g., interest rates, credit spreads, volatilities, etc.). Model inputs are changed only when corroborated by observable market data.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Included in Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Item 4. Controls and Procedures

In connection with the preparation of this Quarterly Report on Form 10-Q, an evaluation was carried out by AIG's management, with the participation of AIG's Chief Executive Officer and Chief Financial Officer, of the effectiveness of AIG's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (Exchange Act)). Disclosure controls and procedures are designed to ensure that information required to be disclosed in reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms and that such information is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosures. Based on that evaluation, AIG's Chief Executive Officer and Chief Financial Officer have concluded that, as of March 31, 2011, AIG's disclosure controls and procedures were effective. There has been no change in AIG's internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that occurred during the quarter ended March 31, 2011 that has materially affected, or is reasonably likely to materially affect, AIG's internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

For a discussion of legal proceedings, see Note 11(a) to the Consolidated Financial Statements, which is incorporated herein by reference.

Item 1A. Risk Factors

AIG's ability to achieve its long-term aspirational goals with respect to ROE and EPS and other long-term aspirational goals are based on significant assumptions, and AIG's actual results may differ, possibly materially and adversely, from these goals.

In setting its long-term aspirational goals for ROE and EPS, AIG has made significant assumptions that include, among other things, the general conditions of markets in which it operates, revenues and combined ratios of its subsidiaries, investment yields, subsidiaries' capacity to distribute dividends to AIG Parent, AIG's ability to apply deployable capital to share repurchases, dividend payments, acquisitions or organic growth, AIG's ability to maintain financial leverage commensurate with its current credit ratings, the exclusion of the impact on shareholders' equity of the reversal of the tax valuation allowance, the effectiveness of AIG's cost rationalization measures, the approval of planned actions (including with respect to any share repurchases, dividend payments or acquisitions) by AIG's regulators, the overall credit rating implications of AIG's proposed strategic actions and general financial market and interest rate conditions. These assumptions are not historical facts but instead represent only AIG's expectations regarding future events, many of which, by their nature, are inherently subject to significant uncertainties and contingencies and are outside AIG's control. It is very likely that one or more of the assumptions will not be met or will deviate materially from what is assumed. Accordingly, AIG's actual results are likely to differ from these aspirational goals and the difference may be material and adverse.

The aspirational goals and their underlying assumptions are forward-looking statements. AIG strongly cautions its shareholders and other investors not to place undue reliance on any of these assumptions or aspirational goals. AIG is not under any obligation (and expressly disclaims any obligation) to update or alter any assumptions, goals, projections or other related statements, whether written or oral, that may be made from time to time, whether as a result of new information, future events or otherwise. See "Cautionary Statement Regarding Forward-Looking Information" and "Executive Overview — Long-Term Aspirational Goals" in Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations for additional information regarding the forward-looking statements.

Item 6. Exhibits

See accompanying Exhibit Index.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

AMERICAN INTERNATIONAL GROUP, INC.

