700  
property risk engineers  
and liability risk  
consultants

in 5  +  
Countries

Partnering  
with brokers  
and clients

- ✓ Understanding needs
- ✓ Improving risk controls
- ✓ Lowering cost of risk
- ✓ Maximizing business continuity

AIG's 700 worldwide property risk engineers and liability risk consultants partner with our clients and brokers to understand their needs, improve their risk controls, lower their cost of risk and maximize their business continuity.

## Wide-ranging capabilities that reduce a client's total cost of risk

### State-of-the-art business solutions

Our state-of-the-art business solutions are based on the latest industry and technical standards, whether clients need to understand how wearable technology can reduce strains and sprains, conduct hazard assessments for a chemical plant, develop best practices for a hospital, or assess emerging liability in a cloud connected world.

### Property risk engineering

Our property risk engineers assess clients' exposures, risk controls, and potential interruption threats and offer solutions to reduce loss. Our dedicated skilled team partners with our clients for a deep understanding of the clients' needs, ensuring the advice we give is set firmly in the context of the clients' business framework.

### Knowledge sharing

We have partnered with the scientific and academic community to build knowledge around identifying and minimizing losses and we share our new perspectives with clients, often educating on relevant loss mitigation techniques based on decades of claims experience and data driven insights.

### Dedicated industry specialists

From power plants to hotels, our risk engineers and consultants, many originating from the same industries as their clients, deliver expert, sector-specific solutions. Clients have a dedicated property risk engineer or liability risk consultant as a single global contact working closely with the client's risk management team, coordinating AIG's technical specialists and ensuring that clients have access to the right local technical resource.

### ENGage<sup>SM</sup> – client portal

To help clients manage their global property loss prevention strategies, our proprietary ENGage system allows clients to align reports and analyses to their own organizational structures, review loss estimates and risk ratings for individual locations. Clients are also able to benchmark their locations against industry peers, perform "what-if" analyses on potential risk improvements and access hazard visualizations of storm, flood and earthquake exposures.

### Natural catastrophes

Our skilled Natural Catastrophe (Nat Cat) risk control team of specialists focuses on managing and mitigating catastrophe losses throughout our clients' businesses. Physical surveys, detailed evaluations of Nat Cat exposures, assessment of loss expectancies and comprehensive response planning maximize our clients' preparedness to help minimize losses associated with property damage, business interruption, loss of market share, employee injuries, threat to shareholder equity and litigation costs.

AIG is the marketing name for the worldwide property-casualty, life and retirement, and general insurance operations of American International Group, Inc. For additional information, please visit our website at [www.aig.com](http://www.aig.com). All products and services are written or provided by subsidiaries or affiliates of American International Group, Inc. Products or services may not be available in all countries, and coverage is subject to actual policy language. Non-insurance products and services may be provided by independent third parties. Certain property-casualty coverages may be provided by a surplus lines insurer. Surplus lines insurers do not generally participate in state guaranty funds, and insureds are therefore not protected by such funds.
