

Enterprise Risk Management

Enterprise Risk Management (ERM) helps an organization assess its full spectrum of risks from insurable risks, to financial risks (e.g. currency movements), operational risks (e.g. product failure) and strategic risks (e.g. social trends) and manage the combined impact of those risks as an interrelated portfolio.

Wide-ranging capabilities that reduce a client's total cost of risk

An industry-leading framework and process

AIG has an industry-leading ERM framework and process to identify, prioritize, measure and manage enterprise risk. We are leveraging this expertise to help our clients enhance their own ERM practices, addressing a number of client needs ranging from evaluating the company's risk appetite or tolerance levels to building or enhancing the organization's risk management framework.

Risk identification and mitigation

We facilitate workshops with client executives to help identify and prioritize key risks, discuss risk mitigation options and evaluate cost/benefit solutions. Our international ERM risk modeling teams offer quantitative consulting services to model, simulate and assess the impact of an extreme event on a client's operations or business, stress test an organization's resilience and advise on emerging risks.

Showcasing our capabilities through Success Stories

ERM client review

We reviewed an international energy company's current ERM framework, processes and practices. We hosted a workshop with the client's executive team to discuss the findings and recommended enhancements. As a follow-up step, the client asked AIG to assist with quantification of property catastrophe loss potential and stress testing of its casualty insurance program using realistic disaster scenarios.

Emerging risk workshops

We have facilitated several emerging risk workshops for AIG clients to identify and prioritize issues that have the potential to result in income statement or balance sheet volatility. Hosted in-depth discussions on topics such as Internet of Things (IoT), robotics and 3-D printing have helped inform clients' thinking on liability and risk issues, as well as relevant risk transfer solutions.

AIG is the marketing name for the worldwide property-casualty, life and retirement, and general insurance operations of American International Group, Inc. For additional information, please visit our website at www.aig.com. All products and services are written or provided by subsidiaries or affiliates of American International Group, Inc. Products or services may not be available in all countries, and coverage is subject to actual policy language. Non-insurance products and services may be provided by independent third parties. Certain property-casualty coverages may be provided by a surplus lines insurer. Surplus lines insurers do not generally participate in state guaranty funds, and insureds are therefore not protected by such funds.