EXHIBIT INDEX

Exhibit Number	Description	Location
2	Plan of acquisition, reorganization, arrangement, liquidation or succession	
	(a) Amended and Restated Purchase Agreement, dated as of January 14, 2011, among American International Group, Inc., the United States Department of the Treasury and the Federal Reserve Bank of New York	Incorporated by reference to Exhibit 2.1 to AIG's Current Report on Form 8-K filed with the SEC on January 14, 2011 (File No. 1-8787).
	(b) Master Transaction Agreement, dated as of December 8, 2010, among American International Group, Inc., ALICO Holdings LLC, AIA Aurora LLC, the Federal Reserve Bank of New York, the United States Department of the Treasury and the AIG Credit Facility Trust	Incorporated by reference to Exhibit 2.1 to AIG's Current Report on Form 8-K filed with the SEC on December 8, 2010 (File No. 1-8787).
	(c) Coordination Agreement, dated as of March 1, 2011, among ALICO Holdings LLC, American International Group, Inc. and MetLife, Inc.	Incorporated by reference to Exhibit 2.1 to AIG's Current Report on Form 8-K filed with the SEC on March 3, 2011 (File No. 1-8787).
	(d) Letter Agreement, dated as of March 1, 2011, among American International Group, Inc., the United States Department of the Treasury, AIA Aurora LLC and ALICO Holdings LLC	Incorporated by reference to Exhibit 2.2 to AIG's Current Report on Form 8-K filed with the SEC on March 3, 2011 (File No. 1-8787).
3	Articles of incorporation and by-laws	
3(i)(a)	American International Group, Inc. Certificate of Designations of Series G Cumulative Mandatory Convertible Preferred Stock	Incorporated by reference to Exhibit 3.1 to AIG's Current Report on Form 8-K filed with the SEC on January 14, 2011 (File No. 1-8787).
3(i)(b)	American International Group, Inc. Certificate of Elimination of Series C Perpetual, Convertible, Participating Preferred Stock	Incorporated by reference to Exhibit 3.2 to AIG's Current Report on Form 8-K filed with the SEC on January 14, 2011 (File No. 1-8787).
3(i)(c)	American International Group, Inc. Certificate of Elimination of Series E Fixed Rate Non-Cumulative Perpetual Preferred Stock	Incorporated by reference to Exhibit 3.3 to AIG's Current Report on Form 8-K filed with the SEC on January 14, 2011 (File No. 1-8787).
3(i)(d)	American International Group, Inc. Certificate of Elimination of Series F Fixed Rate Non-Cumulative Perpetual Preferred Stock	Incorporated by reference to Exhibit 3.4 to AIG's Current Report on Form 8-K filed with the SEC on January 14, 2011 (File No. 1-8787).
3(i)(e)	American International Group, Inc. Certificate of Designation and Terms of Participating Preferred Stock	Incorporated by reference to Exhibit 3.1 to AIG's Current Report on Form 8-K filed with the SEC on March 9, 2011 (File No. 1-8787).
4	Instruments defining the rights of security holders, including indentures	
	(1) Registration Rights Agreement, dated as of January 14, 2011, between American International Group, Inc. and the United States Department of the Treasury	Incorporated by reference to Exhibit 99.4 to AIG's Current Report on Form 8-K filed with the SEC on January 14, 2011 (File No. 1-8787).
	(2) Agreement to Amend Warrants, dated as of January 14, 2011, between American International Group, Inc. and the United States Department of the Treasury	Incorporated by reference to Exhibit 99.5 to AIG's Current Report on Form 8-K filed with the SEC on January 14, 2011 (File No. 1-8787).

Exhibit Number	Description	Location
	(3) Warrant Agreement (including Form of Warrant), dated January 6, 2011, between American International Group, Inc. and Wells Fargo Bank, N.A., as Warrant Agent	Incorporated by reference to Exhibit 10.1 to AIG's Current Report on Form 8-K filed with the SEC on January 7, 2011 (File No. 1-8787).
	(4) Tax Asset Protection Plan, dated as of March 9, 2011, between American International Group, Inc. and Wells Fargo Bank, N.A., as Rights Agent, including as Exhibit A the forms of Rights Certificate and of Election to Exercise	Incorporated by reference to Exhibit 4.1 to AIG's Current Report on Form 8-K filed with the SEC on March 9, 2011 (File No. 1-8787).
10	Material contracts	
	(1) Guarantee, Pledge and Proceeds Application Agreement, dated as of January 14, 2011, among American International Group, Inc., AIA Aurora LLC and ALICO Holdings LLC, as Guarantors, and AIA Aurora LLC, ALICO Holdings LLC, AIG Capital Corporation, AIG Funding, Inc. and AIG Life Holdings (International) LLC as the Secured Parties	Incorporated by reference to Exhibit 99.1 to AIG's Current Report on Form 8-K filed with the SEC on January 14, 2011 (File No. 1-8787).
	(2) AIA Aurora LLC Intercompany Loan Agreement, dated as of January 14, 2011, by and between AIA Aurora LLC and American International Group, Inc.	Incorporated by reference to Exhibit 99.2 to AIG's Current Report on Form 8-K filed with the SEC on January 14, 2011 (File No. 1-8787).
	(3) ALICO Holdings LLC Intercompany Loan Agreement, dated as of January 14, 2011, by and between ALICO Holdings LLC and American International Group, Inc.	Incorporated by reference to Exhibit 99.3 to AIG's Current Report on Form 8-K filed with the SEC on January 14, 2011 (File No. 1-8787).
	(4) Letter Agreement, dated as of February 8, 2011, between American International Group, Inc. and the United States Department of the Treasury	Incorporated by reference to Exhibit 10.1 to AIG's Current Report on Form 8-K filed with the SEC on February 9, 2011 (File No. 1-8787).
	(5) Determination Memorandum, dated April 1, 2011, from the Office of the Special Master for TARP Executive Compensation to American International Group, Inc.	Incorporated by reference to Exhibit 10.1 to AIG's Current Report on Form 8-K filed with the SEC on April 1, 2011 (File No. 1-8787).

Exhibit Number	Description	Location
	(6) Master Transaction Agreement, dated as of April 19, 2011, by and among American Home Assurance Company, Chartis Casualty Company (f/k/a American International South Insurance Company), Chartis Property Casualty Company (f/k/a AIG Casualty Company), Commerce and Industry Insurance Company, Granite State Insurance Company, Illinois National Insurance Co., National Union Fire Insurance Company of Pittsburgh, PA., New Hampshire Insurance Company, The Insurance Company of the State of Pennsylvania, Chartis Select Insurance Company (f/k/a AIG Excess Liability Insurance Company Ltd.), Chartis Specialty Insurance Company (f/k/a American International Specialty Lines Insurance Company), Landmark Insurance Company, Lexington Insurance Company, AIU Insurance Company, American International Reinsurance Company, Ltd. and American Home Assurance Company, National Union Fire Insurance Company of Pittsburgh, PA., New Hampshire Insurance Company and Chartis Overseas Limited acting as members of the Chartis Overseas Association as respects business written or assumed by or from affiliated companies of Chartis Inc. (collectively, the Reinsureds), Eaglestone Reinsurance Company and National Indemnity Company	Filed herewith.
	(7) Unconditional Capital Maintenance Agreement, dated as of March 30, 2011, between American International Group, Inc. and American General Assurance Company	Filed herewith.
	(8) Unconditional Capital Maintenance Agreement, dated as of March 30, 2011, between American International Group, Inc. and American General Life Insurance Company of Delaware	Filed herewith.
	(9) Unconditional Capital Maintenance Agreement, dated as of March 30, 2011, between American International Group, Inc. and American General Life Insurance Company	Filed herewith.
	(10) Unconditional Capital Maintenance Agreement, dated as of March 30, 2011, between American International Group, Inc. and American General Life and Accident Insurance Company	Filed herewith.
	(11) Unconditional Capital Maintenance Agreement, dated as of March 30, 2011, between American International Group, Inc. and The United States Life Insurance Company in the City of New York	Filed herewith.
	(12) Unconditional Capital Maintenance Agreement, dated as of February 25, 2011, between American International Group, Inc. and AIU Insurance Company	Filed herewith.

Computation of Ratios of Earnings to Fixed Charges

Three Months Ended March 31, <i>(in millions, except ratios)</i>	2011	2010
Earnings:		
Pre-tax income (loss) ^(a) :	\$ (1,387)	\$ 1,640
Add – Fixed charges	1,249	1,980
Adjusted Pre-tax income	(138)	3,620
Fixed charges:		
Interest expense	\$ 990	\$ 1,695
Portion of rent expense representing interest	49	61
Interest credited to policy and contract holders	210	224
Total fixed charges	\$ 1,249	\$ 1,980
Total fixed charges, excluding interest credited to policy and contract holders	\$ 1,039	\$ 1,756
Ratio of earnings to fixed charges:		
Ratio	n/a	1.83
Coverage deficiency	(1,387)	n/a
Ratio of earnings to fixed charges, excluding interest credited to policy and contract holders^(b):		
Ratio	n/a	2.06
Coverage deficiency	(1,177)	n/a

(a) From continuing operations, excluding undistributed earnings (loss) from equity method investments and capitalized interest.

(b) The Ratio of earnings to fixed charges excluding interest credited to policy and contract holders removes interest credited to guaranteed investment contract (GIC) policyholders and guaranteed investment agreement (GIA) contract holders. Such interest amounts are also removed from earnings used in this calculation. GICs and GIAs are entered into by AIG's subsidiaries. The proceeds from GICs and GIAs are invested in a diversified portfolio of securities, primarily investment grade bonds. When these investments yield rates greater than the rates on the related policyholders obligation or contract, a profit is earned from the spread.

CERTIFICATIONS

I, Robert H. Benmosche, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of American International Group, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
